## Faculty of Health Sciences

### Welcome to the Faculty of Health Sciences

The Faculty of Health Sciences is recognized nationally and internationally as an outstanding institution in terms of its education of health professionals, its research and its clinical service. Furthermore, it is an institution with a tradition of excellence and a proud history. A great health sciences institution, however, never rests comfortably on its past successes. A great health sciences institution does more than make history – it makes the future. The Faculty management is deeply committed and this has been translated into an action agenda which recognises the need for constant innovation and is dedicated to meet the health sciences challenges: those not yet conquered and those not yet known.

Students learn to make a life, make a living and make a difference. Graduates become community leaders that are distinct in their ability to think, communicate and contribute.

Research in the Faculty of Health Sciences has a strong emphasis on multidisciplinary approaches.

### Faculty regulations and information

*The rules for the degrees published here are subject to change and may be amended after the publication of this information.*

*The General Regulations (referred to as G.1-G.56) and General Rules apply to all faculties of the University of Pretoria. It is expected of all students to familiarise themselves well with these regulations and rules as well as all faculty-specific and programme-specific regulations and information as stipulated in the online yearbook. Ignorance concerning these regulations will not be accepted as an excuse for any transgression.*

#### 1. Selection

A selection process takes place prior to admission to all the degree programmes in the Schools mentioned in the front part of this publication. For some of the undergraduate degree programmes a personal interview is required as part of the selection procedure. The National Benchmark Test (NBT) is compulsory for all applicants applying for admission to an undergraduate degree programme with the exception of the Bachelor of Clinical Medical Practice and students with previous tertiary exposure.

#### 2. National Benchmark Test (NBT)

The National Benchmark Test is compulsory for applicants who are currently in Grade 12 or who have already completed Grade 12 and who wish to apply for admission to any field of study, with the exception of the Bachelor of Clinical Medical Practice as well as students with previous tertiary exposure, in the Faculty of Health Sciences. Applicants who fail to write this test will not be considered for selection. Academic Literacy, Quantitative Literacy and Mathematics are tested and applicants cannot specially prepare for the test. The test results will be used in addition to the Grade 12 marks for provisional selection and will not replace the Grade 12 marks.

#### 3. Requirements for admission to specific modules

A student who has

- obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to Molecular and cell biology (MLB 111), and a module in the subjects Chemistry, Physics, Zoology and Entomology, Genetics, Microbiology or Botany;

- b. obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to a module in Radiation Physics (RFI);
- c. obtained at least 50% in the final Grade 12 examination in either Physical Science or Life Sciences, will be admitted to modules in Occupational Therapy and Therapeutic Media;
- d. obtained at least 60% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 158 in Mathematics; and
- e. obtained at least 50% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 134 in Mathematics.

#### **4. Academic Literacy Test**

All new undergraduate students who register in the School of Dentistry and the School of Medicine will be required to write an academic literacy test. On the grounds of this test, students will be required to follow compulsory academic literacy modules (ELH 111 and 112 for students of Dentistry and Medicine, and ELH 131 and 132 for students of Clinical Medical Practice), which they must pass as one of the requirements for obtaining their degree.

Undergraduate students who register in the School of Healthcare Sciences will not be required to write the academic literacy test. The academic literacy modules ELH 121 and ELH 122 are compulsory for all students, and a pass mark for each of these modules is a requirement for obtaining their degree.

#### **5. Academic information management**

It is required of all new first-year students at the University of Pretoria to complete the module AIM 101 Academic information management. Details of this module can be found in the Course Catalog.

#### **6. Subminimum in examination papers**

Where applicable, the subminimum required in examinations appears in the regulations of the degree/diploma in question and in the syllabi of the modules in question.

#### **With regard to MBChB:**

A subminimum may be required in each module or practical component from which a specific block is compiled, in order to pass in the block in question.

#### **7. Examinations**

The examinations in first-semester modules take place in May/June, while all other examinations (second semester modules, year modules and blocks of the MBChB degree programme) take place in October/November.

#### **8. Ancillary examinations**

After conclusion of an examination and before examination results are announced, the examiners may summon a student for an ancillary examination on particular aspects of a module.

Details in respect of a School's requirements for ancillary examinations are published in the study guide of a given block.

#### **9. Extraordinary examinations (including aegrotats)**

Subject to the stipulations of the General Regulations, the period during which an extraordinary examination will take place in the School of Medicine, will be determined by the lecturer concerned, in consultation with the relevant head of department or block chairperson, provided that the examination in a block should take place during the second examination period, if possible.

If an examination consists of more than one evaluation modality, the examination as a whole must be repeated, even if part thereof has already been completed.

#### **10. Re-marking of examination scripts**

In accordance with the stipulations of the General Regulations, departments give feedback to students after an

examination on the framework used by the examiners during the examination. The way in which feedback is given, is determined by the relevant head of department. Students may, after perusal, and in the case of MBChB students, after the examination period (which includes the examination and the second examination), within 14 calendar days after commencement of the lectures in the next semester, and after payment of the prescribed fee, apply for the re-marking of an examination script, by an examiner (in the case of MBChB study an external examiner from outside of the University) appointed by the relevant head of department.

**The School of Medicine furthermore defines the relevant regulation as follows:**

(i) A student has the right of perusal of his or her examination script before applying for the re-marking of the examination script.

The following is determined by perusal of the script:

- Whether all the answers have been marked.
- Whether the marks awarded, have been calculated correctly.
- Whether the student did in fact answer all the questions.

(ii) During perusal, the student, the lecturer as well as a third person must be present.

If a discussion about the content of the answers in the script develops, the student must be referred to the administration of the School in question, where he or she applies for the re-marking of the examination script.

### **11. Second examination opportunity**

i. A student may be admitted to a second examination in a module in the following instances [excepting specific faculty requirements in respect of second examinations in specific blocks for the first to the fifth year of study for the MBChB degree and the first and second year of study for BChD:

- a. If a final mark of between 40% and 49% has been obtained.
- b. If a pass mark has been obtained but not the required subminimum of 40% in the examination as a whole; or
- c. If a pass mark has been obtained but not the required subminimum in subsections of the module.

ii. A student must obtain a minimum of 50% in the second examination to pass.

iii. The semester/year/continuous evaluation mark is taken into account only if a student did not obtain at least 50% in the second examination of a first-semester module at 100 level.

iv. The highest final mark (pass mark) that can be awarded to a student for a second examination, is 50%.

### **12. Promotion**

In certain departments, students can be promoted to a next semester or level of a subject without writing the prescribed examination, provided that their preparation is satisfactory and a continuous evaluation mark of at least 65% has been obtained.

Departments where promotion as prescribed above is possible, will inform students in good time in this regard.

**Note:**

Students obtain credit for a promoted module only after they have passed an examination in a consecutive module or modules of the subject in question at this University.

Promotion as described above, does not refer to the option that medical students may exercise to have the block mark at the end of the year, validated as the final block mark for a relevant block (i.e. to be exempted from the block examination in the block), provided, inter alia, that a block mark of at least 60% has been obtained in the block in question.

### **13. The examination moderating meeting**

#### **13.1 Students in Year 1 - 3:**

- i. Students obtain class test, practical and block test marks in respect of each block and special activity (which are disclosed to students). These marks are processed into a block mark (which is not disclosed to students). Each block chairperson publishes a list of the registration numbers of students who have to sit the semester examination in his or her block. The block marks are submitted to Student Administration. Students with examination exemption, who nevertheless prefer to sit the block examination, may do so, but will then have to accept the final block mark (which is calculated from the block mark and the examination mark), even if it is less than the (original) block mark.
- ii. The final block mark of the students who have to sit the examination, is only determined at the end of the block examination, from the contributions of the block mark and the examination mark. This final block mark will reflect the real mark obtained. The EMM (Examination Moderating Meeting) now takes place with the following objectives:
  - Identification of the students who pass;
  - Identification of the students who fail and as a result, have to follow the remedial programme and sit the second block examination;
  - Identification of students who did not obtain the required subminimum.
  - Validation of the block marks of the students who have been exempted from the examination, as the final block marks for the blocks in question; and
  - Identification of students who need study assistance.
- iii. Students who fail the examination, must follow the remedial opportunity where applicable and the need for a specific remedial action will be defined at the examination moderating meeting. Such students must sit the second block examination at the end of the second semester. Only the second block examination mark will count and the maximum that can be obtained is "50H".
- iv. The performance of the students who have written the second examination, will be discussed at the second EMM, with the following objectives:
  - Identification of the students who pass; and
  - Identification of the students who fail. In terms of the MBChB selection criteria, first- and second-year students who fail, must apply again for selection.

### **13.2 Students in Year 4 and the first half of Year 5: MBChB**

- i. During the blocks and special activities, students write the class tests as well as the block test. These marks are announced by the block chairperson.
- ii. Students also do morning rotations, each of which is evaluated. There are eight morning rotations in Year 4, and four in the first half of Year 5. These rotation marks are announced by the relevant departments.
- iii. The block mark is calculated from the different test marks, marks awarded for practical work and assignments, as well as the rotation(s) coupled to the specific block. In Year 4, this mark can only be calculated in middle September and in Year 5, only in middle May. These marks are not disclosed to students. A list of the registration numbers of students, who have not obtained examination exemption, is placed on the notice board by the block chairperson. These students are obliged to write the block examination. The block marks are submitted to Student Administration.

Students who nevertheless choose to write the examination, even though they have been exempted from it, may do so, but will have to accept the final block mark, even if it is lower than the (original) block mark.

- iv. The final block mark of the students who sit the examination is only calculated at the end of the block examination, from the contributions from the block mark and the examination mark. This final block mark will reflect the real mark obtained. An EMM is now being held, with the following objectives:

- Identification of the students who pass;
  - Identification of the students who fail and resultantly have to follow the remedial programme and sit the second block examination;
  - Validation of the block marks of the students with examination exemption, as their final block marks; and
  - Identification of the students who need study assistance.
- v. Students who fail the examination, must follow the remedial programme and sit the second block examination, which will take place at the end of the second semester in Year 4, and at the beginning of the second semester in Year 5. Only the second block examination mark will count and a maximum of "50H" can be obtained.
- vi. Students who sit the second examination, are discussed at the second EMM, with the following objectives:
- Identification of the students who pass; and
  - Identification of the students who fail.

### **13.3 Student Interns: MBChB**

#### **13.3.1 All students**

- (i) At the conclusion of each seven-week rotation, an end-of-rotation evaluation (EORE) takes place in the different departments. The aim with the EORE is the identification of those students who obtain examination exemption (semester examination) and those who are not exempted and will have to sit the examination at the end of the semester. All EOREs are supported by external examiners.
- (ii) The same process takes place in rotations with a duration of 3,5 weeks.
- (iii) No marks are disclosed to students, only the names and/or registration numbers of the students who must sit the semester examination.
- (iv) After conclusion of the semester examination (which extends over three days on dates determined beforehand), an EMM is held, with the following objectives:

Validation of the rotation marks as the semester examination mark, of the students who have obtained examination exemption. The rotation mark and the EORE mark contribute to the final mark.

Identification of the students who have passed the semester examination. The rotation mark and the semester examination mark contribute to the final mark;

Identification of the students who have failed the semester examination. These students are referred to Student Administration, as a new rotation division must now be followed; and

Identification of the students who need study assistance.

#### **13.4 Students who repeat rotations: MBChB**

- i. Students who repeat rotations, do the EORE at the conclusion of the rotation that has been repeated. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the final mark.
- ii. On the first Wednesday after the conclusion of the rotation, an EMM takes place at 13:00 (or a different timeslot as arranged), to evaluate the achievement of the students, who have repeated the rotation. The objectives of this EMM are:
- Identification of the students who pass the rotation that has been repeated (final mark of 50% or more) (maximum indicated on the form is "50H");
  - Identification of the students who fail the rotation that has been repeated. These students are referred to Student Administration, as a new rotation division must now be followed; and
  - Identification of the students who need study assistance.
- iii. The achievement of the students who have repeated a 3,5 week rotation, is discussed at the same EMM.

### **13.5 Students who are "finalists" at another time than the end of the sixth year of study: MBChB**

#### **13.5.1 Students who repeated previous rotations successfully, and who are now "finalists", but will be doing the current rotation for the first time:**

- i. These students do the EORE just like all other students do, the objective being, as in the case with other students, to identify those who do or do not obtain, exemption from the semester examination.
- ii. Students who obtain examination exemption after the conclusion of the EORE, thus pass the rotation automatically.
- iii. Students who do not obtain exemption from the semester examination after the conclusion of the EORE, must therefore sit the examination at the end of the relevant semester.
- iv. In keeping with UP regulations, these students, who are completing their studies ("finalists"), who have only one course (rotation) to complete in order to comply with all the requirements for the MBChB degree, and who have not obtained examination exemption, may apply to sit a "special examination" the following week (at a time earlier than the semester examination where applicable). This examination (which will take place at an earlier time), must preferably be scheduled for the Monday or Tuesday of the following week. The department determines the format and due to the fact that the student has already been through the external evaluation process, the presence of an external examiner at the special examination is optional, although recommended. The final mark comprises the examination mark and must be 50% or more to pass. The marks must be available by the Wednesday in order that these students' marks can be submitted to the EMM, which will be held on that day.
- v. The objectives of the EMM for this category of students are:
  - Identification of the students who have passed the special examination. These students complete the programme, and a special mini oath-taking ceremony is arranged for them; and
  - Identification of the students who have failed the special examination. These students fail the course, must repeat the relevant rotation and must therefore be referred to Student Administration.

#### **13.6 Students who are "finalists", but who are repeating the current rotation (all circumstances - previously, or at a recent EMM, identified as having failed): MBChB**

- i. These students do the EORE as all other students. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the rotation mark, which, in this case, is also the final mark. The mark must be 50% or more, but the maximum that will be indicated on the form, is "50H".
- ii. On the first Wednesday after the conclusion of the rotation, an EMM will be held at 13:00 (or another time slot as arranged), to evaluate the achievement of these students who are repeating the current rotation. The objectives of this EMM are:
  - Identification of the students who have passed the EORE/examination. These students thus complete the MBChB degree programme and a mini oath-taking ceremony will be arranged for them; and
  - Identification of the students who have failed the EORE/examination. These students thus fail the rotation, must repeat the relevant rotation and must therefore be referred to Student Administration.
- iii. Students in this category, who are only repeating a 3,5 week rotation, will follow the exact same route, but a unique EMM will be arranged shortly after completion of the EORE/examination. The same objectives will apply.

#### **Special refresher course for medical practitioners**

A one-week course for medical practitioners is presented annually by the School of Medicine with clinical presentations by various departments in the afternoons and evenings. The School also offers an annual intensive two-day course in one main field of study.

A medical practitioner who wishes to update his or her knowledge, may register as a special postgraduate student in the School of Medicine (Medicine Special). He or she will then have the opportunity to attend demonstrations and discussions and to participate in work as determined by the head of the relevant department.

### **Visiting postgraduate students (Code 10290001)**

A medical practitioner or specialist physician may apply to register as a postgraduate visiting student for non-examination purposes for a period/s of one month or longer as preferred, during which period he or she may work in a department of his/her choice. The nature of this work will be determined by each head of department. Periods of time completed in this way, will not be recognised as periods of formal training for the purposes of specialisation.

### **Medicine Special (Undergraduate)**

Individual modules – not for degree purposes.

<b>Code</b>	<b>Description</b>
10180001	Medicine Special (Undergraduate) Prinshof Campus
10185021	Medicine Special (Cuban students: Prinshof Campus)
10190001	Medicine Foreign (Non-examination purposes) Visiting Undergraduate

### **Medicine Special (Postgraduate) (Code 10280001)**

Registration as a postgraduate candidate with a view to complete examinations in prerequisite subjects for MMed (with approval of the Chairperson of the School and heads of departments in question), until such time as a registrarship becomes available. Neither the University of Pretoria nor the province is under any obligation whatsoever, to appoint such a student as a registrar or to give him or her precedence over other candidates to be appointed.

## Undergraduate Degree

### BChD (10136001)

**Minimum duration of study** 5 years

**Contact** Prof WD Snyman [willie.snyman@up.ac.za](mailto:willie.snyman@up.ac.za) +27 (0)123192552

### Programme information

**NB:** Selection of candidates takes place prior to admission.

The General Regulations are applicable to bachelor's degrees.

Each student in Dentistry must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Dentistry, within two months after the commencement of the first year of study.

Students, who have been granted exemption from the first or second year of study, must also comply with the registration requirements.

**NOTE: For students who registered for the BChD degree programme prior to 2014, the relevant regulations as they appear in the 2013 Yearbook will be applicable.**

### Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.
- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

### Minimum requirements

#### Achievement level

#### English Home

#### Language or

#### English First

#### Additional

#### Language

#### Mathematics

#### Physical Science

#### APS

NSC/IEB	AS Level	NSC/IEB	AS Level	NSC/IEB	AS Level	
5	C	5	C	5	C	<b>35</b>

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

## Additional requirements

- a. Candidates are not allowed to complete their first year of study at another university.
- b. In terms of the selection procedure, candidates must pass English, Mathematics and Physical Science with at least a 5 rating code (60%- 69%), and achieve an APS of at least 35, in order to be considered for selection and/or admission.
- c. At the conclusion of the selection process, candidates are informed in writing regarding the outcome.
- d. Admission of foreign students to the BChD degree programme is limited to one annually. Only applications of candidates from SADC countries are accepted.
- e. School-leaving candidates with no previous tertiary exposure, who have not been admitted to the first year of study for the BChD degree programme may register for the BSc degree programme in medical sciences or biological sciences at the University, provided that they comply with the admission requirements for the programme in question. A candidate who completes the first semester of such a degree programme successfully, may apply to be considered for admission to the second semester of BChD I on the grounds of this achievement. If successful, the student may be admitted to the second semester of BChD I.

## Other programme-specific information

### Note:

- i. A new curriculum is being phased in for the programme. The first year of study will be followed for the first time in 2014, the second year in 2015, the third year in 2016, the fourth year in 2017 and the fifth year in 2018.
- ii. The total credits and regulations for the degree programme in this publication are applicable to the new curriculum being phased in.
- iii. In 2017 the fifth year of study will still be followed according to the old curriculum.
- iv. Students who fail a year in the existing curriculum immediately prior to the year of the implementation of the revised curriculum will have to repeat all the modules for that particular year in the revised curriculum.
- v. The total credits and regulations for the old curriculum appear in the 2013 Yearbook and are applicable for students who registered for the BChD degree programme prior to 2014.

### Types of modules

Please take note of the different categories of modules in this degree.

### First year of study

#### First semester

#### Examination modules

CMY 151 Chemistry 151

FIL 155 Science and world views 155

MGW 112 People and their environment 112

MLB 111 Molecular and cell biology 111

PHY 131 General physics 131

MTL 180 Medical terminology 180

## **Second semester**

### **Examination modules**

SEP 110 Sepedi 110

### **Promotion modules**

GNK 188 Anatomy 188

IDE 180 Integrated dentistry 180

POH 170 Public oral health 170

- Apart from the examination modules mentioned above, the following compulsory academic information management module must also be passed during the first semester of the first year of study: AIM 101.
- All new first-year students at the University must write an academic literacy test. On the grounds of the outcome of this test, students will either be exempted from the following academic literacy modules, or if they have failed the test mentioned above, will be required to pass in the relevant modules: ELH 111 and 112
- The first semester of the year module PHY 181 is the same as PHY 131.
- Students are exempted from the language module(s) on the basis of the successful completion of a language proficiency test at the beginning of the year.

## **Second year of study**

### **Requirements for admission to specific modules**

A student who has:

- obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be admitted to Molecular and cell biology (MLB 111), and a module in the subjects Chemistry, Physics, Zoology and Entomology, Genetics, Microbiology or Botany;
- obtained at least 50% in the final Grade 12 examination in Mathematics as well as in Physical Science, will be

- admitted to a module in Radiation Physics (RFI);
- c. obtained at least 50% in the final Grade 12 examination in either Physical Science or Life Sciences, will be admitted to modules in Occupational Therapy and Therapeutic Media;
  - d. obtained at least 60% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 158 in Mathematics; and
  - e. obtained at least 50% in the final Grade 12 examination in Mathematics, will be admitted to the module WTW 134 in Mathematics.

## Examinations and pass requirements

### Passing a module

A **module mark** is calculated from the continuous evaluation opportunities during the course of the presentation of the module in question. These evaluations shall include one or more of the following:

- i. Evaluations regarding theoretical knowledge.
- ii. Evaluations regarding clinical knowledge and skills.
- iii. Compulsory attendance at and active participation in prescribed activities.
- iv. A final comprehensive module examination moderated by external examiners.

### Repeating modules (and thus the year of study)

- i. Students must pass all the modules of a particular year of study in order to be admitted to the next year of study.
- ii. Students who repeat the first or second year of study are exempted from the examination modules which have been passed in the unsuccessful year. The examination moderating meeting, in conjunction with the Dean/Chairperson of the School of Dentistry, retains the right to only award a pass mark in the said modules, if the student complies with the following requirements regarding those modules:
  - That the mark awarded to the relevant module was not awarded on the grounds of condonement;
  - That the student attended the relevant module regularly and furthermore complied with all other requirements.
  - That the contents of the module in the ensuing year correspond with the contents of the module concerned.
- iii. In order to comply with the requirements for (ii) above, the extent of involvement of students in successfully completed promotion modules is determined by the relevant module chairperson, at the commencement of the year, and agreed with the student(s) concerned.

### Examinations and pass requirements, subminima and continuous evaluation mark

- i. In accordance with the stipulations of the General Regulations, no minimum year or semester mark is required for admission to the examination: Provided that the different year and semester modules in a School need not be handled in the same manner, although a great degree of uniformity is expedient. Any other requirements for admission to the examination are set out in the study manuals. A final mark of at least 50% is required to pass.

- ii. **Subminimum:**

A subminimum of 40% is required in the written section of an examination, with a subminimum of 50% in the clinical section of a module. At the beginning of the academic year, the relevant head of department informs the students of the required subminimum in subsections of the modules offered by the department in question. This information is also published in the study manual.

- iii. **Continuous evaluation mark:**

- A student obtains marks for practical and clinical work, for tests and also for assignments completed during the course of an academic year.
- A student who repeats a year of study and who must acquire certificates of satisfactory preparation in failed modules, must comply with all the requirements set by the relevant head of department.

#### iv. **Supplementary examinations in the fourth year of study**

A student who obtains between 40-49% in examination and promotion modules, is admitted to supplementary examinations. Should he or she fail this supplementary examination/promotion test, the fourth year has to be repeated. When a year of study has to be repeated, the student retains credit for the examination modules passed. Consult Reg. D.1 (e) regarding the certificate of satisfactory preparation and progress, which must be obtained in the year of repetition in all promotion modules already passed, as well as the extent of involvement of students regarding promotion modules already passed, in order to maintain a specific level of clinical skills.

#### v. **Examinations in the fifth year of study**

A student who has failed the clinical part of any module in the final examination, will be required to repeat that module. The period which must elapse before the student may again sit an examination, is determined by the Dean, on the recommendation of the examination moderating committee. A student who repeats a module, must obtain certificates of satisfactory preparation in all the other modules that he/she has passed.

### **Promotion to next study year**

#### **Promotion to the next year of study**

The stipulations of the General Regulations concerning satisfactory preparation and progress also apply to modules where a promotion test is required. Supplementary examination marks and pass marks in promotion modules are awarded according to the stipulations of the General Regulations: Provided that:

- Promotion is based on theoretical and/or practical and/or clinical evaluation throughout the year and a minimum of 50% is required to be promoted.
- A student, who has obtained a year mark of less than 50% can be admitted by the examination moderating meeting to a supplementary promotion test in the relevant promotion module.
- Students repeating a year of study retain credit for examination modules passed, unless determined otherwise, but a certificate of satisfactory preparation and progress must be obtained in all the promotion modules.
- In order to comply with the requirements for (iii) and to maintain a specified level of clinical skills, the extent of involvement of students in successfully completed promotion modules is determined by the relevant module chairperson, at the commencement of the year, and agreed with the student(s) concerned.

#### **Failed candidates/Admission to the second semester of BChD I**

- Selected first-year students, who have passed a sufficient number of prescribed first-semester modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study. During the second semester, the students will be admitted to an examination on an anti-semester basis in the first-semester module(s) still outstanding, if this can be accommodated in the timetable.
- In the School of Dentistry, a student may not repeat more semester modules than the equivalent of eight lectures per week on an anti-semester basis in the second semester.

iii. Candidates who failed BChD I, please consult points (ii) and (iii) under the Repeating modules paragraph below.

### **Promotion to the next year of study**

A student must pass all the modules of the relevant year of study for promotion to the next year of study (see exceptions for promotion to the second and third years of study below).

### **Promotion to the second year of study**

A student must pass all the core modules of the first year of study for promotion to the second year of study. Students will be allowed to carry fundamental modules (AIM 101/AIM 111/AIM 121 and/or ELH 111/ELH 112 in the first year) over to the second year but must pass them during the second year of study in order to proceed to the third year of study.

### **Failed candidates**

A student who has failed the first year of study for the second time is excluded from the programme and will have to apply for readmission.

### **Promotion to the third year of study**

A student must pass all the core modules of the second year of study and any fundamental modules carried over from the first year of study for promotion to the third year of study. Students will be allowed to carry fundamental modules (AFR 111 and/or ZUL 110 in the second year) over to the third year of study but must pass them during the third year of study in order to proceed to the fourth year of study.

### **Promotion to the fourth year of study**

A student must pass all the modules of the third year of study and any fundamental modules carried over from the second year of study for promotion to the fourth year of study.

### **Promotion to the fifth year of study**

A student must pass all the core and fundamental modules of the preceding years of study for admission to the fifth year of study.

### **Academic exclusion from further study**

- i. A student following a BChD degree will only be allowed two opportunities to repeat a year of study.
- ii. A student who does not comply with the abovementioned requirement but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson of the School in writing, to consider his or her application for readmission in accordance with the prescribed procedure.
- iii. If a student fails one or more first-year modules (and therefore is not admitted to the second year of study), such a student forfeits his or her selection and must apply again for selection with a view to admission to the first year of study.
- iv. A student, who has failed a year of study for the second time before completing BChD II is excluded from the programme and must apply again for selection with a view to readmission to the second year of study.

### **Pass with distinction**

The degree is conferred with distinction on a student who has obtained at least 65% in all the examination modules of the final year of study, with an average of at least 75% for all the modules.

### **Curriculum: Year 1**

Minimum credits: 183

### Fundamental modules

- Academic information management 111 (AIM 111) - Credits: 4.00
- Academic information management 121 (AIM 121) - Credits: 4.00
- Academic English for Health Sciences 111 (ELH 111) - Credits: 6.00
- Academic English for Health Sciences (MBChB and BChD) 112 (ELH 112) - Credits: 6.00
- Academic orientation 110 (UPO 110) - Credits: 0.00

### Core modules

- Chemistry 151 (CMY 151) - Credits: 16.00
- Science and world views 155 (FIL 155) - Credits: 6.00
- Anatomy 188 (GNK 188) - Credits: 56.00
- Integrated dentistry 180 (IDE 180) - Credits: 20.00
- People and their environment 112 (MGW 112) - Credits: 6.00
- Molecular and cell biology 111 (MLB 111) - Credits: 16.00
- Medical terminology 180 (MTL 180) - Credits: 12.00
- Physics for biology students 131 (PHY 131) - Credits: 16.00
- Public oral health 170 (POH 170) - Credits: 5.00
- Sepedi for beginners 110 (SEP 110) - Credits: 12.00

### Curriculum: Year 2

Minimum credits: 202

### Fundamental modules

- Basic conversational Afrikaans 111 (AFR 111) - Credits: 12.00
- isiZulu for beginners 110 (ZUL 110) - Credits: 12.00

### Core modules

- Physiology 280 (FSG 280) - Credits: 40.00
- Anatomy 289 (GNK 289) - Credits: 40.00
- General microbiology 270 (GOM 270) - Credits: 23.00
- Generic procedural skills 280 (GPS 280) - Credits: 2.00
- Integrated dentistry 280 (IDE 280) - Credits: 20.00
- Oral biology 280 (MDB 280) - Credits: 24.00
- Ondontology 270 (ODO 270) - Credits: 6.00
- Public oral health 280 (POH 280) - Credits: 15.00
- Prosthodontics 270 (PRD 270) - Credits: 3.00

### Curriculum: Year 3

Minimum credits: 198

### Core modules

- Anatomical pathology 380 (ANP 380) - Credits: 24.00
- Clinical pharmacotherapy 370 (FAR 370) - Credits: 8.00
- Odontology 380 (ODO 380) - Credits: 39.00
- Oro-facial surgery 370 (OFC 370) - Credits: 12.00
- Orthodontics 380 (ORD 380) - Credits: 14.00
- Periodontology 380 (PDL 380) - Credits: 9.00
- Public oral health 370 (POH 370) - Credits: 4.00
- Prosthodontics 380 (PRD 380) - Credits: 43.00

Diagnostic imaging 380 (RAD 380) - Credits: 14.00  
Comprehensive patient management 370 (TBW 370) - Credits: 18.00  
Applied medicine 380 (TGG 380) - Credits: 8.00

## Curriculum: Year 4

Minimum credits: 253

### Core modules

Maxillo-facial pathology 480 (MFP 480) - Credits: 31.00  
Odontology 470 (ODO 470) - Credits: 63.00  
Oro-facial surgery 470 (OFC 470) - Credits: 41.00  
Orthodontics 480 (ORD 480) - Credits: 17.00  
Periodontology 480 (PDL 480) - Credits: 12.00  
Public oral health 470 (POH 470) - Credits: 6.00  
Prosthodontics 470 (PRD 470) - Credits: 26.00  
Diagnostic imaging 480 (RAD 480) - Credits: 21.00  
Comprehensive patient management 480 (TBW 480) - Credits: 20.00  
Anaesthesiology 470 (TMZ 470) - Credits: 16.00

## Curriculum: Final year

Minimum credits: 218

### Core modules

Maxillo-facial pathology 580 (MFP 580) - Credits: 33.00  
Odontology 570 (ODO 570) - Credits: 52.00  
Oro-facial surgery 570 (OFC 570) - Credits: 42.00  
Orthodontics 580 (ORD 580) - Credits: 17.00  
Periodontology 570 (PDL 570) - Credits: 16.00  
Public oral health 570 (POH 570) - Credits: 5.00  
Prosthodontics 580 (PRD 580) - Credits: 26.00  
Diagnostic imaging 580 (RAD 580) - Credits: 7.00  
Comprehensive patient management 580 (TBW 580) - Credits: 20.00

## BCMP (10130012)

**Minimum duration of study** 3 years

**Contact** Dr JM Louw [murray.louw@up.ac.za](mailto:murray.louw@up.ac.za) +27 (0)123563309

## Programme information

The integrated outcomes-based, problem-oriented degree programme consists of theoretical modules and clinical rotations.

## Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who

is currently in university.

- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

**25**

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

### Additional requirements

Also consult the General Regulations.

- Each student must apply to the Registrar of the Health Professions Council of South Africa for registration as a clinical associate student, immediately after admission to the first year of study.
- After obtaining the degree, graduates must also register as clinical associates with the Health Professions Council of South Africa.

### Other programme-specific information

Please note: **Third year of study**

- Attendance and continuous assessments for some modules will be either 1st semester or 2nd semester depending on rotation arrangements.
- Marks obtained in the clinical rotations are taken into account when calculating the relevant module marks.

### Examinations and pass requirements

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is required for admission to the examination. Adequate attendance at (more than 90%) and active participation in prescribed clinical activities as recorded in the clinical logbook are required for admission to the examination.
- A final module mark in the relevant module is, however, calculated from the module examination mark as well as the module mark compiled from continuous evaluation during the presentation of the module (i.e. the semester, year or module mark). The latter is calculated from the marks obtained in one or more of the undermentioned:

- a. Evaluations of theoretical knowledge.
  - b. Evaluations of clinical knowledge and skills.
  - c. Compulsory attendance at and participation in prescribed activities.
  - d. Compulsory attendance at all academic support activities for the first two years of study.
- iii. The contribution of each modality in the calculation of the abovementioned mark is set out in the regulations and published in the study guides. The details are explained to the students concerned before commencement of the modules. Likewise, the weight (50:50) allocated to the abovementioned marks and the various examination marks when calculating the final module mark awarded to the student. The importance of continuous evaluation in the assessment of students is non-negotiable, and therefore the marks awarded in this type of evaluations will form part of the final pass mark of all modules.
- iv. A student repeating the first or second year of study will retain credit for Clinical Medical Practice modules passed previously, subject to the following:
- a. The student will be required to participate adequately in the current year in the clinical component of all Clinical Medical Practice modules in order to maintain a specified level of clinical skills and be required to record such activities in an appropriate clinical logbook.
  - b. Compliance with (s) is a requirement for the admission to subsequent CMP modules.
  - c. In order to comply with the requirements for (a), the extent of involvement of students in successfully completed modules is determined by the relevant course coordinator, at the commencement of the year, and agreed with the student(s) concerned.

### **Passing a module in the BClinical Medical Practice degree programme**

- i. A module mark is calculated from the continuous evaluation opportunities during the course of the presentation of the module in question. These evaluations shall include one or more of the following:
- a. Evaluations regarding theoretical knowledge.
  - b. Evaluations regarding clinical knowledge and skills.
  - c. Compulsory attendance at and active participation in prescribed activities.
  - d. Compulsory attendance at all academic support activities for the first two years of study.
- ii. Students may exercise the option to have the module mark at the end of the year validated as the final module mark for the module in question (i.e. they are exempted from the module examination for this module), provided that they comply with the following requirements:
- a. The abovementioned module mark is more than 60% in all the different module assessments (with the exception of the Anatomy module that is more than 65%).
  - b. Proven attendance at all applicable module-specific activities, namely:
    - All tests/continuous evaluations.
    - All practicals and morning ward-round activities.
    - All relevant skills laboratory activities.
    - All relevant community-based education activities.
    - All clinical rotations.
  - c. A pass mark in the clinical rotation test.
  - d. Attendance at the module in question from day 1.
  - e. No conviction by the Faculty Preliminary Disciplinary Committee (Student offences) of any form of dishonesty or fraud.

- iii. A module examination is granted to all registered students regardless of the module mark, subject to adequate attendance (hours of clinical training) at and active participation in prescribed clinical activities (patients seen and procedures conducted) as set out in the relevant study guide and recorded in the clinical logbook of Clinical Medical Practice modules.
- iv. Any student without adequate attendance at and active participation in prescribed clinical activities as set out in the relevant study guide and recorded in the applicable clinical logbook will fail the Clinical Medical Practice module in question even if the student wrote and passed the module examination.
- v. The final module mark is calculated from the module examination mark and the module mark (continuous evaluation) in a 50:50 ratio, depending on the year of study and/or module-specific regulations. The formula according to which the final module mark is calculated will be set out in the study guide and communicated to students at the commencement of the programme.
- vi. In order to pass in a module, a subminimum of 40% is required in the written section of the module examination. In order to pass in a module in which a clinical component is included, a subminimum of 50% in the clinical component of the module examination is also required.
- vii. A second examination in a module will be granted to all students who fail the module in question.
- viii. As a rule, the second examination in question will take place in November/ December of the same year, or in January of the following year. A minimum of 50% is required in order to pass in the second examination.
- ix. An aegrotat or extraordinary examination granted to a student who could not participate in the module examination due to illness or other acceptable reasons, will take place during the second examination period. Students must apply formally for such an examination, and admission to the examination is approved by the Chairperson of the School or his/her authorised representative. Where applicable, the Chairperson of the School may first require a recommendation from the Faculty Health Committee before approving an application for admission to an aegrotat.

All modalities of a final examination must be completed jointly as an aegrotat or an extraordinary examination, even if part of it has already been completed as part of the examination sat in the previous examination period. The final module mark is calculated from the marks of all the divisions/modalities of the aegrotat or extraordinary examination and the module mark in question (continuous evaluation mark). The same criteria set for a final mark in a module, are applicable in this case.

**Note:** No special dates will be arranged for an aegrotat/extraordinary examination. These examinations will only take place on the scheduled dates for regular first/second examinations.

- x. Aegrotat/extraordinary tests are not allowed for the BClinical Medical Practice degree programme. However, students who have acceptable reasons for being absent from no more than one test will have a module mark calculated from the other continuous assessment opportunities. Students who have acceptable reasons for being absent from more than one test will, of course, have no module mark, and a pass in the module(s) will depend totally upon the module examination mark.

### **Academic exclusion from further study**

- i. In accordance with the stipulations of the General Regulations, re-registration of a student is permitted only if the student completes the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
- ii. In the case of the BClinical Medical Practice degree offered by the School of Medicine, a student who fails a year of study for a second time must apply, in writing, to the Readmission Committee of the School, chaired by the chairperson of the School, for readmission to the programme.
- iii. The committee in question will take all factors into consideration and its decision and conditions will be final.

## Promotion to next study year

### (i) Failed candidates/Admission to the second semester of the first year of study

Selected first-year students, who have passed a sufficient number of prescribed first-semester modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study.

### (ii) Failed candidates/Admission to the second year of study

(aa) First-year students who have passed all prescribed core modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second year of study.

(bb) A student who has failed any one or more of the 100-level core modules will have to repeat those modules failed before he/she will be admitted to the second year of study.

(cc) Also consult Faculty regulations in respect of a student studying for the BClinical Medical Practice degree, who fails a year of study for a second time.

### (iii) Failed candidates/Admission to the second semester of the second year of study

Second-year students who have passed a sufficient number of prescribed first-semester modules at 200 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the second year of study.

### (iv) Failed candidates/Admission to the third year of study

(aa) Second-year students who have passed all prescribed first- and second-semester modules at 200 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the third year of study.

(bb) A student who has failed any one or more of the 200-level modules, will have to repeat those module(s) failed before he/she will be admitted to the third year of study.

(cc) Also consult Faculty regulations in respect of a student studying for the BClinical Medical Practice degree, who fails a year of study for a second time.

### (vi) Failed candidates/Academic exclusion from further study

Consult Faculty regulations in respect of a student who does not complete the degree programme within the prescribed minimum period of study plus two years.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules of the third year of study.

## Curriculum: Year 1

Minimum credits: 128

## BDietetics (10139003)

**Minimum duration of study** 4 years

**Contact** Prof FAM Wenhold [tsa-s02399849@tuks.co.za](mailto:tsa-s02399849@tuks.co.za) +27 (0)123543200

### Programme information

The programme extends over four academic years during which period a student receives practical training as a student dietician at an institution or institutions approved for this purpose by the University.

After admission to the first year of study, each student in Dietetics must register as a student in Dietetics with the Health Professions Council of South Africa.

Students are required to complete at least four weeks applicable elective training (Code DTT 380) under the supervision of a dietician at an institution approved for this purpose by the University, after the first semester of the third year of study and prior to the commencement of the fourth year of study.

Note: Students who enrolled for the BDietetics degree programme prior to 2105 will complete the degree under the old curriculum. However, students who will have third-year status in 2020 will be transferred to the new curriculum.

### Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is

deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.

- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to healthapplications@up.ac.za.

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

### Additional requirements

Also consult General Regulations.

### Other programme-specific information

#### Exemption from the examination in (FAR) Pharmacology 381, 382

Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

### Examinations and pass requirements

- Each paper (Paper 1 and 2) of the written examination for Medical nutrition therapy 323, 411 and 480 (MNX 323, 411, 480) as well as the practical examination for MNX 411 must be passed individually with a subminimum of 40%.
  - Each paper written for the second examination opportunity in Medical nutrition therapy 323, 411 and 480 (MNX 323, 411, 480) as well as the practical examination for MNX 411 (second examination opportunity) must be passed individually with a subminimum of 50%.
- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed

for admission to the examination, and all registered students are admitted to the examination automatically.

- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the relevant head of department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
  - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
  - If a student does not obtain the subminimum in the examination, as required for a specific module.
  - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

### **Promotion to next study year**

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per

semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.

- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the relevant head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the relevant head of department, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

## Practical/clinical/internship information

### Internship training (second semester of the final year of study)

The four compulsory semester modules (CNT 480, DTT 480, MNX 480 and FSS 480) jointly form the internship training and must be taken simultaneously.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in the following modules: CNT 411, 480 jointly, as well as MNX 411, 480 jointly, and FSS 480.

## Curriculum: Year 1

Minimum credits: 134

Choose between Sepedi SEP 110 and Zulu ZUL 110

### Fundamental modules

Academic information management 111 (AIM 111) - Credits: 4.00

Academic information management 121 (AIM 121) - Credits: 4.00

General chemistry 117 (CMY 117) - Credits: 16.00

General chemistry 127 (CMY 127) - Credits: 16.00

Academic English for Health Sciences (BCur, BDietetics, BOH, BOccTher, BRad and BPhysT) 121 (ELH 121) - Credits: 6.00

Academic English for Health Sciences 122 (ELH 122) - Credits: 6.00

Molecular and cell biology 111 (MLB 111) - Credits: 16.00

Academic orientation 110 (UPO 110) - Credits: 0.00

### Core modules

Dietetic profession 110 (DTT 110) - Credits: 6.00

Cultural eating patterns 122 (DTT 122) - Credits: 6.00

Physiology 161 (FSG 161) - Credits: 6.00

Physiology 162 (FSG 162) - Credits: 6.00

Integrated healthcare leadership 120 (IHL 120) - Credits: 8.00

## Curriculum: Year 2

Minimum credits: 221

### Fundamental modules

Introduction to proteins and enzymes 251 (BCM 251) - Credits: 12.00

Carbohydrate metabolism 252 (BCM 252) - Credits: 12.00

Lipid and nitrogen metabolism 261 (BCM 261) - Credits: 12.00

Physiology 251 (FSG 251) - Credits: 6.00

Physiology 252 (FSG 252) - Credits: 6.00

Medical microbiology 252 (GMB 252) - Credits: 6.00

Medical microbiology 253 (GMB 253) - Credits: 6.00

Medical microbiology 254 (GMB 254) - Credits: 6.00

### Core modules

Nutrition education 223 (DTT 223) - Credits: 12.00

Human nutrition 210 (HNT 210) - Credits: 20.00

Human nutrition 220 (HNT 220) - Credits: 20.00

Integrated healthcare leadership 210 (IHL 210) - Credits: 8.00

Basic food preparation and food preparation techniques 231 (VDS 231) - Credits: 12.00

Food commodities and preparation 232 (VDS 232) - Credits: 12.00

## Curriculum: Year 3

Minimum credits: 242

### Fundamental modules

Pharmacology 381 (FAR 381) - Credits: 18.00

### Core modules

Community nutrition 321 (CNT 321) - Credits: 10.00

Dietetic counselling 310 (DTT 310) - Credits: 20.00

Clinic and discussion class 320 (DTT 320) - Credits: 5.00

Integrated healthcare leadership 310 (IHL 310) - Credits: 8.00

Medical nutrition therapy 310 (MNX 310) - Credits: 9.00

Medical nutrition therapy 323 (MNX 323) - Credits: 28.00

Nutritional assessment 313 (NTA 313) - Credits: 30.00

Research methodology for healthcare sciences 300 (RHC 300) - Credits: 30.00

Food service management 321 (VDB 321) - Credits: 18.00

Large-scale food production 323 (VDS 323) - Credits: 19.00

## Curriculum: Final year

Minimum credits: 222

### Core modules

Community nutrition 411 (CNT 411) - Credits: 22.00

Internship training in community nutrition 480 (CNT 480) - Credits: 14.00

Dietetic profession 411 (DTT 411) - Credits: 3.00

Integration in dietetics 480 (DTT 480) - Credits: 5.00

Internship training in food service system management 480 (FSS 480) - Credits: 14.00

Advanced human nutrition 411 (HNT 411) - Credits: 10.00

Medical nutrition therapy 411 (MNX 411) - Credits: 25.00

Internship training in medical nutrition therapy 480 (MNX 480) - Credits: 18.00

Research in healthcare sciences 400 (RHC 400) - Credits: 10.00

## BNurs (10131002)

**Minimum duration of study** 4 years

**Contact** Prof FM Mulaudzi [mavis.mulaudzi@up.ac.za](mailto:mavis.mulaudzi@up.ac.za) +27 (0)123541908

### Programme information

i. The Bachelor of Nursing Science [BNur] degree is a four-year, professional, career-oriented whole qualification that allows graduates to register with the South African Nursing Council (SANC) as:

- Professional Nurse; and
- Midwife/Accoucheur

ii. Successful completion of the degree programme will present graduates with the opportunity to further their studies in Nursing Science at postgraduate level.

iii. Candidates who comply with the necessary admission requirements will follow the prescribed curriculum.

- a. The compulsory practical and clinical hours of training over a four-year period will be determined by the competency-based framework and related regulations and circulars of the South African Nursing Council.
- b. Due to the compulsory practical and clinical training component as well as professional development, the curriculum cannot be completed in less than four years.
- c. The training institutions in question will grant vacation and sick leave according to the applicable requirements of the South African Nursing Council (SANC).

**Note:** Also consult the General Regulations.

### Conferment of the degree

The Bachelor of Nursing Science [BNurs] is conferred on students who have fulfilled all the programme requirements as well as the prescribed practical and clinical training successfully.

### Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who

is currently in university.

- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Mathematics, Physical Science or Life Sciences are not compulsory, but they will be an advantage for selection purposes.
- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

### Minimum requirements

#### Achievement level

#### English Home Language or English First Additional Language

#### APS

NSC/IEB

AS Level

4

D

**28**

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

### Other programme-specific information

1. Students who have to repeat specific modules, must also acquire a certificate of satisfactory attendance and progress in Nursing Practice Education (both modules of the year in question) in the year of repetition, even if the modules in question have already been passed in the unsuccessful year.
2. Examinations are compulsory in respect of all the modules presented by the Department of Nursing Science, as it is not possible to be promoted in any of these modules.

### Examinations and pass requirements

#### Exemption from the examination in (ANP) Anatomical Pathology 210

Exemption from the examination may be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

#### Academic exclusion from further study

- a. In accordance with the stipulations of the General Regulations, a student must complete the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
- b. Subject to the stipulations mentioned in a. above, a student in the School of Health Sciences, who fails a year of study for the second time, will only be allowed one opportunity to repeat a year of study, and will have to submit a written application for readmission to the programme in accordance with the prescribed procedure.

### Passing modules in Anatomy and Physiology

- 
- i. A **module mark** is calculated from the continuous evaluation opportunities during the course of the presentation of the relevant module. These evaluations will include one or more of the following:
    - a. Evaluations in connection with theoretical knowledge.
    - b. Evaluations in connection with practical knowledge and skills.
    - c. Compulsory attendance at and active participation in prescribed activities.
    - d. A final comprehensive module test.
  - ii. Students may exercise the option that the module mark at the end of the semester be ratified as the final module mark for the relevant module (i.e. they are exempted from the module examination for this module), if they comply with the following requirements:
    - a. The abovementioned module mark is more than 65%.
    - b. Proven attendance of all applicable module-specific activities, namely:
      - All tests/continuous evaluations.
      - All practical work and skills development sessions.
    - c. Attendance of the relevant module from Day 1.
    - d. No convictions by the School's Preliminary Disciplinary Committee (Student Transgressions) of any form of transgression.
  - iii. A **module examination** is granted to all registered students (even if the module mark is more than 65%).
  - iv. The **final module mark** is calculated from the examination mark and the module mark (continuous evaluation) in the ratio 50:50.
  - v. A **second module examination** is granted to all students who have obtained a final module mark of 40% to 49%. Students who have obtained a module mark of less than 40%, fail the module and will have to repeat the year of study.
  - vi. The relevant **second examination** will take place in November/December of the current year or in January of the subsequent year. A minimum of 50% is required to pass in the second examination.
  - vii. **Aegrotats or extraordinary examinations**, for students who could not sit the module examination due to health or other acceptable reasons, will take place during the second examination period. Students must apply formally for these examinations, and will be admitted by the Chairperson of the School or his/her authorised person. Where applicable, the Chairperson of the School may first require the recommendation of the Faculty Health Committee before admission to an aegrotat.

