

Prof. Andrew L Leisewitz

BVSc, MMedVet(Med)(Pretoria), PhD

Diplomate of the European College of Veterinary Internal Medicine

Andrew is a companion animal specialist physician with over 20 years of clinical experience. He is an NRF rated researcher (C1) and an active researcher in the field of babesiosis and parvovirus infection. His PhD studies were focussed on host response to malaria infection in an animal model and he continues to be fascinated by the patho-mechanisms of infectious disease. He has a special interest in the dog as a model for some aspects of various human diseases. He is active in teaching undergraduate and post graduate veterinary students and has over 30 publications in ISI journals. He is a frequent speaker at continuing education events for the veterinary profession.

He is married with three children and is a devoted family man very active in local church life.
