

Prof Swan is Dekaan van die Fakulteit Veeartsenykunde. Hy beskou die ontwikkeling van verskeie innoverende farmaseutiese molekules, veral *ivermectin*, 'n endektosied vir gebruik in vee, as een van sy belangrikste bydraes tot navorsing. Van sy ander navorsingsbydraes is dat groter helderheid verkry is oor die invloed van farmakokinetika op die doeltreffendheid en veiligheid van die gebruik van salisielanilide-middels om inwendige parasitiete in herkouers te beheer, en die bestudering van die toksisiteit van *diclofenac* in verskeie aasvoëlspesies.

In 2011 was prof Swan 'n finalis vir die NSTF-BHP Billiton-toekenning, in die kategorie individuele bydraes tot wetenskap, ingenieurswese en tegnologie. Hy het die Sasol-toekenning vir Aasvoëlbewaring in Suid Afrika vir 2005 ontvang vir sy navorsing oor *diclofenac*-toksisiteit in aasvoëls. In 2004 het hy die Boswell-toekenning van die Suid-Afrikaanse Veeartsenykundige Vereniging ontvang vir sy voortreflike bydrae tot die veeartsenyberoep.

Prof Swan is die outeur of mede-outeur van 74 artikels in ISI-gegradeerde vaktydskrifte.

Hy is lid van die Suid-Afrikaanse Veeartsenykundige Vereniging, die Suid-Afrikaanse Farmakologiese Vereniging, die Europese Farmakologiese en Toksikologiese Vereniging en die Suid-Afrikaanse Wetenskapakademie. Hy is 'n genoot van die American College of Veterinary Pharmacology and Therapeutics.

Prof Swan was vir 22 jaar lid van die Medisynebeheerraad en het ook as voorstitter van die Veeartsenykundige Kliniese Komitee gedurende hierdie periode gedien. Hy is steeds 'n lid van etlike deskundige komitees van die Raad. Oor die laaste agt jaar dien hy as 'n deskundige lid van die Wêreldgesondheidorganisasie en Voedsel- en Landbou-organisasie se gesamentlike deskundige komitee oor voedselbymiddels (JECFA) en is hy betrokke by JEFCFA se ondersoek na veeartsenykundige farmaseutiese residu's. Hy is onlangs vir 'n verdere drie jaar heraangestell tot die Raad van SanParke en was die afgelope jaar Voorsitter van die bewarings- en toerismekomitee van die Raad. Hy het 'n C2-gradering van die NRF.

---

Prof Swan is the Dean of the Faculty of Veterinary Science. He regards the development of several innovative drug molecules, in particular *ivermectin*, an endectocide for use in stock, as one of his main research contributions. His other research contributions include gaining a better understanding of the influence of the pharmacokinetics on the efficacy and safety of the salicylanilide group of anthelmintics in ruminants, and investigating the toxicity of *diclofenac* in various species of vultures.

Prof Swan was a finalist for the NSTF-BHP Billiton award in the category of individual contributions to science, engineering and technology in 2011. He received the Sasol Vulture Conservationist Award in South Africa of 2005 for his research on *diclofenac* toxicity in vultures. In 2004 he received the Boswell Award of the South African Veterinary Association in recognition of eminent service to the veterinary profession.

Prof Swan is the author or co-author of 74 articles in ISI-rated scientific journals.

He is a member of the South African Veterinary Association, the South African Pharmacology Society, the European Pharmacological and Toxicological Society and the Academy of Science for South Africa. He is a Fellow of the American College of Veterinary Pharmacology and Therapeutics. Prof Swan had been a member of the Medicines Control Council (MCC) for 22 years and served as chairman of the Veterinary Clinical Committee of the MCC during this period. He still serves as a member of several of its expert committees. Over the past eight years he served as an expert member of the Joint Expert Committee of Food Additives (JECFA) of the World Health Organisation and the Food and Agriculture Organisation on drug residues. He was recently reappointed to the SanParks Board for a further three years and has chaired the Conservation and Tourism Committee for the past year. He has a C2-rating from the NRF.