**All** modalities of a final examination must be written jointly as an aegrotat or extraordinary examination, even if part of the relevant examination had already been written during the previous examination period.

The **final module mark** is calculated from the marks of all the sections/ modalities of the aegrotat or extraordinary examination and the continuous evaluation mark. The same criteria as set for a pass mark in a module are applicable here. Students who could not sit the module examination in the examination period due to acceptable reasons, and who are consequently writing the module examination in the second examination period, forfeit the opportunity to be admitted to a further second examination.

### **Exemption from the examination in (FAR) Pharmacology 381, 382**

Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.

- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the relevant head of department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
  - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
  - If a student does not obtain the subminimum in the examination, as required for a specific module.
  - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

### **Promotion to next study year**

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core

and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.

- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the relevant head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the relevant head of department, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

## Practical/clinical/internship information

- i. The curriculum includes compulsory practical and clinical training modules, comprising a percentage of the total credits required for the successful completion of the programme.
- ii. Students will be registered as student nurses at an approved teaching hospital (or hospitals) for the duration of their studies.
- iii. Students will be required to visit clinics outside of the hospital as well as institutions where health services are provided.
- iv. Clinical training will take place for the duration of studies at the facilities mentioned above.
- v. Students will be required to sign a contract of service with the approved teaching hospital (or hospitals) in question – information will be made available after successful application for admission.

Certain hospitals and healthcare facilities have been approved for the purposes of practical and clinical training in Fundamental Nursing Science, General Nursing Science, Psychiatric Nursing Science, Community Nursing Science and Midwifery.

## Pass with distinction

The BNurs degree is conferred with distinction on a student who has obtained:

- i. A joint average of at least 75% in NPE 410 and NPE 420;
- ii. A joint average of at least 75% in NUR 410 and NUR 420; and
- iii. A joint average of at least 75% in IHL 412 and IHL 422.

### BOccTher (10138003)

**Minimum duration of study** 4 years

**Contact** Prof CJE Uys [kitty.uys@up.ac.za](mailto:kitty.uys@up.ac.za) +27 (0)123563213

### Programme information

Students who registered for BOccTher degree programme prior to 2015 will complete the degree according to the relevant regulations as published in the 2014 Yearbook. A revised curriculum as reflected below is being phased in for the programme. The revised first year of study will be followed for the first time in 2015, the second year of study in 2016, the third year of study in 2017 and the fourth year in 2018.

The programme extends over four academic years, during which period a student receives clinical training as a student occupational therapist at an institution approved by the University.

Students must complete at least 1 000 hours' clinical practical work over the four years of study in order to register as an occupational therapist with the Health Professions Council of South Africa.

Students may complete the first three years over four years. In such cases, the choice of modules for the different years is done at the commencement of studies, in conjunction with the head of department.

## Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.
- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to healthapplications@up.ac.za.

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

## Additional requirements

Also consult General Regulations.

**Note:** Each student in Occupational Therapy must apply immediately after admission to the first year of study, to the Registrar of the Health Professions Council of South Africa for registration as a student in Occupational Therapy.

## Other programme-specific information

**Important:** The modules AIM 101 Academic information management and ELH 121 and 122 Academic English for Health Sciences must be completed before registration for the fourth year of study.

### Note:

- Consult the Department of Physiology regarding possible prerequisites for the modules in question.
- Students who enrolled for the BOccTher degree programme prior to 2015, will complete the degree under the old curriculum.
- Students who fail a year in the existing curriculum will be managed on an individual basis in the Department

of Occupational Therapy.

- iv. The total credits and regulations for the old curriculum appear in the 2014 yearbook and are applicable for these students.

## Examinations and pass requirements

### Subminimum

In modules with a written as well as a practical and/or clinical examination, a subminimum of 40% is required in the written as well as the practical and/or clinical sections of the examination.

### Examination after one semester

A final-year student who has failed one module but who has passed all other modules, may be admitted to a special examination in the module in question at the end of the first semester of the subsequent year, after satisfactory attendance at lectures and clinical work during the first semester.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the relevant head of department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
  - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
  - If a student does not obtain the subminimum in the examination, as required for a specific module.
  - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass

mark to the module in question.

- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

## Promotion to next study year

Students in the first year of study who do not qualify for admission to the second year of study are automatically subjected to selection again.

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules in each discipline.
- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the relevant head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the relevant head of department, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

## Pass with distinction

The BOccTher degree is conferred with distinction on a student who has obtained an average of at least 75% in the core modules in the final year of study.

## Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.
- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any

programme in this Faculty.

- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

### Additional requirements

The General Regulations are applicable to bachelor's degrees.

### Other programme-specific information

\*The final examination for Oral biology (MDB 171) will take place at the end of the second semester together with Pharmacology (FAR 171) which is a semester module in the second semester.

\*\*Students are exempted from the language modules (ZUL 110, AFR 111 and SEP 110) on the basis of the successful completion of a language proficiency test at the beginning of the year.

### Examinations and pass requirements

#### Examinations of the first, second and third years of study

- A subminimum of 50% in the examination is required in respect of the examination modules, with a final mark of at least 50% to pass.
- A student who fails the clinical part of one or more of the modules of the third year must repeat those modules in the ensuing semester, with an examination at the end of the semester. The Dean on the recommendation of the examination moderating committee, will determine the time that must elapse before the student may again report for examination. Students, who are repeating the year of study, retain credit for modules passed, unless determined otherwise, but a certificate of satisfactory preparation and progress must be obtained in all modules passed.
- A student who has failed the theoretical part of any module in the third year, final examination, will be admitted to a supplementary examination in that part of the module. A student who fails the supplementary examination may, subject to other faculty regulations, sit an examination at the end of the ensuing semester, but must obtain certificates of satisfactory preparation in all the other modules that he/she has passed.
- In order to comply with the requirements in (iii) above, and to maintain a specific level of clinical skills, the extent of students' involvement in modules passed, will be contracted with the students concerned, by the module chairperson, at the beginning of the year.
- The requirement as stipulated in par (i) above, will apply to students who, after repeating a semester, again fail some of the modules.

## Promotion to next study year

### Promotion to next year of study

#### Admission to the second year of study

- i. To progress to the second year of study, a student must pass all the first-year modules. Students will be allowed to carry a maximum of two fundamental modules (AIM, AFR, SEP, ZUL, NHS and ELH) over to the second year but must pass them during the second year of study in order to proceed to the third year of study.
- ii. Students who are repeating the first year of study, retain credit for examination modules passed, unless otherwise stipulated, but have to obtain a certificate of satisfactory preparation and progress in all the promotion modules. In order to comply with the requirements mentioned above, and to maintain a specific level of clinical skills, the extent of involvement of students in promotion modules passed, will be contracted by the module chairperson with the student(s) concerned, at the commencement of the academic year.
- iii. A pass mark of at least 50% is required in the promotion module VKM 171 Preventive oral health 171.

#### Progression to the third year of study

- i. To progress to the third year of study, a student must pass all the second-year modules and any fundamental modules carried over from the first year of study.
- ii. Students who are repeating the second year of study, retain credit for examination modules passed, unless otherwise stipulated, but have to obtain a certificate of satisfactory preparation and progress in all the promotion modules. In order to comply with the requirements mentioned above, and to maintain a specific level of clinical skills, the extent of involvement of students in promotion modules passed, will be contracted by the module chairperson with the student(s) concerned, at the commencement of the academic year.
- iii. A pass mark of at least 50% is required in the promotion module VKM 271 Preventive oral health 271.

#### Academic exclusion

- i. A student following the Oral Hygiene programme will only be allowed two opportunities to repeat a year of study. Refer to the General Regulations.
- ii. A student who does not comply with the requirements above may apply to the Chairperson of the School in writing for readmission in accordance with the prescribed procedure.
- iii. A student who fails the first year of study must apply for readmission to the programme.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained a sub-minimum of 65% in each examination module of the final year of study, with an overall average of at least 75% for all the final-year examination modules.

## Curriculum: Year 1

### Programme information

**A revised curriculum is being phased in for the programme. The revised first year of study will be followed for the first time in 2015, the second year in 2016, the third year in 2017 and the fourth year in 2018.**

The programme extends over four academic years, during which period a student receives clinical training as a student physiotherapist at an institution approved by the University.

Students may be allowed to extend the first two years of study over three years, in which case the modules per year must be selected in consultation with the head of department at the commencement of studies.

### Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.
- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

**30**

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

**Additional requirements**

Also consult the General Regulations.

Notes:

- i. For students who registered for the BPhysT degree programme prior to 2015, the relevant regulations as they appear in the 2014 Yearbook will apply.
- ii. Each student in Physiotherapy must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Physiotherapy immediately after admission to the first year of study.

**Other programme-specific information**

**First year of study**

*Practical nursing*

Practical nursing for a continual period of 40 hours must be completed satisfactorily at an approved hospital/facility after the conclusion of the examination period in November. Documentary proof to this effect must be submitted.

*Subminimum*

A subminimum of 40% is required in the theoretical as well as in the practical examination in FTP 100.

**Second year of study**

Basic Emergency Care (Code GNK 286)

- If students obtain 60% or more in Basic Emergency Care, this mark will be validated as the examination mark at the end of the year, and such students will be exempted from the examination in the module.
- Students who obtain between 40% and 49% in the calculated mark for the module, will be admitted to a second examination in November/ December of the same year, or in January of the following year. A minimum of 50% is required as a pass mark for the second examination.
- This examination will also serve as an aegrotat or extraordinary examination for students who could not write the initial examination due to health or other acceptable reasons. A student must, however, apply formally to be admitted to such an examination, and the application must be approved by the Dean, on the recommendation of the head of department, and in some cases, also by the Faculty Health Committee.

*Subminimum*

A subminimum of 40% is required in the theoretical and practical components in the examination in FTP 220 and 203 and in POL 251 IHL 210

**Third year of study**

*Subminimum*

A subminimum of 40% is required in the theoretical and practical/clinical examination in (FTP) Physiotherapy 300, (FTP) Physiotherapy clinical practice 301 and (POL) Professional development and leadership 300.

#### **Fourth year of study**

##### *Subminimum*

A subminimum of 40% is required in clinical/practical as well as theoretical components of the examination of (FTP 400,402) Physiotherapy 400 and 402 and (IHL 414, 424) Integrated healthcare leadership 414, 424.

#### **Exemption from the examination in (ANP) Anatomical Pathology 210**

Exemption from the examination may be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

#### **Exemption from the examination in (FAR) Pharmacology 381, 382**

Exemption from the examination can be granted if a student who obtained a module mark of at least 60%, exercises the option to accept it as the final mark.

### **Examinations and pass requirements**

Students who fail a year in the existing curriculum will be managed on an individual basis in the Department of Physiotherapy.

#### **Special examination: Fourth year of study**

- The student gets another opportunity to take part in the examination.
- A special examination in (FTP 400) Physiotherapy 400, (FTP 402) Physiotherapy clinical practice 402 and (IHL 414, 424) Integrated healthcare leadership 414, 424, is conducted after six months have elapsed since the examination in which the student failed. If the student failed in (FTP 402) Physiotherapy clinical practice 402, he or she must undergo further clinical instruction in the clinical training areas and obtain at least 50% in the examination.
- A student who has not obtained a pass mark in the research report of RHC 400, Research in healthcare sciences 400, must submit an amended research report at a later date determined by the head of department.

#### **Ancillary examination: Fourth year of study**

After the conclusion of the examination in (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402 and before the results are announced, the examiners may, with a view to awarding a final mark, summon a student for an ancillary examination in the theory and/or clinical component of (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402.

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module in Nursing Science, Physiotherapy, Radiography, Occupational Therapy and Human Nutrition (at least 50% is required to pass) is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the quarter/semester/year. At least one formal assessment per module is set as the minimum norm, and students will be exposed on a continuous and regular basis to self-directed assignments in order to promote reflective learning.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.

- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/ November and the second examination opportunity in November/December of the same year. Where students need to work additional clinical hours to be allowed to do a second examination, the relevant head of department will determine the second examination opportunity.
- Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
  - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
  - If a student does not obtain the subminimum in the examination, as required for a specific module.
  - If a student does not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances.
- Students intending to sit the second examination due to the reasons mentioned above, must register for the second examination opportunity 24 hours after the results have been made public.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the quarter/semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- The School of Healthcare Sciences applies the General Regulations, according to which a student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

## Promotion to next study year

Selected first-year students who have passed in sufficient first-semester modules at 100 level will, according to the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study. During the second semester, students may follow the outstanding module(s) on an anti-semester basis and write the examination, on the condition that the modules in question are indeed presented on an anti-semester basis in the second semester by the relevant department and can be accommodated in the class and examination timetables.

Modules/subjects with practical and clinical training credits cannot be passed, unless all prescribed clinical hours and practical skills have been completed to the satisfaction of the head of department.

- A student must pass in all the prescribed core modules of a specific year of study to be promoted to a subsequent year of study. A student can only be promoted to a subsequent year of study if the student has not failed more than two fundamental modules of seven weeks each per semester or one module of 14 weeks per semester. A non-negotiable prerequisite for admission to the final year of study is pass marks in all the core and fundamental modules of the preceding years of study. Refer to the programmes for fundamental modules

in each discipline.

- A pass mark refers to a final mark of at least 50%.
- Modules with practical and clinical training credits cannot be passed unless all the prescribed clinical hours and practical activities have been completed to the satisfaction of the relevant head of department.
- The Chairperson of the examination moderating meeting may, after assessing the student's total profile, grant special approval to be promoted to the next year of study.
- The exception is the Department of Human Nutrition, where the regulations as applicable in the Faculty of Natural and Agricultural Sciences regarding the modules presented by that Faculty, are relevant.
- Modules can only be taken in advance or repeated if it can be accommodated in the existing examination timetable.
- A student who must repeat a year of study may, with the approval of the Chairperson of the examination moderating meeting and the relevant head of department, be allowed to take fundamental modules of the subsequent year, if he/she complies with all the prerequisites for the relevant modules. No adjustment to existing timetables will be allowed.

The following fundamental modules are relevant:

- Department of Nursing Science: SLK 110, 120; FSG 251,252
- Department of Physiotherapy: SOH 254; FSG 251, 252, 261, 262; SLK 210, ANP 210; GMB 252, 253, 254; FAR 381, 382
- Department of Occupational Therapy: ZUL 110; SEP 110; SLK 210, 220; FSG 251, 252, 261, 262; ANP 210; RPD 481, GNK 286
- Department of Human Nutrition: FLG 211, 212, 221, 222; BCM 251, 252, 261, 262; FAR 381, 382, VDS 322; VDB 321
- Department of Radiography: FSG 251, 252, 262; GNK 286; ANP 210.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in (FTP 400) Physiotherapy 400 and (FTP 402) Physiotherapy clinical practice 402 and a joint average of at least 75% in (RHC 400) Research in healthcare sciences 400 and (IHL 414, 424) Integrated healthcare leadership 414, 424.

## Curriculum: Year 1

Minimum credits: 140

### Fundamental modules

[Academic information management 111](#) (AIM 111) - Credits: 4.00

[Academic information management 121](#) (AIM 121) - Credits: 4.00

[Introduction to anatomy 151](#) (ANA 151) - Credits: 6.00

[Anatomy of the limbs 152](#) (ANA 152) - Credits: 6.00

[Anatomy of the torso 161](#) (ANA 161) - Credits: 6.00

[Anatomy of the head and neck 162](#) (ANA 162) - Credits: 6.00

[Chemistry 151](#) (CMY 151) - Credits: 16.00

[Academic English for Health Sciences \(BCur, BDietetics, BOH, BOccTher, BRad and BPhysT\) 121](#) (ELH 121) - Credits: 6.00

[Physics for biology students 131](#) (PHY 131) - Credits: 16.00

Sepedi for beginners 110 (SEP 110) - Credits: 12.00

Psychology 110 (SLK 110) - Credits: 12.00

Academic orientation 110 (UPO 110) - Credits: 0.00

isiZulu for beginners 110 (ZUL 110) - Credits: 12.00

### Core modules

Physiotherapy 101 (FTP 101) - Credits: 10.00

Integrated healthcare leadership 120 (IHL 120) - Credits: 8.00

## Curriculum: Year 2

Minimum credits: 128

### Fundamental modules

Anatomical pathology 210 (ANP 210) - Credits: 10.00

Physiology 251 (FSG 251) - Credits: 6.00

Physiology 252 (FSG 252) - Credits: 6.00

Physiology 261 (FSG 261) - Credits: 6.00

Physiology 262 (FSG 262) - Credits: 6.00

Medical microbiology 252 (GMB 252) - Credits: 6.00

Medical microbiology 253 (GMB 253) - Credits: 6.00

Medical microbiology 254 (GMB 254) - Credits: 6.00

Basic emergency care 286 (GNK 286) - Credits: 5.00

Psychology 210 (SLK 210) - Credits: 20.00

### Core modules

Physiotherapy 204 (FTP 204) - Credits: 35.00

Physiotherapy clinical practice 221 (FTP 221) - Credits: 8.00

Integrated healthcare leadership 210 (IHL 210) - Credits: 8.00

## Curriculum: Year 3

Minimum credits: 147

### Fundamental modules

Pharmacology 381 (FAR 381) - Credits: 18.00

Pharmacology 382 (FAR 382) - Credits: 18.00

Integrated healthcare leadership 310 (IHL 310) - Credits: 8.00

Integrated healthcare leadership 324 (IHL 324) - Credits: 8.00

Research methodology for healthcare sciences 300 (RHC 300) - Credits: 30.00

### Core modules

Physiotherapy 303 (FTP 303) - Credits: 20.00

Physiotherapy clinical practice 304 (FTP 304) - Credits: 45.00

Integrated healthcare leadership 310 (IHL 310) - Credits: 8.00

Integrated healthcare leadership 424 (IHL 424) - Credits: 8.00

## Curriculum: Final year

Minimum credits: 113

### Core modules

Physiotherapy 403 (FTP 403) - Credits: 12.00

Physiotherapy clinical practice 404 (FTP 404) - Credits: 75.00  
Integrated healthcare leadership 414 (IHL 414) - Credits: 8.00  
Integrated healthcare leadership 424 (IHL 424) - Credits: 8.00  
Research in healthcare sciences 400 (RHC 400) - Credits: 10.00

## **BRad in Diagnostics (10137100)**

**Minimum duration of study** 4 years

**Contact** Dr RM Kekana [mable.kekana@up.ac.za](mailto:mable.kekana@up.ac.za) +27 (0)123563114

### **Programme information**

The programme extends over four years' full-time study, during which period a student radiographer will be allocated to an institution approved by the Department of Radiography and accredited by the Health Professions Council of South Africa for clinical training in collaboration with the University of Pretoria.

The programme has both an academic and compulsory clinical (work integrated learning) component, with students having to complete specified clinical outcomes for the course in an HPCSA accredited facility. Students must comply with the stipulations of the Health Professions Council of South Africa concerning the required clinical outcomes and as determined by the Department of Radiography.

All students are required to complete specified clinical outcomes as in HPCSA accredited training facilities for each year of study. Students are subject to the rules and regulations of the selected facility in which they are placed for the clinical component of the course, whether in public and/or private health sectors.

### **Admission requirements**

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required National Senior Certificate (NSC) with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another Faculty at the University of Pretoria; and a candidate who is currently studying at a university.
- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results and the National Benchmark Test (NBT) results will be used for the conditional selection of prospective students.
- For selection purposes, the sum of the results in six subjects, including English, Mathematics and Physical Sciences, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- The applications of international candidates who come from countries that have medical schools will not be considered for placement in the MBChB programme, except where intergovernmental agreements are in place.
- **Candidates should note that their conditional admission will be revoked if their APS drops by more than two points in their final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to [click here](#)
- A student who is made an offer but does not accept it cannot defer the offer and must reapply to be considered in the following year.

### **Transferring students (university experience)**

- The applications of students who are studying towards a tertiary qualification or have obtained a tertiary qualification must meet the following requirements regarding school subjects and performance levels: They must be in possession of an NSC for degree studies/full exemption certificate and must have attained a performance level of 5 (or 50% HG if completed prior to 2009) for Mathematics and Physical Sciences (or Life Sciences, if required).
- If the subjects were not passed in Grade 12, the equivalent subjects (Physics, Chemistry and Mathematics) must be completed at the tertiary level. University students do not have to write the National Benchmark Test (NBT) or submit any non-academic performance record or CV. In their case selection is based on the results attained in the qualification(s) previously completed, ie they will be considered on the basis of their results achieved in higher education.
- The completion of only a three-year diploma or certificate is not considered as university experience, but will be considered in the school-leaver category and admission will be based on the applicant’s Grade 12 and NBT results.

### **Qualifications from countries other than South Africa**

- A limited number of places are made available to citizens from countries other than South Africa, with those from SADC countries being given preference. Permanent residents of RSA are not categorised as foreign students. Applications from citizens from countries other than South Africa may also be considered if they are:
  - citizens or permanent residents of countries which have relevant government to government agreements with South Africa
  - asylum seekers or refugees

### **National Benchmark Test (NBT)**

The NBT is compulsory for all school leavers who apply for admission to any programme in the Faculty of Health Sciences.

- Applicants must write the NBT no later than the middle of July.

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. Students in the Cambridge system must offer both Physics AND Chemistry with performance at the level specified for NSC Physical Sciences in the table above.

\* International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission. Students in the IB system must offer both Physics AND Chemistry with performance at the level specified for NSC Physical Sciences in the table above.

## Examinations and pass requirements

Consult the general pass requirements of the School of Healthcare Sciences, for the calculation of the final mark in a module, the continuous assessment mark, obtaining a pass mark in modules with practical and/or clinical components, etc.

### Subminimum:

A subminimum of 50% is required in the written, as well as the practical/clinical components sections of the examinations in all modules in Radiographic Sciences at 100, 200, and 300 level.

### A second examination opportunity in a module is granted to students in the following cases:

Second examinations are granted according to the stipulations of the general pass requirements of the School of Healthcare Sciences.

### Admission to fourth year of study:

A student must pass all the modules of the first, second and third year of study in order to be admitted to the fourth year of study

### Special examination: Fourth year of study

A special examination for a student who failed the module; Clinical Practice in Diagnostic Radiography IV. He or she must undergo a further clinical instruction in clinical training areas and obtain at least 50% in the examination

A student who has not obtained a pass mark in the module Research for healthcare sciences 400 must submit an amended essay at a date determined by the head of department.

## Promotion to next study year

Consult the general requirements for promotion to a subsequent year of study under the School of Healthcare Sciences, in this publication. Consult also the general pass requirements of the School of Healthcare Sciences for the calculation of the final marking and module, the continuous assessment mark, etc in the learner guides. All modules with practical and clinical training credits cannot be passed, unless all prescribed clinical hours and practical skills have been completed as per module requirement.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the final-year modules.

## Curriculum: Year 1

Minimum credits: 144

## BSportSci (10135010)

**Minimum duration of study** 3 years

**Contact** Prof PS Wood [paola.wood@up.ac.za](mailto:paola.wood@up.ac.za) +27 (0)124206046

### Programme information

This three-year full-time BSportSci programme includes basic and applied sciences of the human body and provides a pathway towards a BScHons (Biokinetics) or a BScHons (Sports Science). Qualified BSc (Sports Science) students may also either apply for the Postgraduate Certificate in Education or start working in the sporting industry.

### Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.
- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

## Other programme-specific information

Students who obtain a 4 or 5 in the compulsory Academic Literacy Test (TALL) will be exempted from the ELH 121 and ELH 122 modules.

## Examinations and pass requirements

- In accordance with the stipulations of the General Regulations, no minimum year or semester mark is needed for admission to the examination, and all registered students are admitted to the examination automatically.
- The final mark for a specific module is calculated from the examination mark as well as the mark compiled from the evaluation of a student during continuous, objective and controlled assessment opportunities during the course of the semester/year. A final mark of at least 50% is required to pass.
- In the case of modules with practical components, students are required to also comply with the applicable attendance requirements with regard to acquiring practical skills before a pass mark can be obtained for the module.
- There are two main examination opportunities per annum, the first and second examination. In respect of first-semester modules, the first examination opportunity is in May/June and the second examination opportunity in July. In respect of second-semester modules, the first examination opportunity is in October/November and the second examination opportunity in November/ December of the same year. Only two examination opportunities per module are allowed. If a student fails a module at the second examination opportunity, the module must be repeated.
- A second examination opportunity in a module is granted to students in the following cases:
  - If a student obtains a final mark of less than 50% in the relevant module at the first examination opportunity and thus fails.
  - If a student does not obtain the subminimum in the examination, as required for a specific module.
  - If a student does not sit the examination in a module at the first examination opportunity due to illness, official UP recognised sports participation or extraordinary circumstances.
- If a student fails a module at the first examination opportunity, the examination mark obtained in the relevant module at the second examination opportunity will be calculated as the final mark. The marks obtained with continuous evaluation during the course of the semester/year will not be taken into calculation. If the student passes the module at the second examination opportunity, a maximum of 50% is awarded as a pass mark to the module in question.
- If a student could not sit the examination in a module at the first examination opportunity due to illness, official UP recognised sports participation or extraordinary circumstances, the continuous evaluation mark, together with the examination mark obtained in the module in question at the second examination opportunity, will be calculated as the final mark obtained in the module.
- A student requiring a limited number of modules to complete his or her degree, may in terms of faculty regulations, be admitted to a special examination in the modules in question.

## Promotion to next study year

### Admission to the second year of study

- i. To be admitted to the second year of study, a student must pass PRC 100, EXE 110, FSG 110, MTL 180, ANA 123, EXE 120 and FSG 120.

- ii. Modules can only be repeated if they can be accommodated within the existing examination timetable.
- iii. Students who are repeating the first year of study, retain credit for examination modules passed.

### **Admission to the third year of study**

- i. To be admitted to the third year of study, a student must have passed all the first and second-year modules.
- ii. Students who are repeating the second year of study, retain credit for examination modules passed.

### **Academic exclusion**

- i. A student following the BSportSci programme will only be allowed one opportunity to repeat a year of study.
- ii. A student who does not comply with the abovementioned requirements but nevertheless wishes to be admitted to the School, may request the Dean/Chairperson in writing to consider his or her application for readmission in accordance with the prescribed procedure.

### **Pass with distinction**

#### **BSportSci degree**

The degree is conferred with distinction on a student who obtains a cumulative average of at least 75% for all modules over the three years of study.

## MBCbB (10130003)

**Minimum duration of study** 6 years

**Contact** Prof RJ Green [robin.green@up.ac.za](mailto:robin.green@up.ac.za) +27 (0)123545277

## Programme information

Each student in Medicine must apply to the Registrar of the Health Professions Council of South Africa for registration as a student in Medicine, immediately after admission to the first year of study.

After obtaining the degree, a student must register with the Health Professions Council of South Africa as an intern, and complete at least one year of training at an institution approved by the abovementioned Council for this purpose. (Students who qualify after July 2006, will have a compulsory two-year internship.) After this, he or she must register with the Council as a physician and complete one year of community service before he or she may work in private practice.

The integrated outcomes-based problem-oriented programme consists of theoretical blocks, special activities (SAs) and clinical rotations. During the final 18 months, referred to as the Student Intern Complex (SIC), all the programme activities take place in the clinical settings.

## Admission requirements

- The following persons will be considered for admission: a candidate who is in possession of a certificate that is deemed by the University to be equivalent to the required Grade 12 certificate with university endorsement; a candidate who is a graduate from another tertiary institution or has been granted the status of a graduate of such an institution; a candidate who is a graduate of another faculty at the University of Pretoria; and a candidate who is currently in university.

- Admission to Health Sciences programmes is subject to a selection process.
- Grade 11 final examination results, the National Benchmark Test (NBT) results as well as a Value-added Form will be used for the provisional selection of prospective students.
- For selection purposes the sum of the results in six subjects, including English, Mathematics and Physical Science, is calculated.
- Life Orientation is excluded in the calculation of the Admission Point Score (APS).
- The application of international candidates who come from countries that have medical schools will not be considered for placement in the MBChB programme except where intergovernmental agreements are in place.
- **Candidates, please note that your conditional admission will be revoked if your APS drops by more than two points in your final school examination results.**
- PLEASE NOTE that compliance with the minimum admission requirements does not guarantee admission to any programme in this Faculty.
- Selection queries may be directed to [healthapplications@up.ac.za](mailto:healthapplications@up.ac.za).

\* Cambridge A level candidates who obtained at least a D in the required subjects, will be considered for admission. International Baccalaureate (IB) HL candidates who obtained at least a 4 in the required subjects, will be considered for admission.

### Additional requirements

The Faculty can accommodate 300 first-year MBChB students. Applicants for MBChB I are evaluated according to different categories, with the minimum admission requirements set according to the categories in question.

1. In terms of the selection procedure, candidates must pass English, Mathematics and Physical Science with at least a 5 rating code (60%-69%), and achieve an APS of at least 35, in order to be considered for selection and/or admission.
2. It is not possible for candidates to complete the first year of study for this study programme at another South African university.
3. A candidate who has passed a full academic year at another university, with at least four first-year subjects, will be considered for selection, but only for admission to MBChB I.
4. Admission of foreign candidates is limited. Preference will be given to students from SADC countries.
5. Candidates will be notified per SMS and in writing of the outcome of the selection.
6. School leaving candidates with no previous tertiary exposure who have not been admitted to MBChB I, may register for a first year of study in the BSc degree programme in Biological or Medical Sciences at the University of Pretoria, provided that they qualify for admission. If they pass the prescribed first-semester modules, they may apply before 31 May of their first year of study, to be considered for admission to MBChB I as from the second semester
7. Candidates who have not been admitted to the first year of study for the MBChB degree programme, may apply for admission to any other degree programme at this University, provided that they comply with the

entrance requirements for the degree programme in question; and may, on the grounds of that achievement, reapply for selection (changing to MBChB I).

## Other programme-specific information

### Important:

Students have three assessment opportunities, namely a block test, first examination and second examination in order to pass GPS Generic procedural skills 280. Although a student will not be held back if GPS 280 is failed, the module in question must be passed by the end of the first semester of the third year of study, failing which the student will be held back in the third year of study.

### Fourth year of study:

- SA 11 (GNK 487) Skin 487 is preceded by one study week named SA 11a in the 4th year, 2nd semester.
- Students who offer BOK 284 (25 credits) from 2015 will be required to offer and pass module GNK 482.
- SA 16 (GNK 482) Forensic medicine 482 will be offered for the first time in 2017. Students who passed BOK 284 prior to 2015 will not be required to offer this module as the contents were included in BOK 284 (31 credits).

### Fifth year of study:

Block 18 (GNK 585) Pharmacotherapy 585 is preceded by two study weeks, namely Block 18a in the 2nd year, 2nd semester and Block 18b in the 4th year, 2nd semester.

**Note:** Marks obtained in the morning rotations are taken into account with the relevant block marks.

### Second half of the fifth year of study, and the sixth year of study:

#### Admission to the Student Intern Complex (SIC):

1. For admission to the SIC, a student is required to pass in all the examination modules and morning rotations of the first semester of the fifth year of study.
2. Rotations and end-of-rotations evaluations (first examinations) and end-of-semester examinations (second examinations)
1. Training in the SIC extends over 18 months. Rotations take place over a period of 63 weeks in three semesters.
2. All students who are involved, will enjoy the same rank of seniority and will be known as student interns; i.e. no differentiation will in this case be made between the status of the fifth-year and sixth-year student concerned.
3. A rotation extends over seven weeks, and every three rotations are grouped together in a logical manner in the three semester divisions of the SIC.
4. The semester rotations are divided as follows:

#### Student Intern Complex (SIC) (18 months)

##### SIC Semester (a): Surgery and related disciplines and Family Medicine

1. Surgery (7 weeks) GNK 680 – 52 credits

- General surgery
- Vascular surgery
- Plastic surgery
- Paediatric surgery
- Cardiothoracic surgery
- Neurosurgery (1 week)

2. Surgery-related subdisciplines (3 weeks)

- Urology (2 weeks) GNK 690 – 11 credits
  - Orthopaedics (3 weeks) GNK 681 – 17 credits
  - 1 week of exams
3. Anaesthesiology and Family medicine (7 weeks)
- Anaesthesiology (3½ weeks) GNK 682 – 20 credits
  - Family medicine (3½ weeks) GNK 691 – 20 credits

**Total credits per semester: 120**

**SIC Semester (b): Internal medicine and related sub-disciplines and psychiatry**

1. Internal medicine (7 weeks) GNK 683 – 45 credits
  2. Internal medicine-related subdisciplines (3½ weeks) GNK 684 – 20 credits
- Dermatology
  - Haematology
  - Cardiology
  - Neurology (3½ weeks) GNK 693 – 15 credits
3. Psychiatry (7 weeks) GNK 685 – 40 credits

**Total credits per semester: 120**

**SIC Semester (c): Women’s and children’s health and community-based education**

1. Obstetrics and gynaecology (7 weeks) GNK 686 – 40 credits
2. Paediatrics (7 weeks) GNK 687 – 40 credits
3. Community obstetrics (3½ weeks) GNK 692 – 20 credits
4. Community-based education (3½ weeks) GNK 688 – 20 credits

**Total credits per semester: 120**

**SA13 Special activity: Diagnostic laboratory medicine**

1. Diagnostic laboratory medicine (2 weeks) GNK 689 – 11 credits
- Image-forming medicine
  - Evidence-based medicine
  - Bioethics (2 days)\*

**Total credits: 11**

**Total credits Student Intern Complex: 371**

\*SA13 Diagnostic laboratory medicine is followed by two study days, namely SA13a in the 6th year, 2nd semester.

5. End-of-rotation evaluations are held at the end of every seven-week rotation. Students who obtain a final mark of at least 60%, are promoted in the rotation and need not sit the end-of-semester examination in that rotation.
  - In the first semester, this examination will be held three times (for students in the first semester of their sixth year of study).
  - In the second semester, this examination will also be held three times for students in the second semester of both the fifth and the sixth year of study.
6. End-of-semester examinations are held in the relevant rotations of the semester of a SIC in which students

have performed unsatisfactorily (i.e. less than 60%). Students who fail these examinations, will not be admitted to the rotations of the subsequent semester and will be required to repeat and pass the unsuccessful rotation(s). (Further details in this regard appear in Rotation(s) failed or not promoted in below.

7. During the first semester of the sixth year of study, two lecturing periods of two weeks each will be devoted to the following: GNK 689: Diagnostic laboratory medicine; Image-forming medicine; Evidence-based medicine; Bioethics.

### **Rotation(s) failed or not promoted in**

1. A student intern who fails a seven-week rotation or rotations for the first time (i.e. the end-of-rotation evaluation) or is not promoted in the rotation(s) in question, sits the end-of-semester examination in the rotation(s) in question. If successful in the second examination, he or she continues with the rotations of the following semester. If unsuccessful, the relevant rotation(s) must be repeated at the first opportunity in the next semester. The nature of such repetition must be regarded as remedial and it ends with the next end-of-rotation examination.
2. The end-of-rotation examination for such student interns serves as the next official evaluation and must, as such, be monitored by external examiners. A pass mark of at least 50% is required.
3. Student interns who pass the end-of-rotation evaluation, continue with the next “semester rotations” and may re-join their original group for the duration of the rest of the SIC. The third rotation of the semester will then again be out of phase.
4. Student interns who fail the end-of-rotation evaluation again (i.e. first examination), routinely continue with the next rotations or semester activity as applicable according to the number of rotations failed. Such student interns will complete the unsuccessful rotations at the end of the training period, after all other rotations have been passed.
5. The sixth year of study may be failed twice, provided that no previous year has been failed. This means that there is a total of seven semesters available for the sixth year of study to a student intern who has not failed any previous year of study.

## **Examinations and pass requirements**

### **Passing a block/special activity in the MBChB degree programme**

1. A block mark is calculated from the end of the block assessment and the continuous evaluation opportunities during the course of the presentation of the block or special activity in question. These evaluations shall include one or more of the following:
  1. Evaluations regarding theoretical knowledge.
  2. Evaluations regarding clinical knowledge and skills.
  3. Compulsory attendance of, and active participation in prescribed activities.
  4. A final comprehensive block test moderated by external examiners.
2. Students may exercise the option to have the block mark at the end of the year validated as the final block mark for the block in question (i.e. they are exempted from the block examination for this block), provided that they comply with the following requirements:
  1. The abovementioned block mark is more than 60%.
  2. Proven attendance of all applicable block-specific activities, namely:
    - All tests/continuous evaluations.
    - All practicals and morning ward-round activities.

- All relevant skills laboratory activities.
  - All relevant community-based education activities.
  - All clinical rotations.
3. A pass mark in the clinical rotation test.
  4. Attendance of the block in question from day 1.
  5. No conviction by the Faculty Preliminary Disciplinary Committee (Student offences), of any form of dishonesty or fraud.
3. A block examination is granted to all registered students regardless of the block mark.
  4. The final block mark is calculated from the block examination mark and the block mark (continuous evaluation) in a 50:50 or 60:40 ratio, depending on the year of study and/or block-specific regulations. The formula according to which the final block mark is calculated will be set out in the block book (study guide) and communicated to students at the commencement of the programme.
  5. In order to pass in a block/special activity in which a clinical component is included, a subminimum of 50% is required for the block examination mark, implying that a student who obtains a block mark of more than 50% and a block examination mark of less than 50%, with a final block mark of more than 50%, fails the block and will thus be admitted to a second examination.
  6. Regarding the Longitudinal Clinic Attachment Programme (L-CAS activities) of an academic year (module code LCP 180, 280, 380, 480 and 580), students must hand in a portfolio at the end of the academic year which will be assessed. Satisfactory attendance will furthermore be required regarding this module to pass the year. **Note:** Students are not allowed into patients' homes or any other unauthorised facility.
  7. A second examination in a block will be granted to all students who fail the block.
  8. As a rule, the second examination in question will take place in November/ December of the same year, or in January of the following year. However, this regulation is not applicable to the end of the first semester of MBChB V. (A minimum of 50% is required in order to pass in the second examination.
  9. An aegrotat or extraordinary examination granted to a student who could not participate in the block examination due to illness or other acceptable reasons, will take place during the second examination period. Students must apply formally for such an examination, and admission to the examination is approved by the Chairperson of the School or his/her authorised person. Where applicable, the Chairperson of the School may first require a recommendation from the Faculty Health Committee before approving an application for admission to an aegrotat. All modalities of a final examination must be completed jointly as an aegrotat or an extraordinary examination, even if part of it has already been completed as part of the examination sat in the previous examination period. The final block mark is calculated from the marks of all the divisions/modalities of the aegrotat or extraordinary examination and the block mark in question (continuous evaluation mark). The same criteria set for a final mark in a block, are applicable in this case. **Note:** No special dates will be arranged for an aegrotat/extraordinary examination. These examinations will only take place on the scheduled dates for regular first/second examinations.
  10. Aegrotat/extraordinary tests are not allowed for the MBChB degree programme. Students who have acceptable reasons for being absent from tests, will of course have no block mark, and a pass in the block(s) will depend totally upon the block examination mark.

### **Repeating blocks and/or special activities (and thus the year of study) in the MBChB degree programme**

A student who has failed one or more blocks and/or special activities in a year of study, must repeat the year of study. However, such a student will be exempted from the blocks and/or special activities passed in the previous (failed) year.

The Examination Moderating Meeting and/or the Chairperson of the School of Medicine, reserves the right to only

award a pass mark to the said blocks and/or special activities should the student comply with the following requirements in respect of the blocks and/or special activities in question:

- That the mark awarded to the said block or special activity was not awarded on the grounds of condonement.
- That the student's attendance of the said block and/or special activity was satisfactory, that he or she participated in all other activities and complied with all other requirements.

### **Examinations and pass requirements**

In accordance with the stipulations of the General Regulations, a minimum year or semester mark of 40% is required for admission to the examination: Provided that the different year and semester modules in a School need not be handled in the same manner, although a considerable degree of uniformity is advisable.

The stipulation that students be admitted to the examination without reservation, is supported. A final block mark in the relevant module is, however, calculated from the block examination mark as well as the block mark compiled from continuous evaluation during the presentation of the module (i.e. the semester, year, module or block mark). The latter is calculated from the marks obtained in one or more of the undermentioned:

1. Evaluations of theoretical knowledge.
2. Evaluations of clinical knowledge and skills.
3. Compulsory attendance of and participation in prescribed activities.

The contribution of each modality in the calculation of the abovementioned mark is set out in the regulations and published in the study guides. The details are explained in detail to the students concerned before commencement of the modules. Likewise, also the weight allocated to the abovementioned marks and the various examination marks when calculating the final block mark awarded to the student, which varies between 50:50 and 40:60 according to the field of study, year of study and programme-specific compilation.

The importance of continuous evaluation in the assessment of students is non-negotiable, and therefore the marks awarded in these type of evaluations will form part of the final pass mark of all modules/subjects.

The pass mark for essays is at least 50%. The stipulations of the General Regulations regarding requirements for dissertations apply mutatis mutandis to essays.

For requirements regarding the abovementioned, also consult the study manual of a given block.

### **Academic exclusion from further study**

1. In accordance with the stipulations of the General Regulations, re-registration of a student is permitted only if the student completes the degree programme for which he or she is registered within the prescribed minimum period of study plus two years.
2. In the case of the MBChB degree offered by the School of Medicine, a student who fails a year of study for a second time, must apply, in writing, to the Readmission Committee of the School chaired by the Chairperson of the School, for readmission to the programme.
3. The Committee in question will take all relevant factors into consideration.

### **Promotion to next study year**

#### **Failed candidates/Admission to the second semester of MBChB I**

1. Selected first-year students, who have passed in all prescribed first-semester modules at 100 level will, in accordance with the stipulations of the General Regulations, automatically be admitted to the second semester of the first year of study.
2. During the second semester, the students who have failed modules may be admitted to an examination on an anti-semester basis, if this can be accommodated in the timetables.
3. In the School of Medicine, a student may not repeat first-semester modules comprising more than 8 lectures per week on an anti-semester basis in the second semester.

---

### **Failed candidates/Admission to MBChB II**

1. A student must pass all the modules prescribed for MBChB I, for admission to MBChB II.
2. Students who take the maximum allowable number of first-semester modules on an anti-semester basis in the second semester, must pass a second examination in the modules in question prior to commencement of the second year of study. Should a student pass in these modules, the fact that the modules were failed in the first semester, will not affect his or her admission to MBChB II.
3. None of the second-semester blocks and special activities of MBChB I are presented on an anti-semester basis.
4. ALL students who fail the first year of study for the MBChB degree, forfeit their selection and must apply, in writing, for readmission to the MBChB degree programme. Also consult Reg.M.1(c) regarding students who fail certain blocks in a year and therefore the year of study.

### **Admission to the second year of study**

A student must pass all the modules prescribed for the first year of study before admission to the second year of study.

### **Failed candidates/Admission to MBChB III**

1. Students must pass in all the prescribed modules for MBChB II for admission to MBChB III.
2. Students who fail one block, may repeat the MBChB II year\* without forfeiting his/her selection.
3. Students who fail two blocks, but who have not failed a block before, may repeat the MBChB II year\*, without forfeiting his/her selection.
4. Students who fail three or more blocks, are automatically excluded from the programme.
5. Students who have failed MBChB I and subsequently also MBChB II (notwithstanding the number of blocks involved), are automatically excluded from the programme.
6. Students who are excluded from the programme, will again be subjected to selection with a view to readmission to MBChB II.

See also **Examinations and pass requirements** regarding students who fail certain blocks and therefore have to repeat the year of study.

### **Admission to the third year of study**

A student must pass all the modules prescribed for the second year of study with exception of SA9 for admission to the third year of study.

### **Failed candidate (third year of study)**

A student who fails any given block (i.e. examination modules), fails and will be required to repeat the third year of study. Consult also faculty regulations regarding students who fail some blocks, and thus the year of study.

### **Admission to the fourth year of study:**

A student must pass all the modules prescribed for the third year of study for admission to the fourth year of study. Consult also faculty regulations regarding students who fail certain blocks in a year, and therefore the year of study.

### **Failed candidates (fourth year of study)**

A student who fails any given block (i.e. examination modules), fails and will be required to repeat the fourth year of study. Consult also the paragraph regarding students who fail some blocks, and thus the year of study.

### **Admission to the fifth year of study:**

A student must pass all the modules prescribed for the fourth year of study for admission to the fifth year of study.

### **Fifth year of study:**

## Second semester

The Student Intern Complex (SIC) commences at the beginning of the second semester of the fifth year of study.

### Failed candidates

1. At the end of the first semester of the fifth year of study, students will sit examinations in each block in which they have not been promoted. A second examination will take place immediately after commencement of the SIC. Successful students obtain SIC status and may continue with the SIC.
2. Students who fail the examination as well as the second examination in one block or more (and therefore fail the semester) may not continue with the SIC but participate in a remedial programme, which will take place during the first seven weeks of the second semester.
3. A second examination will be granted in the outstanding blocks at the end of the seven-week period.
4. Unsuccessful completion of the morning rotations during the first semester of the fifth year of study prevents a student from promoting the relevant block(s) and examination will become compulsory.
5. If the students pass in the second examination, they may join the SIC as from the second seven-week rotation period.
6. If a student again fails the second examination, the rest of the year of study will be used as remediation. In January of the subsequent year, students may commence provisionally with the SIC, but will have to interrupt the SIC for the duration of the unsuccessful block when it is presented in the first semester. Students will then have to repeat the block. Successful students then continue with the SIC.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the Student Intern Complex rotations.

### General information

Students who will comply with all the requirements for the MBChB degree by 28 February, will receive the degree in question officially during the Autumn graduation ceremonies in April of the particular year. Students who will only comply with all the requirements for the MBChB degree during or after March, will receive the degree in question officially during the Spring graduation ceremonies in September of the particular year.

### Student interns: MBChB

#### All students

- i. At the conclusion of each seven-week rotation, an end-of-rotation evaluation (EORE) takes place in the different departments. The aim with the EORE is the identification of those students who obtain examination exemption (semester examination) and those who are not exempted and will have to sit the examination at the end of the semester. All EOREs are supported by external examiners.
- ii. The same process takes place in rotations with a duration of 3,5 weeks.
- iii. No marks are disclosed to students, only the names and/or registration numbers of the students who must sit the semester examination.
- iv. After conclusion of the semester examination (which extends over three days on dates determined beforehand), an EMM is held, with the following objectives:
  - Validation of the rotation marks as the semester examination mark, of the students who have obtained examination exemption. The rotation mark and the EORE mark contribute to the final mark.
  - Identification of the students who have passed the semester examination. The rotation mark and the semester

examination mark contribute to the final mark;

- Identification of the students who have failed the semester examination. These students are referred to Student Administration, as a new rotation division must now be followed; and
- Identification of the students who need study assistance.

### **Students who repeat rotations: MBChB**

- i. Students who repeat rotations, do the end-of-rotation evaluation (EORE) at the conclusion of the rotation that has been repeated. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the final mark.
- ii. On the first Wednesday after the conclusion of the rotation, an EMM takes place at 13:00 (or a different timeslot as arranged), to evaluate the achievement of the students, who have repeated the rotation. The objectives of this EMM are:
  - Identification of the students who pass the rotation that has been repeated (final mark of 50% or more) (maximum indicated on the form is "50H");
  - Identification of the students who fail the rotation that has been repeated. These students are referred to Student Administration, as a new rotation division must now be followed; and
  - Identification of the students who need study assistance.
- iii. The achievement of the students who have repeated a 3,5 week rotation, is discussed at the same EMM.

### **Students who are "finalists" at another time than the end of the sixth year of study: MBChB**

1. Students who repeated previous rotations successfully, and who are now "finalists", but will be doing the current rotation for the first time:
  - i. These students do the EORE just like all other students do, the objective being, as in the case with other students, to identify those who do or do not obtain, exemption from the semester examination.
  - ii. Students who obtain examination exemption after the conclusion of the EORE, thus pass the rotation automatically.
  - iii. Students who do not obtain exemption from the semester examination after the conclusion of the EORE, must therefore sit the examination at the end of the relevant semester.
  - iv. In keeping with UP regulations, these students, who are completing their studies ("finalists"), who have only one course (rotation) to complete in order to comply with all the requirements for the MBChB degree, and who have not obtained examination exemption, may apply to sit a "special examination" the following week (at a time earlier than the semester examination where applicable). This examination (which will take place at an earlier time), must preferably be scheduled for the Monday or Tuesday of the following week. The department determines the format and due to the fact that the student has already been through the external evaluation process, the presence of an external examiner at the special examination is optional, although recommended. The final mark comprises the examination mark and must be 50% or more to pass. The marks must be available by the Wednesday in order that these students' marks can be submitted to the EMM, which will be held on that day.
  - v. The objectives of the EMM for this category of students are:
    - Identification of the students who have passed the special examination. These students complete the programme, and a special mini oath-taking ceremony is arranged for them; and
    - Identification of the students who have failed the special examination. These students fail the course, must repeat the relevant rotation and must therefore be referred to Student Administration.
2. Students who are "finalists", but who are repeating the current rotation (all circumstances – previously, or at a

recent EMM, identified as having failed): MBChB

- i. These students do the EORE as all other students. The objective is to obtain a pass mark. The continuous evaluation marks and the EORE mark contribute to the rotation mark, which, in this case, is also the final mark. The mark must be 50% or more, but the maximum that will be indicated on the form, is "50H".
- ii. On the first Wednesday after the conclusion of the rotation, an EMM will be held at 13:00 (or another time slot as arranged), to evaluate the achievement of these students who are repeating the current rotation. The objectives of this EMM are:
  - Identification of the students who have passed the EORE/examination. These students thus complete the MBChB degree programme and a mini oath-taking ceremony will be arranged for them; and
  - Identification of the students who have failed the EORE/examination. These students thus fail the rotation, must repeat the relevant rotation and must therefore be referred to Student Administration.
- iii. Students in this category, who are only repeating a 3,5 week rotation, will follow the exact same route, but a unique EMM will be arranged shortly after completion of the EORE/examination. The same objectives will apply.

## Curriculum: Year 1

Minimum credits: 160

### Fundamental modules

Academic information management 111 (AIM 111) - Credits: 4.00

Academic information management 121 (AIM 121) - Credits: 4.00

Academic English for Health Sciences 111 (ELH 111) - Credits: 6.00

Academic English for Health Sciences (MBChB and BChD) 112 (ELH 112) - Credits: 6.00

Longitudinal clinic attachment programme 180 (LCP 180) - Credits: 0.00

Academic orientation 110 (UPO 110) - Credits: 0.00

### Core modules

Molecule to organism 121 (BOK 121) - Credits: 40.00

Chemistry 151 (CMY 151) - Credits: 16.00

Science and world views 155 (FIL 155) - Credits: 6.00

Orientation 120 (GNK 120) - Credits: 5.00

People and their environment 127 (GNK 127) - Credits: 10.00

Introduction to clinical pharmacotherapy 128 (GNK 128) - Credits: 10.00

People and their environment 112 (MGW 112) - Credits: 6.00

Molecular and cell biology 111 (MLB 111) - Credits: 16.00

Medical terminology 180 (MTL 180) - Credits: 12.00

Physics for biology students 131 (PHY 131) - Credits: 16.00

### Elective modules

Special study module 121 (SMO 121) - Credits: 5.00

## Curriculum: Year 2

Minimum credits: 176

### Fundamental modules

Longitudinal clinic attachment programme 280 (LCP 280) - Credits: 0.00

### Core modules

- Homeostasis 280 (BOK 280) - Credits: 42.00
- People and their environment 284 (BOK 284) - Credits: 25.00
- Pathological conditions 285 (BOK 285) - Credits: 22.00
- Infectious diseases 287 (BOK 287) - Credits: 23.00
- Introduction to clinical medicine 283 (GNK 283) - Credits: 10.00
- Basic emergency care 286 (GNK 286) - Credits: 5.00
- Anatomy (Dissection) 288 (GNK 288) - Credits: 37.00
- Generic procedural skills 280 (GPS 280) - Credits: 2.00

### Elective modules

- Special study module 211 (SMO 211) - Credits: 5.00
- Special study module 281 (SMO 281) - Credits: 5.00

### Curriculum: Year 3

Minimum credits: 198

#### Core modules

- Abdomen and mamma 380 (BOK 380) - Credits: 50.00
- Pregnancy and neonatology 382 (BOK 382) - Credits: 55.00
- Heart and blood vessels 381 (GNK 381) - Credits: 25.00
- Lungs and chest 383 (GNK 383) - Credits: 20.00
- Haematological malignancies 386 (GNK 386) - Credits: 5.00
- Elective 488 (GNK 488) - Credits: 23.00
- Generic procedural skills 380 (GPS 380) - Credits: 5.00
- Longitudinal clinic attachment programme 380 (LCP 380) - Credits: 0.00
- Special study module 311 (SMO 311) - Credits: 5.00
- Special study module 380 (SMO 380) - Credits: 5.00
- Special study module 382 (SMO 382) - Credits: 5.00

### Curriculum: Year 4

Minimum credits: 219

#### Core modules

- Genital and urinary tract diseases 480 (BOK 480) - Credits: 62.00
- Nervous system 482 (BOK 482) - Credits: 28.00
- Preceptorship 385 (GNK 385) - Credits: 10.00
- Disorders of childhood 481 (GNK 481) - Credits: 31.00
- Forensic medicine 482 (GNK 482) - Credits: 6.00
- Musculoskeletal conditions 483 (GNK 483) - Credits: 28.00
- Endocrinology 484 (GNK 484) - Credits: 6.00
- Head and neck 485 (GNK 485) - Credits: 33.00
- Ageing 486 (GNK 486) - Credits: 8.00
- Skin 487 (GNK 487) - Credits: 5.00
- Longitudinal clinic attachment programme 480 (LCP 480) - Credits: 0.00
- Special study module 411 (SMO 411) - Credits: 2.00

### Curriculum: Year 5

Minimum credits: 114

### Core modules

- Psychiatry and social dysfunction 581 (GNK 581) - Credits: 34.00
- Health and healthcare 582 (GNK 582) - Credits: 27.00
- Traumatology 583 (GNK 583) - Credits: 25.00
- Pharmacotherapy 585 (GNK 585) - Credits: 7.00
- Anaesthesiology 586 (GNK 586) - Credits: 13.00
- Forensic medicine morning rotation 587 (GNK 587) - Credits: 4.00
- Internal medicine 683 (GNK 683) - Credits: 45.00

## Postgrad Diploma/Certificate

### PGDip Dentistry Aesthetic Dentistry (10221015)

**Minimum duration of study** 1 year

#### Admission requirements

- BChD degree or an equivalent qualification.

#### Other programme-specific information

##### Contact time

The contact time in the major field of study is determined by the relevant head of department and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

#### Examinations and pass requirements

The examination in the basic subject and the main field of study may take place every semester. Examinations in both the basic subject as well as the main field of study may be written in the same semester. In order to be admitted to the examination in the main field of study the student must have passed the basic subject. A final mark of at least 50% is required to pass.

Subject to exceptions approved by the Dean, on the recommendation of the relevant head of department, a student may not enter for the postgraduate diploma's examination in the same subject more than twice.

#### Pass with distinction

The diploma is awarded with distinction to students who obtain at least 75% in both the main field of study and the basic subject.

#### Curriculum: Final year

Minimum credits: 120

##### Core modules

[Aesthetic dentistry 701](#) (ADX 701) - Credits: 100.00

##### Elective modules

[Anatomy 710](#) (ANA 710) - Credits: 20.00

[Anatomy and principles of surgery 700](#) (CBA 700) - Credits: 20.00

[Physiology 714](#) (FSG 714) - Credits: 20.00

[Applied oral biology 700](#) (MDB 700) - Credits: 20.00

[Introductory radiography 702](#) (RAD 702) - Credits: 20.00

[Ethics and jurisprudence 700](#) (RLE 700) - Credits: 30.00

[Dental materials 702](#) (THM 702) - Credits: 20.00

### PGDip Dentistry Community Dentistry (10221012)

**Minimum duration of study** 1 year

## Admission requirements

BChD degree or an equivalent qualification.

## Other programme-specific information

### Contact time

## PGDip Dentistry Prosthetics (10221008)

**Minimum duration of study** 1 year

### Admission requirements

- BChD degree or equivalent qualification

## Other programme-specific information

### Contact time

The contact time in the major field of study is determined by the relevant head of department and approved by the Dean. It includes systematic tuition as well as clinical/practical assignments.

### Examinations and pass requirements

The examination in the basic subject and the main field of study may take place every semester. Examinations in both the basic subject as well as the main field of study may be written in the same semester. In order to be admitted to the examination in the main field of study the student must have passed the basic subject. A final mark of at least 50% is required to pass.

Subject to exceptions approved by the Dean, on the recommendation of the relevant head of department, a student may not enter for the postgraduate diploma's examination in the same subject more than twice.

### Pass with distinction

The diploma is awarded with distinction to students who obtain at least 75% in both the main field of study and the basic subject.

### Curriculum: Final year

Minimum credits: 120

#### Core modules

[Prosthetics 701](#) (PTK 701) - Credits: 100.00

#### Elective modules

[Anatomy 710](#) (ANA 710) - Credits: 20.00

## PGDip Family Medicine (10220008)

**Minimum duration of study** 2 years

**Contact** Dr RPG Botha [gerhard.botha@up.ac.za](mailto:gerhard.botha@up.ac.za)

## Admission requirements

- MBChB degree or an equivalent qualification.
- South African students must be registered as a medical doctor with the Health Professions Council of South Africa.
- International students must be registered as a medical doctor with the Licensing authority in their country of origin and present acceptable documentary proof to this effect.

The doctor should be:

- Consulting ambulatory patients;
- Providing first contact medical care; and
- Working as a medical generalist.

## Other programme-specific information

Two academic years part-time study with a modularised curriculum by means of distance education. A blended approach which will involve campus-based teaching, web-based teaching and workplace-based learning will be followed.

## Examinations and pass requirements

- Assignments as prescribed by the head of department, must be submitted for each of the eight modules. If a student does not achieve at least 50%, one resubmission is permitted for each module.
- Workplace-based learning and assessment.

Learning in the workplace will be driven by peer learning and documented by means of a portfolio of learning. The portfolio of learning would need to include:

- Evidence of self-directed learning by means of six (6) monthly learning plans and reflection. The assignments will form part of the portfolio;
- Evidence of learning by means of ten (10) observations per year; and
- Evidence of learning skills by use of a logbook.

### iii. Final assessment

An annual assessment of the learning documented in the portfolio by the Department of Family Medicine. A minimum final mark of 50% is required as a pass mark for each module.

### National exit examination

There will be one national exit examination for the country offered by the College of Family Physicians. The portfolio should be part of the assessment and the portfolio will give the student access to the national exit examination. Successful candidates will receive a Higher Diploma from the College as well as a Postgraduate Diploma from the University.

### Pass with distinction

An average of at least 75% in the for the modules and the portfolio is required to obtain the diploma with distinction.

### Curriculum: Year 1

Minimum credits: 120

#### Core modules

Family-oriented patient care 700 (FFM 700) - Credits: 15.00

Chronic diseases 700 (FMD 700) - Credits: 15.00

Psychiatry 700 (FMF 700) - Credits: 15.00

Infectious diseases 700 (FMI 700) - Credits: 15.00

Practice management 700 (FMX 700) - Credits: 15.00

Philosophy and principles of family medicine 700 (HAK 700) - Credits: 15.00

Clinical primary care 700 (PCC 700) - Credits: 15.00

### PGDip General Ultrasound (10220007)

**Minimum duration of study** 2 years

**Contact** Dr HM Swanepoel [hester.swanepoel@up.ac.za](mailto:hester.swanepoel@up.ac.za) +27 (0)129972438

## Admission requirements

- MBChB degree or an equivalent qualification.
- Must be registered as a medical doctor with the Health Professions Council of South Africa.
- Due to limited resources, a selection procedure might need to be applied.

## Other programme-specific information

**Select one of the following at the end of the first semester:**

- Cardiac ultrasound
- Obstetrics
- General
- Vascular

## Examinations and pass requirements

- Students must obtain a minimum mark of 50% in all the practical assessments and assignments assigned every semester.
- A practical examination (ULT 751) will take place at the end of the two-year programme.
- The final written examination (ULT 750) takes the form of a portfolio of the continuous written assessments completed during each module.
- A minimum final mark of 50% is required in both the portfolio and the practical examination to pass.

## Pass with distinction

An average of at least 75% in all modules is required to obtain the diploma with distinction.

## Curriculum: Year 1

Minimum credits: 60

### Core modules

Applied ultrasound imaging of the body 714 (ULT 714) - Credits: 4.00

Applied ultrasound physics 715 (ULT 715) - Credits: 2.00

Applied ultrasound pathology 716 (ULT 716) - Credits: 4.00

Basic abdominal ultrasound 717 (ULT 717) - Credits: 10.00

Basic pelvic ultrasound 718 (ULT 718) - Credits: 14.00

Ultrasound of small body parts 719 (ULT 719) - Credits: 14.00

### Elective modules

Elective module: Cardiac ultrasound 726 (ULT 726) - Credits: 12.00

Elective module: Obstetrics ultrasound 727 (ULT 727) - Credits: 12.00

Elective module: General ultrasound 728 (ULT 728) - Credits: 12.00

Elective module: Vascular ultrasound 729 (ULT 729) - Credits: 12.00

## Curriculum: Final year

Minimum credits: 60

### Core modules

Abdominal ultrasound 736 (ULT 736) - Credits: 14.00

Obstetric ultrasound 737 (ULT 737) - Credits: 14.00  
Pelvic ultrasound 747 (ULT 747) - Credits: 8.00  
Final written examination 754 (ULT 754) - Credits: 0.00  
Practical examination 755 (ULT 755) - Credits: 0.00

### Elective modules

Elective module: Cardiac ultrasound 738 (ULT 738) - Credits: 12.00  
Elective module: Obstetrics ultrasound 739 (ULT 739) - Credits: 12.00  
Elective module: General ultrasound 741 (ULT 741) - Credits: 12.00  
Elective module: Vascular ultrasound 746 (ULT 746) - Credits: 12.00  
Elective module: Cardiac ultrasound 748 (ULT 748) - Credits: 12.00  
Elective module: Obstetrics ultrasound 749 (ULT 749) - Credits: 12.00  
Elective module: General ultrasound 752 (ULT 752) - Credits: 12.00  
Elective module: Vascular ultrasound 753 (ULT 753) - Credits: 12.00

## PGDip Hand Therapy (10220012)

**Minimum duration of study** 1 year

### Programme information

The programme extends over one academic year and is presented in four blocks. (The number of blocks and duration may be adjusted after consultation between the lecturers and students.)

**Note:** Commencement of studies must be discussed with the head of department, as the programme is presented every second year.

### Admission requirements

- BOccTher degree or an equivalent qualification, or the BPhysio degree or an equivalent qualification.
- Registration as an Occupational Therapist/Physiotherapist with the Health Professions Council of South Africa (HPCSA).
- A student must fill at least a part-time post regarded by the head of department as appropriate for the field of study in question.

### Additional requirements

### Examinations and pass requirements

#### (i) Pass requirements

In the case of a written and oral/practical examination, a subminimum of 50% is required in each of the written as well as the oral/practical sections of the examination, with a final mark (continuous evaluation mark and examination mark) of at least 50% to pass in a module.

#### (ii) Admission to the examination

Students must have attended all practicals and submitted all assignments, failing which admission to the examination will not be granted.

#### (iii) Second examination

The dates for second examinations are arranged in consultation with the head of department, with the proviso that this will take place not later than the next examination period.

### Pass with distinction

The diploma is awarded with distinction to a student who obtains at least 75% in (ADM 701) Advanced clinical management in hand therapy 701, and an average of at least 75% in the other modules.

### Curriculum: Final year

Minimum credits: 120

#### Core modules

Anatomy 702 (AAN 702) - Credits: 10.00

Advanced clinical management in hand therapy 702 (ADM 702) - Credits: 50.00

Biomechanics and ergonomics 702 (BEX 702) - Credits: 10.00

Physiology and pathophysiology 702 (FIP 702) - Credits: 10.00

Clinical skills in hand therapy 702 (KVH 702) - Credits: 40.00

### PGDip Health Systems Management Executive Leadership (10220001)

**Minimum duration of study** 2 years

#### Programme information

A curriculum comprises prescribed modules and/or a research report compiled in conjunction with the head of department or Chairperson of the School. Details regarding the curriculum and syllabuses are published in a brochure which is available on request from the relevant department or School.

Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, register simultaneously for Part I and Part II of a diploma which extends over two academic years.

#### Admission requirements

- Four-year bachelor's degree; plus at least two years' applicable practical (work) experience; or
- An honours degree; or
- A three-year bachelor's degree plus at least five years' applicable practical (work) experience

#### Additional requirements

##### Registration as a special student in the Faculty in order to pass a status examination

(i) Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

#### NB:

• In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval.

• All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

(ii) Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.

(iii) The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

**Other selection criteria** (Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community building, etc.

## Additional requirements

### Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

#### **NB:**

In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval. All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

### ii. Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.

iii. The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

### Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

## Examinations and pass requirements

Students must attend all lectures and practical classes to the satisfaction of the head of department or the Chairperson of the School before they will be admitted to the examinations. Written, oral and/or practical examinations must be passed in all the modules. All diploma programme summative assessments will be externally moderated.

The minimum pass mark for prescribed modules and the summative assessment is 50%.

Only with the approval of the Chairperson of the School, on the recommendation of the relevant head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

A second examination in a module (including the diploma-specific summative assessment) is arranged in conjunction with the relevant head of department.

## Pass with distinction

A diploma is awarded with distinction to a student who has obtained a mark of at least 75% for the externally moderated assessment component as well as a simple (unweighted) average of at least 75% of all the marks for the other required modules for the relevant diploma; excluding PHM 870 Learning in public health 870.

## General information

### Concurrent registration for two study programmes

- i. In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- ii. In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.
- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

## Curriculum: Year 1

Minimum credits: 120

### Core modules

Research report 772 (AHM 772) - Credits: 30.00

Complex problem-solving and negotiating, coherence and coordination 771 (CCC 771) - Credits: 10.00

Ethics and values in healthcare, organisational behaviour change and strategy in health 771 (EOC 771) - Credits: 10.00

Health system and transformation policy (political analysis, strategy and finance options) 771 (HPF 771) - Credits: 10.00

Health systems re-engineering including public sector centralisation and decentralisation 771 (HSR 771) - Credits: 10.00

Executive leadership in health (including responsible leadership) 771 (LHE 771) - Credits: 10.00

Learning in public health 778 (PHM 778) - Credits: 5.00

### Elective modules

Strategic human resources and management performance 772 (HRM 772) - Credits: 10.00

Health informatics, monitoring and evaluation 772 (MEH 772) - Credits: 10.00

Policy practice seminar 771 (PPS 771) - Credits: 5.00

Implementation of quality improvement modalities (strategies) in the health system 772 (QIM 772) - Credits: 10.00

Strategic financial management in health 771 (SFM 771) - Credits: 10.00

Strategic marketing (and communication) in health 771 (SMH 771) - Credits: 5.00

- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

## Curriculum: Year 1

Minimum credits: 80

### Core modules

- Research project: Occupational health 771 (AOH 771) - Credits: 30.00
- Health risk assessment 774 (EHM 774) - Credits: 10.00
- Introduction to environmental and occupational health 776 (EOH 776) - Credits: 10.00
- Occupational health law 773 (HCL 773) - Credits: 10.00
- Clinical skills in occupational medicine 774 (OCM 774) - Credits: 5.00
- Diploma examination: Occupational health (Part 1) 776 (PHM 776) - Credits: 0.00
- Diploma examination: Occupational health (Part 2) 777 (PHM 777) - Credits: 0.00
- Learning in public health 778 (PHM 778) - Credits: 5.00
- Human resource management and industrial sociology 773 (SCM 773) - Credits: 10.00

### Curriculum: Final year

Minimum credits: 40

### Core modules

- Managing occupational health services 773 (HCM 773) - Credits: 10.00
- Primary epidemiology 774 (HME 774) - Credits: 10.00
- Principles of occupational medicine 772 (OCM 772) - Credits: 10.00
- Principles of occupational hygiene and toxicology 771 (OHT 771) - Credits: 10.00
- Diploma examination: Occupational health (Part 1) 776 (PHM 776) - Credits: 0.00
- Diploma examination: Occupational health (Part 2) 777 (PHM 777) - Credits: 0.00

## PGDip Tropical Medicine and Health (10220000)

**Minimum duration of study** 2 years

### Programme information

This diploma programme extends over two academic years. Students may, with the approval of the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health, offer it over one year.

### Admission requirements

- MBChB degree or an equivalent qualification with a completed internship of at least one year, plus professional (work) experience (post-internship) of at least one year that is regarded as applicable by the Head of the Department of Public Health Medicine or the Chairperson of the School of Health Systems and Public Health.

### Examinations and pass requirements

Students must attend all lectures and practical classes to the satisfaction of the head of department or the Chairperson of the School before they will be admitted to the examinations. Written, oral and/or practical examinations must be passed in all the modules. All diploma programme summative assessments will be externally moderated. The minimum pass mark for prescribed modules and the summative assessment is 50%. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice). A second examination in a module (including the diploma-specific summative assessment) is arranged in conjunction with the head of department.

## Pass with distinction

A diploma is awarded with distinction to a student who has obtained a mark of at least 75% for the externally moderated assessment component as well as a simple (unweighted) average of at least 75% of all the marks for the other required modules for the relevant diploma.

## General information

### Concurrent registration for two study programmes

- i. In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- ii. In the case of registering concurrently for two study programmes in the School of Health Systems and Public Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.
- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

## Curriculum: Year 1

Minimum credits: 120

### Core modules

- Principles of communicable disease control 777 (CDC 777) - Credits: 10.00
- Seminars in tropical health (Agent) 778 (CDC 778) - Credits: 10.00
- Seminars in tropical health (Environment) 779 (CDC 779) - Credits: 10.00
- Seminars in tropical health (Host) 780 (CDC 780) - Credits: 10.00
- Tropical health examination 784 (CDC 784) - Credits: 0.00
- Case studies in tropical medicine and health 785 (CDC 785) - Credits: 30.00
- Research report 786 (CDC 786) - Credits: 30.00
- Clinical tropical medicine 771 (CDS 771) - Credits: 5.00
- Investigating outbreaks 775 (CDS 775) - Credits: 10.00
- Learning in public health 778 (PHM 778) - Credits: 5.00

## Curriculum: Final year

Minimum credits: 120

### Core modules

- Principles of communicable disease control 777 (CDC 777) - Credits: 10.00
- Seminars in tropical health (Agent) 778 (CDC 778) - Credits: 10.00
- Seminars in tropical health (Environment) 779 (CDC 779) - Credits: 10.00
- Seminars in tropical health (Host) 780 (CDC 780) - Credits: 10.00
- Tropical health examination 784 (CDC 784) - Credits: 0.00
- Case studies in tropical medicine and health 785 (CDC 785) - Credits: 30.00
- Research report 786 (CDC 786) - Credits: 30.00
- Clinical tropical medicine 771 (CDS 771) - Credits: 5.00
- Investigating outbreaks 775 (CDS 775) - Credits: 10.00
- Learning in public health 778 (PHM 778) - Credits: 5.00

## PGDip Vocational Rehabilitation (10220009)

**Minimum duration of study** 1 year

### Programme information

Please Note: Commencement of studies must be discussed with the head of department, as the programme is presented every second year.

### Admission requirements

- BOccTher degree or an equivalent qualification.
- Registration as an Occupational Therapist with the Health Professions Council of South Africa (HPCSA).
- A student must fill at least a part-time post regarded by the head of department as appropriate for the field of study in question.

### Examinations and pass requirements

The sequence of the examinations in the prerequisite subjects will be determined by the head of the department, depending on the candidate's choice of a major subject.

### Pass with distinction

The diploma is awarded with distinction to a student who has obtained an average of at least 75% in all the subjects.

### Curriculum: Final year

Minimum credits: 120

#### Core modules

- Vocational rehabilitation 701 (BRH 701) - Credits: 30.00
- Financial administration 703 (FIA 703) - Credits: 30.00
- Groups in occupational therapy 702 (GRA 702) - Credits: 30.00
- Work study 702 (WSD 702) - Credits: 30.00

## Honours

### **BRadHons Diagnostics (10247015)**

**Minimum duration of study** 1 year

#### **Admission requirements**

- The BRad degree, the Bachelor in Technology: Radiography or an equivalent qualification in the relevant field of specialisation.
- The candidate must have access to equipment and patients in a healthcare facility approved by the Department, for the purpose of undertaking work-integrated learning associated with the programme in which the student will be registered.
- The candidate must be registered as radiographer with the Health Professions Councils of South Africa (HPCSA) (for candidates who are South African Citizens).
- International students will be registered with the HPCSA as postgraduate students.
- Admission is subject to the approval of the head of department: with the proviso that a candidate must have obtained an average of more than 60% in the modules of his or her final year of the bachelor's degree study.
- Candidates who do not meet this requirement will be expected to pass the BRadHons bridging programme as stipulated by the Department.
- Successful completion of a research methodology module with a minimum credit weighting of 16 credits in the prerequisite degree.

#### **Additional requirements**

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

#### **Examinations and pass requirements**

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

#### **Pass with distinction**

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

#### **Curriculum: Final year**

Minimum credits: 120

##### **Fundamental modules**

[Anatomical pathology 703 \(ANP 703\)](#) - Credits: 5.00

[Research principles 700 \(NVB 700\)](#) - Credits: 5.00

[Radiographic anatomy 700 \(RAN 700\)](#) - Credits: 20.00

##### **Core modules**

[Research report: Radiography 700 \(RSK 700\)](#) - Credits: 30.00

### Elective modules

- Quality assurance 780 (RAW 780) - Credits: 20.00
- Image interpretation 781 (RAW 781) - Credits: 20.00
- Computer tomography 782 (RAW 782) - Credits: 20.00
- Magnetic resonance imaging 783 (RAW 783) - Credits: 20.00
- Intervention 784 (RAW 784) - Credits: 20.00

## **BRadHons Nuclear Medicine (10247013)**

**Minimum duration of study** 1 year

### Programme information

Students who did not register at undergraduate level (i.e. from the second year of study) in Nuclear Medicine, register according to this curriculum.

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

### Admission requirements

- The BRad degree, the Bachelor in Technology: Radiography or an equivalent qualification in the relevant field of specialisation.
- The candidate must have access to equipment and patients in a healthcare facility approved by the Department, for the purpose of undertaking work-integrated learning associated with the programme in which the student will be registered.
- The candidate must be registered as radiographer with the Health Professions Councils of South Africa (HPCSA) (for candidates who are South African Citizens).
- International students will be registered with the HPCSA as postgraduate students.
- Admission is subject to the approval of the head of department: with the proviso that a candidate must have obtained an average of more than 60% in the modules of his or her final year of the bachelor's degree study.
- Candidates who do not meet this requirement will be expected to pass the BRadHons bridging programme as stipulated by the Department.
- Successful completion of a research methodology module with a minimum credit weighting of 16 credits in the prerequisite degree.

### Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

### Curriculum: Final year

Minimum credits: 120

## Fundamental modules

Research principles 700 (NVB 700) - Credits: 5.00

## Core modules

Nuclear medicine 701 (KDE 701) - Credits: 25.00

Radiochemistry and pharmacology 700 (RCF 700) - Credits: 20.00

Research report: Radiography 700 (RSK 700) - Credits: 30.00

Radiation physics and instrumentation for nuclear medicine 700 (SFI 700) - Credits: 15.00

Theory of nuclear medicine 710 (TKG 710) - Credits: 25.00

## BRadHons Nuclear Medicine (10247016)

**Minimum duration of study** 1 year

## Programme information

Students who specialised at undergraduate level (i.e. from the second year of study) in Nuclear Medicine, register according to this curriculum.

## Admission requirements

- The BRad degree, the Bachelor in Technology: Radiography or an equivalent qualification in the relevant field of specialisation.
- The candidate must have access to equipment and patients in a healthcare facility approved by the Department, for the purpose of undertaking work-integrated learning associated with the programme in which the student will be registered.
- The candidate must be registered as radiographer with the Health Professions Councils of South Africa (HPCSA) (for candidates who are South African Citizens).
- International students will be registered with the HPCSA as postgraduate students.
- Admission is subject to the approval of the head of department: with the proviso that a candidate must have obtained an average of more than 60% in the modules of his or her final year of the bachelor's degree study.
- Candidates who do not meet this requirement will be expected to pass the BRadHons bridging programme as stipulated by the Department.
- Successful completion of a research methodology module with a minimum credit weighting of 16 credits in the prerequisite degree.

Additional requirements

- All students must register for NVB 700 Research principles.

## Additional requirements

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

## Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

## Curriculum: Final year

Minimum credits: 120

### Fundamental modules

Research principles 700 (NVB 700) - Credits: 5.00

### Core modules

Instrumentation 700 (INX 700) - Credits: 25.00

Nuclear medicine 700 (KDE 700) - Credits: 30.00

Radiopharmacology 700 (RDF 700) - Credits: 30.00

Research report: Radiography 700 (RSK 700) - Credits: 30.00

## BRadHons Radiation Therapy (10247012)

**Minimum duration of study** 1 year

## Programme information

Students who did not register at undergraduate level (i.e. from the second year of study) in Radiation Therapy, register according to this curriculum.

## Admission requirements

- The BRad degree, the Bachelor in Technology: Radiography or an equivalent qualification in the relevant field of specialisation.
- The candidate must have access to equipment and patients in a healthcare facility approved by the Department, for the purpose of undertaking work-integrated learning associated with the programme in which the student will be registered.
- The candidate must be registered as radiographer with the Health Professions Councils of South Africa (HPCSA) (for candidates who are South African Citizens).
- International students will be registered with the HPCSA as postgraduate students.
- Admission is subject to the approval of the head of department: with the proviso that a candidate must have obtained an average of more than 60% in the modules of his or her final year of the bachelor's degree study.
- Candidates who do not meet this requirement will be expected to pass the BRadHons bridging programme as stipulated by the Department.
- Successful completion of a research methodology module with a minimum credit weighting of 16 credits in the prerequisite degree.

Additional requirements

- All students must register for NVB 700 Research principles.

## Additional requirements

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

## Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

## Curriculum: Final year

Minimum credits: 120

### Fundamental modules

Research principles 700 (NVB 700) - Credits: 5.00

### Core modules

Radiotherapeutic dosage planning 700 (RDB 700) - Credits: 35.00

Research report: Radiography 700 (RSK 700) - Credits: 30.00

Radiation therapy 701 (RSZ 701) - Credits: 35.00

Radiation physics and radiation protection 700 (SFR 700) - Credits: 15.00

## BRadHons Radiation Therapy (10247014)

**Minimum duration of study** 1 year

## Programme information

Students who specialised at undergraduate level (i.e. from the second year of study) in Radiation Therapy, register according to this curriculum.

## Admission requirements

- The BRad degree, the Bachelor in Technology: Radiography or an equivalent qualification in the relevant field of specialisation.
- The candidate must have access to equipment and patients in a healthcare facility approved by the Department, for the purpose of undertaking work-integrated learning associated with the programme in which the student will be registered.
- The candidate must be registered as radiographer with the Health Professions Councils of South Africa (HPCSA) (for candidates who are South African Citizens).
- International students will be registered with the HPCSA as postgraduate students.
- Admission is subject to the approval of the head of department: with the proviso that a candidate must have obtained an average of more than 60% in the modules of his or her final year of the bachelor's degree study.
- Candidates who do not meet this requirement will be expected to pass the BRadHons bridging programme as stipulated by the Department.
- Successful completion of a research methodology module with a minimum credit weighting of 16 credits in the prerequisite degree.

## Additional requirements

- All students must register for NVB 700 Research principles.

## Additional requirements

All students must register for NVB 700 Research principles.

Also consult the General Regulations.

## Examinations and pass requirements

Second examinations may be granted in modules not passed, according to the stipulations of the School of Healthcare Sciences in this regard.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules for the degree.

## Curriculum: Final year

Minimum credits: 120

### Fundamental modules

Research principles 700 (NVB 700) - Credits: 5.00

### Core modules

Dosage planning 700 (DSB 700) - Credits: 30.00

Oncological behavioural sciences 700 (OKG 700) - Credits: 25.00

Research report: Radiography 700 (RSK 700) - Credits: 30.00

Radiation therapy 700 (RSZ 700) - Credits: 30.00

## BScHons Aerospace Medicine (10244024)

**Minimum duration of study**                      2 years

## Programme information

The following requirements are set:

- Advanced instruction by means of self-tuition, lectures and seminars.
- Students must pass the module TNM 700 Applied research methodology 700.
- Students must pass the module PHM 770 Learning in public health 770.
- Students must pass a research report (or project) that carries at least 30 credits.

## Admission requirements

- Candidates must have an MBChB or equivalent degree deemed acceptable by the head of the department.
- Candidates must be registered Aviation Medical Examiners.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

## Additional requirements

- Candidates must have an MBChB or equivalent degree deemed acceptable by the head of the department.
- Candidates must be registered Aviation Medical Examiners.

## Examinations and pass requirements

- i. The individual modules in each field of study must all be passed with a mark of at least 50% in each module, before a student may graduate in that field of study.
- ii. Each field of study has a specified, externally moderated, summative assessment that must also be passed before the student may graduate.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the summative assessment, as well as an average of at least 75% for the remaining components of the curriculum (i.e. excluding the summative assessment mark).

## Curriculum: Final year

Minimum credits: 120

The contact time for the research component LRG701 will comprise 16 hours during the 3 contact weeks.

This honours degree cannot be completed in less than two (2) years.

## Core modules

Primary epidemiology 773 (HME 773) - Credits: 10.00

Aerospace medicine 700 (LRG 700) - Credits: 75.00

Research report: Aerospace medicine 701 (LRG 701) - Credits: 30.00

Learning in public health 773 (PHM 773) - Credits: 5.00

Applied research methodology 700 (TNM 700) - Credits: 0.00

## BScHons Anatomy (10243004)

**Minimum duration of study** 1 year

**Contact** Prof MC Bosman [s73072843@tuks.co.za](mailto:s73072843@tuks.co.za) +27 (0)123192233

## Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 700) Applied research methodology 700.
- Successful completion of the prescribed module (MBS 700) Medical biostatistics 700.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

### Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

### Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.
- iv. Also consult General Regulation G.18 regarding Renewal of registration.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

### Curriculum: Final year

Minimum credits: 124

#### Core modules

Human osteology 122 (ANA 122) - Credits: 4.00

Anatomy 700 (ANA 700) - Credits: 100.00

Medical biostatistics 700 (MBS 700) - Credits: 20.00

Applied research methodology 700 (TNM 700) - Credits: 0.00

### BScHons Biokinetics (10243025)

**Minimum duration of study** 1 year

**Contact** Prof PS Wood [paola.wood@up.ac.za](mailto:paola.wood@up.ac.za) +27 (0)124206046

## Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and compulsory seminars on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

## Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

## Examinations and pass requirements

- i. The examinations in the programme will consist of written papers of three hours in each subject, practical examinations of one hour, as well as an oral examination of 30 minutes.
- ii. The maximum period for completion of the honours degree, is two years in the case of full-time students and three years in the case of part-time students. In exceptional circumstances, a student may apply, in writing, to the head of department for an extension of the period of study.
- iii. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

## Curriculum: Final year

Minimum credits: 120

### Core modules

[Biokinetics clinical practice II 718 \(MBK 718\)](#) - Credits: 40.00

[Clinical exercise physiology 719 \(MBK 719\)](#) - Credits: 25.00

[Biokinetics 721 \(MBK 721\)](#) - Credits: 25.00

Research III 702 (NMR 702) - Credits: 30.00

## BScHons Cell Biology (10244052)

- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 700) Applied research methodology 700.
- Successful completion of the prescribed module (MBS 700) Medical biostatistics 700.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

## Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

## Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.
- iv. Also consult General Regulation G.18 regarding Renewal of registration.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

## Curriculum: Final year

Minimum credits: 120

### Core modules

[Chemical pathology 700](#) (CHP 700) - Credits: 100.00

[Medical biostatistics 700](#) (MBS 700) - Credits: 20.00

## BScHons Environmental Health (10244026)

**Minimum duration of study** 1 year

### Programme information

The following requirements are set:

- Advanced instruction by means of self-tuition, lectures and seminars.
- Students must pass the module TNM 700 Applied research methodology 700.
- Students must pass the module PHM 770 Learning in public health 770.
- Students must pass a research report (or project) that carries at least 30 credits.

### Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study, or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study, may be admitted only with the Dean's approval, on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

### Other programme-specific information

Students who want to specialise in environmental health need to enrol for ENV 785 and GGY 789 to replace EOH 771 and EOH 772.

### Examinations and pass requirements

- i. The individual modules in each field of study must all be passed with a mark of at least 50% in each module, before a student may graduate in that field of study.
- ii. Each field of study has a specified, externally moderated, summative assessment that must also be passed before the student may graduate.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the summative assessment, as well as an average of at least 75% for the remaining components of the curriculum (i.e. excluding the summative assessment mark).

### Curriculum: Final year

Minimum credits: 120

#### Core modules

Research project: Occupational health 772 (AOH 772) - Credits: 30.00

Basis in environmental health 772 (EHM 772) - Credits: 5.00  
Health risk assessment 773 (EHM 773) - Credits: 10.00  
Environmental assessments 785 (ENV 785) - Credits: 15.00  
Environmental health examination 774 (EOH 774) - Credits: 0.00  
Introduction to environmental and occupational health 775 (EOH 775) - Credits: 10.00  
Environmental change 789 (GGY 789) - Credits: 15.00  
Occupational health law 772 (HCL 772) - Credits: 10.00  
Managing occupational health services 775 (HCM 775) - Credits: 10.00  
Principles of occupational hygiene and toxicology 772 (OHT 772) - Credits: 10.00  
Learning in public health 773 (PHM 773) - Credits: 5.00  
Applied research methodology 700 (TNM 700) - Credits: 0.00

## BScHons Haematology (10244062)

### Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At minimum average of 60% in the final year (undergraduate) in Physiology.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

### Additional requirements

A minimum average of 60% in the final year (undergraduate) in Physiology.

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

## Examinations and pass requirements

An average of at least 50% in all the sections of the module MFG 777 is required in order to pass (see syllabi). A minimum continuous evaluation mark of 40% is required for admission to the examination. The continuous evaluation mark is compiled from an average of 3 tests (50%), seminars and discussions on journals (25%), and project and presentation (25%). TNM 700 must be satisfactorily attended and MBS 700 must be completed successfully before the degree will be conferred.

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.
- iv. Also consult General Regulation G.18 regarding Renewal of registration.

Also consult General Regulations.

## Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply *mutatis mutandis* to essays.
- iv. Also consult General Regulation G.18 regarding Renewal of registration.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

## Curriculum: Final year

Minimum credits: 120

### Core modules

Medical criminalistics 700 (KRT 700) - Credits: 100.00

Medical biostatistics 700 (MBS 700) - Credits: 20.00

Applied research methodology 700 (TNM 700) - Credits: 0.00

## BScHons Medical Immunology (10243172)

**Minimum duration of study** 1 year

## Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 700) Applied research methodology 700.
- Successful completion of the prescribed module (MBS 700) Medical biostatistics 700.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

## Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

## Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well

- as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
  - iii. ## Other programme-specific information

Modules to be taken in the Department of Physics, Faculty of Natural and Agricultural Sciences:

- FSK 710 Mathematical methods 710
- FSK 711 Classical dynamics 711
- FSK 713 Quantum mechanics 713
- FSK 714 Electrodynamics 714

Modules to be taken in the School of Medicine:

- GNF 700 Medical physics: Practical work 700
- GNF 701 Medical physics: Nuclear medicine 701
- GNF 702 Medical physics: Diagnostic radiology 702
- GNF 703 Medical physics: Radiation physics 703
- GNF 704 Medical physics: Radiotherapy 704
- GNF 705 Medical physics: Radiation protection 705

## Examinations and pass requirements

- The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.

## BScHons Occupational Hygiene (10244025)

**Minimum duration of study**                      1 year

## Programme information

The following requirements are set:

- Advanced instruction by means of self-tuition, lectures and seminars.
- Students must pass the module TNM 700 Applied research methodology 700.
- Students must pass the module PHM 770 Learning in public health 770.
- Students must pass a research report (or project) that carries at least 30 credits.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.

- Additional requirements may be set by the head of department.

## Examinations and pass requirements

- The individual modules in each field of study must all be passed with a mark of at least 50% in each module, before a student may graduate in that field of study.
- Each field of study has a specified, externally moderated, summative assessment that must also be passed before the student may graduate.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the summative assessment, as well as an average of at least 75% for the remaining components of the curriculum (i.e. excluding the summative assessment mark).

## Curriculum: Final year

Minimum credits: 120

### Core modules

Research project: Occupational health 772 (AOH 772) - Credits: 30.00

Basis in environmental health 772 (EHM 772) - Credits: 5.00

Health risk assessment 773 (EHM 773) - Credits: 10.00

Environmental and occupational hygiene measuring techniques 771 (EOH 771) - Credits: 20.00

Occupational health and safety legislation in South Africa 772 (EOH 772) - Credits: 10.00

Occupational hygiene examination 773 (EOH 773) - Credits: 0.00

Introduction to environmental and occupational health 775 (EOH 775) - Credits: 10.00

Occupational health law 772 (HCL 772) - Credits: 10.00

Managing occupational health services 775 (HCM 775) - Credits: 10.00

Principles of occupational hygiene and toxicology 772 (OHT 772) - Credits: 10.00

Learning in public health 773 (PHM 773) - Credits: 5.00

Applied research methodology 700 (TNM 700) - Credits: 0.00

## BScHons Pharmacology (10243162)

**Minimum duration of study** 1 year

**Contact** Prof AD Cromarty [duncan.cromarty@up.ac.za](mailto:duncan.cromarty@up.ac.za) +27 (0)123192622

## Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 700) Applied research methodology 700.
- Successful completion of the prescribed module (MBS 700) Medical biostatistics 700.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- A minimum average of 60% in Pharmacology at undergraduate level.
- In addition, the modules (FAR 381, 382) Pharmacology 381, 382 must be completed at the Department of Pharmacology, if not completed at undergraduate level.
- Exemption from the examination in FAR 381, 382 may be granted if a student, who obtained a module mark of at least 60%, exercises the option to accept this as the final mark.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

## Additional requirements

A minimum average of 60% in Pharmacology at undergraduate level.

In addition, the modules (FAR 381, 382) Pharmacology 381, 382 must be completed at the Department of Pharmacology, if not completed at undergraduate level.

Exemption from the examination in FAR 381, 382 may be granted if a student, who obtained a module mark of at least 60%, exercises the option to accept this as the final mark.

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- ii. For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- iii. To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.
- iv. Also consult General Regulation G.18 regarding Renewal of registration.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

## Curriculum: Final year

Minimum credits: 120

### Core modules

Pharmacology 705 (FAR 705) - Credits: 100.00

Medical biostatistics 700 (MBS 700) - Credits: 20.00

Applied research methodology 700 (TNM 700) - Credits: 0.00

### Elective modules

Pharmacology 381 (FAR 381) - Credits: 18.00

Pharmacology 382 (FAR 382) - Credits: 18.00

## BScHons Physical Anthropology (10243009)

**Minimum duration of study** 1 year

**Contact** Prof EN L' Abbé [ericka.labbe@up.ac.za](mailto:ericka.labbe@up.ac.za) +27 (0)123192438

### Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 700) Applied research methodology 700.
- Successful completion of the prescribed module (MBS 700) Medical biostatistics 700.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

### Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.
- Only students who intend to specialise in Physical Anthropology may, in addition to the requirements as set out above, also apply for admission, provided that they are in possession of a BA degree with Archaeology as major subject.
- A minimum average of 60% in the modules of the major subjects in the final year of study is required.
- The module (ANA 122) Human osteology 122 must be taken additionally.

### Additional requirements

- Only students who intend to specialise in Physical Anthropology may, in addition to the requirements as set out above, also apply for admission, provided that they are in possession of a BA degree with Archaeology as major subject.
- A minimum average of 60% in the modules of the major subjects in the final year of study, is required.

- The module (ANA 122) Human osteology 122 must be taken additionally.

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

## Examinations and pass requirements

- The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.
- For the field of specialisation Medical Physics, one examination of three hours is required in each of the theoretical modules. The mark awarded to the practical work will also be taken into account when the final mark is calculated.
- To comply with the pass requirements for the degree, a student must obtain a final mark of at least 50% in each division as indicated, as well as a pass mark of at least 50% for the essay/work assignment (if applicable). The stipulations regarding pass requirements for dissertations in the General Regulations apply mutatis mutandis to essays.
- Also consult General Regulation G.18 regarding Renewal of registration.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination (written, oral, practical, etc).

## Curriculum: Final year

Minimum credits: 120

### Core modules

Physical anthropology 715 (ANA 715) - Credits: 100.00

Medical biostatistics 700 (MBS 700) - Credits: 20.00

Applied research methodology 700 (TNM 700) - Credits: 0.00

## BScHons Radiation Oncology (10243144)

**Minimum duration of study** 1 year

**Contact** Mr MR Mlambo [roy.mlambo@up.ac.za](mailto:roy.mlambo@up.ac.za) +27 (0)123541033

## Programme information

The following requirements are set for completing the programme:

- Advanced instruction by means of self-tuition and four compulsory seminars of which at least one must be read to and defended before the department in question, on topics assigned to the student.
- Practical experience of the laboratory techniques used in the particular subsections of the subject.
- Attendance at the compulsory faculty module (TNM 700) Applied research methodology 700.
- Successful completion of the prescribed module (MBS 700) Medical biostatistics 700.
- Taking part in a research project and presentation of an independent research report.
- Satisfactory attendance at a library-user course.

## Admission requirements

- A bachelor's degree deemed acceptable by the head of department for the proposed field of study or an equivalent qualification deemed acceptable by the Senate of the University for the proposed field of study.
- At least one applicable biological subject as major subject.
- Admission is subject to the approval of the head of department: with the proviso that a candidate who has obtained an average of less than 60% in the modules of his or her major subject in the final year of the bachelor's degree study may be admitted only with the Dean's approval on the recommendation of the head of department.
- Additional requirements may be set by the head of department.

## Additional requirements

The prerequisites for admission to the honours degree in certain fields of study are indicated in the syllabuses of the specific department.

Also consult General Regulations.

## Examinations and pass requirements

- i. The examination at the end of the programme will consist of two written papers of three hours each as well as an oral examination of 30 minutes.

## Master's

### MChD Community Dentistry (10252050)

**Minimum duration of study** 4 years

#### Admission requirements

- BChD degree of the University of Pretoria or an equivalent qualification, or a qualification deemed equivalent and acceptable by the Senate of the University.
- Registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.

#### Other programme-specific information

Additionally, the Diploma in Health Systems Management must be attended and passed on a capita selecta basis, or any other management course as determined by the head of department and approved by the Dean.

#### Examinations and pass requirements

##### i. Examinations in the basic subjects

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
- b. Examinations in the basic subjects must be passed before the end of the third year of study, or at a time as determined by the head of department.
- c. The Diploma in Health Systems Management offered by the School of Health Systems and Public Health must be attended and passed.

##### ii. Examinations in the major subject

- a. Admission to the examination in the major subject is determined by the head of department.
- b. The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.

Also consult the General Regulations.

##### i. Examinations in the basic and subsidiary subjects (with the exception of KGM 803):

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
- b. Examinations in the basic and subsidiary subjects must be passed before the end of the third year of study, or at a time as determined by the relevant head of department.

ii. **Examinations in the major subject:** Admission to the examination in the major subject is determined by the relevant head of department.

iii. If a student fails one or more of the basic subjects, subsidiary subjects or the major subject, the relevant head of department may recommend to the examination moderating meeting, that he or she be admitted to a supplementary examination. A student who has been admitted to a second examination in a basic subject

must write the examination during the next examination period. Second examinations in the major subject may only take place after a minimum period of six months has elapsed since the examination in which the student failed.

**NB:**

- a. In view of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination will have to discontinue the programme. In this event, a student who has been holding a registrarship, will have to vacate the position as soon as possible after one calendar month's notice to the University of Pretoria and/or other recognised training institution, where applicable.
- b. If a student is admitted to a second examination in the major subject, the relevant head of department will determine whether he/she has to vacate the registrarship at the end of the training period, or immediately after the second examination.
- iv. **Subminimum:** In order to pass in the major subject a student must obtain a subminimum of 50% in all the sections of the examination, with a final mark of at least 50%.
- v. The stipulations of the General Regulations are applicable with regard to attendance courses.
- vi. In addition to the stipulations already mentioned, a dissertation on a topic related to the major subject must also be submitted. In order to pass in the final examination, a pass mark must also be obtained for the dissertation.

## Exemption

Exemption may be granted by the Dean, on the recommendation of the relevant head of department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

**Please note:** The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

## Practical/clinical/internship information

Practical training is provided at recognised institutions.

## Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

An MChD student, who has obtained at least 75% with the first attempt in both his major subject and the dissertation, will receive the degree with distinction.

## Curriculum: Year 1

### Core modules

Biostatistics (1) 870 (BOS 870) - Credits: 10.00

Ethics and human rights 800 (EHR 800) - Credits: 0.00

Community dentistry 800 (GTH 800) - Credits: 24.00

Dissertation: Community dentistry 891 (GTH 891) - Credits: 180.00

Epidemiology 1 870 (HME 870) - Credits: 10.00

Applied oral pathology 801 (TMP 801) - Credits: 24.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Biostatistics (1) 870 (BOS 870) - Credits: 10.00
- Ethics and human rights 800 (EHR 800) - Credits: 0.00

## MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med) (10252081)

**Minimum duration of study** 6 years

### Admission requirements

- BChD degree of the University of Pretoria or an equivalent qualification, or a qualification deemed equivalent and acceptable by the Senate of the University.
- Registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.

#### Additional requirements

- Second year of study: The student must also register for the BChD degree and apply for registration as a student in Dentistry with the Health Professions Council of South Africa.

### Additional requirements

**Second year of study:** The student must also register for the MBChB degree and must apply for registration as a student in Medicine with the Health Professions Council of South Africa.

## Other programme-specific information

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).

## Examinations and pass requirements

### i. Examinations in the basic subjects

A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

### ii. Examinations in the subsidiary (intermediary) subjects

(The minimum pass mark is 50%.)

- For the endorsement Maxillofacial Surgery-Medicus, a student has to pass in Principles of surgery in the year of study as indicated, before he or she may continue with the programme.
- A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject.

These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

- If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the relevant head of department may recommend that he or she be admitted to a second examination.

### iv. Examination and evaluation in the major subject

- If a student fails his or her major subject, the student has to reapply for admission to the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.
- In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination, will have to discontinue the programme.
- If a student has been admitted to a second examination in the major subject, the relevant head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student has to vacate the registrarship immediately after the second examination has been completed.
- Subminimum: A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the relevant head of department. A final mark of at least 50% is required in order to pass in a subject.
- In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation

(endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a manuscript as required (see also the General Regulations). A complete record of operations (as a logbook) must also be submitted.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

## Exemption

Exemption may be granted by the Dean, on the recommendation of the relevant head of department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

**Please note:** The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

## Pass with distinction

A student who obtains a final mark of at least 75% (on the first attempt) in the major subject, qualifies to obtain the degree with distinction.

## General information

1. The content of the basic subjects, subsidiary subjects and attendance courses will be determined by the relevant head of department in consultation with the head of the department at Dentistry or Medicine.
2. General information concerning content and extent of the basic and subsidiary subjects is available at the relevant department.
3. Students have to ensure that certificates of satisfactory preparation are acquired in all the attendance courses.

## Maxillofacial and Oral Surgery

### Major subject:

Maxillofacial and oral surgery: Experience is acquired through practical and clinical training and supplemented by seminars, discussions, papers and research. Diagnosis, planning, surgical and secondary treatment of diseases, injuries and defects of the human mouth, jaws, face and related structures.

### Subsidiary (intermediary) subject:

Principles of surgery: Instruction mainly by the departments of Surgery (and its divisions), Neurosurgery, Otorhinolaryngology, Ophthalmology and Family Medicine. This training takes place over nine months.

Instruction in the subsidiary subject:

Principles of surgery:

### Endorsement ChirMaxFac-Med BVC 806

General Surgery (including Paediatric Surgery): 2 months

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

### **Endorsement ChirMaxFac-Dent BVC 807**

Distress Unit (Family Medicine): 1 month

General Surgery (including Paediatric Surgery): 1 month

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

### **General information concerning the endorsements ChirMaxFac-Med and ChirMaxFac-Dent**

1. A candidate with a BChD or BDS degree should preferably enrol for the MChD(ChirMaxFac-Med) programme.
2. Permission is granted to a student for (ChirMaxFac-Med) to register simultaneously for the postgraduate and undergraduate programmes as applicable. At the end of the programme the student will have complied with all the requirements for the BChD, MBChB and MChD degrees.
3. The content of the basic and subsidiary (intermediary) subjects and attendance courses will be determined by the relevant head of department, in consultation with the Department of Maxillofacial and Oral Surgery.
4. Basic and subsidiary (intermediary) subjects: Acknowledgement of basic and/or subsidiary (intermediary) subjects may be granted if all the particular subjects have already been passed at an approved institution such as the Colleges of South Africa (College of Maxillofacial and Oral Surgery) as recommended by the relevant head of department.
5. Pharmacology as a basic subject has to be passed as a prerequisite before the first year of study, should all other basic subjects be acknowledged by an approved institution.
6. Instruction in the major subject extends over a minimum period of three years, of which the first year mainly concentrates on minor oral surgery.
7. A student for the endorsement ChirMaxFac-Med can only fulfil his or her clinical obligations in Principles of Surgery after he or she has complied with the requirements for the MBChB degree, as well as having completed the Certificate for Advanced Trauma Life Support (ATLS) (before commencing the registrarship).
8. The instruction in the last two years in the major subject takes place only after having successfully completed the subsidiary subjects.
9. The first year of registrarship is acknowledged as an additional year of experience for Medicine and Dentistry if the training in Maxillofacial and Oral Surgery is discontinued. However, a student who discontinues one of the subjects must resign from the registrarship immediately.
10. The basic subjects for Maxillofacial and Oral Surgery (endorsements ChirMaxFac-Med and ChirMaxFac-Dent) are identical.
11. The requirements for the major subject are: Submission of a mini-dissertation (endorsement ChirMaxFac-Med) and a dissertation (endorsement ChirMaxFac-Dent), a letter from an appropriate journal editor, acknowledging receipt of the draft manuscript, surgical portfolio (logbook) with minimum cases treated per surgical section, a prescribed summary of case reports, any publications, research abstracts, examination in a surgical procedure and examination in patient short cases conducted under examination conditions.
12. A student may only proceed with the final FC MFOS (SA) examination after fulfilling the requirements for the MChD(ChirMaxFac-Med or -Dent) as stipulated in 11. above.
13. The MChD(ChirMaxFac-Med or -Dent) may only be awarded after successfully passing the final examination for the FC MFOS (SA).

14. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

## MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent) (10252000)

**Minimum duration of study**                      5 years

## Admission requirements

- Obtained the BChD degree of the University of Pretoria or an equivalent qualification and the MBChB degree or an equivalent qualification at least one year previously.
- Passed the Advanced Trauma Life Support Course (maximum three attempts) as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject.
- Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study may apply in writing for credit for the basic subject(s).
- Registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

## Other programme-specific information

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).

## Examinations and pass requirements

### i. Examinations in the basic subjects

A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

### ii. Examinations in the subsidiary (intermediary) subjects

(The minimum pass mark is 50%.)

- a. For the endorsement Maxillofacial Surgery-Medicus, a student has to pass in Principles of surgery in the year of study as indicated, before he or she may continue with the programme.
- b. A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject.

These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

- iii. If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the relevant head of department may recommend that he or she be admitted to a second examination.

### iv. Examination and evaluation in the major subject

- a. If a student fails his or her major subject, the student has to reapply for admission to the final examination of

the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

- b. In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination, will have to discontinue the programme.
- c. If a student has been admitted to a second examination in the major subject, the relevant head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student has to vacate the registrarship immediately after the second examination has been completed.
- d. Subminimum: A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the relevant head of department. A final mark of at least 50% is required in order to pass in a subject.
- e. In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation (endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a manuscript as required (see also the General Regulations). A complete record of operations (as a logbook) must also be submitted.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

## Exemption

Exemption may be granted by the Dean, on the recommendation of the relevant head of department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

**Please note:** The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

## Pass with distinction

A student who obtains a final mark of at least 75% (on the first attempt) in the major subject, qualifies to obtain the degree with distinction.

## General information

1. The content of the basic subjects, subsidiary subjects and attendance courses will be determined by the relevant head of department in consultation with the head of the department at Dentistry or Medicine.
2. General information concerning content and extent of the basic and subsidiary subjects is available at the relevant department.
3. Students have to ensure that certificates of satisfactory preparation are acquired in all the attendance courses.

## Maxillofacial and Oral Surgery

### Major subject:

Maxillofacial and oral surgery: Experience is acquired through practical and clinical training and supplemented by seminars, discussions, papers and research. Diagnosis, planning, surgical and secondary treatment of diseases, injuries and defects of the human mouth, jaws, face and related structures.

### **Subsidiary (intermediary) subject:**

Principles of surgery: Instruction mainly by the departments of Surgery (and its divisions), Neurosurgery, Otorhinolaryngology, Ophthalmology and Family Medicine. This training takes place over nine months.

Instruction in the subsidiary subject:

Principles of surgery:

### **Endorsement ChirMaxFac-Med BVC 806**

General Surgery (including Paediatric Surgery): 2 months

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

### **Endorsement ChirMaxFac-Dent BVC 807**

Distress Unit (Family Medicine): 1 month

General Surgery (including Paediatric Surgery): 1 month

Intensive Care: 2 months

Neurosurgery: 2 months

Ophthalmology: 1 month

Otorhinolaryngology: 1 month

Plastic Surgery: 1 month

Applied Oral Pathology: 3 months

### **General information concerning the endorsements ChirMaxFac-Med and ChirMaxFac-Dent**

1. A candidate with a BChD or BDS degree should preferably enrol for the MChD(ChirMaxFac-Med) programme.
2. Permission is granted to a student for (ChirMaxFac-Med) to register simultaneously for the postgraduate and undergraduate programmes as applicable. At the end of the programme the student will have complied with all the requirements for the BChD, MBChB and MChD degrees.
3. The content of the basic and subsidiary (intermediary) subjects and attendance courses will be determined by the relevant head of department, in consultation with the Department of Maxillofacial and Oral Surgery.
4. Basic and subsidiary (intermediary) subjects: Acknowledgement of basic and/or subsidiary (intermediary) subjects may be granted if all the particular subjects have already been passed at an approved institution such as the Colleges of South Africa (College of Maxillofacial and Oral Surgery) as recommended by the relevant head of department.
5. Pharmacology as a basic subject has to be passed as a prerequisite before the first year of study, should all other basic subjects be acknowledged by an approved institution.
6. Instruction in the major subject extends over a minimum period of three years, of which the first year mainly concentrates on minor oral surgery.
7. A student for the endorsement ChirMaxFac-Med can only fulfil his or her clinical obligations in Principles of Surgery after he or she has complied with the requirements for the MBChB degree, as well as having completed the Certificate for Advanced Trauma Life Support (ATLS) (before commencing the registrarship).
8. The instruction in the last two years in the major subject takes place only after having successfully completed the subsidiary subjects.
9. The first year of registrarship is acknowledged as an additional year of experience for Medicine and Dentistry if the training in Maxillofacial and Oral Surgery is discontinued. However, a student who discontinues one of

the subjects must resign from the registrarship immediately.

10. The basic subjects for Maxillofacial and Oral Surgery (endorsements ChirMaxFax-Med and ChirMaxFac-Dent) are identical.
11. The requirements for the major subject are: Submission of a mini-dissertation (endorsement ChirMaxFac-Med) and a dissertation (endorsement ChirMaxFac-Dent), a letter from an appropriate journal editor, acknowledging receipt of the draft manuscript, surgical portfolio (logbook) with minimum cases treated per surgical section, a prescribed summary of case reports, any publications, research abstracts, examination in a surgical procedure and examination in patient short cases conducted under examination conditions.
12. A student may only proceed with the final FC MFOS (SA) examination after fulfilling the requirements for the MChD(ChirMaxFac-Med or -Dent) as stipulated in 11. above.
13. The MChD(ChirMaxFac-Med or -Dent) may only be awarded after successfully passing the final examination for the FC MFOS (SA).
14. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

## Curriculum: Year 1

### Core modules

- Anatomy 870 (ANA 870) - Credits: 36.00
- General pathology 808 (APA 808) - Credits: 24.00
- Principles of surgery 806 (BVC 806) - Credits: 52.00
- Ethics and human rights 800 (EHR 800) - Credits: 0.00
- Pharmacology 806 (FAR 806) - Credits: 36.00
- Physiology 806 (FSG 806) - Credits: 36.00
- Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00
- Oral Pathology 805 (MPG 805) - Credits: 24.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Principles of surgery 806 (BVC 806) - Credits: 52.00
- Ethics and human rights 800 (EHR 800) - Credits: 0.00
- Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 3

### Core modules

- Ethics and human rights 800 (EHR 800) - Credits: 0.00
- Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 4

### Core modules

- Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00
- Dissertation: Maxillofacial and Oral surgery 893 (KGM 893) - Credits: 180.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00

Dissertation: Maxillofacial and Oral surgery 893 (KGM 893) - Credits: 180.00

## MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med) (10252070)

**Minimum duration of study** 4 years

### Admission requirements

- Obtained the BChD degree of the University of Pretoria or an equivalent qualification and the MBChB degree or an equivalent qualification at least one year previously.
- Passed the Advanced Trauma Life Support Course (maximum three attempts) as well as the basic subjects Anatomy 870, Physiology 806 and Pharmacology 809 and the PGDipDent (Oral Surgery), with a minimum pass mark of 65% in the major subject.
- Students who hold the Postgraduate Diploma in Dentistry [PGDipDent(Oral Surgery)] and/or the Master of Science Dentistry [MScDent] with Oral Surgery as the main field of study may apply in writing for credit for the basic subject(s).
- Registered as a dentist and/or physician with the Health Professions Council of South Africa in the category Independent Practice.

### Other programme-specific information

In order to qualify for the degree, a candidate must, for a period of four to eight years, depending on the specific requirements for a particular field of study, have held a full-time training position/registrarship successfully, at a training institution approved by the University. In the case of Maxillofacial and Oral Surgery, a candidate must hold a full-time registrarship for a minimum of four years (for a candidate with both a BChD degree and a MBChB degree), a minimum of seven years (for a candidate with a BChD degree), a minimum of six years years (for a candidate with a MBChB degree), or a minimum of five years (for MChD (ChirMaxFac-Dent)).

### Examinations and pass requirements

#### i. Examinations in the basic subjects

A student must pass all the basic subjects (Anatomy [with Embryology], Physiology and Pharmacology [University of Pretoria or College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study. A minimum pass mark of at least 50% is required in all examinations for the University of Pretoria and College of Maxillofacial and Oral Surgery and a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

#### ii. Examinations in the subsidiary (intermediary) subjects

(The minimum pass mark is 50%.)

- a. For the endorsement Maxillofacial Surgery-Medicus, a student has to pass in Principles of surgery in the year

of study as indicated, before he or she may continue with the programme.

- b. A student has to pass in Applied oral pathology at least two and a half years prior to the examination in his or her major subject.

These subsidiary subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.

- iii. If a student fails any of the subsidiary subjects Principles of surgery or Applied oral pathology, the relevant head of department may recommend that he or she be admitted to a second examination.

#### iv. **Examination and evaluation in the major subject**

- a. If a student fails his or her major subject, the student has to reapply for admission to the final examination of the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa.
- b. In the light of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination, will have to discontinue the programme.
- c. If a student has been admitted to a second examination in the major subject, the relevant head of department will determine whether he or she should vacate the registrarship at the end of the training period. The student has to vacate the registrarship immediately after the second examination has been completed.
- d. Subminimum: A student must obtain a subminimum of 60% in the clinical section (operation and short cases) of the examination, with a subminimum of 50% in all the other sections for the master's degree. He or she must also comply with the requirements regarding the number of operation procedures performed in each section, as required by the relevant head of department. A final mark of at least 50% is required in order to pass in a subject.
- e. In addition to the stipulations already mentioned, the student must submit and pass a mini-dissertation (endorsement Maxillofacial Surgery-Med) or a dissertation (endorsement Maxillofacial Surgery-Dent), on an approved topic related to the major subject and submit a manuscript as required (see also the General Regulations). A complete record of operations (as a logbook) must also be submitted.

(v) The master's degree can only be conferred after the National Professional Examination [FCMFOS(SA)] has been passed (as this master's degree and the Fellowship may be used as an interwoven final equivalence examination).

### **Exemption**

Exemption may be granted by the Dean, on the recommendation of the relevant head of department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

**Please note:** The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

10. The basic subjects for Maxillofacial and Oral Surgery (endorsements ChirMaxFax-Med and ChirMaxFac-Dent) are identical.
11. The requirements for the major subject are: Submission of a mini-dissertation (endorsement ChirMaxFac-Med) and a dissertation (endorsement ChirMaxFac-Dent), a letter from an appropriate journal editor, acknowledging receipt of the draft manuscript, surgical portfolio (logbook) with minimum cases treated per surgical section, a prescribed summary of case reports, any publications, research abstracts, examination in a surgical procedure and examination in patient short cases conducted under examination conditions.
12. A student may only proceed with the final FC MFOS (SA) examination after fulfilling the requirements for the MChD(ChirMaxFac-Med or -Dent) as stipulated in 11. above.
13. The MChD(ChirMaxFac-Med or -Dent) may only be awarded after successfully passing the final examination for the FC MFOS (SA).
14. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

## Curriculum: Year 1

### Core modules

Anatomy 870 (ANA 870) - Credits: 36.00

General pathology 808 (APA 808) - Credits: 24.00

Ethics and human rights 800 (EHR 800) - Credits: 0.00

Pharmacology 806 (FAR 806) - Credits: 36.00

Physiology 806 (FSG 806) - Credits: 36.00

Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00

Oral Pathology 805 (MPG 805) - Credits: 24.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

Ethics and human rights 800 (EHR 800) - Credits: 0.00  
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 3

### Core modules

Ethics and human rights 800 (EHR 800) - Credits: 0.00  
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 4

### Core modules

Ethics and human rights 800 (EHR 800) - Credits: 0.00  
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 5

### Core modules

Ethics and human rights 800 (EHR 800) - Credits: 0.00  
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 6

### Core modules

Principles of surgery 806 (BVC 806) - Credits: 52.00  
Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00  
Dissertation: Maxillofacial and Oral surgery 893 (KGM 893) - Credits: 180.00

## Curriculum: Final year

### Core modules

Maxillo-facial and oral surgery 802 (KGM 802) - Credits: 700.00  
Dissertation: Maxillofacial and Oral surgery 893 (KGM 893) - Credits: 180.00

## MChD Oral Pathology (10252030)

**Minimum duration of study** 5 years

## Admission requirements

- BChD degree of the University of Pretoria or an equivalent qualification, or a qualification deemed equivalent and acceptable by the Senate of the University.
- Registered as a dentist with the Health Professions Council of South Africa in the category Independent

Practice.

## Other programme-specific information

Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

## Examinations and pass requirements

### Examinations in the basic subjects

A student must pass the basic subject Molecular pathology (MPX 800) at the University of Pretoria. The basic subject, Anatomical pathology (ANP 808) will be examined by the College of Pathologists as their Part I examination.

### Examination and evaluation in the major subject

- The final exit examination of the major subject (MPG 802) will be administered by the College of Pathologists. Only candidates who have met all the requirements for the MChD degree in Oral Pathology except for the major subject (final examination), i.e. passed all the prerequisite subjects; completed all applicable training as prescribed (continuous evaluation of the candidate in an approved registrar post by the relevant head of department); and completed the required research component for the degree, will be allowed to write the College examination (exit examination) after which they will obtain both the FCP and the MChD as specialist qualifications.
- The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.
- A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.
- Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

## Exemption

Exemption may be granted by the Dean, on the recommendation of the relevant head of department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

**Please note:** The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

## Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

## Curriculum: Year 1

### Core modules

Anatomical pathology 808 (ANP 808) - Credits: 48.00

Ethics and human rights 800 (EHR 800) - Credits: 0.00

Oral pathology 802 (MPG 802) - Credits: 500.00

Dissertation: Oral pathology 891 (MPG 891) - Credits: 180.00

Molecular pathology 800 (MPX 800) - Credits: 120.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

Anatomical pathology 808 (ANP 808) - Credits: 48.00  
Ethics and human rights 800 (EHR 800) - Credits: 0.00

Oral pathology 802 (MPG 802) - Credits: 500.00  
Dissertation: Oral pathology 891 (MPG 891) - Credits: 180.00

## MChD Orthodontics (10252020)

**Minimum duration of study** 4 years

### Admission requirements

- BChD degree of the University of Pretoria or an equivalent qualification, or a qualification deemed equivalent and acceptable by the Senate of the University.
- Registered as a dentist with the Health Professions Council of South Africa in the category Independent Practice.

### Examinations and pass requirements

#### Examination in the basic subjects

A student must pass all the basic subjects [University of Pretoria or the Colleges of Medicine of South Africa] before he or she may be admitted to the first year of study.

## Examination and evaluation in the major subject

Admission to the examination in the major subject is determined by the head of department.

- a. The final exit examination of the major subjects will be administered by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MChD degree except for the major subject (final examination), i.e. passed all the prerequisite subjects; completed all applicable training as prescribed by the Head of Department concerned; and completed the required research component for the degree, will be allowed to write the College examination (exit examination) after which they will obtain both the College qualification and the MChD as specialist qualifications.
- b. The student must submit and pass a dissertation on an approved topic related to the major subject and submit a manuscript for publication as required.
- c. Costs or fees for any examination(s) and registration at the Colleges of Medicine of South Africa have to be met by the student.

Also consult the General Regulations.

### i. Examinations in the basic and subsidiary subjects (with the exception of KGM 803):

- a. A student must pass these subjects prior to admission to the examination in the major subject. A minimum of at least 50% is required to pass.
- b. Examinations in the basic and subsidiary subjects must be passed before the end of the third year of study, or at a time as determined by the relevant head of department.

ii. **Examinations in the major subject:** Admission to the examination in the major subject is determined by the relevant head of department.

- iii. If a student fails one or more of the basic subjects, subsidiary subjects or the major subject, the relevant head of department may recommend to the examination moderating meeting, that he or she be admitted to a supplementary examination. A student who has been admitted to a second examination in a basic subject must write the examination during the next examination period. Second examinations in the major subject may only take place after a minimum period of six months has elapsed since the examination in which the student failed.

### NB:

- a. In view of the fact that a postgraduate student may repeat an examination in any subject only once, a student who fails a second examination will have to discontinue the programme. In this event, a student who has been holding a registrarship, will have to vacate the position as soon as possible after one calendar month's notice to the University of Pretoria and/or other recognised training institution, where applicable.
- b. If a student is admitted to a second examination in the major subject, the relevant head of department will determine whether he/she has to vacate the registrarship at the end of the training period, or immediately after the second examination.

iv. **Subminimum:** In order to pass in the major subject a student must obtain a subminimum of 50% in all the sections of the examination, with a final mark of at least 50%.

v. The stipulations of the General Regulations are applicable with regard to attendance courses.

vi. In addition to the stipulations already mentioned, a dissertation on a topic related to the major subject must also be submitted. In order to pass in the final examination, a pass mark must also be obtained for the dissertation.

## Exemption

Exemption may be granted by the Dean, on the recommendation of the relevant head of department by virtue of comparable training and/or experience in terms of the requirements of School Regulations, with the proviso that exemption from the examination and evaluation in the major subject may not be granted.

**Please note:** The regulations of the Health Professions Council of South Africa, as published in the Government Gazette No. 4631 of 11 January 1991 – Notice No. R.40 (as amended), will be used as a criterion in determining the period of exemption.

## Pass with distinction

A student who obtains a final mark of at least 75% (with the first attempt) in the major subject qualifies to obtain the degree with distinction.

An MChD student, who has obtained at least 75% with the first attempt in both his major subject and the dissertation, will receive the degree with distinction.

## Curriculum: Year 1

## MDietetics (10259003)

**Minimum duration of study** 1 year

### Programme information

The master's degree is conferred by virtue of a dissertation (DEK 890) on an approved topic based on research.

### Admission requirements

- A recognised honours degree in Dietetics/Human Nutrition and be registered as a dietician with the Health Professions Council of South Africa.
- At least one year of full-time practical experience after acquiring the qualification in terms of which admission to master's degree study is sought.
- Students are selected on the grounds of previous academic achievement.

### Examinations and pass requirements

A minimum pass mark of 50% is required for the dissertation.

### Pass with distinction

The degree is conferred with distinction on a student who obtains at least 75% in the dissertation.

### Curriculum: Final year

#### Core modules

Dissertation: Dietetics 890 (DEK 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## MDietetics (Coursework) (10259004)

**Minimum duration of study** 2 years

## Programme information

For the coursework component, a student has to take compulsory modules to a total of 40 credits and choose modules (from elective modules) to a total of 20 credits. Any specific module is offered on condition that a minimum number of students is registered for the module, as determined by the relevant head of department and the Dean. Students must consult the relevant head of department in order to compile a meaningful programme, as well as for information on the syllabi of the modules. The departmental postgraduate brochure should also be consulted.

Also consult General Regulations.

## Admission requirements

- The minimum requirement is a Bachelor's degree in Dietetics/Human Nutrition as well as registration as a dietician with the Health Professions Council of South Africa.
- At least one year of full-time practical experience after acquiring the qualification in terms of which admission to master's degree study is sought.
- Students are selected on the grounds of previous academic achievement.

## Additional requirements

(TNM 802) Applied Research Methodology 802 or an equivalent module must be attended satisfactorily.

## Examinations and pass requirements

A final mark of at least 50% is required to pass in the coursework. A minimum of 50% is required to pass in the essay.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the coursework as well as a minimum of 75% in the essay.

## Curriculum: Year 1

### Core modules

[Advanced research and nutritional epidemiology 870](#) (DEK 870) - Credits: 20.00

[Nutritional assessment 871](#) (DEK 871) - Credits: 20.00

[Mini-dissertation: Dietetics 896](#) (DEK 896) - Credits: 120.00

[Applied research methodology 802](#) (TNM 802) - Credits: 0.00

### Elective modules

[Immunonutrition 814](#) (DEK 814) - Credits: 10.00

[Sport nutrition 815](#) (DEK 815) - Credits: 10.00

[Nutrition counselling 816](#) (DEK 816) - Credits: 10.00

[Diet-related non-communicable lifestyle diseases 817](#) (DEK 817) - Credits: 10.00

[Nutrition support 818](#) (DEK 818) - Credits: 10.00

[Nutrigenomics 819](#) (DEK 819) - Credits: 10.00

[Micronutrient malnutrition 873](#) (DEK 873) - Credits: 10.00

[Early childhood nutrition intervention 874](#) (DEK 874) - Credits: 10.00

## Curriculum: Final year

### Core modules

Advanced research and nutritional epidemiology 870 (DEK 870) - Credits: 20.00

Nutritional assessment 871 (DEK 871) - Credits: 20.00

Mini-dissertation: Dietetics 896 (DEK 896) - Credits: 120.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

### Elective modules

Immunonutrition 814 (DEK 814) - Credits: 10.00

Sport nutrition 815 (DEK 815) - Credits: 10.00

Nutrition counselling 816 (DEK 816) - Credits: 10.00

Diet-related non-communicable lifestyle diseases 817 (DEK 817) - Credits: 10.00

Nutrition support 818 (DEK 818) - Credits: 10.00

Nutrigenomics 819 (DEK 819) - Credits: 10.00

Micronutrient malnutrition 873 (DEK 873) - Credits: 10.00

Early childhood nutrition intervention 874 (DEK 874) - Credits: 10.00

## MECI (10258241)

**Minimum duration of study** 2 years

**Contact** Prof AE Samuels [alecia.samuels@up.ac.za](mailto:alecia.samuels@up.ac.za) +27 (0)124204727

### Admission requirements

- An applicable four-year professional bachelor's degree or an equivalent qualification.

### Additional requirements

Also consult General Regulations.

### Other programme-specific information

Refer to the study guide available on request from the Centre for Augmentative and Alternative Communication for information on the subdivisions of specific modules.

### Examinations and pass requirements

- i. A minimum of 50% is required to pass in a module, and all modules must be passed before the degree will be conferred.
- ii. The nature and frequency of examinations will be determined by the head of department in conjunction with the programme supervisor.

### Second examinations

Second examinations or regrouping of work assignments will take place within two weeks or a month after conclusion of the examination in which the student failed.

### Promotion to next study year

A student must pass the first year of study for admission to the second year of study. Participation as described

in the study guide is a requirement for promotion to the second year of study.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in all the modules.

## Curriculum: Year 1

### Core modules

Critical theoretical analysis in ECI 801 (ECI 801) - Credits: 90.00

## Curriculum: Final year

### Core modules

Collaborative problem solving 872 (ECI 872) - Credits: 20.00

Measurement in ECI 873 (ECI 873) - Credits: 20.00

Evaluation and intervention 874 (ECI 874) - Credits: 20.00

### Elective modules

Child health 860 (ECI 860) - Credits: 30.00

Communication pathology 861 (ECI 861) - Credits: 30.00

Education psychology 862 (ECI 862) - Credits: 30.00

Nursing science 863 (ECI 863) - Credits: 30.00

Occupational therapy 865 (ECI 865) - Credits: 30.00

Physiotherapy 866 (ECI 866) - Credits: 30.00

Severe disability 867 (ECI 867) - Credits: 30.00

Social work 868 (ECI 868) - Credits: 30.00

Audiology 869 (ECI 869) - Credits: 30.00

Nutrition care 864 (VSG 864) - Credits: 30.00

## MMed Anaesthesiology (10250012)

**Minimum duration of study** 4 years

**Contact** Prof JLA Rantloane [arthur.rantloane@up.ac.za](mailto:arthur.rantloane@up.ac.za) +27 (0)123192108

## Programme information

### Please note:

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the

necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.

- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### **Registrarship:**

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### **Each student must prove to the University that he or she**

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### **Other programme-specific information**

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### **Examinations and pass requirements**

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

## Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

Anaesthesiology 801 (ANE 801) - Credits: 300.00

Pharmacology 802 (FAR 802) - Credits: 36.00

(b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

### **Pass with distinction**

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

### Curriculum: Year 1

#### Core modules

Chemical pathology 800 (CHP 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 2

#### Core modules

Chemical pathology 800 (CHP 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 3

#### Core modules

Chemical pathology 800 (CHP 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 4

#### Core modules

Chemical pathology 800 (CHP 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Final year

#### Core modules

Chemical pathology 800 (CHP 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Clinical Pathology (10250242)

**Minimum duration of study** 5 years

**Contact** Prof T Pillay [tahir.pillay@up.ac.za](mailto:tahir.pillay@up.ac.za) +27 (0)123192911

## Programme information

**Please note:**

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree, It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### **Registrarship:**

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### **Each student must prove to the University that he or she**

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### **Other programme-specific information**

Duration of training is five years with at least 18 months in each major subject.

“**Major subject**” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### **Examinations and pass requirements**

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation

with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:

- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### **Second examinations**

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### **Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]**

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## **Exemption**

### **Exemption**

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## **Pass with distinction**

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

This alternative is in special cases applicable to other MMed degrees.

#### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

#### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

## Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

## Other programme-specific information

**Note:** Inquire at the Head of the Department of Family Medicine regarding the availability of registrarships.

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

### Programme information

#### Please note:

- All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

#### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

#### Each student must prove to the University that he or she

- has successfully filled the required full-time training post for a period of four or five years according to the

- requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
  - iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
  - iv. has successfully completed the research component of the degree.

## Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

## Other programme-specific information

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Exemption

- i. The Faculty Board may grant partial exemption from the training and work on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Exemption from a maximum of two years' clinical training may be granted in the Department of Forensic Medicine in respect of the MMed(Path) degree with specialisation Forensic Pathology, to a candidate already in possession of an MMed degree (or a degree deemed equivalent by the University) with specialisation in Anatomical Pathology.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

Family medicine 805 (HAK 805) - Credits: 354.00  
Dissertation 890 (MMS 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 2

#### Core modules

Family medicine 805 (HAK 805) - Credits: 354.00  
Dissertation 890 (MMS 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 3

#### Core modules

Family medicine 805 (HAK 805) - Credits: 354.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Forensic Pathology (10250274)

**Minimum duration of study** 4 years

**Contact** Prof G Saayman [gsaayman@up.ac.za](mailto:gsaayman@up.ac.za) +27 (0)123192260

### Programme information

#### Please note:

- All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree, It requires, inter alia, a protocol with clearly formulated objectives and methods.

Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### **Registrarship:**

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### **Each student must prove to the University that he or she**

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### **Other programme-specific information**

“**Major subject**” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### **Examinations and pass requirements**

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### **Second examinations**

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### **Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]**

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Haematology 800 (HEM 800) - Credits: 300.00  
Dissertation 890 (MMS 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Internal Medicine (10250052)

**Minimum duration of study** 4 years

**Contact** Prof GR Tintinger [gregory.tintinger@up.ac.za](mailto:gregory.tintinger@up.ac.za) +27 (0)123542287

### Programme information

#### Please note:

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

#### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

#### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### Other programme-specific information

A certificate issued by the relevant head of department must be submitted as proof that the student is well

qualified in research methodology before the degree is conferred.

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the

MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.

iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

### Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

### General information

#### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

### Curriculum: Year 1

#### Core modules

- Anatomy 800 (ANA 800) - Credits: 36.00
- Pharmacology 806 (FAR 806) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Internal medicine 800 (IGK 800) - Credits: 300.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Pathology 808 (PAG 808) - Credits: 36.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 2

#### Core modules

- Anatomy 800 (ANA 800) - Credits: 36.00
- Pharmacology 806 (FAR 806) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Internal medicine 800 (IGK 800) - Credits: 300.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Pathology 808 (PAG 808) - Credits: 36.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 3

#### Core modules

- Anatomy 800 (ANA 800) - Credits: 36.00
- Pharmacology 806 (FAR 806) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Internal medicine 800 (IGK 800) - Credits: 300.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Pathology 808 (PAG 808) - Credits: 36.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Internal medicine 800 (IGK 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

## Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

## Other programme-specific information

Satisfactory progress after one year of training is required, as evaluated by the applicable examination panel.

Duration of training: Four years, of which at least three years must be in the major field of study. The fourth year can either be in the major subject or in any combination of the other Pathology specialisations.

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this

University, or experience recognised by the University as equivalent.

iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

### Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

### General information

#### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

### Curriculum: Year 1

#### Core modules

Medical virology 800 (GVR 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

#### Elective modules

Anatomical pathology (Capita selecta) 871 (APY 871) - Credits: 12.00

Chemical pathology (Capita selecta) 871 (CHP 871) - Credits: 36.00

Medical microbiology (Capita selecta) 871 (GMB 871) - Credits: 36.00

Medical virology 801 (GVR 801) - Credits: 36.00

Haematology (Capita selecta) 871 (HEM 871) - Credits: 36.00

### Curriculum: Year 2

#### Core modules

Medical virology 800 (GVR 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

#### Elective modules

Anatomical pathology (Capita selecta) 871 (APY 871) - Credits: 12.00

Chemical pathology (Capita selecta) 871 (CHP 871) - Credits: 36.00

Medical microbiology (Capita selecta) 871 (GMB 871) - Credits: 36.00

Medical virology 801 (GVR 801) - Credits: 36.00

Haematology (Capita selecta) 871 (HEM 871) - Credits: 36.00

### Curriculum: Year 3

#### Core modules

Medical virology 800 (GVR 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

### Elective modules

Anatomical pathology (Capita selecta) 871 (APY 871) - Credits: 12.00

Chemical pathology (Capita selecta) 871 (CHP 871) - Credits: 36.00

Medical microbiology (Capita selecta) 871 (GMB 871) - Credits: 36.00

Medical virology 801 (GVR 801) - Credits: 36.00

Haematology (Capita selecta) 871 (HEM 871) - Credits: 36.00

### Curriculum: Final year

#### Core modules

Medical virology 800 (GVR 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Neurology (10250092)

**Minimum duration of study** 4 years

**Contact** Prof C Schutte [clara.schutte@up.ac.za](mailto:clara.schutte@up.ac.za) +27 (0)123541082

### Programme information

#### Please note:

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6

months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.

- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### **Registrarship:**

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### **Each student must prove to the University that he or she**

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### **Other programme-specific information**

If a student specialises in Nuclear Medicine after having obtained the MMed in Radiological Diagnostics, Radiation Oncology or Internal Medicine, the duration will be three years.

“**Major subject**” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### **Examinations and pass requirements**

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year

programmes in which an examination is held at the end of the third year.

### **Second examinations**

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### **Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]**

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

### **Exemption**

#### **Exemption**

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution - with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

### **Pass with distinction**

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

### **General information**

#### **Registrars**

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

### **Curriculum: Year 1**

#### **Core modules**

**Anatomy 809** (ANA 809) - Credits: 36.00

Physiology 801 (FSG 801) - Credits: 36.00  
Nuclear medicine 801 (KDE 801) - Credits: 300.00  
Nuclear physics 802 (KDE 802) - Credits: 36.00  
Dissertation 890 (MMS 890) - Credits: 180.00  
Pathology 801 (PAG 801) - Credits: 36.00  
Radiobiology, chemistry and pharmacology 800 (RCF 800) - Credits: 36.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

Dissertation 890 (MMS 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Obstetrics and Gynaecology (10250102)

**Minimum duration of study** 4 years

**Contact** Prof BG Lindeque u02449854@up.ac.za +27 (0)123541201

## Programme information

### Please note:

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.

- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment (other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### **Registrarship:**

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### **Each student must prove to the University that he or she**

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### **Other programme-specific information**

In addition to the prerequisite subjects mentioned, also (OEG 801). Additional examination: Basic sciences 801 (examination on aspects from the basic sciences, as applicable to Obstetrics and Gynaecology).

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### **Examinations and pass requirements**

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in

cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:

- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### **Second examinations**

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### **Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]**

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## **Exemption**

### **Exemption**

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.

## MMed Occupational Medicine (10250374)

**Minimum duration of study** 4 years

## Programme information

A dissertation (GG5 892 Dissertation: Occupational Medicine – 180 credits) on an approved research project must be passed in addition to the major subject and prerequisites. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply

## Additional requirements

- i. has successfully filled the required full-time training post for a period of four years according to the requirements of the Department of Public Health Medicine;
- ii. has completed the theoretical and practical applicable training as stipulated; and
- iii. has passed the prescribed written, oral and/or practical university examinations or equivalent Colleges of Medicine of South Africa examinations.

## Other programme-specific information

Please note: All MMed students must register for, and attend (TNM 802) Applied research methodology, satisfactorily.

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four years, as prescribed by the Department of Public Health Medicine.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department of Public Health Medicine.
- ii. The final exit examination for the major subject (GG5 802) will be conducted by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MMed (Occupational Medicine) degree except for the major subject, i.e. passed all prerequisite subjects, completed all applicable training as prescribed and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. TNM 802 and the dissertation (GG5 892), will be allowed to write the Colleges of Medicine of South Africa exit examination.
- iii. A minimum final mark of 50% is required to pass in a subject.
- iv. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

## Second examinations

Second examinations in the prerequisite subjects will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed, and following adequate remediation.

## Exemption

The Faculty Board may, at its discretion, grant partial exemption from the training and work mentioned earlier on the grounds of comparable training and experience completed in another post or at another recognised institution – with the provision that exemption from a maximum period of 18 months may be granted in the case of the MMed (Occupational Medicine) degree programme.

---

## Practical/clinical/internship information

Registrars in Occupational Medicine are expected to undergo rotational attachment to a number of designated organisations during their period of training.

## Research information

A dissertation on an approved Occupational Health or Occupational Medicine research project must be passed in addition to the major subject and prerequisites. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

## Pass with distinction

The degree is conferred at the end of the prescribed training period, i.e. four years unless a time exemption has been awarded by the Faculty Board. The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in the major subject.

### Programme information

#### Please note:

- All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree, It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

#### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### **Each student must prove to the University that he or she**

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### **Other programme-specific information**

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### **Examinations and pass requirements**

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### **Second examinations**

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### **Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]**

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of

department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.

- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution - with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

- Anatomy 895 (ANA 895) - Credits: 36.00
- Anatomical pathology 879 (ANP 879) - Credits: 36.00
- Principles of surgery 802 (BVC 802) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Orthopaedics 800 (ORT 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Anatomy 895 (ANA 895) - Credits: 36.00

Anatomical pathology 879 (ANP 879) - Credits: 36.00  
Principles of surgery 802 (BVC 802) - Credits: 36.00  
Physiology 801 (FSG 801) - Credits: 36.00  
Dissertation 890 (MMS 890) - Credits: 180.00  
Orthopaedics 800 (ORT 800) - Credits: 300.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Year 3

#### Core modules

It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

#### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

#### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### Other programme-specific information

A student may be exempted from writing the final Professional Theoretical and Clinical Examination if he/she

has passed the Final Fellowship Examination of the College of Paediatricians of South Africa [FC Paed (SA)] within the previous two years.

“**Major subject**” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.

- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

- Anatomy 805 (ANA 805) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Paediatrics 800 (KGE 800) - Credits: 300.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Pathology 802 (PAG 802) - Credits: 36.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Anatomy 805 (ANA 805) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Paediatrics 800 (KGE 800) - Credits: 300.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Pathology 802 (PAG 802) - Credits: 36.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 3

### Core modules

- Anatomy 805 (ANA 805) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Paediatrics 800 (KGE 800) - Credits: 300.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Pathology 802 (PAG 802) - Credits: 36.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Paediatrics 800 (KGE 800) - Credits: 300.00

Dissertation 890 (MMS 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Plastic Surgery (10250212)

**Minimum duration of study** 5 years

**Contact** Dr SS Selahle [solly.selahle@up.ac.za](mailto:solly.selahle@up.ac.za) +27 (0)123541666

## Programme information

### Please note:

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

## Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB

degree for at least two years.

- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

## Other programme-specific information

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- In the case of four-year programmes: not before the end of the third year.
- In the case of five-year programmes: not before the end of the fourth year.
- A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i)

and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.

- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## MMed Public Health Medicine (10250373)

**Minimum duration of study** 4 years

### Programme information

A dissertation (GGS 891 Dissertation – 180 credits) on an approved research project must be passed in addition to the major subject and prerequisites. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

### Admission requirements

- A prospective student for the MMed degree programme must be in possession of the MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years. In addition, such a student must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### Additional requirements

- Each student must prove to the University that he or she has successfully filled the required full-time training post for a period of four years according to the requirements of the Department of Public Health Medicine.
- has completed the theoretical and practical applicable training as stipulated; and
- has passed the prescribed written, oral and/or practical university examinations or equivalent primary Colleges of Medicine of South Africa examinations.

## Additional requirements

### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four years according to the requirements of the Department of Public Health Medicine.
- ii. has completed the theoretical and practical applicable training as stipulated; and
- iii. has passed the prescribed written, oral and/or practical university examinations or equivalent primary Colleges of Medicine of South Africa examinations.

## Other programme-specific information

**Please note:** All MMed students must register for, and attend (TNM 800) Applied research methodology, satisfactorily.

“Major subject” refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four years, as prescribed by the Department of Public Health Medicine.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department of Public Health Medicine.
- ii. The final exit examination for the major subject will be conducted by the Colleges of Medicine of South Africa. Only candidates who have met all the requirements for the MMed(Public Health Medicine) degree except for the major subject, i.e. passed all prerequisite subjects, completed all applicable training as prescribed in Reg. P.3(c) and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. TNM 800 and the dissertation (GGS 890) will be allowed to write the Colleges of Medicine of South Africa exit examination.
- iii. A minimum final mark of 50% is required to pass in a subject.
- iv. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

## Second examinations

Second examinations in the prerequisite subjects will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

## Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned earlier on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted in the case of a four-year programme such as the MMed (Public Health Medicine) degree programme.
- ii. Exemption from a maximum of two years’ Public Health Medicine training may be granted in the Department of Public Health Medicine in respect of the MMed(Public Health Medicine) degree, to a candidate already in possession of a Fellowship of the College of Public Health Medicine or a Fellowship of the College of Occupational Health Medicine of the Colleges of Medicine of South Africa. Such a candidate must have completed a period of at least 24 months of registrar training in Public Health Medicine or in Occupational Health Medicine that is recorded as such by the HPCSA.

## Practical/clinical/internship information

Registrars in Public Health Medicine are expected to undergo rotational attachment to a number of designated health service organisations during their period of training.

## Research information

A dissertation on an approved research project must be passed in addition to the major subject and prerequisites. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

## Pass with distinction

The degree is conferred at the end of the prescribed training period, i.e. four years. The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## Curriculum: Year 1

### Core modules

- Administrative theory and health related social sciences 800 (ASW 800) - Credits: 50.00
- Epidemiology theory, biostatistics and demography 800 (EBD 800) - Credits: 50.00
- Public health medicine 800 (GGS 800) - Credits: 150.00
- Dissertation: Public health medicine 891 (GGS 891) - Credits: 180.00
- Communicable and non-communicable health-related conditions 800 (ONO 800) - Credits: 50.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Administrative theory and health related social sciences 800 (ASW 800) - Credits: 50.00
- Epidemiology theory, biostatistics and demography 800 (EBD 800) - Credits: 50.00

Public health medicine 800 (GGS 800) - Credits: 150.00

Dissertation: Public health medicine 891 (GGS 891) - Credits: 180.00

Communicable and non-communicable health-related conditions 800 (ONO 800) - Credits: 50.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Radiation Oncology (10250164)

**Minimum duration of study** 4 years

**Contact** Prof R Lakier [roy.lakier@up.ac.za](mailto:roy.lakier@up.ac.za) +27 (0)123541184

### Programme information

#### Please note:

- i. All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- ii. All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- iii. A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree, It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

#### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

#### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

### Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.

- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

### Other programme-specific information

If this specialisation is followed after having obtained the MMed in Radiological Diagnostics, the duration of the programme will be three years.

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

### Examinations and pass requirements

- The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- In the case of four-year programmes: not before the end of the third year.
- In the case of five-year programmes: not before the end of the fourth year.
- A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

#### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

#### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

### Exemption

#### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

- Anatomy 809 (ANA 809) - Credits: 36.00
- Anatomical pathology 809 (ANP 809) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Medical physics 801 (MFK 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Radiobiology 801 (RBG 801) - Credits: 36.00
- Radiation oncology 800 (SOZ 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Anatomy 809 (ANA 809) - Credits: 36.00
- Anatomical pathology 809 (ANP 809) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Medical physics 801 (MFK 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Radiobiology 801 (RBG 801) - Credits: 36.00
- Radiation oncology 800 (SOZ 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 3

### Core modules

- Anatomy 809 (ANA 809) - Credits: 36.00
- Anatomical pathology 809 (ANP 809) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Medical physics 801 (MFK 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Radiobiology 801 (RBG 801) - Credits: 36.00
- Radiation oncology 800 (SOZ 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Final year

#### Core modules

- Dissertation 890 (MMS 890) - Credits: 180.00
- Radiation oncology 800 (SOZ 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### Each student must prove to the University that he or she

- i. has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- ii. has completed the theoretical, practical, clinical and applicable training as stipulated;
- iii. has passed the prescribed written, oral, practical and/or clinical university examinations, and
- iv. has successfully completed the research component of the degree.

## Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

## Other programme-specific information

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

- Anatomy 898 (ANA 898) - Credits: 36.00
- Anatomical pathology 878 (ANP 878) - Credits: 36.00
- Principles of surgery 805 (BVC 805) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Thoracic surgery 800 (TCR 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 2

### Core modules

- Anatomy 898 (ANA 898) - Credits: 36.00
- Anatomical pathology 878 (ANP 878) - Credits: 36.00
- Principles of surgery 805 (BVC 805) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Thoracic surgery 800 (TCR 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 3

### Core modules

- Anatomy 898 (ANA 898) - Credits: 36.00
- Anatomical pathology 878 (ANP 878) - Credits: 36.00
- Principles of surgery 805 (BVC 805) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Thoracic surgery 800 (TCR 800) - Credits: 300.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Year 4

### Core modules

- Principles of surgery 805 (BVC 805) - Credits: 36.00

Dissertation 890 (MMS 890) - Credits: 180.00  
Thoracic surgery 800 (TCR 800) - Credits: 300.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Dissertation 890 (MMS 890) - Credits: 180.00  
Thoracic surgery 800 (TCR 800) - Credits: 300.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## MMed Urology (10250222)

**Minimum duration of study** 5 years

**Contact** Prof C Schutte [clara.schutte@up.ac.za](mailto:clara.schutte@up.ac.za) +27 (0)123541082

## Programme information

### Please note:

- All MMed students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily, preferably during the intermediate phase/ after completion of Part 1 and before sitting for Part 2 of the MMed.
- All MMed students must submit a dissertation (MMS 890) which must be assessed as satisfactory by an external examiner, or a research article that has been accepted for publication in a subsidised periodical. The student must be the first author of the article. An ordinary literature review will not be accepted. The research proposal must be approved by the MMed Protocol Committee prior to the intermediate exam (surgical disciplines) or otherwise within two years of enrolment ( other disciplines). It is in the best interest of the candidate to complete the research component prior to the exit exam and if not possible, preferably to postpone the exam. If the exam is to be written in Semester 2 of the 4th year the dissertation should be submitted 1 September of the 4th year. If this is not the case, the supervisor should complete and sign the necessary documentation, stipulating that the candidate will complete the project within the next 3 to 6 months. The dissertation must be submitted prior to the taking of the CMSA fellowship examination.
- A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MMed (Public Health Medicine) degree. It requires, inter alia, a protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods. This alternative is in special cases applicable to other MMed degrees.

### Registrarship:

Inquire at the relevant head of department regarding the availability of registrarships for the specialisation.

### Each student must prove to the University that he or she

- has successfully filled the required full-time training post for a period of four or five years according to the requirements of the relevant department at the Steve Biko Academic Hospital, (in case of pathology registrars) or Kalafong Hospital or at an institution recognised by the University as equivalent;
- has completed the theoretical, practical, clinical and applicable training as stipulated;
- has passed the prescribed written, oral, practical and/or clinical university examinations, and
- has successfully completed the research component of the degree.

## Admission requirements

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a physician with the Health Professions Council of South Africa for at least one year.
- International students must have qualifications verified by SAQA.

## Other programme-specific information

**“Major subject”** refers to the recognised field of study in Medicine in which the student specialises. The study of the major subject extends over four or five years, as prescribed by the relevant department.

## Examinations and pass requirements

- i. The sequence of the examinations in the prerequisite subjects will be determined by the head of the department under which the major subject falls.
- ii. The nature, duration and time of the examinations in the prerequisite subjects are determined in cooperation with the heads of the departments under which the prerequisite subjects fall – with the proviso that, except in cases where stipulated otherwise, the examinations in the prerequisite subjects may be held at any time prior to or concurrently with the major subject. The examinations in the major subjects are held as follows:
- iii. In the case of four-year programmes: not before the end of the third year.
- iv. In the case of five-year programmes: not before the end of the fourth year.
- v. A minimum final mark of 50% is required by all departments to pass in a subject and in the clinical section of the examination, a subminimum of 50%. General Regulations apply.
- vi. A student is not admitted to the examination in a prerequisite subject (second examinations excluded) more than twice, nor is he or she admitted to the examination in the major subject more than twice.

**Note:** Certificates of satisfactory preparation and progress are required in respect of the fourth year of four-year programmes in which an examination is held at the end of the third year.

### Second examinations

Second examinations for MMed students will only be held after at least six months have elapsed since the conclusion of the examination in which the student had failed.

### Rules governing the writing of the examinations of the College of Medicine of South Africa [CMSA]

- i. Only candidates who have met all requirements for the MMed degree except for the major subject (final examination), i.e. passed all prerequisite subjects (the latter to be interchangeable; can be passed either at the University or as primary and intermediary examinations at the College of Medicine of South Africa [CMSA], completed all practical, clinical and applicable training of four or five years as prescribed by the relevant academic department (continuous evaluation of the candidate, in an approved registrar post, by the head of department of the candidate); and completed the required research component for the degree in accordance with the Faculty Yearbook regulations, i.e. Applied research methodology 800 (TNM 800) and the dissertation (MMS 800) or an article (not an ordinary literature review) that has been accepted for publication in a subsidised periodical, will be allowed to write the college examination (exit examination), after which they will obtain both the CMSA fellowship and the MMed as specialist qualifications.
- ii. The rules have been effective as from 1 January 2011. As a transitional measure, cases will be considered on an individual basis where necessary.

## Exemption

### Exemption

- i. The Faculty Board may grant partial exemption from the training and work mentioned under par. (b) and (c)(i) and (ii) above on the grounds of comparable training and experience completed in another post or at another recognised institution – with the proviso that exemption from a maximum period of 18 months may be granted with regard to four-year and five-year programmes.
- ii. Exemption from a maximum of three years may be granted by the Department of Medical Oncology for the MMed in Medical Oncology [MMed(MedOnc)] on the grounds of the MMed(Int) or MMed(Paed) degree of this University, or experience recognised by the University as equivalent.
- iii. Specific prerequisite subjects must be passed within 24 months after commencement of the programme.

## Pass with distinction

The degree is conferred at the end of the prescribed training period (i.e. three, four or five years, respectively). The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## General information

### Registrars

Departments expect registrars to participate increasingly in the examining and treatment of patients in the hospital, both in-patients and out-patients, as well as performing and interpreting tests in the laboratory (where applicable); initially under supervision and later increasingly at their own responsibility. Lectures/symposia with closely related departments are organised, as well as discussions of literature, etc.

## Curriculum: Year 1

### Core modules

- Anatomy 897 (ANA 897) - Credits: 36.00
- Anatomical pathology 877 (ANP 877) - Credits: 36.00
- Principles of surgery 804 (BVC 804) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00
- Urology 800 (URO 800) - Credits: 300.00

## Curriculum: Year 2

### Core modules

- Anatomy 897 (ANA 897) - Credits: 36.00
- Anatomical pathology 877 (ANP 877) - Credits: 36.00
- Principles of surgery 804 (BVC 804) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00
- Urology 800 (URO 800) - Credits: 300.00

## Curriculum: Year 3

### Core modules

- Anatomy 897 (ANA 897) - Credits: 36.00
- Anatomical pathology 877 (ANP 877) - Credits: 36.00
- Principles of surgery 804 (BVC 804) - Credits: 36.00
- Physiology 801 (FSG 801) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00
- Urology 800 (URO 800) - Credits: 300.00

### Curriculum: Year 4

#### Core modules

- Principles of surgery 804 (BVC 804) - Credits: 36.00
- Dissertation 890 (MMS 890) - Credits: 180.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00
- Urology 800 (URO 800) - Credits: 300.00

### Curriculum: Final year

#### Core modules

- Dissertation 890 (MMS 890) - Credits: 180.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00
- Urology 800 (URO 800) - Credits: 300.00

## MMilMed (10255002)

**Minimum duration of study** 3 years

### Admission requirements

MBChB (or equivalent) degree or relevant medical degree with modules equivalent to at least the first two years of the MBChB degree.

### Additional requirements

Also consult the General Regulations. The first two years will be part-time study, and the final year full-time study as a registrar in the relevant main discipline.

### Examinations and pass requirements

- The sequence of the examinations in the prerequisite subjects is determined by the head of the department under which the major subject falls.
- The nature, duration and time of the examinations are determined in co-operation with the heads of the departments under which the prerequisite subjects fall - with the proviso that, except in cases indicated differently, the examinations in the prerequisite subjects will be held at any time prior to, or concurrently with the examinations in the major subject.
- To pass in a module, a minimum final mark of 50% is required.
- A student will not be admitted to the examinations in a prerequisite module, or to the examination in the major subject, more than twice (second examinations excluded).

## Second examinations

Second examinations will take place only after at least six months have elapsed since the conclusion of the examination in which the student failed.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained a final mark of at least 75% in his or her major subject.

## Curriculum: Year 1

### Core modules

Surgery 801 (CHR 801) - Credits: 36.00

Physiology 801 (FSG 801) - Credits: 36.00

Internal medicine 804 (IGK 804) - Credits: 36.00

## Curriculum: Year 2

### Core modules

Surgery 801 (CHR 801) - Credits: 36.00

Physiology 801 (FSG 801) - Credits: 36.00

Internal medicine 804 (IGK 804) - Credits: 36.00

## Curriculum: Final year

### Core modules

Surgery 800 (CHR 800) - Credits: 300.00

Military medicine: Internal medicine 800 (MIG 800) - Credits: 300.00

## MNurs Clinical Fields of Study (10251154)

**Minimum duration of study**                      2 years

## Admission requirements

- At least a Bachelor of Nursing Science degree and according to the discretion of the head of department, an applicable post-basic qualification.
- The master's degree may be awarded only in the field of study of the prerequisite degree or equivalent qualification.

## Examinations and pass requirements

A final mark of at least 50% is required in both VNM 800 and the dissertation in order to comply with all the requirements for the degree.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation.

## Curriculum: Year 1

### Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 180.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

### Curriculum: Final year

#### Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 180.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

## MNurs Clinical Fields of Study (Coursework) (10251056)

**Minimum duration of study** 2 years

### Programme information

The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification. Not all the different fields of study are presented every year. Commencement of studies must therefore be discussed beforehand with the head of department.

### Admission requirements

- Subject to the stipulations of General Regulation G.62 the Bachelor of Nursing Science degree is required for admission. In the case of the non-clinical fields another approved bachelor's degree may also be considered.
- Successful completion of an entrance examination according to the discretion of the head of department.

### Clinical fields of specialisation:

- a. A minimum of one year experience as registered nurse in the workplace, which is deemed appropriate by the head of department for the proposed field of study, other nursing science-related modules excluded.
  - b. Students must, at least on a part-time basis, have access to clinical learning facilities suitable for the chosen field of specialisation, and approved by the head of department for the field of study in question.
  - c. Registration with the South African Nursing Council (SANC) is required as follows:
- For **Advanced Medical and Surgical Nursing Science (Critical Care Nursing: General)**, as general nurse.
  - For **Advanced Medical and Surgical Nursing Science (Critical Care: Trauma and Emergency Nursing)**, as general nurse.
  - For **Advanced Midwifery and Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
  - For **Advanced Psychiatric Nursing Science**, as general nurse and psychiatric nurse.
  - For **Advanced Community Nursing Science**, as general nurse, midwife/accoucheur and community nurse.
  - For **Advanced Paediatric Nursing Science**, as general nurse and midwife/accoucheur.
  - For **Advanced Neonatal Nursing Science**, as general nurse and midwife/accoucheur.
  - For **Advanced Women's Health**, as general nurse, midwife/ accoucheur and community nurse.
  - For **Primary Healthcare**, as general nurse, midwife/accoucheur and community nurse, as well as listing with the SANC, in the Handling of Medicine in Nursing and the Physical Evaluation of Patients.

### Non-clinical fields:

Registration with the South African Nursing Council (SANC) is required as follows:

- For **Nursing Management**, as general nurse and in Nursing Administration (Nursing Management).
- For **Nursing Education**, as general nurse and lecturer.

## Examinations and pass requirements

- i. A final mark of at least 50% must be obtained in each of the prescribed modules in order to pass.
- ii. Modules with a practical and/or clinical training component can only be passed if the student has also completed all prescribed practical and/or clinical work to the satisfaction of the relevant head of department.
- iii. The degree is conferred on a student who has complied with all the degree requirements.

## Pass with distinction

- i. The degree is conferred with distinction on a student who has maintained an average of at least 75% for the duration of his/her studies, with the exception of Nursing research methodology (VNM 800) and Advanced dynamics of nursing practice (DNP 800).
- ii. Students who complete the degree in a clinical field of specialisation, will receive their degree certificates endorsed with the subspeciality in question.

## Curriculum: Year 1

### Core modules

- Advanced child nursing science 863 (ACC 863) - Credits: 50.00  
Advanced child nursing science 864 (ACC 864) - Credits: 30.00  
Advanced child nursing science 865 (ACC 865) - Credits: 30.00  
Advanced community nursing science 863 (ACN 863) - Credits: 40.00  
Advanced community nursing science 864 (ACN 864) - Credits: 40.00  
Advanced community nursing science 865 (ACN 865) - Credits: 40.00  
Advanced midwifery and neonatal nursing science 863 (AMN 863) - Credits: 40.00  
Advanced midwifery and neonatal nursing science 864 (AMN 864) - Credits: 30.00  
Advanced midwifery and neonatal nursing science 865 (AMN 865) - Credits: 30.00  
Advanced midwifery and neonatal nursing science 870 (AMN 870) - Credits: 40.00  
Advanced medical and surgical nursing (Critical care: General) 863 (AMS 863) - Credits: 40.00  
Advanced medical and surgical nursing science 864 (AMS 864) - Credits: 30.00  
Advanced medical and surgical nursing science 865 (AMS 865) - Credits: 30.00  
Advanced neonatal nursing science 863 (ANN 863) - Credits: 50.00  
Advanced neonatal nursing science 864 (ANN 864) - Credits: 30.00  
Advanced neonatal nursing science 865 (ANN 865) - Credits: 30.00  
Advanced nursing management 863 (ANX 863) - Credits: 40.00  
Advanced nursing management 864 (ANX 864) - Credits: 30.00  
Advanced nursing management 865 (ANX 865) - Credits: 30.00  
Advanced nursing education 863 (ANZ 863) - Credits: 40.00  
Advanced nursing education 864 (ANZ 864) - Credits: 30.00  
Advanced nursing education 865 (ANZ 865) - Credits: 30.00  
Primary curative nursing science 863 (APC 863) - Credits: 40.00  
Primary curative nursing science 864 (APC 864) - Credits: 30.00  
Primary curative nursing science 865 (APC 865) - Credits: 30.00  
Advanced psychiatric nursing science 863 (APN 863) - Credits: 40.00  
Advanced psychiatric nursing science 864 (APN 864) - Credits: 30.00  
Advanced psychiatric nursing science 865 (APN 865) - Credits: 30.00  
Advanced medical surgical nursing science (Critical care: Trauma and emergency nursing science) 860 (ATN 863)

- Credits: 40.00

Advanced medical and surgical nursing science 864 (ATN 864) - Credits: 30.00

Advanced medical and surgical nursing science 865 (ATN 865) - Credits: 30.00

Advanced women's health 863 (AVN 863) - Credits: 40.00

Advanced women's health 864 (AVN 864) - Credits: 30.00

Advanced women's health 865 (AVN 865) - Credits: 30.00

Mini-dissertation 891 (VGK 891) - Credits: 80.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

## Curriculum: Final year

### Core modules

Advanced child nursing science 863 (ACC 863) - Credits: 50.00

Advanced child nursing science 864 (ACC 864) - Credits: 30.00

Advanced child nursing science 865 (ACC 865) - Credits: 30.00

Advanced community nursing science 863 (ACN 863) - Credits: 40.00

Advanced community nursing science 864 (ACN 864) - Credits: 40.00

Advanced community nursing science 865 (ACN 865) - Credits: 40.00

Advanced midwifery and neonatal nursing science 863 (AMN 863) - Credits: 40.00

Advanced midwifery and neonatal nursing science 864 (AMN 864) - Credits: 30.00

Advanced midwifery and neonatal nursing science 865 (AMN 865) - Credits: 30.00

Advanced midwifery and neonatal nursing science 870 (AMN 870) - Credits: 40.00

Advanced women's health 864 (AVN 864) - Credits: 30.00

Advanced women's health 865 (AVN 865) - Credits: 30.00

Mini-dissertation 891 (VGK 891) - Credits: 80.00

## MNurs Nursing Education (10251053)

**Minimum duration of study** 2 years

### Admission requirements

- At least a Bachelor of Nursing Science degree and according to the discretion of the head of department, an applicable post-basic qualification.
- The master's degree may be awarded only in the field of study of the prerequisite degree or equivalent qualification.

### Examinations and pass requirements

A final mark of at least 50% is required in both VNM 800 and the dissertation in order to comply with all the requirements for the degree.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation.

### Curriculum: Year 1

#### Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 180.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

### Curriculum: Final year

#### Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 180.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

## MNurs Nursing Education (Coursework) (10251055)

**Minimum duration of study** 2 years

### Programme information

The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification. Not all the different fields of study are presented every year. Commencement of studies must therefore be discussed beforehand with the head of department.

### Admission requirements

- The Bachelor of Nursing Science degree is required for admission.
- In the case of the non-clinical fields another approved bachelor's degree may also be considered.
- Successful completion of an entrance examination according to the discretion of the head of department.
- Registration with the South African Nursing Council (SANC) is required as general nurse and lecturer.

## Examinations and pass requirements

- i. A final mark of at least 50% must be obtained in each of the prescribed modules in order to pass.
- ii. Modules with a practical and/or clinical training component can only be passed if the student has also completed all prescribed practical and/or clinical work to the satisfaction of the relevant head of department.
- iii. The degree is conferred on a student who has complied with all the degree requirements.

## Pass with distinction

- i. The degree is conferred with distinction on a student who has maintained an average of at least 75% for the duration of his/her studies, with the exception of Nursing research methodology (VNM 800) and Advanced dynamics of nursing practice (DNP 800).
- ii. Students who complete the degree in a clinical field of specialisation, will receive their degree certificates endorsed with the subspeciality in question.

## Curriculum: Year 1

### Core modules

Advanced dynamics of nursing practice 800 (DNP 800) - Credits: 40.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

## Curriculum: Final year

### Core modules

Advanced nursing education 871 (ANZ 871) - Credits: 40.00

Advanced nursing education 872 (ANZ 872) - Credits: 40.00

Mini-dissertation 891 (VGK 891) - Credits: 80.00

## MNurs Nursing Management (10251113)

**Minimum duration of study**                      2 years

## Admission requirements

- At least a Bachelor of Nursing Science degree and according to the discretion of the head of department an applicable post-basic qualification.

## Examinations and pass requirements

A final mark of at least 50% is required in both VNM 800 and the dissertation in order to comply with all the requirements for the degree.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation.

## Curriculum: Year 1

### Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 180.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

## Curriculum: Final year

### Core modules

Dissertation: Nursing science 890 (VGK 890) - Credits: 180.00

Nursing research methodology 801 (VNM 801) - Credits: 0.00

## MNurs Nursing Management (Coursework) (10251114)

**Minimum duration of study** 2 years

### Programme information

The master's degree may only be awarded in the field of study of the prerequisite degree or equivalent qualification. Not all the different fields of study are presented every year. Commencement of studies must therefore be discussed beforehand with the head of department.

### Admission requirements

Nursing research methodology 801 (VNM 801) - Credits: 0.00

---

## Curriculum: Final year

### Core modules

Advanced nursing management 871 (ANX 871) - Credits: 40.00

Advanced nursing management 872 (ANX 872) - Credits: 40.00

Mini-dissertation 891 (VGK 891) - Credits: 80.00

## MOccTher (10258002)

**Minimum duration of study** 2 years

### Admission requirements

- The Bachelor's degree in Occupational Therapy or an equivalent qualification.
- Registration as occupational therapist with the Health Professions Council of South Africa.
- A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).
- A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.
- A written structured letter of motivation must be submitted with the application on 31 October.

### Additional requirements

Also consult the General Regulations.

#### Note:

Students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

### Examinations and pass requirements

The minimum pass mark for the dissertation is 50%.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% for the dissertation . (TNM 802) Applied research methodology 800 and (OTX 800) Occupational therapy 800 must have been attended satisfactorily.

## Curriculum: Year 1

### Core modules

Occupational therapy 800 (OTX 800) - Credits: 0.00

Dissertation: Occupational therapy 890 (OTX 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Occupational therapy 800 (OTX 800) - Credits: 0.00

Dissertation: Occupational therapy 890 (OTX 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MOccTher Activity Theory (Coursework) (10258052)

**Minimum duration of study** 2 years

### Admission requirements

- The Bachelor's degree in Occupational Therapy or an equivalent qualification.
- Registration as occupational therapist with the Health Professions Council of South Africa.
- A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).
- A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.
- Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five applicants apply for admission to a particular field of specialisation.
- Applicants will be notified as soon as possible after the closing date whether or not a particular field of specialisation will be presented in the subsequent year.

### Additional requirements

Also consult the General Regulations.

#### Note:

Students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

### Examinations and pass requirements

- i. A continuous evaluation mark of at least 50% is required for admission to the examination in the major subject.
- ii. The sequence of the examinations in the prerequisite subjects will be determined by the relevant head of department according to the major subject followed by the student.
- iii. In order to pass, a subminimum of 40% in the written and/or practical and/or clinical sections of the examination, and a final mark of at least 50%, is required in the major as well as the prerequisite subject.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained at least 75% in the major subject, and an average of at least 65% in the prerequisite subjects.

### Curriculum: Year 1

#### Fundamental modules

Occupational therapeutic anatomy 805 (AAN 805) - Credits: 24.00

Physiology 882 (FSG 882) - Credits: 15.00

### Core modules

Occupational therapy 805 (OTX 805) - Credits: 68.00

Mini-dissertation: Occupational therapy 891 (OTX 891) - Credits: 60.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Fundamental modules

Occupational therapeutic anatomy 805 (AAN 805) - Credits: 24.00

Physiology 882 (FSG 882) - Credits: 15.00

### Core modules

Occupational therapy 805 (OTX 805) - Credits: 68.00

Mini-dissertation: Occupational therapy 891 (OTX 891) - Credits: 60.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MOccTher Hand Therapy (Coursework) (10258012)

**Minimum duration of study** 2 years

### Admission requirements

- The Bachelor's degree in Occupational Therapy or an equivalent qualification.
- Registration as occupational therapist with the Health Professions Council of South Africa.
- A student must have at least one year clinical experience in the proposed field of study (Community service year excluded).
- A student must hold at least a 15 hours per week position for the duration of study deemed applicable to the proposed field of study by the head of department.
- Fields of specialisation for the MOccTher degree with coursework are offered on an annual basis if at least five applicants apply for admission to a particular field of specialisation.
- Applicants will be notified as soon as possible after the closing date whether or not a particular field of specialisation will be presented in the subsequent year.

### Additional requirements

Also consult the General Regulations.

#### Note:

Students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption will be granted if the module, BSN 701 Biostatistics and research methodology has been passed for the BOccTherHons degree.)

### Examinations and pass requirements

- i. A continuous evaluation mark of at least 50% is required for admission to the examination in the major subject.
- ii. The sequence of the examinations in the prerequisite subjects will be determined by the relevant head of department according to the major subject followed by the student.

iii. In order to pass, a subminimum of 40% in the written and/or practical and/or clinical sections of the examination, and a final mark of at least 50%, is required in the major as well as the prerequisite subject.

## MPH (10256502)

**Minimum duration of study** 2 years

### Programme information

The MPH programme comprises the following three components:

- Core modules
- Track modules (compulsory and elective)
- Mini-dissertation

### Track modules (compulsory and elective)

The following areas are available:

- Biostatistics and epidemiology – Monitoring and evaluation
- Disease control
- Disease control – field Epidemiology and Laboratory Training programme
- Environmental and occupational health
- Environmental and occupational health – Occupational hygiene
- Environmental and occupational health – Aerospace medicine
- Health policy and management
- Health promotion

Information regarding the content of each track is available on the website of the School of Health Systems and Public Health ([www.shsph.up.ac.za](http://www.shsph.up.ac.za)).

## Admission requirements

- Four-year bachelor's degree; plus at least two years' applicable practical (work) experience; or
- An honours degree; or
- A three-year bachelor's degree plus at least five years' applicable practical (work) experience

### Registration as a special student in the Faculty in order to pass a status examination

(i) Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

#### NB:

- In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval.
- All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purpose.

(ii) Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.

(iii) The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

### Other selection criteria (Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community building, etc.

## Additional requirements

### Registration as a special student in the Faculty in order to pass a status examination

i. Candidates will be required to first register as a special student in the Faculty, in order to pass in a status examination, in the following instances:

- A three-year bachelor's degree with less than five years' applicable practical (work) experience; or
- A four-year bachelor's degree with less than two years' applicable practical (work) experience; or
- Any applicant in possession of an approved bachelor's degree, who the School's Selection Committee deems fit to register as a special student.

#### NB:

In accordance with the criteria of the Senate of the University, the applications for admission of all such candidates must, apart from any Faculty requirements, also be submitted to the University Senate for approval. All candidates accepted for postgraduate study (MPH or the Postgraduate Diplomas) must be in possession of a National Senior Certificate with admission for degree purposes.

## ii. Pass requirements for the status examination

- At least 60% must be obtained in the status examination.
- The status examination will be written in June.
- iii. The application of a student who has passed the status examination must be submitted to the Senate of the University for approval. Successful students may then enrol for the degree programme in the following academic year.

### Other selection criteria

(Each on a scale of one to five.)

- Academic merit
- National/International need for public health
- Under-represented groups in public health
- Public health related employment
- Track record – e.g. employment, academic, community-building, etc.

### Other programme-specific information

**Please note:** All MMed students must register for, and attend (TNM 800) Applied research methodology, satisfactorily.

Also consult General Regulations

## Examinations and pass requirements

### i. Examination of modules

- a. Each module has its individual (own) evaluation, which may consist of more than one mode of evaluation. To pass in a module, a student must obtain a minimum pass mark of 50%.
- b. If a student fails a module but obtains 40% to 49%, a second examination in the module in question must be written. The student must arrange with the lecturer who presents the module, in consultation with the Academic Programme Coordinator, in this regard.
- c. If a student fails a module but obtains a mark of less than 40%, the module must be repeated in full in the following year.
- d. If a core module is still not passed after two attempts, the student will not be allowed to continue with the MPH programme.
- e. A compulsory module in the student's track can only be repeated once. If it is not passed after the second attempt, the student will be requested to change the track. If the student fails after two attempts in the second track, he or she will not be allowed to continue with the MPH programme.
- f. If an elective module is failed after two attempts, the student will have to select another elective module.

### ii. Final examinations for the MPH

- a. Other than summarising the total of marks obtained for modules, the MPH has an additional evaluation of its coursework, consisting of two comprehensive examinations. The decision as to whether these examinations will be written or conducted orally, lies with the examiners.
- b. The first examination (PHM 871 Public health examination Part 1 871 ) will take place after completion of all the compulsory core modules with the exception of HMS 871 Scientific writing 871 ; and is a test of the ability to apply basic knowledge in Public Health. This examination will consist of two papers, each three hours long.

Paper II will cover material learned during the core modules HME 870 and BOS 870. Paper I will cover material learned during the remaining core modules with the exception of material learned during the Scientific writing 871 module (HMS 871). This examination will be externally moderated.

- c. The second examination will take place at the end of the MPH programme and covers the modules taken as part of a track.
- d. The minimum pass mark for PHM 871 and for PHM 872 is 50% for each examination. For PHM 871 there are two papers; Paper I and Paper II. A subminima for 40% is required for each of these two papers and the final mark is simple (unweighted) average marks for the two papers. For PHM 872 there will be one three hour paper. The pass mark is 50% . If a student is awarded a final mark between 40% and 49% for either PHM 871 or PHM 872 the student will be offered a supplementary examination 2-3 months later. If the supplementary examination is passed the student will be awarded a mark of 50% for the examination. For both PHM 871 and PHM 872 students will be permitted only two attempts (excluding one supplementary examination per attempt for those who qualify for it/them. If a student fails either of the examination, either with or without a supplementary examination , the student will be required to rewrite it the next available examination period. If a student fails for the second time, the student will be required to rewrite in the next available examination period. A student who fails for the second time may not continue with the MPH programme.

The mini-dissertation must be passed independently with at least 50%.

## Research information

### Mini-dissertation

- i. The MPH degree consists of coursework (70%) and a research component (30%). The mini-dissertation contributes 60 credits (the equivalent of 600 notional hours of learning according to SAQA criteria).
- ii. The expected outcome of the mini-dissertation is that the student will be able to identify and investigate health and health systems problems in a comprehensive manner, and that he or she will be able to (i.e. begin to) formulate appropriate interventions.
- iii. The student's research protocol is submitted for approval to the MPH track head, prior to submission to the Health Sciences Research Ethics Committee.

### Pass with distinction

The degree will be conferred with distinction on a student who has a final mark of at least 75% for the mini-dissertation as well as a simple (i.e. unweighted) average mark of at least 75% for the following modules:

- all the required modules, excluding PHM 870 Learning in Public Health 870.
- PHM 871 Public health examination Part 1 871
- PHM 872 Public health examination Part 2 872

## General information

### Concurrent registration for two study programmes

- i. In accordance with the stipulations of the General Regulations, which is mutatis mutandis applicable in the case of postgraduate diploma study, the permission of the Dean is required for concurrent registration, subject to the regulations applicable to the fields of study in question and to any other stipulations the Dean may prescribe. Such a concession may be withdrawn by the Dean if the student does not perform satisfactorily – all assignments and coursework must be completed on time. Concurrent registration will not be accepted as a reason for poor performance or not meeting deadlines for both study programmes.
- ii. In the case of registering concurrently for two study programmes in the School of Health Systems and Public

Health and elsewhere, students must obtain the written consent of both the coordinator of their current programme and the coordinator of the second programme (or the track co-ordinator in the case of the MPH), and submit it with a substantiating letter to the School's Academic Programme Committee, for recommendation by the Chairperson of the School, after which the application is submitted to the Dean for approval.

- iii. The School of Health Systems and Public Health states that concurrent registration for two study programmes is a privilege and not a right.
- iv. Concurrent registration must be applied for annually and is granted based on academic performance in the primary degree/diploma programme. If the current field of study is a master's degree, then the second field of study can be a postgraduate diploma.
- v. If the current field of study is a postgraduate diploma, then the second field of study can be another postgraduate diploma.

## Curriculum: Year 1

ACM872, 874 and 875 are available only under exceptional circumstances and with the approval of the Dean acting on the advice of the Chairperson of the SHSPH.

### Core modules

- Biostatistics 1 874 (BOS 874) - Credits: 10.00
- Introduction to disease control 880 (CDC 880) - Credits: 10.00
- Basis of environmental health 881 (EHM 881) - Credits: 10.00
- Introduction to health management 875 (HCM 875) - Credits: 10.00
- Epidemiology 1 874 (HME 874) - Credits: 10.00
- Scientific writing 873 (HMS 873) - Credits: 0.00
- Learning in public health 880 (PHM 880) - Credits: 10.00
- Mini-dissertation 870 (PHR 870) - Credits: 60.00
- Social determinants of health and primary health care 880 (SCM 880) - Credits: 10.00
- Applied research methodology 802 (TNM 802) - Credits: 0.00

### Elective modules

- Individual study in public health 874 (ACM 874) - Credits: 30.00
- Biostatistics 2 875 (BOS 875) - Credits: 10.00
- Principles of communicable disease control 876 (CDC 876) - Credits: 10.00
- Seminars in tropical health (Agent) 877 (CDC 877) - Credits: 10.00
- Seminars in tropical health (Environment) 878 (CDC 878) - Credits: 10.00
- Seminars in tropical health (Host) 879 (CDC 879) - Credits: 10.00
- Principles: Chronic disease epidemiology 870 (CDE 870) - Credits: 5.00
- Disease outbreak and control 871 (CDS 871) - Credits: 10.00
- Economic evaluation of disease control intervention 872 (CDS 872) - Credits: 5.00
- Human nutrition and public health 874 (CDS 874) - Credits: 10.00
- Infectious disease epidemiology 870 (CDT 870) - Credits: 5.00
- Health risk assessment 871 (EHM 871) - Credits: 10.00
- Methods in exposure assessment 872 (EHM 872) - Credits: 10.00
- Introduction to toxicology 872 (EOH 872) - Credits: 5.00
- Environmental epidemiology 871 (EOM 871) - Credits: 10.00
- Epidemiology 2 870 (EPM 870) - Credits: 10.00

Conducting surveys 873 (EPM 873) - Credits: 10.00  
Disease surveillance 874 (EPM 874) - Credits: 5.00  
Financial management in public health 872 (HCF 872) - Credits: 10.00  
Health systems operations management 871 (HCI 871) - Credits: 10.00  
Occupational health law 872 (HCL 872) - Credits: 10.00  
Managing occupational health services 873 (HCM 873) - Credits: 10.00  
Health policy and systems 876 (HCM 876) - Credits: 10.00  
Project management in health 876 (HCS 876) - Credits: 10.00  
Introduction to monitoring and evaluation for health managers 874 (HIN 874) - Credits: 10.00  
Monitoring and evaluation 875 (HME 875) - Credits: 15.00  
Health data management 874 (HMS 874) - Credits: 5.00  
Principles of human resource management 872 (HRM 872) - Credits: 10.00  
Postgraduate studies in occupational hygiene 1 873 (OHS 873) - Credits: 10.00  
Postgraduate studies in occupational hygiene 2 874 (OHS 874) - Credits: 5.00  
Individual studies in occupational hygiene 875 (OHS 875) - Credits: 5.00  
Qualitative research methods 870 (QHR 870) - Credits: 10.00  
Communication in health 873 (SCC 873) - Credits: 10.00  
Health promotion 870 (SCP 870) - Credits: 10.00  
Principles of quality assurance 872 (TQM 872) - Credits: 10.00

## Curriculum: Final year

### Core modules

Biostatistics 1 874 (BOS 874) - Credits: 10.00

## **MPharmMed (10256002)**

**Minimum duration of study** 3 years

**Contact** Prof OBW Greeff [oppel.greeff@up.ac.za](mailto:oppel.greeff@up.ac.za) +27 (0)123192254

### **Admission requirements**

- MBChB degree of this University or a qualification deemed by the University to be equivalent to the MBChB degree for at least two years.
- Must be registered as a medical practitioner with the Health Professions Council of South Africa.
- International students must have qualifications verified by SAQA.

### **Additional requirements**

Also consult General Regulations.

### **Examinations and pass requirements**

- i. The examinations for each year of study will take place during the summer examination period.
- ii. To pass in a module, a minimum final mark of 50% is required.
- iii. In addition to the examination, a student will be required to complete all practical work and work assignments satisfactorily, as well as (NAV 882) Research report (Preparation) 882 and pass (NAV 883) Research report 883 (minimum pass mark 50%), in order to comply with all the requirements for the degree.
- iv. Second examinations will not be held before at least six months have elapsed since conclusion of the

examination in which the student failed.

## Pass with distinction

The degree will be conferred with distinction on a student who has obtained a final mark of at least 75% in the following modules:

- i. Medical pharmacology 802 and 803
- ii. Pharmacokinetics and pharmacodynamics 802 and 803, as well as a final mark of at least 75% for (NAV 883) Research report 883 in the final year of study.

## Curriculum: Year 1

### Core modules

- Principles of clinical epidemiology 872 (CLI 872) - Credits: 10.00
- Evidence-based medicine 873 (CLI 873) - Credits: 12.00
- Pharmaco-kinetics and pharmaco-dynamics 801 (FFD 801) - Credits: 30.00
- Medical biostatistics 800 (MBS 800) - Credits: 20.00
- Medical pharmacology 801 (MFM 801) - Credits: 30.00
- Practical work and work assignments 881 (WKT 881) - Credits: 40.00

## Curriculum: Year 2

### Core modules

- Principles of clinical epidemiology 872 (CLI 872) - Credits: 10.00
- Evidence-based medicine 873 (CLI 873) - Credits: 12.00
- Pharmaco-kinetics and pharmaco-dynamics 802 (FFD 802) - Credits: 30.00
- Medical pharmacology 802 (MFM 802) - Credits: 30.00
- Research report: Preparation 882 (NAV 882) - Credits: 40.00
- Practical work and work assignments 882 (WKT 882) - Credits: 40.00

## Curriculum: Final year

### Core modules

- Pharmaco-kinetics and pharmaco-dynamics 803 (FFD 803) - Credits: 30.00
- Medical pharmacology 803 (MFM 803) - Credits: 30.00
- Research report 883 (NAV 883) - Credits: 40.00
- Practical work and work assignments 883 (WKT 883) - Credits: 40.00

## MPhil Allergology (Coursework) (10250502)

**Minimum duration of study** 2 years

**Contact** Prof JFM Hugo [jannie.hugo@up.ac.za](mailto:jannie.hugo@up.ac.za) +27 (0)124203111

## Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.

- Appointed against an HPCSA-approved training number.

## Examinations and pass requirements

- Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.
- Successful completion of the examination of the relevant College of Medicine will constitute credit for the Part 1 of the relevant MPhil degree.
- Candidates who register for the relevant Part 2 of the MPhil degree and complete the required dissertation or approved equivalent such as a published paper or paper submitted for publication will be awarded the MPhil degree.

## Pass with distinction

The degree will be conferred with distinction on candidates who obtain a mark of 75% or more for Part 2 (the dissertation). Part 1 will be awarded only as a Pass or Fail.

## Curriculum: Year 1

### Core modules

Dissertation: Medical subspecialities Part 2 890 (DMS 890) - Credits: 60.00

Allergology for medical subspecialities Part 1 801 (LER 801) - Credits: 120.00

## Curriculum: Final year

### Core modules

Dissertation: Medical subspecialities Part 2 890 (DMS 890) - Credits: 60.00

Allergology for medical subspecialities Part 1 801 (LER 801) - Credits: 120.00

## MPhil Cardiology (Coursework) (10250503)

**Minimum duration of study** 2 years

**Contact** Prof IA Sarkin [andrew.sarkin@up.ac.za](mailto:andrew.sarkin@up.ac.za) +27 (0)123542277

## Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.
- Appointed against an HPCSA-approved training number.

## Examinations and pass requirements

- Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.
- Successful completion of the examination of the relevant College of Medicine will constitute credit for the Part 1 of the relevant MPhil degree.
- Candidates who register for the relevant Part 2 of the MPhil degree and complete the required dissertation or approved equivalent such as a published paper or paper submitted for publication will be awarded the MPhil degree.

## Pass with distinction

The degree will be conferred with distinction on candidates who obtain a mark of 75% or more for Part 2 (the dissertation). Part 1 will be awarded only as a Pass or Fail.

### Curriculum: Year 1

#### Core modules

Cardiology for medical subspecialities Part 1 801 (CAR 801) - Credits: 120.00

### Curriculum: Final year

#### Core modules

Cardiology for medical subspecialities Part 1 801 (CAR 801) - Credits: 120.00

Dissertation: Medical subspecialities Part 2 890 (DMS 890) - Credits: 60.00

## MPhil Child and Adolescent Psychiatry (Coursework) (10250504)

**Minimum duration of study** 2 years

**Contact** Prof RJ Green [robin.green@up.ac.za](mailto:robin.green@up.ac.za) +27 (0)123545277

### Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.
- Appointed against an HPCSA-approved training number.

### Examinations and pass requirements

- i. Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.
- ii. Successful completion of the examination of the relevant College of Medicine will constitute credit for the Part 1 of the relevant MPhil degree.
- iii. Candidates who register for the relevant Part 2 of the MPhil degree and complete the required dissertation or approved equivalent such as a published paper or paper submitted for publication will be awarded the MPhil degree.

## Pass with distinction

The degree will be conferred with distinction on candidates who obtain a mark of 75% or more for Part 2 (the dissertation). Part 1 will be awarded only as a Pass or Fail.

### Curriculum: Year 1

#### Core modules

Child and adolescent psychiatry Part 1 801 (FPY 801) - Credits: 120.00

### Curriculum: Final year

#### Core modules

Dissertation: Medical subspecialities Part 2 890 (DMS 890) - Credits: 60.00

Child and adolescent psychiatry Part 1 801 (FPY 801) - Credits: 120.00

## MPhil Clinical Haematology (Coursework) (10250505)

**Minimum duration of study** 2 years

**Contact** Prof GR Tintinger [gregory.tintinger@up.ac.za](mailto:gregory.tintinger@up.ac.za) +27 (0)123542287

### Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.
- Appointed against an HPCSA-approved training number.

### Examinations and pass requirements

- i. Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.
- ii. Successful completion of the examination of the relevant College of Medicine will constitute credit for the Part 1 of the relevant MPhil degree.
- iii. Candidates who register for the relevant Part 2 of the MPhil degree and complete the required dissertation or approved equivalent such as a published paper or paper submitted for publication will be awarded the MPhil degree.

### Pass with distinction

The degree will be conferred with distinction on candidates who obtain a mark of 75% or more for Part 2 (the dissertation). Part 1 will be awarded only as a Pass or Fail.

### Curriculum: Year 1

#### Core modules

Clinical haematology for medical subspecialties Part 1 801 (RHE 801) - Credits: 120.00

### Curriculum: Final year

#### Core modules

Dissertation: Medical subspecialities Part 2 890 (DMS 890) - Credits: 60.00

Clinical haematology for medical subspecialties Part 1 801 (RHE 801) - Credits: 120.00

## MPhil Critical Care (Coursework) (10250506)

**Minimum duration of study** 2 years

**Contact** Prof GR Tintinger [gregory.tintinger@up.ac.za](mailto:gregory.tintinger@up.ac.za) +27 (0)123542287

### Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.
- Appointed against an HPCSA-approved training number.

## Examinations and pass requirements

- i. Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.
- ii. Successful completion of the examination of the relevant College of Medicine will constitute credit for the Part 1 of the relevant MPhil degree.
- iii. Candidates who register for the relevant Part 2 of the MPhil degree and complete the required dissertation or approved equivalent such as a published paper or paper submitted for publication will be awarded the MPhil degree.

## Pass with distinction

The degree will be conferred with distinction on candidates who obtain a mark of 75% or more for Part 2 (the dissertation). Part 1 will be awarded only as a Pass or Fail.

## Curriculum: Year 1

### Core modules

Critical care for medical subspecialities Part 1 801 (CRT 801) - Credits: 120.00

## Curriculum: Final year

### Core modules

Critical care for medical subspecialities Part 1 801 (CRT 801) - Credits: 120.00

Dissertation: Medical subspecialities Part 2 890 (DMS 890) - Credits: 60.00

## MPhil Developmental Paediatrics (Coursework) (10250507)

**Minimum duration of study** 2 years

**Contact** Prof RJ Green [robin.green@up.ac.za](mailto:robin.green@up.ac.za) +27 (0)123545277

## Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.
- Appointed against an HPCSA-approved training number.

## Examinations and pass requirements

- i. Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.

## Admission requirements

- Registration as a specialist in the base or one of the base specialities of the HPCSA against the relevant subspeciality.
- Appointed against an HPCSA-approved training number.

## Examinations and pass requirements

- i. Submission of a satisfactory logbook of clinical cases prior to admission to writing the examination of the relevant College of Medicine.
- ii. Successful completion of the examination of the relevant College of Medicine will constitute credit for the Part 1 of the relevant MPhil degree.
- iii. Candidates who register for the relevant Part 2 of the MPhil degree and complete the required dissertation or approved equivalent such as a published paper or paper submitted for publication will be awarded the MPhil degree.

## Pass with distinction

The degree will be conferred with distinction on candidates who obtain a mark of 75% or more for Part 2 (the dissertation). Part 1 will be awarded only as a Pass or Fail.

## MPhil Philosophy and Ethics of Mental Health (Coursework) (10250531)

**Minimum duration of study** 1 year

**Contact** Prof CW van Staden [werdie.vanstaden@up.ac.za](mailto:werdie.vanstaden@up.ac.za) +27 (0)123199720

## Admission requirements

- A bachelor honours degree or equivalent in a field of relevance to either mental health or philosophy e.g. MBChB; BPsych; BAHons; LLB; BCur; BOccTher is the minimum admission requirement.
- Practical experience and/or a relevant master's degree is strongly recommended e.g. MMed (Psych); MA (Philosophy); MA (Psychology); MA (Sociology) MA (Social Work); MMus (Music Therapy); LLM; MNurs MOccTher.

## Additional requirements

Also consult General Regulations.

## Examinations and pass requirements

- i. Students must complete the assignments of each of the core modules and obtain a minimum mark of 50% to pass in the respective core modules.
- ii. The dissertation must consist of five sections of which the first four will respectively address a topic from the core modules. The fifth section will be on an appropriate topic of the student's choice.
- iii. The first four sections of the dissertation should each be between 5 000 and 6 000 words and the fifth section should be approximately 10 000 words in length.
- iv. A minimum mark of 50% will be required in each section of the dissertation to pass.
- v. A student will be disqualified from further study towards this degree when he or she fails any one of the sections for the third time.

## Pass with distinction

The degree will be conferred with distinction on a student who obtains a mark of 75% or more for the dissertation.

## Curriculum: Final year

## MPhysio (10258103)

**Minimum duration of study** 2 years

## Programme information

The master's degree is conferred by virtue of a dissertation (FTP 890), on an approved topic based on research.

**Note:** All MPhysT students must register for, and attend (TNM 802) Applied research methodology 800 satisfactorily.

## Admission requirements

- The BPhysio degree or an equivalent qualification.
- Registration as a physiotherapist with the Health Professions Council of South Africa.
- Students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.
- Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysio degree will be conferred.
- During the MPhysio studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- Postgraduate modules for all the fields of specialisation for the MPhysio degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation.
- Applicants will be notified as soon as possible after the closing date, whether or not a particular field of specialisation will be presented in the subsequent year.

## Research information

### Publication

All students must submit a publication that has been accepted for publication by an accredited journal before the degree will be conferred.

## Pass with distinction

To obtain the degree with distinction, at least 75% is required for the dissertation.

---

## Curriculum: Year 1

### Core modules

Dissertation: Physiotherapy 890 (FTP 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

## MPhysio Internal Medicine (Coursework) (10258163)

**Minimum duration of study**                      2 years

### Admission requirements

- The BPhysio degree or an equivalent qualification.
- Registration as a physiotherapist with the Health Professions Council of South Africa.
- Students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.
- Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysio degree will be conferred.
- During the MPhysio studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- Postgraduate modules for all the fields of specialisation for the MPhysio degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation.
- Applicants will be notified as soon as possible after the closing date, whether or not a particular field of specialisation will be presented in the subsequent year.

### Additional requirements

- i. For the MPhysT degree, students must also hold at least a part-time position, deemed applicable for master's degree studies by the relevant head of department.
- ii. Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysT degree will be conferred.
- iii. During the MPhysT studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- iv. Postgraduate modules for all the fields of specialisation for the MPhysT degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date, whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must, therefore, be discussed beforehand with the relevant head of department.

Also consult General Regulations.

## Other programme-specific information

Candidates who have passed with at least 60% in corresponding modules to those indicated by the department during the four-year BPhysio degree studies or an equivalent degree programme must, in consultation with the relevant head of department, select relevant modules from any faculty of the University of Pretoria, instead of the modules in question to the value of at least 40 credits, provided it can be accommodated in the class and examination timetables.

## Examinations and pass requirements

- i. The examinations in the prerequisite modules will take place prior to or concurrently with that of the major subject as determined by the relevant head of department.
- ii. The examination consists of a written and a clinical as well as an oral component.
- iii. A subminimum of 50% is required in each section of the examination, with a final mark of at least 50% to pass.
- iv. A student will be granted a second opportunity to take part in the examination in the major subject after at least six months have elapsed since the original examination took place.
- v. Students must submit a publication that has been accepted by an accredited journal for publication before the degree will be conferred.
- vi. Candidates who submit certificates of successful completion of modules in the Continued Professional Development programme with a view to admission to the MPhysT with coursework, must pass in an open examination in the module in question in order to retain credits.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the major subject and the prerequisite subjects, and at least 60% in all other prescribed modules.

## Curriculum: Year 1

### Fundamental modules

Physiotherapeutic anatomy 803 (FSA 803) - Credits: 15.00

Physiology 887 (FSG 887) - Credits: 15.00

Physiotherapy 812 (FTB 812) - Credits: 15.00

**Minimum duration of study**                      2 years

### Admission requirements

- The BPhysio degree or an equivalent qualification.
- Registration as a physiotherapist with the Health Professions Council of South Africa.
- Students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.
- Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysio degree will be conferred.
- During the MPhysio studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- Postgraduate modules for all the fields of specialisation for the MPhysio degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation.
- Applicants will be notified as soon as possible after the closing date, whether or not a particular field of specialisation will be presented in the subsequent year.

## Additional requirements

- i. For the MPhysT degree, students must also hold at least a part-time position, deemed applicable for master's degree studies by the relevant head of department.
- ii. Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysT degree will be conferred.
- iii. During the MPhysT studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- iv. Postgraduate modules for all the fields of specialisation for the MPhysT degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation. The closing date for new applications is 31 October annually. Applicants will be notified as soon as possible after this date, whether or not a particular field of specialisation will be presented in the subsequent year. Commencement of studies must, therefore, be discussed beforehand with the relevant head of department.

Also consult General Regulations.

## Other programme-specific information

Candidates who have passed with at least 60% in corresponding modules to those indicated by the department during the four-year BPhysio degree studies or an equivalent degree programme must, in consultation with the relevant head of department, select relevant modules from any faculty of the University of Pretoria, instead of the modules in question to the value of at least 40 credits, provided it can be accommodated in the class and examination timetables.

## Examinations and pass requirements

- i. The examinations in the prerequisite modules will take place prior to or concurrently with that of the major subject as determined by the relevant head of department.
- ii. The examination consists of a written and a clinical as well as an oral component.
- iii. A subminimum of 50% is required in each section of the examination, with a final mark of at least 50% to pass.
- iv. A student will be granted a second opportunity to take part in the examination in the major subject after at least six months have elapsed since the original examination took place.
- v. Students must submit a publication that has been accepted by an accredited journal for publication before the degree will be conferred.
- vi. Candidates who submit certificates of successful completion of modules in the Continued Professional Development programme with a view to admission to the MPhysT with coursework, must pass in an open examination in the module in question in order to retain credits.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the major subject and the prerequisite subjects, and at least 60% in all other prescribed modules.

## Curriculum: Year 1

## Fundamental modules

Physiotherapeutic anatomy 874 (FSA 874) - Credits: 15.00

Physiology 888 (FSG 888) - Credits: 15.00

Physiotherapy 811 (FTB 811) - Credits: 15.00

## Core modules

Clinical physiotherapy: Surgery 811 (FTK 811) - Credits: 40.00

## Curriculum: Final year

### Fundamental modules

Pharmacology 871 (FAR 871) - Credits: 35.00

### Core modules

Clinical physiotherapy: Surgery 811 (FTK 811) - Credits: 40.00

Mini-dissertation 894 (FTP 894) - Credits: 60.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MPhysio Women's Health (Coursework) (10258183)

**Minimum duration of study**                      2 years

### Admission requirements

- The BPhysio degree or an equivalent qualification.
- Registration as a physiotherapist with the Health Professions Council of South Africa.
- Students must also hold at least a part-time position, deemed applicable for master's degree studies by the head of department.
- Candidates will be required to provide proof of having successfully completed applicable postgraduate modules in clinical fields of specialisation, e.g. Orthopaedic Manual Therapy 1, before the MPhysio degree will be conferred.
- During the MPhysio studies, students must participate in formal departmental instruction and/or research programmes of at least 60 hours per year.
- Postgraduate modules for all the fields of specialisation for the MPhysio degree with coursework, are offered on a biennial basis, if at least five applicants apply for admission to a particular field of specialisation.
- Applicants will be notified as soon as possible after the closing date, whether or not a particular field of specialisation will be presented in the subsequent year.

### Additional requirements

### Curriculum: Final year

#### Fundamental modules

Pharmacology 871 (FAR 871) - Credits: 35.00

#### Core modules

Clinical physiotherapy: Women's health 815 (FTK 815) - Credits: 40.00

Mini-dissertation 894 (FTP 894) - Credits: 60.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## MRad Diagnostics (10257002)

**Minimum duration of study** 2 years

### Admission requirements

- Honours degree in Radiography.
- Registration as a radiographer with the Health Professions Council of South Africa.
- The master's degree may be taken only in the field of study in which the foregoing degree or equivalent qualification has been obtained.

### Other programme-specific information

(TNM 802) Applied research methodology 802 or an equivalent module must be attended satisfactorily.

### Pass with distinction

A minimum of 75% must be obtained in the dissertation, to obtain the degree with distinction.

### Curriculum: Year 1

#### Core modules

Dissertation: Diagnostics 890 (RSD 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

### Curriculum: Final year

#### Core modules

Dissertation: Diagnostics 890 (RSD 890) - Credits: 180.00  
Applied research methodology 802 (TNM 802) - Credits: 0.00

## MRad Nuclear Medicine (10257022)

**Minimum duration of study** 2 years

### Admission requirements

- Honours degree in Radiography.
- Registration as a radiographer with the Health Professions Council of South Africa.
- The master's degree may be taken only in the field of study in which the foregoing degree or equivalent qualification has been obtained.

### Other programme-specific information

(TNM 802) Applied research methodology 802 or an equivalent module must be attended satisfactorily.

### Pass with distinction

A minimum of 75% must be obtained in the dissertation, to obtain the degree with distinction.

## Curriculum: Year 1

### Core modules

Dissertation: Nuclear medicine 890 (KDE 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Dissertation: Nuclear medicine 890 (KDE 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MRad Radiation Therapy (10257013)

**Minimum duration of study** 2 years

### Admission requirements

- Honours degree in Radiography.
- Registration as a radiographer with the Health Professions Council of South Africa.
- The master's degree may be taken only in the field of study in which the foregoing degree or equivalent qualification has been obtained.

### Other programme-specific information

(TNM 802) Applied research methodology 802 or an equivalent module must be attended satisfactorily.

### Pass with distinction

A minimum of 75% must be obtained in the dissertation, to obtain the degree with distinction.

## Curriculum: Year 1

### Core modules

Dissertation: Radiation therapy 890 (RSZ 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Curriculum: Final year

### Core modules

Dissertation: Radiation therapy 890 (RSZ 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Aerospace Medicine (10253252)

**Minimum duration of study** 1 year

### Admission requirements

- An honours degree in Aerospace Medicine or another applicable honours degree.

## Additional requirements

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, MSc(Pharmacology) students must register for FAR 872 instead of TNM 802.

Also consult General Regulations.

## Other programme-specific information

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

## Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.
- ii. The prescribed modules must be passed independently of each other.
- iii. Second examinations in the modules are arranged by the relevant head of department, within a period of time specified by him or her.
- iv. No second examinations will be granted in modules in which less than 40% has been obtained. Instead, the module must be repeated in its entirety.
- v. Only with the approval of the Chairperson of the School, on the recommendation of the relevant head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

## Research information

### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the Academic Advisory Committee and if necessary, also to the Ethics Committee for approval.

### Dissertation

A dissertation on an approved research project must be passed in addition to the coursework. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MSc degree, provided that the module CLI 870 Principles of clinical epidemiology has been successfully completed. It requires, inter alia, a research protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods.

## Pass with distinction

The average mark of the modules, weighted in respect of the number of credits acquired for each individual module, will be the final mark (%) of the coursework.

The degree is conferred with distinction on a student who obtains an average mark of at least 75% in the coursework, as well as a final mark of at least 75% for the dissertation.

## Curriculum: Final year

### Core modules

Scientific writing 873 (HMS 873) - Credits: 0.00

Dissertation: Aerospace medicine 890 (LRG 890) - Credits: 180.00

Learning in public health 873 (PHM 873) - Credits: 0.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Anatomy (10253013)

**Minimum duration of study** 1 year

**Contact** Prof MC Bosman s73072843@tuks.co.za +27 (0)123192233

### Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

#### Note:

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

### Admission requirements

- A four-year bachelor's degree or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:
- With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

### Research information

#### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

#### Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the relevant head of department.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in the dissertation.

## Curriculum: Final year

### Core modules

Dissertation: [Anatomy 890](#) (ANA 890) - Credits: 180.00

[Applied research methodology 802](#) (TNM 802) - Credits: 0.00

## MSc Applied Human Nutrition (10253340)

**Minimum duration of study** 2 years

## Admission requirements

- A recognised bachelor's degree in Medicine or in a supplementary health service profession; or a recognised and applicable bachelor honours degree of equivalent status as the BDietetics degree with regard to Physiology and Biochemistry.

## Additional requirements

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, MSc(Pharmacology) students must register for FAR 872 instead of TNM 802.

Also consult General Regulations.

## Other programme-specific information

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

## Pass with distinction

The MSc in Applied Human Nutrition is conferred with distinction on a student who obtains an average of at least 75% in all the abovementioned modules and for the essay.

## Curriculum: Year 1

### Core modules

[Human nutrition 885](#) (DEK 885) - Credits: 20.00

[Introduction to nutrition and nutrient metabolism 889](#) (DEK 889) - Credits: 20.00

## MSc Dentistry Maxillofacial and Oral Radiology (Coursework) (10252092)

**Minimum duration of study** 1 year

#### Admission requirements

- BChD degree as well as the Postgraduate Diploma in Dentistry [PGDipDent] in the main field of study (RAD) Radiography 700.

#### Examinations and pass requirements

The stipulations of the General Regulations apply.

## Pass with distinction

A student must obtain a minimum of 65% in the basic subject and at least 75% in the major subject of the study programme.

## Curriculum: Final year

### Core modules

Maxillo-facial and oral radiology 806 (MPG 806) - Credits: 90.00

Radiography 801 (RAD 801) - Credits: 40.00

Mini-dissertation: Radiography 891 (RAD 891) - Credits: 60.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Dentistry Oral Surgery (Coursework) (10252091)

**Minimum duration of study** 1 year

## Admission requirements

- BChD degree as well as the Postgraduate Diploma in Dentistry [PGDipDent] with the main field of study Oral Surgery (Oral Surgery with a minimum pass mark of 65%).

## Other programme-specific information

A minimum of any two of the listed basic subjects is required. These basic subjects may be passed at the University of Pretoria or the College of Maxillofacial and Oral Surgery of the Colleges of Medicine of South Africa or may be part of the PGDipDent in Oral Surgery, or promoted/passed with a minimum pass mark of 65% from another tertiary institution (see also the General Regulations).

Students who hold the Postgraduate Diploma in Dentistry [PGDipDent] with Oral Surgery as the main field of study, may apply in writing for credit for the basic subject, clinical training and the written final examination in Oral Surgery, provided that a minimum of 65% has been obtained in the basic subject at the University of Pretoria (see also the General Regulations).

## Examinations and pass requirements

The stipulations of the General Regulations apply.

## Pass with distinction

A student must obtain a minimum of 65% in Parts I and II, and a minimum of 75% in each of the subdivisions of Part III of the study programme.

## Curriculum: Final year

### Core modules

Anatomy and principles of surgery 800 (CBA 800) - Credits: 24.00

Maxillo-facial radiology and principles of surgery 800 (CBR 800) - Credits: 24.00

Clinical training 891 (KGM 891) - Credits: 12.00

Mini-dissertation: Oral Surgery 892 (KGM 892) - Credits: 60.00

Oral surgery 800 (MCH 800) - Credits: 60.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Dentistry (10252090)

**Minimum duration of study** 1 year

### Programme information

The programme consists of a dissertation related to the major subject.

### Admission requirements

- BChD degree or an equivalent qualification as well as the Postgraduate Diploma in Dentistry [PGDipDent].
- The candidate may be exempted from the latter qualification at the discretion of the head of the department concerned and with the Dean's approval.
- Candidates in possession of an applicable bachelor honours degree or equivalent qualification may be admitted to study in certain specialised basic dental sciences at the discretion of the head of department concerned and according to the General Regulations, and with the Dean's approval.

### Examinations and pass requirements

The stipulations of the General Regulations apply. A minimum pass mark of 50% is required for the dissertation.

### Pass with distinction

A student must obtain a minimum of 75% for the dissertation.

### Curriculum: Final year

#### Core modules

Dissertation 890 (ODO 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Environmental Health (10253323)

**Minimum duration of study** 1 year

### Admission requirements

- A four-year bachelor's degree is required or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:
- With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

### Additional requirements

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, MSc(Pharmacology) students must register for FAR 872 instead of TNM 802.

Also consult General Regulations.

## Other programme-specific information

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

## Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.
- ii. The prescribed modules must be passed independently of each other.
- iii. Second examinations in the modules are arranged by the relevant head of department, within a period of time specified by him or her.
- iv. No second examinations will be granted in modules in which less than 40% has been obtained. Instead, the module must be repeated in its entirety.
- v. Only with the approval of the Chairperson of the School, on the recommendation of the relevant head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

## Research information

### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the Academic Advisory Committee and if necessary, also to the Ethics Committee for approval.

### Dissertation

A dissertation on an approved research project must be passed in addition to the coursework. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MSc degree, provided that the module CLI 870 Principles of clinical epidemiology has been successfully completed. It requires, inter alia, a research protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods.

## Pass with distinction

The average mark of the modules, weighted in respect of the number of credits acquired for each individual module, will be the final mark (%) of the coursework.

The degree is conferred with distinction on a student who obtains an average mark of at least 75% in the coursework, as well as a final mark of at least 75% for the dissertation.

## Curriculum: Final year

### Core modules

Dissertation: Environmental health 890 (EHM 890) - Credits: 180.00

Scientific writing 873 (HMS 873) - Credits: 0.00

Learning in public health 873 (PHM 873) - Credits: 0.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Epidemiology (10253324)

**Minimum duration of study** 2 years

### Admission requirements

- A four-year bachelor's degree is required or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:
- With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

### Additional requirements

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, MSc(Pharmacology) students must register for FAR 872 instead of TNM 802.

Also consult General Regulations.

### Other programme-specific information

**Please note:** The choice of elective modules has to be approved by the supervisor.

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

### Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.

## Admission requirements

- A four-year bachelor's degree or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:
- With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

## Research information

### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

### Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the relevant head of department.

## Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in the dissertation.

## Curriculum: Final year

### Core modules

Dissertation: Medical nuclear science 890 (GKW 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Medical Oncology (10253302)

**Minimum duration of study** 1 year

**Contact** Prof LM Dreosti [lydia.dreosti@up.ac.za](mailto:lydia.dreosti@up.ac.za) +27 (0)123541054

## Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

Note:

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

## Admission requirements

- A four-year bachelor's degree or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:

the dissertation.

## Curriculum: Final year

### Core modules

Dissertation: Medical virology 890 (GVR 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Pharmacology (10253053)

**Minimum duration of study** 1 year

**Contact** Prof AD Cromarty [duncan.cromarty@up.ac.za](mailto:duncan.cromarty@up.ac.za) +27 (0)123192622

### Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Students who follow the specialisation Pharmacology for the MSc degree, register for (FAR 872) Pharmacology: Introduction to laboratory research and techniques 872, instead of TNM 800 if the honours degree was not completed within the Department of Pharmacology.

The maximum period for completion of the master's degree is four years. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

Also consult General Regulations.

### Admission requirements

- A four-year bachelor's degree or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:
- With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

### Research information

#### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

#### Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the relevant head of department.

### Pass with distinction

The degree is conferred with distinction on a student who has obtained an average of at least 75% in the examination, or in the examination and the dissertation, or in the examination and the essay, or in

the dissertation.

## Curriculum: Final year

### Core modules

Pharmacology: Introduction to laboratory research and techniques 872 (FAR 872) - Credits: 12.00

Dissertation: Pharmacology 890 (FAR 890) - Credits: 180.00

## MSc Public Health (10253290)

**Minimum duration of study** 2 years

### Admission requirements

- A four-year bachelor's degree is required or an honours degree.
- In the case of a three-year bachelor's degree also applicable practical (work) experience as prescribed by the University plus any other additional work deemed necessary by the head of department:
- With the proviso that the head of department will have the discretion to decide whether the prerequisite qualification or the qualification plus work experience would be acceptable for admission to the proposed field of study.

### Additional requirements

All MSc students must register for, and attend (TNM 802) Applied research methodology 802 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.) However, MSc(Pharmacology) students must register for FAR 872 instead of TNM 802.

Also consult General Regulations.

### Other programme-specific information

**Please note:** The choice of elective modules has to be approved by the supervisor.

Subject to the stipulations of the General Regulations, the Chairperson of the School may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

### Examinations and pass requirements

- i. The minimum pass mark for a module is 50%.
- ii. The prescribed modules must be passed independently of each other.
- iii. Second examinations in the modules are arranged by the relevant head of department, within a period of time specified by him or her.
- iv. No second examinations will be granted in modules in which less than 40% has been obtained. Instead, the module must be repeated in its entirety.
- v. Only with the approval of the Chairperson of the School, on the recommendation of the relevant head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice).

---

## Research information

### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the Academic Advisory Committee and if necessary, also to the Ethics Committee for approval.

### Dissertation

A dissertation on an approved research project must be passed in addition to the coursework. The stipulations of the General Regulations regarding the preparation and submission, the technical editing and the résumé of the dissertation apply.

A systematic literature review (Cochrane type) on an approved subject, which is undertaken in such a manner that bias is minimised, may be presented as an alternative to the dissertation for awarding the MSc degree, provided that the module CLI 870 Principles of clinical epidemiology has been successfully completed. It requires, inter alia, a research protocol with clearly formulated objectives and methods. Inclusion and exclusion methods for the study must be determined. Where applicable, the data must be summarised (meta analysis), with applicable statistical methods.

### Pass with distinction

The average mark of the modules, weighted in respect of the number of credits acquired for each individual module, will be the final mark (%) of the coursework.

The degree is conferred with distinction on a student who obtains an average mark of at least 75% in the coursework, as well as a final mark of at least 75% for the dissertation.

## Curriculum: Year 1

### Fundamental modules

Scientific writing 873 (HMS 873) - Credits: 0.00

Learning in public health 873 (PHM 873) - Credits: 0.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the relevant head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

## Admission requirements

- MBChB degree of this University or a qualification deemed equivalent by the University for at least one year.
- Must be registered as a physician with the Health Professions Council of South Africa.

## Examinations and pass requirements

(aa) Examinations in the basic subjects FSG 880, SAN 880 and DTE 880 will take place at the end of the first semester.

(bb) The examination will comprise a two-hour written paper, with a subminimum of 40% required in the written examination. To pass in a module, a minimum final mark of 50% is required.

(cc) Should a student fail one of the basic subjects, he or she may be allowed to repeat the examination at the end of the second semester.

(dd) Examinations (two papers of 3 hours each, an oral and a practical), as well as the mini-dissertation, may only take place/be submitted after completion of the basic subjects.

## Pass with distinction

The MSc (Sports Medicine) will be conferred with distinction on students who obtain a mark of at least 75% in both the mini-dissertation (SGN 896) and SGN 800 Sports medicine.

## Curriculum: Final year

### Core modules

Sports nutrition 880 (DTE 880) - Credits: 12.00

Sports physiology 880 (FSG 880) - Credits: 12.00

Sports anatomy 880 (SAN 880) - Credits: 12.00

Sports medicine 800 (SGN 800) - Credits: 30.00

Sports medicine 802 (SGN 802) - Credits: 24.00

Mini-dissertation: Sports medicine 896 (SGN 896) - Credits: 90.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Sports Science Biokinetics (10253144)

**Minimum duration of study** 1 year

### Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

Note:

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

The maximum period for completion of the master's degree is four years. All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

### Admission requirements

- An honours degree in Biokinetics with a minimum average mark of 60%.
- A mark of 65% in NMR 702.

### Additional requirements

Admission to this programme requires an honours degree in Biokinetics with a minimum average mark of 60%, a mark of 65% in NMR 702 and a master's research proposal that has been accepted by the Departmental Research Committee, the Postgraduate Committee and Ethical Committee of the Faculty of Health Sciences.

### Research information

#### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

#### Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the relevant head of department.

### Pass with distinction

The MSc (Sports Science) Option: Biokinetics is conferred with distinction on a student who has obtained at least 75% in the dissertation.

### Curriculum: Final year

## Core modules

Dissertation: Biokinetics 891 (POK 891) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## MSc Sports Science Biomechanics (10253145)

**Minimum duration of study** 1 year

### Programme information

In accordance with the stipulations of the General Regulations, the MSc degree is conferred by virtue of an examination, or an examination and a dissertation, or an examination and an essay, or a dissertation.

Also consult General Regulations.

Note:

All MSc students must register for, and attend (TNM 800) Applied research methodology 800 satisfactorily. (Exemption may be granted if the module has already been passed for the BScHons degree.)

The maximum period for completion of the master's degree is four years. All the stipulations pertaining to coursework master's degrees and postgraduate studies in accordance with the General Regulations apply. Subject to the stipulations of the General Regulations, the Chairperson of the School in question may, in consultation with the head of department, approve a fixed limited extension of the period on the grounds of extraordinary circumstances.

### Admission requirements

- An honours degree in Sports Science with a minimum average mark of 60%.
- A mark of 65% in NMR 702 and MBK 705.

### Additional requirements

Admission to this programme requires an honours degree in Sports Science with a minimum average mark of 60%, a mark of 65% in NMR 702 and MBK 705, and a master's research proposal that has been accepted by the Departmental Research Committee, the Postgraduate Committee and Ethical Committee of the Faculty of Health Sciences.

### Research information

#### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

#### Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the relevant head of department.

### Pass with distinction

The MSc (Sports Science) Option: Biomechanics is conferred with distinction on a student who has obtained at least 75% in the dissertation.

Admission to this programme requires an honours degree in Sports Science with a minimum average mark of 60%, a mark of 65% in NMR 702 and a master's research proposal that has been accepted by the Departmental Research Committee, the Postgraduate Committee and Ethical Committee of the Faculty of Health Sciences.

### Research information

#### Research protocol

After registration, a student is required to submit a complete research protocol regarding the proposed dissertation to the MSc Committee of the School and if necessary, also to the Ethics Committee for approval.

#### Dissertation

A dissertation must be submitted via Student Administration at least three months prior to the date of a particular graduation ceremony. A manual on the editing of dissertations is available on request from the relevant head of department.

## Pass with distinction

The MSc in Sports Science is conferred with distinction on a student who has obtained at least 75% in the dissertation.

## Curriculum: Final year

### Core modules

Dissertation: Sports science 890 (POK 890) - Credits: 180.00

Applied research methodology 802 (TNM 802) - Credits: 0.00

## Doctorate

### DMed Anaesthesiology (10260014)

**Minimum duration of study** 2 years

**Contact** Prof JLA Rantloane [arthur.rantloane@up.ac.za](mailto:arthur.rantloane@up.ac.za) +27 (0)123192108

#### Programme information

The DMed degree is conferred by virtue of a thesis and, if the Dean deems it necessary, an examination on the field of study of the thesis.

Also consult General Regulations.

#### Admission requirements

- MMed or the PhD degree or a qualification of equivalent status following a MBChB degree.

#### Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted for approval to the Postgraduate Committee and if necessary, also to the Ethics Committee. The thesis must deal with a problem from any field of study in Medicine and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Medicine. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

#### Curriculum: Year 1

### Curriculum: Final year

#### Core modules

Thesis: **Psychiatry 990** (PSI 990) - Credits: 360.00

## DMed Public Health Medicine (10260244)

**Minimum duration of study** 2 years

### Programme information

The DMed degree is conferred by virtue of a thesis and, if the Dean deems it necessary, an examination on the field of study of the thesis.

Also consult General Regulations.

### Admission requirements

For admission to the study for the MD degree a candidate must be in possession of the MMed or the PhD degree or a qualification of equivalent status following a MBChB degree – in the case of Family Medicine the MMed in Family Medicine; and in the case of Pharmacology the MPharmMed degree of the University of Pretoria.

Alternatively the student must comply with the stipulations as set out in the General Regulations.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted for approval to the Postgraduate Committee and if necessary, also to the Ethics Committee. The thesis must deal with a problem from any field of study in Medicine and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Medicine. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

## PhD Anaesthesiology (10260522)

**Minimum duration of study** 2 years

**Contact** Prof JLA Rantloane [arthur.rantloane@up.ac.za](mailto:arthur.rantloane@up.ac.za) +27 (0)123192108

## Programme information

A PhD student must:

- under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a student may apply to the relevant head of the department, in writing, for a fixed, limited extension of this period.

## Admission requirements

- MBChB degree or a master's degree or has been granted the equivalent status.

## Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

## PhD Community Health (10260406)

**Minimum duration of study**                      2 years

### Programme information

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis. The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

## Admission requirements

- MBChB or a master's degree or has been granted the equivalent status.

## Additional requirements

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

A PhD student must

- under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not making adequate progress and will not be admitted to a second year of study.

## Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not

making adequate progress and will not be admitted to a second year of study.

## Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

## PhD Epidemiology (10260409)

**Minimum duration of study**                      2 years

## Programme information

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis. The maximum period for completion of a doctoral degree is five years. Under exceptional circumstances, a student may apply to the head of the department, in writing, for a fixed, limited extension of this period.

## Admission requirements

- MBChB or a master's degree or has been granted the equivalent status.

## Additional requirements

Also consult General Regulations.

Please note: All PhD students must register for, and attend TNM 800 Applied research methodology 800 satisfactorily. (Exemption will be granted if Applied research methodology 800 had been passed for the master's degree.)

A PhD student must

- under the supervision of a supervisor at the University or another institution approved by the Senate,

- undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

## Programme information

A PhD student must:

- under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a

student may apply to the relevant head of the department, in writing, for a fixed, limited extension of this period.

## Admission requirements

- MBChB degree or a master's degree or has been granted the equivalent status.

## Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

## PhD Nursing Science (10260312)

**Minimum duration of study** 2 years

## Programme information

The PhD degree study in the field of Nursing Science is conferred by virtue of a thesis and, if the Dean decides otherwise, an examination (VGK 900) which deals with the field of study of the thesis.

## Admission requirements

- Master's degree in Nursing Science or an equivalent qualification.

## Research information

- a. The thesis (VGK 990) deals with a problem from one or other field of Nursing Science, it must give an overview of the literature on the topic, and a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached. It must furthermore convince the promoter and examiners that it represents original research.
- b. A complete research protocol in respect of the proposed thesis must be submitted to an evaluation committee at the commencement of the doctoral studies, and if necessary, also to the Ethics Committee for approval.
- c. The evaluation committee is constituted by the head of department, in conjunction with the Chairperson of the School, and will consist of experienced persons in research in the proposed field of study of the candidate.
- d. At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities who will therefore not be able to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

A PhD student must

- under the supervision of a supervisor at the University or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The following additional requirement is set in respect of the PhD degree completed in the School of Health Systems and Public Health:

All PhD students in the School are required to have a successful oral defence of their research protocol before the end of the first academic year of study. Students who do not meet this requirement will be considered as not

making adequate progress and will not be admitted to a second year of study.

## Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Academic Advisory Committee and, if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from a field of study in Health Systems and Public Health and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of Health Systems and Public Health. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

## Curriculum: Year 1

### Core modules

Thesis: Public health 990 (OGD 990) - Credits: 360.00

## Curriculum: Final year

### Core modules

Thesis: Public health 990 (OGD 990) - Credits: 360.00

## PhD Radiography (10260572)

**Minimum duration of study** 2 years

## Programme information

Also consult the General Regulations.

The PhD degree study in the field Radiography is conferred by virtue of a thesis and, unless the Dean decides otherwise, an examination (RAD 900) which deals with the field of the thesis.

## Admission requirements

- Master's degree in Radiography or an equivalent qualification.

## Research information

- a. The thesis (RAD 990) must deal with a problem from one or other field of Radiography, it must give an overview of the literature on the topic, and a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached, and furthermore convince the promoter and examiners that it represents original research.
- b. A complete research protocol in respect of the proposed thesis must be submitted to an evaluation committee at the commencement of the doctoral studies, and also to the Ethics Committee for approval.
- c. The evaluation committee is constituted by the head of department, in conjunction with the Chairperson of the School, and will consist of experienced persons in research in the proposed field of study of the

candidate.

- d. At least two committee members will be appointed from other national and/or international tertiary institutions. Due to financial constraints, technological aids will be used in the case of committee members from foreign universities who will therefore be unable to attend the meeting. The report of the evaluation committee will be made available to the candidate in writing.

## Curriculum: Year 1

### Core modules

Thesis: Radiography 990 (RAD 990) - Credits: 360.00

## Curriculum: Final year

### Core modules

Thesis: Radiography 990 (RAD 990) - Credits: 360.00

## PhD Reproductive Biology Andrology (10260488)

**Minimum duration of study** 2 years

**Contact** Dr NH Aneck-Hahn [u01231626@up.ac.za](mailto:u01231626@up.ac.za) +27 (0)123541676

## Programme information

A PhD student must:

- i. under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a student may apply to the relevant head of the department, in writing, for a fixed, limited extension of this period.

## Admission requirements

- MBChB degree or a master's degree or has been granted the equivalent status.

## Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

## Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the

candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. It must give an overview of the literature that was used on the topic and contain a description of the observations made and experiments done by the student, as well as a discussion of the conclusions reached.

## PhD Sports Science Biokinetics (10260585)

**Minimum duration of study**                      2 years

## Programme information

A PhD student must:

- i. under the supervision of a supervisor at the university or another institution approved by the Senate, undertake original research to the satisfaction of the examiners; and
- ii. submit a thesis which will prove, according to the opinion of the examiners, that he or she has, on the grounds of independent critical judgement, made a distinct contribution towards the enrichment of knowledge in the chosen subject.

A student for the PhD degree must be registered for the doctoral degree study at the University for at least one academic year before the degree can be conferred.

The PhD degree is conferred by virtue of a thesis and, should the Dean deem it necessary, an examination on the field of study of the thesis.

The maximum period for completion of a doctoral degree is three years. Under exceptional circumstances, a student may apply to the relevant head of the department, in writing, for a fixed, limited extension of this period.

## Admission requirements

- A master's degree in Sports Science with focus area Biokinetics with a minimum mark of 60%.

- An acceptable level of proficiency in English is required.

### Additional requirements

Admission to this programme requires a master's degree in Sports Science with focus area Biokinetics with a minimum mark of 60% and a research proposal that has been accepted by the Departmental Research Committee, and the Ethical Committee of the Faculty of Health Sciences.

### Examinations and pass requirements

The doctoral examination will be oral and/or written and will deal with the content of the thesis as well as those subdivisions of the field of study on which the thesis is based, if requested.

### Research information

A complete research protocol regarding the proposed thesis (as well as the curriculum vitae of the candidate) must be submitted to the Postgraduate committee of the School in question and if necessary, also to the Ethics Committee for approval. The thesis must deal with a problem from any field of study in the Health Sciences and must satisfy the supervisor and the examiners that it represents advanced original research and/or creative work in the field of the Health Sciences. ## UPOnline

### PGDip in Public Health (UPOnline) (10221019)

**Minimum duration of study** 2 years

#### Programme information

The curriculum for the PGDip (Public Health) will comprise of compulsory core modules and a research component. All modules will be offered online.

#### Information on UPOne:

- The programmes presented by UPOne are part-time and fully online
- Online programmes allow access to programme material on any device provided that a stable internet connection is available.
- The UPOne modules have dedicated facilitators and contactable staff ready to help, motivate and assist students with any queries they may have.
- UPOne programmes have been designed to provide a highly interactive learning environment which may include live chats, discussion forums and online video communication.
- These programmes are structured with six enrolment opportunities per year where a student will enrol for a single module of either 8 or 16 weeks at a time.
- Payment can be made per module.

#### Admission requirements

Relevant Honours degree (NQF level 8)

or

Relevant four-year Bachelor's degree (NQF level 8) with at least two years' applicable practical work experience

or

Relevant three-year Bachelor's degree (NQF level 7) with at least two years' applicable practical work experience

#### Additional requirements

##### Computer literacy

The University of Pretoria makes use of Blackboard, branded as clickUP, which is an online system that provides a workspace for students, providing students with the information and the connections needed. ClickUP contains study material as well as a simple, convenient, and reliable web conferencing and virtual classroom solutions specifically built for education and training. ClickUP is accessible via a web browser mobile device, or tablet and has a useful student guide.

Students are required to have some technical and digital literacy skills such as the ability to:

- navigate the University's eLearning environment (ClickUP);
- use the email service in the LMS;
- manage digital files: create, store, upload and attach files to assignment submissions (using applications such as MS Word, MS Excel, MS PowerPoint);
- use the Library website or databases for research and make use of proper referencing techniques;
- use a webcam, upload videos or audio files, use social media for communication or to collaborate electronically; and
- download and install software and applications.

## Examinations and pass requirements

Written, oral and/or practical assessments must be passed in all the modules. The minimum pass mark for prescribed modules' summative assessment is 50%. Only with the approval of the Chairperson of the School, on the recommendation of the head of department, will a student be allowed to continue his or her studies after having failed two modules (or the same module twice). A second assessment attempt in a module is arranged in conjunction with the head of department for any student obtaining less than 50% and more than 39% for any module assessment.

## Pass with distinction

A diploma is awarded with distinction to a student who has obtained a mark of at least 75% for the externally moderated assessment components as well as a simple (unweighted) average of at least 75% of all the marks for the other required modules for the relevant diploma; excluding PHM 710 Learning in public health 710.

## Curriculum: Year 1

Minimum credits: 120

- PHM 710 must be completed first before registering for any other module.
- AHM 710 can only be registered for after completing all of the other modules.
- HME 711 is a prerequisite for HME 712.
- This programme is structured with six enrolment opportunities per year where a student will enrol for a single module of either 8 or 16 weeks at a time.
- A 8 week module typically consists of 7 weeks of teaching and 1 week of recess. A 16 week module typically consists of 14 weeks of teaching and 2 weeks of recess.
- The full curriculum is displayed below.

### Core modules

[PGDPH Research protocol 710 \(AHM 710\)](#) - Credits: 30.00

[Principles of disease prevention and control 710 \(CDC 710\)](#) - Credits: 10.00

[Introduction to environmental health 710 \(EHM 710\)](#) - Credits: 10.00

[Principles of health policy and management 710 \(HCM 710\)](#) - Credits: 10.00

[Introduction to research methodology 710 \(HME 710\)](#) - Credits: 10.00

[Epidemiology and Biostatistics I 711 \(HME 711\)](#) - Credits: 15.00

[Epidemiology and Biostatistics II 712 \(HME 712\)](#) - Credits: 15.00

[Learning in public health 710 \(PHM 710\)](#) - Credits: 10.00

[Social determinants of health 710 \(SCM 710\)](#) - Credits: 10.00

## Curriculum: Final year

Minimum credits: 120

- PHM 710 must be completed first before registering for any other module.
- AHM 710 can only be registered for after completing all of the other modules.
- HME 711 is a prerequisite for HME 712.
- This programme is structured with six enrolment opportunities per year where a student will enrol for a single module of either 8 or 16 weeks at a time.

## Modules

### Anatomy 701 (AAN 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

#### Module content

A complete synopsis of all anatomy modules at postgraduate level published in the Study Guide for Postgraduate Anatomy Courses is available on request from the Department of Anatomy.

### Anatomy 702 (AAN 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Hand Therapy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

#### Module content

A complete synopsis of all anatomy modules at postgraduate level published in the Study Guide for Postgraduate Anatomy Courses is available on request from the Department of Anatomy.

### Occupational therapeutic anatomy 804 (AAN 804)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	28.00
<b>Programmes</b>	<a href="#">MOccTher Hand Therapy (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 other contact session per week, 1 seminar per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy

**Period of presentation** Year

**Module content**

Applied clinical anatomy of structures and systems as set out in the study guide for postgraduate anatomy courses.

**Occupational therapeutic anatomy 805 (AAN 805)**

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes**

MOccTher Activity Theory (Coursework)  
MOccTher Neurology (Coursework)  
MOccTher Paediatrics (Coursework)  
MOccTher Psychiatry (Coursework)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 other contact session per week, 1 seminar per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

**Module content**

Applied clinical anatomy of structures and systems as set out in the study guide for postgraduate anatomy courses.

**General anatomical pathology 310 (AAP 310)**

**Qualification** Undergraduate

**Module credits** 6.00

**Prerequisites** MTS 200, RFI 210, RFI 211, RBG 210, RAW 201, RAN 280

**Contact time** 1 seminar per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Semester 1

**Context of child nursing and child development 711 (ACC 711)**

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

**Module content**

Approaches to child nursing and modalities of care; paediatric epidemiology, specific legislation, policies, guidelines, best practices and ethical decision making; theories, principles, assessment and appropriate care during human development; principles of early childhood intervention; mental health / psychosocial care of children and families; and pharmacological support of the sick child.

**Specific nursing care of the sick child and family 712 (ACC 712)**

**Qualification** Postgraduate

**Module credits** 22.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

**Module content**

Theory and practice of nursing care of the sick child and the family regarding respiratory-, cardiovascular-, neurological- and genito-urinary conditions, shock and acid-base disturbances, as well as gastrointestinal-, endocrine-, haematological-, immunological-, musculoskeletal-, integumentary-, and ear, nose and throat conditions.

**Nursing care of a child with surgery or trauma 721 (ACC 721)**

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

**Module content**

Theory and practice of pre-, intra- and postoperative nursing care of children and care of children with surgery of different systems, multiple trauma, injuries, accidents, burns, and specific incidents such as near-drowning, poisoning, children exposed to maltreatment and shock.

**Introduction to nursing care of critically ill neonate 722 (ACC 722)**

**Qualification** Postgraduate

<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

### Module content

Introduction to the theory and practice of nursing care of the high risk and critically ill neonates and their families.

## Advanced child nursing science 863 (ACC 863)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	50.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

## Advanced child nursing science 864 (ACC 864)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

## Advanced child nursing science 865 (ACC 865)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.

<b>Programmes</b>	<a href="#">MPH</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Individual study in public health 875 (ACM 875)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisite.

<b>Contact time</b>	16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Fundamentals of community nursing science 711 (ACN 711)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

#### **Module content**

Principles of evidence-based community nursing science and relevant ethical-legal frameworks; role of the community nurse in re-engineering of primary health care.

### **Health promotion and prevention in community care 712 (ACN 712)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

#### **Module content**

Theory and practice of evidence-based community assessment, health promotion and prevention of illness in different communities.

### **Community infant, child and adolescent health care 721 (ACN 721)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science

**Period of presentation** Quarter 3

**Module content**

Theory and practice of evidence-based health care of the infant, child and adolescent in the community; dealing with contemporary issues in infancy, childhood and adolescence in communities; integrated management of childhood illnesses (IMCI).

**Community nursing of acute and chronic conditions 722 (ACN 722)**

**Qualification** Postgraduate

**Module credits** 22.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

**Module content**

Theory and practice of evidence-based health care of patients with acute and chronic conditions in the community; dealing with contemporary issues in communities, including management of emergencies, rehabilitative and palliative care.

**Advanced community nursing science 863 (ACN 863)**

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

**Advanced community nursing science 864 (ACN 864)**

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced community nursing science 865 (ACN 865)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced community nursing science 871 (ACN 871)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced community nursing science 872 (ACN 872)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Academic competency in oral health 171 (ACO 171)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BOH](#)

**Prerequisites** No prerequisites.

**Contact time** 4 practicals per week, 5 lectures per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Semester 1

### Module content

This module will introduce the new oral hygiene student to the dental and university environment. It will also serve as the foundation for the total oral hygiene programme and will assist the student to feel more comfortable and settled in the new environment. This module entails the following:

- Professionalism and ethics
- Group work and communication
- Use of the library and correct referencing in assignments
- Academic skills such as academic writing and reading, effective studying and how to do assignments
- Dental terminology
- Dental specialities
- Dental instruments, equipment and materials
- Dental charting
- Infection control
- Occupational health and safety
- Brushing and flossing

### Administration and management 700 (ADB 700)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Contact time** 8 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

### Advanced clinical management in hand therapy 702 (ADM 702)

**Qualification** Postgraduate

**Module credits** 50.00

**Programmes** [PGDip Hand Therapy](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

## Module content

Advanced study of hand injuries and conditions and their management. The design and application of treatment programmes in clinical practice. Study and application of evaluation methods and instruments

### Aesthetic dentistry 700 (ADX 700)

**Qualification** Postgraduate

**Module credits** 100.00

**Prerequisites** No prerequisites.

**Contact time** 10 other contact sessions per week

**Language of tuition** Module is presented in English

**Department** Odontology

**Period of presentation** Year

### Aesthetic dentistry 701 (ADX 701)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [PGDip Dentistry Aesthetic Dentistry](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Odontology

**Period of presentation** Year

### Anatomy, embryology and histology 800 (AEH 800)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 5 lectures per week, 5 practicals per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy, embryology and histology 801 (AEH 801)

**Qualification** Postgraduate

**Module credits** 6.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Fundamentals of clinical forensic care 711 (AFO 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

#### Module content

Conceptualization of clinical forensic care; international and national legislation in forensic care; theories and models of clinical forensic care.

### People-centred and multi-professional approaches to manage forensic populations 712 (AFO 712)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

#### Module content

Ethical aspects in forensic nursing care; communication; counselling; self-care and caring for providers of forensic care; being an expert witness in court.

### Management from trauma to trial 721 (AFO 721)

**Qualification** Postgraduate

**Module credits** 22.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

## Module content

Comprehensive management of a forensic patient; the safety needs of the victim; technological diagnostic equipment; collection, preservation and documentation of treatment.

## Health promotion in clinical forensic care 722 (AFO 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

## Module content

Awareness, prevention and rehabilitation; multi-professional multi-sectoral collaboration.

## Afrikaans 110 (AFR 110)

**Qualification** Undergraduate

**Module credits** 12.00

## Programmes

## Service modules

Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Economic and Management Sciences  
Faculty of Law  
Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 2 discussion classes per week, 2 lectures per week

**Language of tuition** Module is presented in Afrikaans

**Department** Afrikaans

**Period of presentation** Semester 1

## Module content

**Taalkundekomponent:** Inleiding tot die Afrikaanse taalkunde met klem op lees-en skryfvaardigheid.

**Letterkundekomponent:** Inleiding tot die Afrikaanse en Nederlandse letterkunde aan die hand van kortverhale en gedigte.

## Basic conversational Afrikaans 111 (AFR 111)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BChD  
BOH

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Afrikaans

**Period of presentation** Semester 1

## Module content

Basic Afrikaans grammar and pronunciation and a specific technical (oral health) vocabulary is studied and practised to enable students to converse with patients in the professional environment. In this practical module, students are required to memorise phrases and to practise conversation skills under close observation.

## Afrikaans 120 (AFR 120)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BA  
BA Extended programme  
BA Fine Arts  
BA Languages  
BA Law  
BCom Law  
BDiv  
BEd Foundation Phase Teaching

Faculty of Education  
Faculty of Economic and Management Sciences  
Faculty of Law  
Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 2 discussion classes per week, 2 lectures per week

**Language of tuition** Module is presented in Afrikaans

**Department** Afrikaans

**Period of presentation** Semester 2

#### Module content

**Taalkundekomponent:** Inleiding tot die Afrikaanse sintaksis, fonetiek en taalgeskiedenis.

**Letterkundekomponent:** Inleiding tot die Romankuns Inleiding tot die Drama

### Fundamentals of gerontology nursing science 711 (AGN 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

#### Module content

Theoretical and ethical-legal framework of palliative nursing science; evidence-based care of the elderly; alternative care as modality in gerontology and palliative nursing.

### Health promotion, prevention and rehabilitation in gerontology nursing 712 (AGN 712)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

#### Module content

Theory and practice of evidence-based health promotion, prevention and rehabilitation in gerontology nursing.

### **Nursing care of specific conditions of the elderly 721 (AGN 721)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

#### **Module content**

Theory and practice of evidence-based care of elderly patients with health-related issues, acute or chronic illnesses, or emergencies.

### **Palliative and end-of-life care in gerontology nursing 722 (AGN 722)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

#### **Module content**

Ethical decision making in palliative, end-of-life and gerontology nursing science; alternative care as modality in palliative and gerontology nursing.

### **Thesis: General health sciences 990 (AGW 990)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	480.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Year

### **HIV prevention, screening and diagnosis across the lifespan 711 (AHA 711)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

**Module content**

Theory and practice of evidence-based HIV prevention, screening and diagnosis across the lifespan.

### Treatment and nursing care of patients with HIV/AIDS 712 (AHA 712)

**Qualification** Postgraduate

**Module credits** 22.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

**Module content**

Theory and practice of evidence-based treatment and nursing care of patients with HIV/AIDS with or without co-morbidities.

### Counselling and psychosocial support of patients with HIV/AIDS and their families 721 (AHA 721)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

**Module content**

Theory and practice of counselling and psychosocial support of patients with HIV/AIDS and their families; ethical decision making.

### Management, leadership and research related to HIV/AIDS 722 (AHA 722)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

**Module content**

Theory and practice of management, leadership and research related to HIV/AIDS and their families.

### PGDPH Research protocol 710 (AHM 710)

**Qualification** UPOne

**Module credits** 30.00

**Programmes** [PGDip in Public Health \(UPOne\)](#)

**Prerequisites** CDC 710 AND EHM 710 AND SCM 710 AND HCM 710 AND HME 710 AND PHM 710 AND HME 711 and HME 712

**Contact time** Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Long Intake

**Module content**

A formal protocol for study that is feasible and suitable for submission to the ethics and postgraduate committees for an MPH mini-dissertation project.

### Research report 771 (AHM 771)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Contact time** 50 hours per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

### Executive/Emerging Leadership

Participants will be required to write up a project which can consist of a Strategic Plan for Leadership at the workplace which they will be required to implement and monitor over a period of 6 months and then write up the strengths and weaknesses of whether this plan made a difference and to what extent they have been able to influence and change the approach of decision-making at their workplaces. A report from supervisors will be required and the project will include a literature review and a detailed analysis of what was achieved, what value-added difference the project made at the workplace, what were the sustainability factors built into the plan and how it had improved service delivery. The health leadership strategies that arise out of the project will be discussed and how its broader application can be implemented towards transforming healthcare delivery at district or hospital level.

## Research report 772 (AHM 772)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [PGDip Health Systems Management Executive Leadership](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Public health narrative literature review or policy analysis 774 (AHM 774)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

A narrative literature review on an approved public health topic.

### Public health operations research 775 (AHM 775)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

Selected operations research topics to be addressed through a mixture of on-line case studies (supplemented by reading materials) and supplemented by an approved workplace-based mini project of an operations research nature (e.g. a small action research project, or analysis of a queuing or inventory problem with recommendations for improvements etc).

### Reproductive health epidemiology 870 (AHM 870)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** HME 870

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Context of critically ill child over the continuum of developmental phases 711 (AIC 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

## Module content

Approaches, strategies and modalities to critically ill child nursing; specific legislation, policies, guidelines, best practices, paediatric epidemiology and ethical decision making in child critically care; human development and developmental care; mental health, psychosocial and family centred care of critical ill children and families; resuscitation, stabilization, transport, admission and monitoring; and respiratory support, venous access and pain management.

## Nursing care of the critically ill child and family 712 (AIC 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Approaches, strategies and modalities to critically ill child nursing; specific legislation, policies, guidelines, best practices, paediatric epidemiology and ethical decision making in child critically care; human development and developmental care; mental health, psychosocial and family centred care of critical ill children and families; resuscitation, stabilization, transport, admission and monitoring; and respiratory support, venous access and pain management.

## Nursing care of the critically ill child with multi-system related problems, surgery or trauma 721 (AIC 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

### Module content

Theory and practice of nursing care of the critically ill child with cardio-thoracic-, neuro-, reconstructive-, head- and neck surgery, burn wounds, grafts, organ transplants, special implants, multiple trauma, injuries, accidents, maltreatment and toxicology.

## Introduction to nursing care of critically ill neonate 722 (AIC 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

## Module content

Introduction to the theory and practice of nursing care of the high risk and critically ill neonates and their families.

## Academic information management 101 (AIM 101)

**Qualification** Undergraduate

**Module credits** 6.00

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Informatics
<b>Period of presentation</b>	Semester 2

### Module content

Apply effective search strategies in different technological environments. Demonstrate the ethical and fair use of information resources. Integrate 21st-century communications into the management of academic information.

## Fundamentals of leadership in clinical nursing practice 711 (AKL 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Theory, principles, application and opportunities of leadership in clinical nursing practice; management of contemporary issues in clinical nursing practice.

## Ethical, legal, forensic and quality issues in clinical nursing practice 712 (AKL 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Ethical, legal, forensic and quality issues in clinical nursing practice; ethical decision making; management of potential disciplinary, forensic or litigation cases; quality improvement in clinical nursing practice.

## Unit design and procurement in clinical nursing practice 721 (AKL 721)

<b>Qualification</b>	Postgraduate
----------------------	--------------

---

<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

#### **Module content**

Principles and application of unit design and procurement in clinical nursing practice.

### **Managerial and leadership application in a clinical speciality 722 (AKL 722)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

#### **Module content**

Innovative practice, leadership and project management in a clinical speciality.

### **Occupational science 100 (AKU 100)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week, 8 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### **Module content**

Theory of occupational science. Application of creative ability principles during activity participation. Application of a variety of elective activities which promotes the engagement of clients in meaningful occupation.

### **Occupational science 200 (AKU 200)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00

**Prerequisites** ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 1 lecture per week, 4 practicals per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

The theory on the science of occupation. Application of activities in the areas of ADL (Activities of Daily Living) and leisure, as well as elective activities that promote the engagement of clients in meaningful occupation.

## Occupational science 303 (AKU 303)

**Qualification** Undergraduate

**Module credits** 15.00

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283

**Contact time** 1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

The study of normal development and the effect on ill health and disability in the areas of play and school. The science and application of occupational therapy principles to promote engagement in meaningful occupation taking into consideration personal and environmental context. Includes pathology, causes, clinical picture and prognosis of selected conditions.

## Occupational science 381 (AKU 381)

**Qualification** Undergraduate

**Module credits** 25.00

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283

**Contact time** 2 practicals per week, 2 seminars per week, 5 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Semester 1

## Module content

The study of the effect of ill health and disability in the area of Activities of Daily Living (ADL). The science and application of occupational therapy principles to promote engagement in meaningful occupation, taking into consideration personal and environmental contexts. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

### Occupational science 382 (AKU 382)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Prerequisites</b>	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
<b>Contact time</b>	2 practicals per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Semester 2

## Module content

The study of the effect of ill health and disability in the area of work. The science and application of occupational therapy principles to promote engagement in meaningful occupation within the context of South African Disability Equity Legislation. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

### Occupational science 400 (AKU 400)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	BOccTher
<b>Prerequisites</b>	ANP 210, RPD 380, AKU 381, AKU 382, ART 381, ART 382, ART 303, AIM 101, ELH 121, ELH 122 and [SEP 110 of ZUL 110]
<b>Contact time</b>	1 discussion class per week, 1 seminar per week, 2 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

## Module content

Continued study in occupational science with emphasis on the areas of occupation. Integration and application of knowledge and skills in a community fieldwork setting, an elective vocational rehabilitation fieldwork setting and in an elective paediatric fieldwork setting.

### Academic literacy 110 (ALL 110)

<b>Qualification</b>	Undergraduate
----------------------	---------------

**Module credits** 6.00

BA  
BA Audiology  
BA Extended programme

**Service modules** Faculty of Health Sciences  
Faculty of Theology and Religion

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 1

**Module content**

This module intends to equip students to cope more confidently and competently with the reading and understanding of a variety of texts, to apply these skills in a variety of contexts and to follow the conventions of academic writing.

**Academic literacy for Humanities 125 (ALL 125)**

**Qualification** Undergraduate

**Module credits** 6.00

<b>Programmes</b>	BA BA Extended programme BA Fine Arts BA Information Design BA Languages BA Visual Studies BDram BMus BMus Extended programme BPolSci International Studies BPolSci Political Studies BSW BSocSci Heritage and Cultural Tourism BSocSci Industrial Sociology and Labour Studies
-------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Unit for Academic Literacy
<b>Period of presentation</b>	Semester 2

#### Module content

This module equips students to understand and use a range of discipline-specific terminology; apply the strategies of critical and comprehensive reading to their own academic literacy; apply the conventions of academic writing to their own writing, using the process approach, to produce intelligible academic texts and use the correct referencing technique as required by the faculty.

### Genetics and genomics, pre-conception and antenatal care 711 (AMN 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

#### Module content

Principles of genetics and genomics; theory and practice of complex pre-conception and antenatal midwifery care.

### Complex and compassionate intrapartum care 712 (AMN 712)

<b>Qualification</b>	Postgraduate
----------------------	--------------

---

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	24 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

#### Module content

Theory and practice of complex and compassionate intrapartum midwifery care.

### Responding to complex postnatal needs 721 (AMN 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	18.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	20 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

#### Module content

Theory and practice of complex postnatal midwifery care.

### Introduction to nursing care of critically ill neonate 722 (AMN 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

#### Module content

Introduction to the theory and practice of nursing care of the high risk and critically ill neonate.

### Advanced midwifery and neonatal nursing science 863 (AMN 863)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Advanced midwifery and neonatal nursing science 864 (AMN 864)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced midwifery and neonatal nursing science 865 (AMN 865)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Advanced midwifery and neonatal nursing science 870 (AMN 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Advanced midwifery and neonatal nursing science 871 (AMN 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced midwifery and neonatal nursing science 872 (AMN 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Holistic principles underpinning adult critical care practice 711 (AMS 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

#### Module content

Critical nursing care practices related to person-centred care, pain management, hemodynamic monitoring, laboratory findings and diagnostic tests, applied pharmacology, shock and shock syndrome, applicable legislation and policy documents, ethical considerations, safe therapeutically environment and end-of-life care.

### Complexity of critical illness of medical conditions 712 (AMS 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

### Module content

Theory and practice of critical care nursing of patients with conditions of the neurological-, cardiac-, pulmonary- and endocrine systems, as well as the immune-compromised or toxicology critically ill patient, and application of infection control practices.

## Complexity of the critically injured and post-operative critical ill patient 721 (AMS 721)

**Qualification** Postgraduate

**Module credits** 22.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

### Module content

Theory and practice related to nursing of the critically injured and post-operative critically ill patient in relation to injuries, burns and organ donation.

## Prevention of and care of the critical ill patient with multi-organ dysfunction 722 (AMS 722)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

### Module content

Theory and practice of prevention of and care for the critically ill patient with multi-organ dysfunction relating to acute pancreatitis, septic shock, multi-organ dysfunction syndrome and systemic inflammatory response syndrome.

## Advanced medical and surgical nursing (Critical care: General) 863 (AMS 863)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Advanced medical and surgical nursing science 864 (AMS 864)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced medical and surgical nursing science 865 (AMS 865)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Advanced medical and surgical nursing (Critical care: General) 870 (AMS 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Advanced medical and surgical nursing (Critical care: General) 871 (AMS 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced medical and surgical nursing (Critical care: General) 872 (AMS 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Anatomy 111 (ANA 111)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">BA Audiology</a> <a href="#">BA Speech-Language Pathology</a>
<b>Service modules</b>	Faculty of Humanities
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

#### Module content

Anatomy for communication pathology

This module is on the theory and practical experience of the structure of the organs involved with speech production and hearing excluding neuro-anatomy. Anatomical terminology and elementary study of tissues; gross anatomy of structures involved with speech production and hearing: larynx, skeletal components and muscles involved with respiration, viscera of the respiratory system, bones and paranasal sinuses of the skull, synopsis of the cranial nerves, structure of the viscera of the vocal tract, structure of the ear; embryology of the face, palate, tongue, larynx and ear.

## Introduction: Human anatomy and embryology 121 (ANA 121)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	<a href="#">BSc Extended programme - Biological and Agricultural Sciences</a> <a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	MLB 111 and CMY 117; Only for BSc Medical Sciences students.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

### Module content

Terminology, musculo-skeletal system, nervous system, surface anatomy, cardiovascular system, respiratory system, urogenital system, gastro-intestinal system, endocrine system, introductory osteology and joints, introductory embryology.

## Human osteology 122 (ANA 122)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	<a href="#">BSc Extended programme - Biological and Agricultural Sciences</a> <a href="#">BSc Medical Sciences</a> <a href="#">BScHons Anatomy</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	CMY 117 and MLB 111; Only for BSc Medical Sciences students
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

### Module content

Introduction to osteology, bone function and classification, humerus, radius, ulna, femur, tibia, fibula, clavicle, scapula, ribs, sternum, vertebrae, pelvis, hand and foot bones, sesamoid bones, skull, mandible, joints.

## Introduction to human anatomy 123 (ANA 123)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Prerequisites</b>	No prerequisites.

---

<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### Module content

\*Closed - requires departmental selection

This module serves as the foundation of the necessary knowledge required to understand human anatomy as well as facilitate the students' understanding in future applied anatomy modules. This module covers the following aspects of human anatomy: anatomical terminology, osteology, arthrology, the muscular system, the nervous system, the cardiovascular system and the respiratory system.

## Basic human histology 126 (ANA 126)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	<a href="#">BSc Extended programme - Biological and Agricultural Sciences</a> <a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	CMY 117 and MLB 111; Only for BSc Medical Sciences students.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

### Module content

General introduction to cells and tissue, terminology, the cell and cytoplasm, organelles and inclusions, surface and glandular epithelium, general connective tissue, specialised connective tissue, namely cartilage, bone, blood and haemopoietic tissue, muscle and nervous tissue.

## Introduction to anatomy 151 (ANA 151)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	<a href="#">BNurs</a> <a href="#">BOccTher</a> <a href="#">BPhysio</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy

---

**Period of presentation** Quarter 1

**Module content**

A systematic approach to Anatomy, including general terminology, embryology and osteology, with the use of wet specimens. Introductory histology includes cytology, the nucleus and cell division, epithelial tissue, general connective tissue, cartilage and bone.

**Anatomy of the limbs 152 (ANA 152)**

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BNurs](#)  
[BOccTher](#)  
[BPhysio](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 practical per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Quarter 2

**Module content**

Anatomy of the appendicular skeleton

A systematic approach to the Anatomy of the muscles, blood vessels, nerve supply, lymph drainage and joints of the upper and lower limbs, as well as surface anatomy, with the use of wet specimens. Introductory histology includes muscle tissue, nerve tissue, and blood and haemopoietic tissue.

**Anatomy of the torso 161 (ANA 161)**

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BNurs](#)  
[BOccTher](#)  
[BPhysio](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 practical per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Quarter 3

## Module content

A systematic approach to the anatomy of the thorax and its contents, the abdomen and its contents and the pelvis and its contents (organs, vascular systems, nerve supply, lymph drainage, muscles and joints), as well as surface anatomy, with the use of wet specimens. Introductory histology includes the histology of the lungs, liver and kidneys.

## Anatomy of the head and neck 162 (ANA 162)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BNurs  
BOccTher  
BPhysio

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 practical per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Quarter 4

## Module content

Anatomy of the head and neck, and neuroanatomy

A systematic approach to the anatomy of the head and neck regions, the senses and the central and peripheral nervous system (cranial nerves, autonomic nervous system), as well as surface anatomy, with the use of wet specimens.

## Anatomy 171 (ANA 171)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** BOH

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 1

## Module content

The emphasis of the study in anatomy is particularly focused on all aspects of the oral cavity, but certain aspects of the anatomy of the head and neck is also included. This involves aspects of the osteology of the skull and jaw bones, the anatomy of the temporomandibular joint, salivary glands, nose, paranasal sinuses, pharynx, larynx and specific muscle groups as well as the cranial nerves, vascular supply and lymphatic drainage of the head and neck, as well as the radiographic features of some of the above.

## Anatomy 185 (ANA 185)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	21.00
<b>Programmes</b>	<a href="#">BCMP</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 3 practicals per week, 8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

### Module content

Systemic clinical anatomy: cardiovascular, respiratory, digestive, urogenital, eye, ear nose and throat, nervous, musculoskeletal, skin and endocrine systems.

Surface and regional anatomy confined to specific diagnostic, therapeutic and emergency procedures.

## Human cell and developmental biology 214 (ANA 214)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	ANA 121 and ANA 126 and CMY 127
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

### Module content

Functional review of the cell and cell content. Normal and abnormal cell function in relation to structure. Control of the human cell, heredity and the human genome. Cell communication, growth and development, adhesion and division. Aspects of cellular research. Techniques on how to study cells. Medical cell and molecular biology application.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

## Paleoanthropology 215 (ANA 215)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences

---

<b>Prerequisites</b>	ANA 122 and GTS 161
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

### Module content

Introduction to paleoanthropology, focusing on hominid fossil record, principles of evolution, principles of heredity, human variation, introduction to primatology, hominid taxonomy, time-frames and dating methods, fossilisation and taphonomy, trends in hominid evolution, hominid sites. Australopithecus, homo habilis, homo erectus, homo sapiens neanderthalensis, the origin of anatomically modern human beings, DNA studies, palaeo-environments, hominid diets, introduction to the development of culture, South African populations, human adaptation and modernisation.

## Human histology 226 (ANA 226)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	ANA 126
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

### Module content

General introduction to organ structure.

Terminology. The eye, ear, skin, circulatory system, nervous system, lymphoid system, gastrointestinal tract, gastrointestinal tract glands, respiratory system, urinary system, male and female reproductive systems, endocrine system.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

## Human anatomy Part 1 247 (ANA 247)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	ANA 121, ANA 122 and CMY 127
<b>Contact time</b>	2 lectures per week, 2 practicals per week

---

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

### Module content

Regional approach to human anatomy. Cadaver dissection of the head, neck as well as neuro-anatomy. Anatomical techniques.

NOTE: This module is not open to all students and may only be taken by BSc (Medical Sciences) students.

## Forensic anthropology 315 (ANA 315)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** ANA 122, ANA 215

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 1

### Module content

Introduction to forensic anthropology, detection of graves, excavation of graves, human vs. animal bone, forensic entomology, osteometry, cranial and post-cranial measurements, non-metric features of the skeleton, age determination, sex determination, race determination, ante-mortem stature, dental analysis, osteopathology, factors of individualisation, measurements of the face, introduction to face mapping and skull-photo superimposition, legal aspects. NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

## Cell and tissue techniques 316 (ANA 316)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** ANA 226

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 1

## Module content

General introduction to light and electron microscopic techniques: fixation, processing, imbedding, staining. Principles of different staining techniques for LM and EM: routine stains, proteins, carbohydrates, amino acids, metachromasia, immunocytochemistry, lectin stains, specialised stains. Principles of the operation of LM and EM: general LM, fluorescent microscopy, differential contrast microscopy, dark field microscopy, phase contrast microscopy, transmission and scanning electron microscopy.

## Human cell and developmental biology 324 (ANA 324)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Programmes</b>	<a href="#">BSc Medical Sciences</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	ANA 214, ANA 226
<b>Contact time</b>	1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

## Module content

Practical aspects of cell biology. Cell, tissue, organ, and organism culture. The biology of the culture environment. Cellular basic of morphogenesis, cleavage patterns and gastrulation. The early vertebrate development; neurulation, ecto-, meso- and endoderm derivatives. Cell destiny and embryonic axis including malformations. Development of the tetrapod limb and cell death. Cell interactions at a distance through hormones and metamorphosis.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

## Histology techniques 326 (ANA 326)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

## Comparative anatomy 327 (ANA 327)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences

**Prerequisites** ANA 121, ANA 122, ANA 217, ANA 227

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

#### Module content

Introduction to comparative anatomy. Introduction to comparative osteology. Comparative anatomy of the appendicular skeleton. Comparative anatomy of the axial skeleton.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

### Applied research techniques 328 (ANA 328)

**Qualification** Undergraduate

**Module credits** 8.00

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** ANA 315#, ANA 316#

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

#### Module content

Introduction to research. Development of research project. Research skills. Completion of literature review.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

### Human anatomy Part 2 347 (ANA 347)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** ANA 247

**Contact time** 2 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

## Module content

Regional approach to human anatomy.

Cadaver dissection of the head, neck as well as neuro-anatomy. Anatomical techniques.

NOTE: This module is not open to all students and may only be taken by BSc: Medical Sciences students.

## Anatomy 700 (ANA 700)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Anatomy](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

## Module content

A complete synopsis of all anatomy modules at postgraduate level is published in the study guide for postgraduate anatomy courses, which is available on request from the Department of Anatomy.

This module includes 30 research credits.

## Anatomy 710 (ANA 710)

**Qualification** Postgraduate

**Module credits** 20.00

## Programmes

[PGDip Dentistry Aesthetic Dentistry](#)  
[PGDip Dentistry Community Dentistry](#)  
[PGDip Dentistry Dental Materials](#)  
[PGDip Dentistry Endodontics](#)  
[PGDip Dentistry Forensic Odontology](#)  
[PGDip Dentistry Implantology](#)  
[PGDip Dentistry Oral Medicine](#)  
[PGDip Dentistry Oral Microbiology](#)  
[PGDip Dentistry Oral Pathology](#)  
[PGDip Dentistry Oral Surgery](#)  
[PGDip Dentistry Orthodontics](#)  
[PGDip Dentistry Pedodontics](#)  
[PGDip Dentistry Periodontology](#)  
[PGDip Dentistry Practice Management](#)  
[PGDip Dentistry Preventive Dentistry](#)  
[PGDip Dentistry Prosthetics](#)  
[PGDip Dentistry Prosthodontics](#)  
[PGDip Dentistry Radiography](#)  
[PGDip Dentistry Restorative Dentistry](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 1

### Developmental biology 711 (ANA 711)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Developmental Biology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

#### Module content

This module includes 30 research credits.

### Comparative anatomy 712 (ANA 712)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Comparative Anatomy](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

#### Module content

This module includes 30 research credits.

### Neuro-anatomy 713 (ANA 713)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Neuro-anatomy](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Module content

This module includes 30 research credits.

### Human cell biology 714 (ANA 714)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Human Cell Biology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Module content

This module includes 30 research credits.

### Physical anthropology 715 (ANA 715)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Physical Anthropology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Module content

This module includes 30 research credits.

### Human histology 716 (ANA 716)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Human Histology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Module content

This module includes 30 research credits.

## Macro-anatomy 717 (ANA 717)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Macro-anatomy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### Module content

This module includes 30 research credits.

## Anatomy 770 (ANA 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

## Anatomy 800 (ANA 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Anatomical Pathology</a> <a href="#">MMed Forensic Pathology</a> <a href="#">MMed Internal Medicine</a> <a href="#">MMed Medical Oncology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

## Anatomy 802 (ANA 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00

**Programmes** MMed Emergency Medicine  
MMed Paediatric Surgery  
MMed Surgery

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 803 (ANA 803)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** MMed Obstetrics and Gynaecology

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 804 (ANA 804)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** MMed Psychiatry

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 805 (ANA 805)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** MMed Paediatrics

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 807 (ANA 807)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Dermatology](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 808 (ANA 808)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Radiological Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 809 (ANA 809)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Nuclear Medicine](#)  
[MMed Radiation Oncology](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 870 (ANA 870)

**Qualification** Postgraduate

<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anatomy 871 (ANA 871)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MChD Orthodontics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anatomy 872 (ANA 872)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anatomy 873 (ANA 873)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MChD Periodontics and Oral Medicine</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### Anatomy 874 (ANA 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MChD Prosthodontics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### Anatomy 875 (ANA 875)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Otorhinolaryngology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### Anatomy 876 (ANA 876)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Ophthalmology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### Dissertation: Anatomy 890 (ANA 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Anatomy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 891 (ANA 891)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Neurology](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 893 (ANA 893)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Geriatrics](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 894 (ANA 894)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Neurosurgery](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Year

### Anatomy 895 (ANA 895)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Orthopaedics](#)

<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anatomy 896 (ANA 896)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Plastic Surgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anatomy 897 (ANA 897)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Urology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anatomy 898 (ANA 898)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Thoracic Surgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Thesis: Anatomy 990 (ANA 990)**

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Anatomy</a> <a href="#">PhD Anatomy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

### **Anaesthesiology 801 (ANE 801)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Anaesthesiology</a>
<b>Prerequisites</b>	FSG 801, FAR 802, FSK 808
<b>Contact time</b>	1 seminar per week, 3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anesthesiology
<b>Period of presentation</b>	Year

### **Thesis: Anaesthesiology 990 (ANE 990)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Anaesthesiology</a> <a href="#">PhD Anaesthesiology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anesthesiology
<b>Period of presentation</b>	Year

### **Introduction to nursing care of critically ill neonate 711 (ANN 711)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

## Module content

Introduction to the theory and practice of nursing care of the high risk and critically ill neonate.

### Nursing care of the critically ill neonate's ventilation 712 (ANN 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

## Module content

Theory and practice of nursing care of the critically ill neonate's ventilation, haemodynamic and neuro-endocrine status.

### Nursing care of the critically ill neonate's feeding 721 (ANN 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

## Module content

Theory and practice of nursing care of the critically ill neonate's feeding and metabolic status, and genito-urinary and integumentary system, musculo-skeletal system and special senses.

### Nursing of critically ill neonates with surgery or trauma, and their families 722 (ANN 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

## Module content

Theory and practice of nursing of critically ill neonates with surgery or trauma, and their families.

### Advanced neonatal nursing science 851 (ANN 851)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	23.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Advanced neonatal nursing science 852 (ANN 852)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	23.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Advanced neonatal nursing science 853 (ANN 853)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	23.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

### Advanced neonatal nursing science 854 (ANN 854)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	23.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

### Advanced neonatal nursing science 863 (ANN 863)

**Qualification** Postgraduate

**Module credits** 50.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Advanced neonatal nursing science 864 (ANN 864)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced neonatal nursing science 865 (ANN 865)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Anatomical pathology 210 (ANP 210)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** BOccTher  
BPhysio  
B Rad in Diagnostics

**Prerequisites** [PHY 131, CMY 151, FSG 161, FSG 162, FTP 100, ANA 152, ANA 162] or [FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283] or [RAN 280, RAW 281, RAW 282, RAW 283]

**Contact time** 1 seminar per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Semester 1

### Module content

General principles of pathology, including necroses, reversible cell damage, reparation and abnormalities of growth, circulation disturbances, acute and chronic infections, classification of the spreading of tumours and carcinogenesis. Directed course in systematic pathology, with specific reference to cardiovascular system, respiratory system, locomotor system and neurophatology.

## Anatomical pathology 300 (ANP 300)

**Qualification** Undergraduate

**Module credits** 15.00

**Programmes** B Rad in Diagnostics

**Prerequisites** ANP 210

**Contact time** 1 seminar per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Semester 1

### Module content

Systematic pathology – Capita Selecta:

Respiratory and Circulatory system ; Digestive system; Genito-urinary system; Locomotor system; Nervous system; Female reproductive system; Lymphatic and Haematological systems; Intergumentary system; Endocrine system.

Neoplasia associated with viruses.

Tumour markers.

Developmental tumours and tumour like conditions.

Cysts developing on basis of pre-existing malformations.

Tumours developing in pre-existing malformations.

Definition, Incidence, Epidemiology, Aetiology and Pathogenesis of Male & Female Reproductive system, Breast, Endocrine, Skin, Bones/Joints and Soft tissue, Peripheral nerve, Skeletal muscles, Central Nervous system, Eye, Lung, Head and Neck, Gastro-intestinal tract, Urinary system, Liver and Biliary tract, Pancreas.

## Anatomical pathology 370 (ANP 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	4 lectures per week S1, 6 other contact sessions per week for 5 weeks
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Module content

#### General pathology

- Cell injury, death and adaptation
- Acute and chronic inflammation
- Repair: Cell regeneration, fibrosis and wound healing
- Hemodynamic disorders, thrombosis and shock
- Disorders of the immune system
- Neoplasia
- Environmental diseases
- General pathology of infectious diseases

#### Diseases of the following organ systems

- Blood vessels
- Heart
- Haemopoietic and lymphoid systems
- Respiratory tract
- Urinary tract
- Gastrointestinal tract
- Liver and biliary tract
- Pancreas
- Male genital system
- Female genital system and breast
- Endocrine system
- Musculoskeletal system
- Skin
- Nervous system

## Anatomical pathology 380 (ANP 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	24.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week S2, 4 lectures per week S1

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Module content

#### General pathology

- Cell injury, death and adaptation
- Acute and chronic inflammation
- Repair: Cell regeneration, fibrosis and wound healing
- Hemodynamic disorders, thrombosis and shock
- Disorders of the immune system
- Neoplasia
- Environmental diseases
- General pathology of infectious diseases

#### Diseases of the following organ systems

- Blood vessels
- Heart
- Haemopoietic and lymphoid systems
- Respiratory tract
- Urinary tract
- Gastrointestinal tract
- Liver and biliary tract
- Pancreas
- Male genital system
- Female genital system and breast
- Endocrine system
- Musculoskeletal system
- Skin
- Nervous system

### Anatomical pathology 700 (ANP 700)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 702 (ANP 702)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### Anatomical pathology 703 (ANP 703)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">BRadHons Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.

<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Semester 1

#### Module content

Basic knowledge of General Pathology. Pathology and pathogenesis of some of the more common disease in several of the organ systems and integration of clinical features with the pathological aspect of a disease.

### Anatomical pathology 800 (ANP 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Anatomical Pathology</a>
<b>Prerequisites</b>	ANP 801, ANA 800

<b>Contact time</b>	10 discussion classes per week, 2 seminars per week, 20 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### Anatomical pathology 801 (ANP 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Anatomical Pathology</a>
<b>Prerequisites</b>	No prerequisites.

<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 802 (ANP 802)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Paediatric Surgery](#)  
[MMed Surgery](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 other contact session per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 803 (ANP 803)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Obstetrics and Gynaecology](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 other contact session per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 807 (ANP 807)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Radiological Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 other contact session per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 808 (ANP 808)

**Qualification** Postgraduate

**Module credits** 48.00

---

<b>Programmes</b>	<a href="#">MChD Oral Pathology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### **Anatomical pathology 809 (ANP 809)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Radiation Oncology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### **Anatomical pathology 870 (ANP 870)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Otorhinolaryngology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### **Anatomical pathology 871 (ANP 871)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Ophthalmology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

---

### Anatomical pathology 874 (ANP 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Forensic Pathology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 seminars per week, 25 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### Anatomical pathology 875 (ANP 875)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Neurosurgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### Anatomical pathology 876 (ANP 876)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Plastic Surgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### Anatomical pathology 877 (ANP 877)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Urology</a>
<b>Prerequisites</b>	No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 878 (ANP 878)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Thoracic Surgery](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 879 (ANP 879)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Orthopaedics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 other contact session per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Anatomical pathology 891 (ANP 891)

**Qualification** Postgraduate

**Module credits** 28.00

**Programmes** [MOccTher Hand Therapy \(Coursework\)](#)  
[MOccTher Neurology \(Coursework\)](#)  
[MOccTher Paediatrics \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

#### Module content

An in-depth knowledge of the pathology of selected conditions.

## Anatomical pathology 892 (ANP 892)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

## Thesis: Anatomical pathology 990 (ANP 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Anatomical Pathology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

## Foundation of health services management 711 (ANX 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 24 hours work-integrated learning, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Management theories, principles and processes; the healthcare system and twenty-first-century issues about leadership and management; decision making, problem solving, and critical thinking; and project management.

## Management in the healthcare context 712 (ANX 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 22 hours work-integrated learning, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

**Module content**

Strategic management; organisational structure; risk anticipation and management; collective bargaining and unionisation; and information management and technology in healthcare.

**Human resource management 721 (ANX 721)**

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week, 22 hours work-integrated learning, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

**Module content**

The management of diverse teams; change, motivation and innovation; organisational, interpersonal and group communication; management of performance; conflict resolution and negotiation.

**Healthcare finance 722 (ANX 722)**

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week, 22 hours work-integrated learning, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

**Module content**

The financial environment of health care organisations; accounting principles and cost accounting; financial statements; financial management and budgets; staffing.

**Advanced nursing management 863 (ANX 863)**

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced nursing management 864 (ANX 864)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Advanced nursing management 865 (ANX 865)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Advanced nursing management 871 (ANX 871)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Nursing Management \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced nursing management 872 (ANX 872)

**Qualification** Postgraduate

**Module credits** 40.00

---

<b>Programmes</b>	MNurs Nursing Management (Coursework)
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Facilitating adult learning 711 (ANZ 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 22 hours work-integrated learning, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

#### Module content

Application of the following in nursing education: principles of adult education; the process of learning for the adult student; facilitating learning in the classroom and clinical situation; students' educational needs; and learning theories and taxonomies.

### Curriculum development 712 (ANZ 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 22 hours work-integrated learning, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

#### Module content

Relevant government policies, nursing and health care trends, standards and statutory requirements and educational philosophies of relevance during curriculum development.

### Nursing education management 721 (ANZ 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.

**Contact time** 2 practicals per week, 22 hours work-integrated learning, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

### Module content

Social, economic, political and institutional forces which influence higher education and nursing education; legal requirements and standards for the profession and the education of students; the governance structures within an educational institution; academic management functions; strategies for managing student problems and self-development in nursing education.

## Education innovation and assessment 722 (ANZ 722)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week, 22 hours work-integrated learning, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

### Module content

Media theory-design and application; technology for teaching; computer-based teaching; theoretical and clinical assessment; technology mediated assessment; principles of fair and applicable assessment and feedback.

## Advanced nursing education 863 (ANZ 863)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Advanced nursing education 864 (ANZ 864)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Advanced nursing education 865 (ANZ 865)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Advanced nursing education 871 (ANZ 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MNurs Nursing Education (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced nursing education 872 (ANZ 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MNurs Nursing Education (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Epidemiology and principles of health and safety 711 (AOC 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Principles and application of epidemiology in occupational health; ethical-legal frameworks and principles of health and safety in the workplace; role and responsibilities of the occupational health nurse.

## Occupational health nursing related to acute illnesses 712 (AOC 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Theory and practice of evidence-based occupational health nursing in the workplace related to resuscitation, assessment and management of acute illnesses, application of health and safety principles.

## Occupational health nursing related to chronic conditions 721 (AOC 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

### Module content

Theory and practice of evidence-based occupational health nursing in the workplace related to chronic illnesses, collaboration / teamwork with other health professionals.

## Health promotion, prevention and rehabilitation in the workplace 722 (AOC 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

### Module content

Theory and practice of evidence-based occupational health nursing in the workplace related to health promotion, prevention of illness and rehabilitation in the workplace; create a safe and therapeutic work environment.

## Research report: Occupational health 770 (AOH 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Research project: Occupational health 771 (AOH 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">PGDip Occupational Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Research project: Occupational health 772 (AOH 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">BScHons Environmental Health</a> <a href="#">BScHons Occupational Hygiene</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Fundamentals of orthopaedic nursing science 711 (AOR 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

#### Module content

Principles of evidence-based orthopaedic nursing science; legislation / policies / guidelines and ethical considerations in orthopaedic nursing.

### Nursing care of patients with orthopaedic disorders 712 (AOR 712)

**Qualification** Postgraduate

**Module credits** 22.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

#### Module content

Theory and practice of nursing care of patients with orthopaedic disorders, including special investigations and management modalities.

### Nursing care of orthopaedic patients after trauma 721 (AOR 721)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

### Module content

Theory and practice of conservative, pre- and postoperative nursing care of orthopaedic patients after trauma.

## Health promotion and rehabilitation in orthopaedic nursing science 722 (AOR 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

### Module content

Theory and practice of health promotion and rehabilitation in orthopaedic nursing science.

## Principles of perioperative nursing science 711 (AOT 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Application of the principles of perioperative (pre-, intra- and post-operative) nursing related to evidence informed principles, prevention and control of infection, age-related considerations in perioperative nursing and legislation / policy / guidelines documents pertaining to professional perioperative nursing practice.

## Perioperative anaesthetics and recovery room nursing science 712 (AOT 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Theory and practice of perioperative care related to recovery room (pre-, intra- and post-operative), preoperative risk factors, informed consent, ethical considerations; intraoperative role and responsibilities of anaesthetic, scrub and circulating nurses; drugs used pre-, intra- and post operatively; airway management, blood and blood products; emergency conditions and implementation of evidence-based interventions.

### Perioperative nursing science during general surgery 721 (AOT 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

### Module content

Application of evidence-based perioperative nursing care during general surgery (pre-, intra- and post-operative) related to maintaining of haemostatics during surgery, teamwork, ethical considerations, patient and staff safety, applied pharmacology and considerations of indigenous knowledge systems and complementary and alternate medicine.

### Perioperative nursing science during specialised surgery 722 (AOT 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

### Module content

Application of evidence-based perioperative nursing care during specialised surgery (pre-, intra- and post-operative) and contemporary issues (including robotics and endoscopic surgery).

### Anaesthesiology, orthopaedics and urology 600 (AOU 600)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	40 practicals per week

**Language of tuition** Module is presented in English

**Department** Orthopaedics

**Period of presentation** Year

### General pathology 800 (APA 800)

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes** [MMed Clinical Pathology](#)

**Prerequisites** No prerequisites.

**Contact time** 10 discussion classes per week, 2 seminars per week, 20 other contact sessions per week

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### General pathology 808 (APA 808)

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes** [MChD Maxillofacial and Oral Surgery \(endorsement ChirMaxFac-Med\)](#)  
[MChD Maxillofacial and Oral Surgery \(endorsement ChirMaxFac-Dent\)](#)  
[MChD Maxillofacial and Oral Surgery \(endorsement ChirMaxFac-Med\)](#)  
[MChD Periodontics and Oral Medicine](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Year

### Foundation and technology of evidence-based primary care nursing 711 (APC 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

### Module content

Health promotion model; ethical-legal frameworks; community assessment and provision of holistic care; communication.

## Primary care nursing of communicable conditions across the lifespan 712 (APC 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Assessment, diagnosis, planning, implementation and evaluation during assessment, diagnosis and management of communicable conditions across the lifespan; application of health promotion and applied pharmacology.

## Primary care nursing of non-communicable diseases across the lifespan 721 (APC 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

### Module content

Assessment, diagnosis, planning, implementation and evaluation during assessment, diagnosis and management of non-communicable conditions across the lifespan; application of health promotion and applied pharmacology.

## Reproductive health, gender issues, child health and emergencies in primary care 722 (APC 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

**Module content**

Assessment, diagnosis, planning, implementation and evaluation during assessment, diagnosis and management of emergencies in the community; acute and chronic reproductive and gender issues throughout life stages; and management of accidents and injuries, cardio-vascular incidents, diabetic ketoacidosis, convulsions, poisoning and other common emergencies.

**Primary curative nursing science 863 (APC 863)**

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

**Primary curative nursing science 864 (APC 864)**

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

**Primary curative nursing science 865 (APC 865)**

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Primary curative nursing science 871 (APC 871)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Primary curative nursing science 872 (APC 872)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Professional, ethical and legal mental health nursing 711 (APN 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

#### Module content

Theory and practice of mental health nursing across all levels of care from promotion to rehabilitation and across the lifespan; professional, ethical and legal parameters guiding mental health nursing practice; cultural and professional diversity within the mental health care team; principles of quality improvement in mental health.

### Clinical competencies in mental health nursing: assessment and planning 712 (APN 712)

**Qualification** Postgraduate

**Module credits** 20.00

---

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

#### **Module content**

Theory and practice of mental health nursing assessment, planning, diagnosis and care plans based on scientific and theoretical approaches; use of diagnostic tools, criteria, tests and procedures in mental health practice.

### **Clinical competencies in mental health nursing: therapeutic relationship and skills 721 (APN 721)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

#### **Module content**

Theory and practice of self-awareness, therapeutic verbal and non-verbal communication skills and attitudes to create and maintain a therapeutic relationship; principles and application of the therapeutic relationship in terms of phases, characteristics and barriers.

### **Clinical competencies in mental health nursing: therapeutic interventions 722 (APN 722)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

#### **Module content**

Mental and psychosocial health theoretical frameworks in mental health nursing; evidence-informed information and mental health practices; consultation models; the principles and process of crisis intervention and trauma counselling; mental health education; management in a major incident, combat or disaster situation; and mental health promotion and illness prevention.

### Advanced psychiatric nursing science 863 (APN 863)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Advanced psychiatric nursing science 864 (APN 864)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced psychiatric nursing science 865 (APN 865)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MNurs Clinical Fields of Study (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Advanced psychiatric nursing science 870 (APN 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Advanced psychiatric nursing science 871 (APN 871)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 1 other contact session per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced psychiatric nursing science 872 (APN 872)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 1 other contact session per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Fundamentals of palliative nursing science and care of the patient with cancer 711 (APO 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

#### Module content

Theoretical and ethical-legal framework of palliative nursing science; evidence-based care of the oncology patient; alternative care as modality in palliative and oncology nursing.

### Treatment modalities of site specific cancer 712 (APO 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

#### Module content

Theory and practice of evidence-based care of patients with site specific cancer.

### Nursing care of patients with oncological emergencies 721 (APO 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

#### Module content

Theory and practice of evidence-based care of patients with oncological emergencies.

### Health promotion, prevention and rehabilitation in oncology nursing 722 (APO 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

#### Module content

Theory and practice of evidence-based health promotion, prevention and rehabilitation in palliative and oncology nursing.

### Anatomical pathology 801 (APY 801)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Year

### **Anatomical pathology (Capita selecta) 871 (APY 871)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">MMed Haematology</a> <a href="#">MMed Medical Microbiology</a> <a href="#">MMed Medical Virology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Semester 1

### **Occupational therapy 100 (ART 100)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### **Module content**

The study of occupational therapy roles, scope, domain, core knowledge and professional ethics. Includes the application of the process of occupational therapy intervention, tools of practice and theoretical frameworks.

### **Occupational therapy 281 (ART 281)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 of AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
<b>Contact time</b>	2 other contact sessions per week, 2 practicals per week, 2 seminars per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 4

### Module content

Neurology: The study of occupational therapy evaluation and intervention of neurological conditions in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

## Occupational therapy 282 (ART 282)

**Qualification** Undergraduate

**Module credits** 12.00

**Prerequisites** ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 of AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 other contact sessions per week, 2 practicals per week, 2 seminars per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 3

### Module content

Mental health: The study of occupational therapy evaluation and intervention of psychosocial disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

## Occupational therapy 283 (ART 283)

**Qualification** Undergraduate

**Module credits** 12.00

**Prerequisites** ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 of AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 other contact sessions per week, 2 practicals per week, 2 seminars per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 1

### Module content

Biomechanics: The study of occupational therapy evaluation and intervention of the conditions of the musculoskeletal system in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

## Occupational therapy 284 (ART 284)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	14.00
<b>Prerequisites</b>	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 163, AKU 100, ART 100, MTL 180, GNK 286, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
<b>Contact time</b>	2 other contact sessions per week, 2 practicals per week, 2 seminars per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 2

### Module content

Sensory-motor and cognition: The study of occupational therapy evaluation and intervention of sensory-motor and cognitive disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

## Occupational therapy 381 (ART 381)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
<b>Contact time</b>	2 practicals per week, 2 seminars per week, 20 other contact sessions per week, 5 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Semester 1

### Module content

Continued study of occupational therapy for patients/clients with physical and neurological conditions. Facilitation of occupational performance through the application of assistive technologies and adaptations. Includes therapeutic apparatus, control interfaces, prosthesis and the selection, design and manufacture of splints.

## Occupational therapy 382 (ART 382)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283
<b>Contact time</b>	2 practicals per week, 2 seminars per week, 4 other contact sessions per week, 5 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Semester 2

### Module content

The application of therapeutic group techniques, stress management and interpersonal techniques in counselling. Includes the study of occupational therapy evaluation and intervention of psychiatric disorders in childhood.

## Occupational therapy 401 (ART 401)

**Qualification** Undergraduate

**Module credits** 45.00

**Prerequisites** ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122

**Contact time** 1 discussion class per week, 2 seminars per week, 4 other contact sessions per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

Continued study of occupational therapy for patients/clients with physical and neurological conditions. Integration and application of knowledge and skills in a physical/neurological fieldwork setting.

## Occupational therapy 402 (ART 402)

**Qualification** Undergraduate

**Module credits** 45.00

**Prerequisites** ANP 210, RPD 380, SEP 110/ZUL 110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122

**Contact time** 1 discussion class per week, 2 seminars per week, 4 other contact sessions per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

Continued study of occupational therapy for mental healthcare users. Integration and application of knowledge and skills in a mental health fieldwork setting.

## Administrative theory and health related social sciences 800 (ASW 800)

**Qualification** Postgraduate

**Module credits** 50.00

**Programmes** [MMed Occupational Medicine](#)  
[MMed Public Health Medicine](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

### Module content

This module involves the theory of leadership and organisational models in health, health systems and their planning, management and evaluation. Knowledge and application of relevant national and key international health policies and legislation. Knowledge and skills in health economics and financing, psychology, medical sociology and sociological models of health, health promotion and social marketing. Knowledge and application of qualitative research methodologies. Knowledge and skills in occupational hygiene, occupational medicine and management of an occupational health service.

## Essential elements underpinning emergency nursing 711 (ATN 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

### Module content

Application of the following relating to essential elements of emergency nursing: person-centred care in the emergency environment; legislation and policy documents that guide professional practice; staff and patient safety; haemodynamic modalities used to assess patients; basic principles of shock and maintenance of blood pressure.

## Medical emergencies 712 (ATN 712)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

## Module content

Theory and practice of evidence-based emergency care of patients of all ages presenting with: neurological-, respiratory-, cardiovascular-, endocrine-, reproductive- and genito-urinary emergencies; dangerous fever; environmental emergencies; and toxicology emergencies.

### Trauma and pain 721 (ATN 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

## Module content

Theory and practice of evidence-based care of patients exposed to trauma and severe pain related to trauma systems and impact on patient outcomes; injury prevention as first link to survival; patient assessment, stabilisation and resuscitation; and care interventions to address severe pain.

### Interprofessional collaboration and out-of-hospital emergency environment 722 (ATN 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

## Module content

Application of interprofessional collaboration and out-of-hospital emergency environment, patient management and transport to appropriate level of care, immediate care for the potential forensic patient and disaster management.

### Advanced medical surgical nursing science (Critical care: Trauma and emergency nursing science) 860 (ATN 860)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	50.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Advanced medical and surgical nursing science 861 (ATN 861)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Advanced medical and surgical nursing science 862 (ATN 862)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Advanced medical surgical nursing science (Critical care: Trauma and emergency nursing science) 860 (ATN 863)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Advanced medical and surgical nursing science 864 (ATN 864)

**Qualification** Postgraduate

**Module credits** 30.00

---

<b>Programmes</b>	MNurs Clinical Fields of Study (Coursework)
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 discussion classes per week

---

**Period of presentation** Semester 1

### Advanced medical and surgical nursing science (Crit care: Trauma and emergency nursing science) 872 (ATN 872)

**Qualification** Postgraduate

**Module credits** 40.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Theory in occupational therapy practice 800 (ATP 800)

**Qualification** Postgraduate

**Module credits** 28.00

**Prerequisites** No prerequisites.

**Contact time** 6 discussion classes per week, 8 lectures per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

#### Module content

- (i) Perspectives on activity participation and the study of man as multi-level system.
- (ii) Models for activity choices.
- (iii) Activity evaluation.

### Fundamentals of infant and child health care 711 (AVN 711)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

## Module content

Ethical-legal frameworks, strategies and approaches to infant and child health; assessment and management of childhood development; health promotion and prevention of illness of infants and children; integrated management of childhood illnesses (IMCI).

## Reproductive health and gender issues 712 (AVN 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

## Module content

Theory and practice of evidence-informed care of reproductive health and gender issues across the lifespan; management of contemporary issues related to reproductive health and gender issues.

## Gender violence 721 (AVN 721)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

## Module content

Theory and practice of evidence-informed care related to gender violence across the lifespan; management of contemporary issues related to gender violence.

## Leadership and innovative practice in women and child health 722 (AVN 722)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science

**Period of presentation** Quarter 4

**Module content**

Leadership and innovative practice in women and child health, including the use of technology.

**Advanced women's health 863 (AVN 863)**

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 3 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

**Advanced women's health 864 (AVN 864)**

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 3 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

**Advanced women's health 865 (AVN 865)**

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [MNurs Clinical Fields of Study \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

**Advanced women's health 871 (AVN 871)**

**Qualification** Postgraduate

**Module credits** 40.00

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Advanced women's health 872 (AVN 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Principles of medical ward nursing science 711 (AWN 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	22.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

#### Module content

Theory and practice of evidence-based medical ward nursing care; legislation and ethical considerations; resuscitation and stabilisation of medical patients.

### Principles of surgical ward nursing science 712 (AWN 712)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	22 hours work-integrated learning, 3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

## Module content

Theory and practice of evidence-based pre- and postoperative care in wards within the relevant ethical-legal frameworks; resuscitation and stabilisation of surgical patients.

### Management and leadership in medical and surgical units 721 (AWN 721)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

## Module content

Principles of management and leadership in medical and surgical units and implementation of evidence-based nursing care.

### Preventive, promotive and rehabilitative nursing care 722 (AWN 722)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 22 hours work-integrated learning, 3 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

## Module content

Theory and practice of evidence-based preventive, promotive and rehabilitative nursing care of medical and surgical patients.

### Introduction to proteins and enzymes 251 (BCM 251)

**Qualification** Undergraduate

**Module credits** 12.00

## Programmes

BDietetics  
BSc Biochemistry  
BSc Biotechnology  
BSc Chemistry  
BSc Culinary Science  
BSc Ecology  
BSc Entomology  
BSc Food Science  
BSc Genetics  
BSc Human Genetics  
BSc Human Physiology  
BSc Human Physiology, Genetics and Psychology  
BSc Medical Sciences  
BSc Microbiology  
BSc Nutrition  
BSc Plant Science  
BSc Zoology  
BScAgric Animal Science  
BScAgric Applied Plant and Soil Sciences  
BScAgric Plant Pathology

**Service modules** Faculty of Health Sciences

**Prerequisites** CMY 117 GS and CMY 127 GS and MLB 111 GS

**Contact time** 1 tutorial per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Biochemistry, Genetics and Microbiology

**Period of presentation** Semester 1

## Module content

Structural and ionic properties of amino acids. Peptides, the peptide bond, primary, secondary, tertiary and quaternary structure of proteins. Interactions that stabilise protein structure, denaturation and renaturation of proteins. Introduction to methods for the purification of proteins, amino acid composition, and sequence determinations. Enzyme kinetics and enzyme inhibition. Allosteric enzymes, regulation of enzyme activity, active centres and mechanisms of enzyme catalysis. Examples of industrial applications of enzymes and in clinical pathology as biomarkers of diseases. Introduction to practical laboratory techniques and Good Laboratory Practice. Techniques for the quantitative and qualitative analysis of biological molecules, enzyme activity measurements. Processing and presentation of scientific data.

## Carbohydrate metabolism 252 (BCM 252)

**Qualification** Undergraduate

**Module credits** 12.00

<b>Programmes</b>	<a href="#">BDietetics</a> <a href="#">BSc Biochemistry</a> <a href="#">BSc Biotechnology</a> <a href="#">BSc Chemistry</a> <a href="#">BSc Culinary Science</a> <a href="#">BSc Ecology</a> <a href="#">BSc Entomology</a> <a href="#">BSc Food Science</a> <a href="#">BSc Genetics</a> <a href="#">BSc Human Genetics</a> <a href="#">BSc Human Physiology</a> <a href="#">BSc Human Physiology, Genetics and Psychology</a> <a href="#">BSc Medical Sciences</a> <a href="#">BSc Microbiology</a> <a href="#">BSc Nutrition</a> <a href="#">BSc Plant Science</a> <a href="#">BSc Zoology</a> <a href="#">BScAgric Animal Science</a>

<b>Contact time</b>	1 tutorial per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biochemistry, Genetics and Microbiology
<b>Period of presentation</b>	Semester 2

### Module content

Biochemistry of lipids, membrane structure, anabolism and catabolism of lipids. Total ATP yield from the complete catabolism of lipids. Electron transport chain and energy production through oxidative phosphorylation. Nitrogen metabolism, amino acid biosynthesis and catabolism. Biosynthesis of neurotransmitters, pigments, hormones and nucleotides from amino acids. Catabolism of purines and pyrimidines. Therapeutic agents directed against nucleotide metabolism. Examples of inborn errors of metabolism of nitrogen containing compounds. The urea cycle, nitrogen excretion. Practical training in scientific reading skills: evaluation of a scientific report. Techniques for separation analysis and visualisation of biological molecules. Hypothesis design and testing, method design and scientific controls.

### Biochemical principles of nutrition and toxicology 262 (BCM 262)

**Qualification** Undergraduate

**Module credits** 12.00

## Programmes

BSc Biochemistry  
BSc Biotechnology  
BSc Chemistry  
BSc Culinary Science  
BSc Ecology  
BSc Food Science  
BSc Genetics  
BSc Human Genetics  
BSc Human Physiology  
BSc Medical Sciences  
BSc Nutrition  
BSc Plant Science  
BSc Zoology  
BScAgric Animal Science

<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	BCM 251 GS and BCM 252 GS.
<b>Contact time</b>	1 tutorial per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biochemistry, Genetics and Microbiology
<b>Period of presentation</b>	Semester 2

## Module content

Biochemistry of nutrition and toxicology. Proximate analysis of nutrients. Review of energy requirements and expenditure, starvation, marasmus and kwashiorkor. Respiratory quotient. Requirements and function of water, vitamins and minerals. Interpretation and modification of RDA values for specific diets, eg growth, exercise, pregnancy and lactation, aging and starvation. Interactions between nutrients. Cholesterol, polyunsaturated, essential fatty acids and dietary anti-oxidants. Oxidation of fats. Biochemical mechanisms of water- and fat-soluble vitamins and assessment of vitamin status. Mineral requirements, biochemical mechanisms, imbalances and diarrhoea. Biochemistry of xenobiotics: absorption, distribution, metabolism and excretion (ADME); detoxification reactions: oxidation/reduction (Phase I), conjugations (Phase II), export from cells (Phase III); factors affecting metabolism and disposition. Examples of genetic abnormalities, phenotypes and frequencies. Examples of toxins: biochemical mechanisms of common toxins and their antidotes. Natural toxins from fungi, plants and animals: goitrogens, cyanogens, cholineesterase inhibitors, ergotoxin, aflatoxins Practical training in scientific writing skills: evaluating scientific findings. Introduction to practical techniques in nutrition and toxicology. Experimental design and calculations in experiments: determining nutritional value of metabolites and studying the ADME of toxins.

## Industrial and organisational psychology 219 (BDO 219)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	BDO 110 GS, 120 GS
<b>Contact time</b>	3 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Resource Management

**Period of presentation** Semester 1

### Module content

\*Only for BNur students

Group behaviour and leadership

This module will focus on organisational behaviour with specific reference to the principles of group behaviour and the role of work teams in the organisation. Particular attention will be paid to group development, group interaction, group structures, group processes and the promotion of team performance in the organisation. Leadership and the effect of power and politics in the organisation will be studied. The function of leadership in individual, group and task-oriented behaviour will also be addressed.

Organisational behaviour

The behavioural basis for organisational structuring and organisation design will be addressed. This will include organisational culture as an important facet in any organisation. The dynamics and approaches to organisational change will be addressed with specific reference to the role of change agents, resistance to change and organisational development with a practical discussion of the contemporary problems of organisational change, personnel turnover, fatigue, boredom, absenteeism, conflict accidents.

## Industrial and organisational psychology 229 (BDO 229)

**Qualification** Undergraduate

**Module credits** 16.00

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Health Sciences

**Prerequisites** BDO 219 GS

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Resource Management

**Period of presentation** Semester 2

### Module content

\*Only for BCur students

## Industrial and organisational psychology 319 (BDO 319)

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** [BAdmin Public Management and International Relations](#)  
[BCom](#)  
[BCom Business Management](#)  
[BCom Human Resource Management](#)

**Service modules** Faculty of Health Sciences

---

<b>Prerequisites</b>	BDO 110, 120; BDO 219 GS, BDO 229 GS (except for Business Management students).
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Resource Management
<b>Period of presentation</b>	Semester 1

### Module content

#### Part 1: The Human Resource Management environment

This section will provide the necessary know-how on the management of a Human Resource (HR) office. This particular section provides an introduction to Human Resource Management (HRM). The environment and foundations of HR will be covered. Various HR system standard and function models including the SA Board for People Practices HR standards model will be explained. The focus will move to emerging HR practices to ensure “competence” such as competency -based HRM. Day-to-day HRM practices are addressed such as HR office administration and technology (HR information systems). This is followed by specific HRM functions such as job design and analysis and the managing of compensation and benefits. Recruitment and selection process to ensure the placing of qualified employees in jobs will be covered.

#### Part 2: Human Resources Provision

This section builds on the foundation provided in part 1. This module assists with having the right people in the right jobs at the right time through effective HR planning (HRP). This includes provision of theory which will assist HR managers to address strategy-linked HRP. To be able to ensure return on investment (ROI), organisations must ensure effective assessing and development of qualified employees by implementing performance management (PM) practices. This module will assist the HR professionals with theory related to internal staffing and career management practices. The section closes by discussing the role of HRM in virtual organisations as well as presenting international HRM theory that will assist the HR professional in the managing of international HRM.

## Industrial and organisational psychology 329 (BDO 329)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BAdmin Public Management and International Relations</a> <a href="#">BCom</a> <a href="#">BCom Human Resource Management</a>
<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	BDO 319 GS
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Resource Management
<b>Period of presentation</b>	Semester 2

## Module content

### Part 1: The theoretical environment of Human Resource Development

This section focuses on the management of Human Resource Development (HRD) practices in organisations. The information will assist students to be able to understand the importance of education, training and development in South Africa and why education, training and development centres are important. Managing training and development will be addressed under the following headings: Managing training and development (T&D) in organisations, including contemporary issues in HRD. The focus moves to the education, training and development (ETD) environment in South Africa. The administration of T&D in organisations and the relevant learning theories and principles that will be applicable to adult learning in the workplace will be discussed. This section closes with a discussion on employee onboarding and orientation.

### Part 2: The practical environment of Human Resource Development

This section will address learning related to determining training and development needs. Emphasis will be on aspects related to needs analysis, curriculum (programme) design and development, training interventions and presentation. The focus moves to learner assessment and programme evaluation.

## Biomechanics and ergonomics 702 (BEX 702)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Hand Therapy](#)

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 14 lectures per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

Biomechanics of the upper limb and disturbance thereof; the biomechanics of splints. Environmental factors for effective posture and handgrip; relationship between man and environment; disturbance of this relationship.

## Industrial physiology and pathology 700 (BFP 700)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

## Exercise science programme development II 310 (BGN 310)

**Qualification** Undergraduate

**Module credits** 15.00

---

<b>Programmes</b>	BSportSci
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed – requires departmental selection

The module focuses on the practical application of the fundamental concepts related to exercise as well as principles for exercise programme design.

### Measurement and evaluation II 320 (BGN 320)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	BSportSci
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed – requires departmental selection

This module includes the theoretical study and practical demonstration of exercise tests for health-related and sport-related physical fitness components, as well as exercise test data interpretation, evaluation and reporting.

### Biomechanics II 321 (BGN 321)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	BSportSci
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

#### Module content

\*Closed – requires departmental selection

This unit involves the application of biomechanical principles to analyse human motion using various biomechanical methods. Students will learn to collect and analyse two-dimensional video and force platform data, with a focus on gait analysis and exercise training techniques.

### Biomechanics I 360 (BGN 360)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	Departmental selection
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed - requires departmental selection

Introduction to the several methods that can be used to conduct qualitative biomechanical analyses of movements and activities aimed at improving technique and training.

### Biomechanics II 361 (BGN 361)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

#### Module content

\*Closed - requires departmental selection

Applying biomechanical principles through understanding the use of various measurement techniques and technology for the biomechanical analysis of sport.

### Hand biomechanics and ergonomics 701 (BMC 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	25 lectures per week, 5 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 2

### Molecule to organism 121 (BOK 121)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	40.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	7 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 2

### Module content

#### (a) Molecule to cell (2 weeks)

The principles of physiology, chemistry and genetics applicable to man. Macro molecules, lipids, carbohydrates and protein. Introductory genetics: molecular evolution, gene structure and transmission, genetic control of the cell cycle and genetic defects. Impulse conduction and muscle contraction. Nerve potentials.

#### (b) Cell to tissue (4 weeks)

Gammatogenesis, embryogenesis, embryopathy, histology and incidence of tissue types. The immune system and its components. Tissue specificity, genetic control of expression and factors influencing gene expressions.

#### (c) Tissue to organism (2 weeks)

Anatomical terminology and introduction to the systemic and functional organisation of the human body. Arrangement of tissues in organs. Life stages of man.

## Homeostasis 280 (BOK 280)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	42.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
<b>Contact time</b>	18 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Semester 1

### Module content

Interdisciplinary module with a large Physiology component.

- Intermediary metabolism (3 weeks) carbohydrate and lipid metabolism; protein and energy metabolism; vitamins and minerals. Integration of metabolism.
- Control systems of the body (3 weeks).
- Internal milieu (3 weeks) Water balance and blood physiology. Acid-base equilibrium, clinical haematology. Practical work: Human nutrition, anatomy/histology, haematology.

## Pathological conditions and infectious diseases 281 (BOK 281)

---

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	45.00
<b>Prerequisites</b>	CMY 151, GNK 120, GNK 127, MLB 111, P HY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
<b>Contact time</b>	12 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Semester 2

### Module content

a) General pathology and immunology (4 weeks)

Cell damage; growth and repair; infection; disturbances in circulation; HLA system; immune response; hypersensitivity; auto-immunity and transplant immunology. Anatomy of the lymphatic system.

(b) Principles of malignancies (1 week)

Oncogenesis; terminology and biological behaviour of tumours; principles of therapy.

(c) Principles of infectious diseases (3 weeks)

This module deals with the basic principles and systematic classification and clinical picture of bacteria, viral parasitic and fungal infections of importance to man. The pharmacological aspects of antibacterial and antiviral chemotherapy will also be dealt with. A short introduction to epidemiology will also be presented. The practical aspects of the microbiology which includes virology, will be demonstrated in the practical sessions.

(d) Infectious diseases (2 weeks)

This comprehensive module covers all aspects of the most prominent infectious diseases in man, such as tuberculosis, immuno-deficiency syndrome, malaria, gastro-enteritis, haemorrhagic fever, typhoid, bilharzia and sexually transmitted diseases. The module is problem-orientated, multidisciplinary and presented in the form of case studies and group discussions. The module also deals with certain important topics such as surgical infections, nosocomial infections, opportunistic infections, trauma and associated infection. The microbiology of special environments will also be discussed.

### People and their environment 283 (BOK 283)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	31.00
<b>Prerequisites</b>	CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
<b>Contact time</b>	5 practicals per week, 5 seminars per week, 8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Semester 1

## Module content

People and their environment (4 weeks)

Interpersonal skills; contextual and environmental aspects within which patients develop and live with their specific problems; medical ethics with regard to the community, patients and the medical profession; the role and duties of the medical practitioner within the South African legal system, especially with regard to interpersonal violence in society, injuries, the process of dying and death; genetic disability in the South African society; public health and health research in the community.

## People and their environment 284 (BOK 284)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	CMY 151, GNK 120, GNK 127, MLB 111, PHY 131, GNK 128, BOK 121, MGW 112, FIL 155, MTL 180, SMO 121, AIM 101, ELH 111, ELH 112
<b>Contact time</b>	15 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1

## Module content

(a) People and their environment (6 weeks)

Interpersonal skills; contextual and environmental aspects within which patients develop and live with their specific problems; medical ethics with regard to the community, patients and the medical profession; the role and duties of the medical practitioner within the South African legal system, especially with regard to interpersonal violence in society, injuries, the process of dying and death; genetic disability in the South African society; public health and health research. This section of the module can only be taken by medical students.

## Pathological conditions 285 (BOK 285)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	22.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	CMY 151, FIL 155, MGW 112, MLB 111, MTL 180, PHY 131, AIM 101, ELH 111, ELH 112, BOK 121, GNK 120, GNK 127, GNK 128, LCP 180, SMO 121
<b>Contact time</b>	1 discussion class per week, 18 lectures per week, 3 practicals per week, 3 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomical Pathology
<b>Period of presentation</b>	Semester 2

## Module content

Basic principles of pathology and immunology applicable to disease processes. The principles of tumour genetics, pathology and dissemination of tumours.

### Infectious diseases 287 (BOK 287)

**Qualification** Undergraduate

**Module credits** 23.00

**Programmes** [MBChB](#)

**Prerequisites** CMY 151, FIL 155, MGW 112, MLB 111, MTL 180, PHY 131, AIM 101, ELH 111, ELH 112, BOK 121, GNK 120, GNK 127, GNK 128, LCP 180, SMO 121

**Contact time** 15 lectures per week, 4 seminars per week, 8 discussion classes per week, 8 practicals per week

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Semester 2

## Module content

The study of micro organisms which cause disease in the human body. This module entails the study of the interaction of micro-organisms with the human host which results in disease.

### Abdomen and mamma 380 (BOK 380)

**Qualification** Undergraduate

**Module credits** 50.00

**Programmes** [MBChB](#)

**Prerequisites** BOK 280, GNK 288, BOK 284, GPS 280, GNK 283, GNK 286, (BOK 281 or (BOK 285, BOK 287)), LCP 280

**Contact time** 12 lectures per week

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Semester 1

## Module content

(a) Abdomen and abdominal problems

(b) Mamma

A study of the anatomy and functions, as well as the diseases of the different organs in the abdominal cavity including conditions of the abdominal wall. Furthermore, lectures on the clinical conditions of the mamma will be presented.

### Pregnancy and neonatology 382 (BOK 382)

**Qualification** Undergraduate

<b>Module credits</b>	55.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	BOK 280, GNK 288, BOK 284, GPS 280, GNK 283, GNK 286, (BOK 281 or (BOK 285, BOK 287)), LCP 280
<b>Contact time</b>	12 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Semester 2

### Module content

(a) Pregnancy

(b) Neonatology

The study of the natural physiological complexes and pathological conditions concerning pregnancy and birth. Different learning opportunities and situations are used, including prenatal clinics, labour wards and neonatal units. Emphasis is placed on acquiring scientifically-based information, as well as important practical and clinical skills. The behavioural sciences are also included in the block, as well as the social, family and community-related aspects.

(c) Growth and development (2 weeks)

A study of the unique aspects of the physical growth and neuro-development of a normal child. Learning opportunities are presented to the student to identify problems concerning growth and development, as well as evaluating and handling children with abnormal growth and development. Emphasis is placed on the prevention, evaluation and handling, as well as the effective treatment with a decided result. This block integrates with the previous block in order to enable the student to understand the continuum of growth and neuro-development from the prenatal to the post-natal milieu.

### Genital and urinary tract diseases 480 (BOK 480)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	62.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, SMO 380, SMO 311, SMO 382
<b>Contact time</b>	12 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Semester 1

## Module content

Module 1: Genital conditions

Module 2: Urinary tract disease

A study of the disorders of the urinary tract and genital systems in males and in females.

Theoretical and practical instruction is used to integrate basic science and clinical medicine. Important clinical skills must be mastered.

## Nervous system 482 (BOK 482)

**Qualification** Undergraduate

**Module credits** 28.00

**Programmes** MBChB

**Prerequisites** GNK 381, GNK 383, BOK 380, GNK 386, GPS 380, BOK 382, GNK 488#, SMO 311, SMO 380, SMO 382

**Contact time** 5 lectures per week

**Language of tuition** Module is presented in English

**Department** Neurology

**Period of presentation** Semester 1

## Module content

Discussion of the important diseases of the central, peripheral and autonomic nervous system with a view to obtaining a total overview of the specific diseases, which will include anatomy, physiology, pathology, pharmacology, clinical neurology, clinical neurosurgery and neuropaediatrics.

## Biostatistics 1 751 (BOS 751)

**Qualification** Postgraduate

**Module credits** 15.00

**Prerequisites** PHM 773

**Contact time** 2 practicals per week, 32 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

Types of data; Probability sampling distributions; Summary measures for data; Confidence intervals for point estimates; Normal approximations for Binomial and Poisson distributions; Graphics; Single sample and two sample hypothesis tests, both parametric and non parametric. T-tests; Welch tests; Paired t-tests; F-tests; Chi square tests; Tests of association and tests of agreement; sign tests; median tests; MWW tests; Signed ranks tests (paired data). How to perform/ obtain all the above using Stata statistical software. Estimating sample size using PS and G\*Power software.

## Biostatistics 2 752 (BOS 752)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	PHM 773, BOS 751, HME 751
<b>Contact time</b>	10 lectures per week, 4 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

One-way ANOVA; Simple linear regression, classical and correlational; modelling strategies for multilinear regression; post regression diagnostic tests (residuals analysis) following linear regression. Kruskal-Wallis test. Mantel-Haenszel test; Revision of confounding and effect modification and M-H test; the logistic regression model; Interpretation of logistic regression Stata output; logistic regression modelling strategies; Post-regression testing and residuals analysis. How to perform/obtain all the above using Stata statistical software. Estimating sample size using PS and G\*Power statistical software.

## Introduction to Biostatics 770 (BOS 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 practicals per week, 5 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Basic introduction to biostatistical theory and use of Stata software to perform basic data analysis.

## Introduction to Biostatics 771 (BOS 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Basic introduction to biostatistical theory and use of Stata software to perform basic data analysis.

## Seminars in Biostatistics 774 (BOS 774)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Seminar to be written up on a selected topic in Biostatistics and presented before the Epidemiology and Biostatistics track staff.

## Research report: Biostatistics 775 (BOS 775)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

A project agreed to with the head of the sub-track: Biostatistics. This project should be written up in the format described in the School and postgraduate brochure. It will be subject to external moderation.

## Biostatistics (1) 870 (BOS 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MChD Community Dentistry</a>
<b>Prerequisites</b>	HME 870
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Biostatistics 2 871 (BOS 871)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	10.00
<b>Prerequisites</b>	BOS 870
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Survival analysis 873 (BOS 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">MSc Clinical Epidemiology</a> <a href="#">MSc Epidemiology</a>
<b>Prerequisites</b>	BOS 871
<b>Contact time</b>	1 practical per week, 3 discussion classes per week, 3 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Biostatistics 1 874 (BOS 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a> <a href="#">MSc Clinical Epidemiology</a> <a href="#">MSc Epidemiology</a> <a href="#">MSc Public Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Biostatistics 2 875 (BOS 875)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a> <a href="#">MSc Clinical Epidemiology</a> <a href="#">MSc Epidemiology</a> <a href="#">MSc Public Health</a>

<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Principles of practice management 800 (BPB 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Year

### Vocational rehabilitation 701 (BRH 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">PGDip Vocational Rehabilitation</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 2 seminars per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### Module content

Continued training in the vocational rehabilitation process applied to various diagnostic groups.

### Biostatistics and research methodology 801 (BSN 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dentistry General
<b>Period of presentation</b>	Year

### Principles of surgery 800 (BVC 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00

**Programmes** MMed Paediatric Surgery  
MMed Surgery

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Year

### Principles of surgery 801 (BVC 801)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** MMed Neurosurgery

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Year

### Principles of surgery 802 (BVC 802)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** MMed Orthopaedics

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Year

### Principles of surgery 803 (BVC 803)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** MMed Plastic Surgery

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Year

### Principles of surgery 804 (BVC 804)

**Qualification** Postgraduate

<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Urology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

### Principles of surgery 805 (BVC 805)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Thoracic Surgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

### Principles of surgery 806 (BVC 806)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	52.00
<b>Programmes</b>	<a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

### Principles of surgery 807 (BVC 807)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	52.00
<b>Programmes</b>	<a href="#">MMed Otorhinolaryngology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

### Principles of surgery 810 (BVC 810)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Semester 1

### Principles of surgery 811 (BVC 811)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Semester 1

### Principles of surgery 820 (BVC 820)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Semester 2

### Principles of pathology 800 (BVP 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Cardiology for medical subspecialities Part 1 801 (CAR 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00

<b>Programmes</b>	MPhil Cardiology (Coursework)
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Cardiology
<b>Period of presentation</b>	Year

#### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

### Anatomy and principles of surgery 700 (CBA 700)

**Qualification** Postgraduate

**Module credits** 20.00

#### Programmes

PGDip Dentistry Aesthetic Dentistry  
PGDip Dentistry Community Dentistry  
PGDip Dentistry Dental Materials  
PGDip Dentistry Endodontics  
PGDip Dentistry Forensic Odontology  
PGDip Dentistry Implantology  
PGDip Dentistry Oral Medicine  
PGDip Dentistry Oral Microbiology  
PGDip Dentistry Oral Pathology  
PGDip Dentistry Oral Surgery  
PGDip Dentistry Orthodontics  
PGDip Dentistry Pedodontics  
PGDip Dentistry Periodontology  
PGDip Dentistry Practice Management  
PGDip Dentistry Preventive Dentistry  
PGDip Dentistry Prosthetics  
PGDip Dentistry Prosthodontics  
PGDip Dentistry Radiography  
PGDip Dentistry Restorative Dentistry

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Semester 1

### Anatomy and principles of surgery 710 (CBA 710)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Semester 1

### **Anatomy and principles of surgery 800 (CBA 800)**

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes** [MSc Dentistry Oral Surgery \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### **Maxillo-facial radiology and principles of surgery 710 (CBR 710)**

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Dental Management Sciences

**Period of presentation** Semester 1

### **Maxillo-facial radiology and principles of surgery 800 (CBR 800)**

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes** [MSc Dentistry Oral Surgery \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### **Complex problem-solving and negotiating, coherence and coordination 770 (CCC 770)**

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 50 hours per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

### Module content

The public health leader will be equipped with strategies to address difficult and intractable problems at the workplace and assist health workers to become part of the solution by utilising newly acquired problem-solving skills which will have lasting impact in workplace settings. Negotiating techniques will be analysed for different workplace challenges and its application for greater coherence and coordination in the implementation of policy and effective management of its outcomes to improve service delivery.

## Complex problem-solving and negotiating, coherence and coordination 771 (CCC 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Health Systems Management Executive Leadership](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Module content

The public health leader will be equipped with strategies to address difficult and intractable problems at the workplace and assist health workers to become part of the solution by utilising newly acquired problem-solving skills which will have lasting impact in workplace settings. Negotiating techniques will be analysed for different workplace challenges and its application for greater coherence and coordination in the implementation of policy and effective management of its outcomes to improve service delivery.

## Principles of disease prevention and control 710 (CDC 710)

**Qualification** UPOne

**Module credits** 10.00

**Programmes** [PGDip in Public Health \(UPOne\)](#)

**Prerequisites** PHM 710

**Contact time** Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

## Module content

Students will be presented with an overview of health and disease followed by a set of tools for disease prevention and control. They will especially be encouraged to reflect on the importance of epidemiology and surveillance systems (for disease as well as health and for risk factors). They will be tasked with the application of these tools to the prevention and control of a number of important (for South Africa) health threats, both infectious and non-infectious. The scope will be all disease conditions including psychiatric, trauma, violence, etc in addition to the conventional inclusion of infectious diseases and diseases of lifestyle. There will be a link, too, to the concept of “implications for policy”.

## Introduction to disease prevention and control 770 (CDC 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

## Principles of communicable disease control 771 (CDC 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	CDC 772, CDC 773, CDC 774
<b>Contact time</b>	1 practical per week, 18 seminars per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

## Seminars in tropical health (Agent) 772 (CDC 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week, 18 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Seminars in tropical health (Environment) 773 (CDC 773)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	CDC 772
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Seminars in tropical health (Host) 774 (CDC 774)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 18 seminars per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Tropical health examination 775 (CDC 775)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Introduction to disease prevention and control 776 (CDC 776)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Principles of communicable disease control 777 (CDC 777)

<b>Qualification</b>	Postgraduate
----------------------	--------------

---

<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Seminars in tropical health (Agent) 778 (CDC 778)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Seminars in tropical health (Environment) 779 (CDC 779)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Seminars in tropical health (Host) 780 (CDC 780)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Case studies in tropical medicine and health 781 (CDC 781)**

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	30.00
<b>Prerequisites</b>	CDS 771
<b>Contact time</b>	Blended mode
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Six case studies that involve either clinical cases or public health cases (such as outbreaks or other public health scenarios). The cases will be presented online, one every 6 weeks, during the second year of the diploma. The scenarios will be accompanied by questions that will require desktop research and thought as well as a mastery of the materials learned during the first year, in order to answer the questions well. Each case study will be worth 5 credits and an overall mark will be provided for the six case studies. A detailed study guide will be provided online.

## Research report 782 (CDC 782)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	as scheduled with study leader
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

This is a research report consisting of a case series of a group of three patients with a specific infectious disease; or an infectious disease theme. The cases are selected and written up to illustrate an important clinical principle or report on or to demonstrate a variation in presentations and/ or treatment responses etc. The series must “tell a story” and offer insight rather than merely recording the clinical details of the disease episodes (although such documentation is required as part of the report).

## Tropical health examination 784 (CDC 784)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Case studies in tropical medicine and health 785 (CDC 785)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	CDS 771
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Six case studies that involve either clinical cases or public health cases (such as outbreaks or other public health scenarios). The cases will be presented online, one every 6 weeks, during the second year of the diploma. The scenarios will be accompanied by questions that will require desktop research and thought as well as a mastery of the materials learned during the first year, in order to answer the questions well. Each case study will be worth 5 credits and an overall mark will be provided for the six case studies. A detailed study guide will be provided online

## Research report 786 (CDC 786)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	as scheduled with study leader
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

This is a research report consisting of a case series of a group of three patients with a specific infectious disease; or an infectious disease theme. The cases are selected and written up to illustrate an important clinical principle or report on or to demonstrate a variation in presentations and/ or treatment responses etc. The series must “tell a story” and offer insight rather than merely recording the clinical details of the disease episodes (although such documentation is required as part of the report).

## Field epidemiology 860 (CDC 860)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	4 practicals per week, Block 3: 8 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Module content

Surveillance; infectious disease epidemiology; disease control programmes; outbreak investigations and control.

## Introduction to disease control 870 (CDC 870)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Principles of communicable disease control 871 (CDC 871)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 practical per week, 18 seminars per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Seminars in tropical health (Agent) 872 (CDC 872)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 18 seminars per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Seminars in tropical health (Environment) 873 (CDC 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 18 seminars per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Seminars in tropical health (Host) 874 (CDC 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 18 seminars per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Principles of communicable disease control 876 (CDC 876)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Seminars in tropical health (Agent) 877 (CDC 877)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Seminars in tropical health (Environment) 878 (CDC 878)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Seminars in tropical health (Host) 879 (CDC 879)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Introduction to disease control 880 (CDC 880)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

The principles of disease prevention and control to cover the scope of infectious and non-infectious diseases as well as disabilities. The "one health" approach is also included. The syllabus also includes basic demographic indicators and calculations previously learned during DEG 870.

### Principles: Chronic disease epidemiology 870 (CDE 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	MPH MSc Clinical Epidemiology MSc Epidemiology
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 3 discussion classes per week, 3 seminars per week

<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Clinical practice in diagnostic radiography 100 (CDR 100)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BRad in Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

#### Module content

Clinical practice to operationalise and integrate the fundamental theoretical components of the first year of studies. Students will be involved in patient care and communication in diagnostic radiography, undertake operating of diagnostic radiography equipment, whilst practicing health and safety principles in the moving and handling of patients. Students will be allocated to clinical training platforms where patient/public interactions, and interprofessional skills and behaviours are developed.

This module has 10% of the specified clinical training hours necessary to complete specified clinical competencies for the course in an HPCSA accredited facility.

### Clinical practice in diagnostic radiography 200 (CDR 200)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BRad in Diagnostics</a>
<b>Prerequisites</b>	CDR 100, RSC 100, IHL 120, DIR 100
<b>Contact time</b>	3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

## Module content

Clinical practice to operationalise and integrate the fundamental theoretical components of the second year of studies and to build on the competencies developed in the first year of study. Aspects covered within this module include the use of fluoroscopy, with emphasis placed on radiation protection of patients, public and personnel.

### Note:

This module comprises 25% of the specified clinical training hours necessary to complete specified clinical competencies for the course in an HPCSA accredited facility.

## Clinical practice in diagnostic radiography 300 (CDR 300)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	CDR 100& 200, RSC 200, IHL 210
<b>Contact time</b>	4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

## Module content

Clinical practice to operationalise and integrate the fundamental theoretical components of the third year of studies and to build on the competencies developed in the first and second years of study. Aspects covered in this module include the basic clinical practice and image interpretation of excretory urography, angiography, intervention radiology, mammography, hysterosalpingography, bone densitometry, CT scanning, MRI scanning and myelography. Aspects covered within this module to include radiation protection of patients, public and personnel. Community engagement

### Note:

This module comprises 30% of the specified clinical training hours necessary to complete specified clinical competencies for the course in an HPCSA accredited facility.

## Clinical practice in diagnostic radiography 400 (CDR 400)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	35.00
<b>Prerequisites</b>	CDR 300
<b>Contact time</b>	4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

## Module content

Clinical practice to operationalise and integrate the fundamental theoretical components of the fourth-year elective selected and to build on the competencies developed in the first, second and third years of study.

### Note:

This module comprises 35% of the specified clinical training hours necessary to complete specified clinical competencies for the course in an HPCSA accredited facility.

## Clinical tropical medicine 770 (CDS 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Clinical tropical medicine 771 (CDS 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Human nutrition and public health 772 (CDS 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

Principles of nutrition science, factors influencing food choices and nutrition in the life cycle. Main nutrition challenges in public health and interventions to address these. Development and management of public health nutrition interventions as well as a practicum in one aspect of public health nutrition practise in local communities.

## Human nutrition and public health 773 (CDS 773)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Principles of nutrition science, factors influencing food choices and nutrition in the life cycle. Main nutrition challenges in public health and interventions to address these. Development and management of public health nutrition interventions as well as a practicum in one aspect of public health nutrition practise in local communities.

## Investigating outbreaks 774 (CDS 774)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	CDC 774
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Students will learn how to investigate and determine the cause of a disease outbreak for both when the disease in question is known and when the disease in question is unknown. They will learn how to use appropriate study designs and to calculate attack rates and odds ratios in order to investigate outbreaks. They will learn how to write outbreak investigation reports.

## Investigating outbreaks 775 (CDS 775)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Tropical Medicine and Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

Students will learn how to investigate and determine the cause of a disease outbreak for both when the disease in question is known and when the disease in question is unknown. They will learn how to use appropriate study designs and to calculate attack rates and odds ratios in order to investigate outbreaks. They will learn how to write outbreak investigation reports.

### Clinical tropical medicine 870 (CDS 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Disease outbreak and control 871 (CDS 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH
<b>Prerequisites</b>	HME 870
<b>Contact time</b>	40 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Economic evaluation of disease control intervention 872 (CDS 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	MPH
<b>Service modules</b>	Faculty of Veterinary Science
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

Students learn when and how to perform economic analyses.

### Human nutrition and public health 873 (CDS 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Human nutrition and public health 874 (CDS 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Infectious disease epidemiology 870 (CDT 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">MPH</a> <a href="#">MSc Clinical Epidemiology</a> <a href="#">MSc Epidemiology</a>
<b>Prerequisites</b>	HME 870
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

Students learn about the special rates applicable with outbreak and ID investigations. They learn about basic vaccinology (the epidemiology of) and introductory compartmental modelling terms and skills. They also learn basic clinical epidemiology concepts as applicable for screening and public health programmes. Finally they learn about the composition, duties and roles of the infection control team in a hospital.

### Prevention and control of HIV/Aids 870 (CDX 870)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 3 discussion classes per week, 3 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Chemical pathology 700 (CHP 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Chemical Pathology</a>
<b>Prerequisites</b>	No prerequisites.

<b>Period of presentation</b>	Year

### Thesis: Surgery 991 (CHR 991)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	480.00
<b>Programmes</b>	<a href="#">DMed Surgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

## Thesis: Surgery 992 (CHR 992)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	480.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

## Clinical epidemiology and evidence-based medicine 860 (CLI 860)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	4 practicals per week, Block 3: 8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Clinical epidemiology; survival analysis; evidence-based medicine; chronic disease epidemiology; infectious disease epidemiology; economic evaluation.

## Principles of clinical epidemiology 870 (CLI 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	HME 870
<b>Contact time</b>	1 practical per week, 3 discussion classes per week, 3 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Evidence-based medicine 871 (CLI 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	CLI 870
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Principles of clinical epidemiology 872 (CLI 872)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** MPharmMed  
MSc Clinical Epidemiology  
MSc Epidemiology  
MSc Public Health

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Evidence-based medicine 873 (CLI 873)

**Qualification** Postgraduate

**Module credits** 12.00

**Programmes** MPharmMed  
MSc Clinical Epidemiology

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Clinical medical practice 181 (CMP 181)

**Qualification** Undergraduate

**Module credits** 17.00

**Programmes** BCMP

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 practical per week, 3 seminars per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

## Module content

Introduction to the Faculty of Health Sciences, curriculum and cultural differences. Basic theory and skills in respect of health assessment and physical examination, health promotion and disease prevention by means of self-regulated learning and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised.

## Clinical medical practice 182 (CMP 182)

**Qualification** Undergraduate

**Module credits** 56.00

**Programmes** BCMP

**Prerequisites** CMP 181

**Contact time** 1 practical per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 2

## Module content

Basic theory and skills in respect of health assessment and physical examination, health promotion and disease prevention of the cardio/peripheral, reticulo-endothelial, respiratory, gastro-intestinal, genito-urinary, central nervous system, head, neck, eye, ear, nose, throat, musculo-skeletal, endocrine, dermatological systems by means of group discussion, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised.

## Clinical medical practice 281 (CMP 281)

**Qualification** Undergraduate

**Module credits** 68.00

**Programmes** BCMP

**Prerequisites** CMP 181, CMP 182

**Contact time** 2 discussion classes per week, 2 lectures per week, 2 practicals per week, 2 web-based periods per week, 3 seminars per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

## Module content

Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of cardio/peripheral, vascular, reticulo-endothelial, endocrine, respiratory, genito-urinary and gastro-intestinal systems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

## Clinical medical practice 282 (CMP 282)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	68.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	CMP 281
<b>Contact time</b>	2 discussion classes per week, 2 practicals per week, 2 web-based periods per week, 4 lectures per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 2

### Module content

Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of the central nervous system, head, neck, eye, ear, nose, throat, skin and musculo-skeletal systems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

## Healthcare systems 380 (CMP 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	CMP 281, CMP 282, FAR 280
<b>Contact time</b>	2 lectures per week, 4 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

### Module content

Study of healthcare systems with emphasis on district health systems.

## Women's health 381 (CMP 381)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	24.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	CMP 281, CMP 282, FAR 280
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

### Module content

Theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases affecting women by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

## Child health 382 (CMP 382)

**Qualification** Undergraduate

**Module credits** 24.00

**Programmes** [BCMP](#)

**Prerequisites** CMP 281, CMP 282, FAR 280

**Contact time** 1 practical per week, 2 discussion classes per week, 3 seminars per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

### Module content

Basic theory and skills in respect of the health promotion, disease prevention, diagnosis and treatment of diseases of children by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

## Emergency care 383 (CMP 383)

**Qualification** Undergraduate

**Module credits** 24.00

**Programmes** [BCMP](#)

**Prerequisites** CMP 281, CMP 282, FAR 280

**Contact time** 1 discussion class per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

### Module content

Theory and skills training in basic emergency care.

## Infectious and chronic diseases 384 (CMP 384)

**Qualification** Undergraduate

<b>Module credits</b>	36.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	CMP 281, CMP 282, FAR 280
<b>Contact time</b>	2 discussion classes per week, 4 seminars per week, 5 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

### Module content

Theory and skills in respect of the disease prevention, diagnosis and treatment of infectious diseases by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

## Anaesthetics 385 (CMP 385)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	CMP 281, CMP 282, FAR 280
<b>Contact time</b>	2 discussion classes per week, 5 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

### Module content

An introduction to the underlying principles of the theory and practice of anaesthesiology applicable to the clinical associate practice.

## Mental health 386 (CMP 386)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	CMP 281, CMP 282, FAR 280
<b>Contact time</b>	1 practical per week, 1 seminar per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

### Module content

Theory and skills in respect of the disease prevention, diagnosis and treatment of mental health problems by means of lectures, seminars, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

### Orthopaedics 387 (CMP 387)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BCMP

**Prerequisites** CMP 281, CMP 282, FAR 280

**Contact time** 2 discussion classes per week, 4 practicals per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

### Module content

Theory and skills in respect of the disease prevention, diagnosis and treatment of orthopaedic diseases and problems by means of group discussions, self-tuition and practical sessions in the hospital and skills laboratory. A problem-oriented and interdisciplinary approach is emphasised. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

### General chemistry 117 (CMY 117)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes**

- BDietetics
- BEd Senior Phase and Further Education and Training Teaching
- BSc Applied Mathematics
- BSc Biochemistry
- BSc Biological Sciences
- BSc Biotechnology
- BSc Chemistry
- BSc Computer Science
- BSc Culinary Science
- BSc Ecology
- BSc Engineering and Environmental Geology
- BSc Entomology
- BSc Environmental Sciences
- BSc Food Science
- BSc Genetics
- BSc Geography
- BSc Geology
- BSc Human Genetics
- BSc Human Physiology
- BSc Human Physiology, Genetics and Psychology
- BSc Mathematics
- BSc Medical Sciences
- BSc Meteorology
- BSc Microbiology
- BSc Nutrition
- BSc Physics
- BSc Plant Science
- BSc Zoology
- BScAgric Agricultural Economics and Agribusiness Management
- BScAgric Animal Science
- BScAgric Applied Plant and Soil Sciences
- BScAgric Plant Pathology

**Service modules**

Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Health Sciences  
Faculty of Veterinary Science

**Prerequisites**

A candidate must have Mathematics for at least 60% and 60% for Physical Sciences.

**Contact time**

1 practical per week, 4 lectures per week

**Language of tuition**

Module is presented in English

**Department**

Chemistry

**Period of presentation**

Semester 1

## Module content

General introduction to inorganic, analytical and physical chemistry. Atomic structure and periodicity. Molecular structure and chemical bonding using the VSEOR model. Nomenclature of inorganic ions and compounds. Classification of reactions: precipitation, acid-base, redox reactions and gas-forming reactions. Mole concept and stoichiometric calculations concerning chemical formulas and chemical reactions. Principles of reactivity: energy and chemical reactions. Physical behaviour gases, liquids, solids and solutions and the role of intermolecular forces. Rate of reactions: Introduction to chemical kinetics.

## General chemistry 127 (CMY 127)

**Qualification** Undergraduate

**Module credits** 16.00

## Programmes

BDietetics  
BEd Senior Phase and Further Education and Training Teaching  
BSc Applied Mathematics  
BSc Biochemistry  
BSc Biological Sciences  
BSc Biotechnology  
BSc Chemistry  
BSc Computer Science  
BSc Culinary Science  
BSc Ecology  
BSc Engineering and Environmental Geology  
BSc Entomology  
BSc Environmental Sciences  
BSc Extended programme - Biological and Agricultural Sciences  
BSc Extended programme - Physical Sciences  
BSc Food Science  
BSc Genetics  
BSc Geography  
BSc Geology  
BSc Human Genetics  
BSc Human Physiology  
BSc Human Physiology, Genetics and Psychology  
BSc Mathematics  
BSc Medical Sciences  
BSc Meteorology  
BSc Microbiology  
BSc Nutrition  
BSc Physics  
BSc Plant Science  
BSc Zoology  
BScAgric Agricultural Economics and Agribusiness Management  
BScAgric Animal Science  
BScAgric Applied Plant and Soil Sciences  
BScAgric Plant Pathology

<b>Service modules</b>	Faculty of Engineering, Built Environment and Information Technology Faculty of Education Faculty of Health Sciences Faculty of Veterinary Science
<b>Prerequisites</b>	Natural and Agricultural Sciences students: CMY 117 GS or CMY 154 GS Health Sciences students: none
<b>Contact time</b>	1 practical per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Chemistry
<b>Period of presentation</b>	Semester 2

### Module content

Theory: General physical-analytical chemistry: Chemical equilibrium, acids and bases, buffers, solubility equilibrium, entropy and free energy, electrochemistry. Organic chemistry: Structure (bonding), nomenclature, isomerism, introductory stereochemistry, introduction to chemical reactions and chemical properties of organic compounds and biological compounds, i.e. carbohydrates and aminoacids. Practical: Molecular structure (model building), synthesis and properties of simple organic compounds.

## Chemistry 151 (CMY 151)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Programmes</b>	BChD BPhysio BVSc MBChB
<b>Service modules</b>	Faculty of Health Sciences Faculty of Veterinary Science
<b>Prerequisites</b>	A candidate must have Mathematics for at least 60% and 60% for Physical Sciences.
<b>Contact time</b>	1 practical per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Chemistry
<b>Period of presentation</b>	Semester 1

## Module content

Theory: Introduction to general chemistry: Measurement in chemistry, matter and energy, atomic theory and the periodic table, chemical compounds and chemical bonds; quantitative relationships in chemical reactions, states of matter and the kinetic theory; solutions and colloids, acids, bases and ionic compounds, chemical equilibria. Introduction to organic chemistry: Chemical bonding in organic compounds, nature, physical properties and nomenclature of simple organic molecules, isomerism, chemical properties of alkanes and cycloalkanes, alkenes, alcohols, aldehydes and ketones, carboxylic acids and esters, amines and amides, carbohydrates, proteins, and lipids.  
Practicals.

## Community nutrition 321 (CNT 321)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BDietetics</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	3rd-year status
<b>Contact time</b>	2 lectures per week, Community Engagement
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 2

## Module content

Community nutrition practice within the larger public health realm. Nutrition within primary healthcare. Nutrition and community development as well as project planning and management.

## Community nutrition 411 (CNT 411)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	22.00
<b>Programmes</b>	<a href="#">BDietetics</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	4th-year status
<b>Contact time</b>	1 discussion class per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 1

## Module content

Global nutrition challenges e.g. food security, protein-energy and micronutrient malnutrition, non communicable diseases of lifestyle, etc. Public health approaches and general nutrition interventions to address these challenges. Nutrition program development including assessment, analysis and interventions in the South African context as well as Nutrition Policy formulation

## Internship training in community nutrition 480 (CNT 480)

**Qualification** Undergraduate

**Module credits** 14.00

**Programmes** [BDietetics](#)

**Prerequisites** CNT 411

**Contact time** Five times 8hrs per day for 7 weeks

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

## Module content

Academic service learning project in community-based programme development (i.e. planning, implementation and evaluation). Facility-based primary healthcare service delivery.

## Counselling 371 (COU 371)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [BOH](#)

**Prerequisites** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

## Module content

This module will equip the oral hygiene student with the theoretical underpinning for behavioural change and the necessary skills to counsel a patient on lifestyle behavioural change. This would include, but not limited to promoting a healthy diet and smoking cessation. This would consist of both lectures and practical sessions with clients/patients.

## Critical care for medical subspecialties Part 1 801 (CRT 801)

**Qualification** Postgraduate

**Module credits** 120.00

<b>Programmes</b>	MPhil Critical Care (Coursework)
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

#### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

### Essay 795 (DBG 795)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Normal development 701 (DCD 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 practicals per week, 10 seminars per week, 15 lectures per week, 5 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 1

#### Module content

Sensory development. Motor development. Cognitive/perceptual development. Communication development. Socio-emotional development.

### Identification 702 (DCD 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 practicals per week, 15 lectures per week, 5 discussion classes per week, 5 seminars per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 2

### Module content

Early identification and the clinical picture of developmental delay of the somato-sensory system. Early identification and the clinical picture of developmental delay of the motor system. Early identification and the clinical picture of developmental delay of the visual system including pre-perceptual and perceptual skills.

## Intervention for developmental disabilities 703 (DCD 703)

**Qualification** Postgraduate

**Module credits** 35.00

**Prerequisites** No prerequisites.

**Contact time** 10 practicals per week, 15 lectures per week, 5 discussion classes per week, 5 seminars per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 3

### Module content

Intervention strategies within the school setting. Adaptation of activity programmes. Facilitation of social interaction.

## Intervention for disabilities 704 (DCD 704)

**Qualification** Postgraduate

**Module credits** 35.00

**Prerequisites** No prerequisites.

**Contact time** 10 practicals per week, 15 lectures per week, 5 discussion classes per week, 5 seminars per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 4

### Module content

Handling techniques for the child with severe disabilities. Positioning for functioning. Environmental adaptations. Play as intervention medium. Integration into main stream schools.

## Normal development 705 (DCD 705)

**Qualification** Postgraduate

**Module credits** 20.00

---

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 seminar per week, 10 practicals per week, 15 lectures per week, 5 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### Module content

Sensory development. Motor development. Cognitive/perceptual development. Communication development. Socio-emotional development.

### Identification 706 (DCD 706)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 practicals per week, 15 lectures per week, 5 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### Module content

Early identification and the clinical picture of developmental delay of the somato-sensory system. Early identification and the clinical picture of developmental delay of the motor system. Early identification and the clinical picture of developmental delay of the visual system including pre-perceptual and perceptual skills.

### Intervention for developmental disabilities 707 (DCD 707)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	35.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 practicals per week, 15 lectures per week, 5 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 3

#### Module content

Intervention strategies within the school setting. Adaptation of activity programmes. Facilitation of social interaction.

### Intervention for disabilities 708 (DCD 708)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	35.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 practicals per week, 15 lectures per week, 5 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 4

### Module content

Handling techniques for the child with severe disabilities. Positioning for functioning. Environmental adaptations. Play as intervention medium. Integration into main stream schools.

## Principles of demography 770 (DEG 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

## Principles of demography 771 (DEG 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

## Principles of demography 870 (DEG 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health

**Period of presentation** Year

### **Dietetics 800 (DEK 800)**

**Qualification** Postgraduate

**Module credits** 24.00

## Module content

Introduction to radiography.

Fundamental ethical principles; consent and history taking in radiography. Professional roles, responsibilities and codes of conduct. Introduction to communication: interpersonal and scientific. Team work. Reflective processes. Introduction to legislation and the professional bodies related to Radiography practice (national and international).

Care of the patient. Principles of infection control. Pathological conditions. Overview of imaging modalities and procedures. Radiation personnel monitoring – requirements, methods of monitoring, record keeping, responsibility of radiation protection officers. Practical radiation protection- facility design; safety accessory equipment; safety devices.

- a. Respecting the human rights of vulnerable patient groups.
- b. Basic patient positioning and immobilisation for radiographic examinations. Radiographic examinations: thorax, abdomen, extremities, hip, pelvis, spine and skull. Theoretical and practical instruction is used to integrate basic Science and clinical radiography. Procedural considerations and positioning techniques. Selection of technique factors. Radiation protection. Pathological conditions and image evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma.

Introduction to research in health care science – research process.

## Diagnostic radiography 200 (DIR 200)

**Qualification** Undergraduate

**Module credits** 22.00

**Programmes** [BRad in Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 seminar per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

**Skeletal system:** Procedures and techniques for: positioning, patient care, selection of Technique factors, radiation protection, pathological conditions and image evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma radiography. Alternative imaging principles and procedures. Apparatus. Radiation protection.

**Radiographic procedures:** Execution of radiographic examinations and procedures, selection of technique factors, radiation protection, problem-solving, pathological conditions and image evaluation for neonatal and mobile unit procedures. Orthopaedic theatre procedures. Soft tissue examinations using contrast media in demonstration of Genito-urinary system and gastro-intestinal system.. Introduction to pharmacology and contrast media. Introduction to developing research idea and literature review and research question. Patient assessment, education and care by the diagnostic radiographer. Developing professional attitudes as a diagnostic radiographer practitioner. Patient communication-establishing professional relationship. Patient family interactions. Inter-professional management between divisions in radiography discipline. Inter-professional management within trauma, surgical theatre and hospital wards. Psycho-social management of patient.

## Diagnostic radiography 300 (DIR 300)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	DIR 200, RSC 200, RPH 300
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

Venous needle placement.

**Cardiovascular system:** Selective angiography. Intervention techniques (vascular and non-vascular). Venography. Seldinger technique, contrast media, medication, catheters, guide wires and accessories. Quality assurance and quality control. Patient care. Medico-legal aspects. Pattern recognition.

**Mammography:** Introduction. Principles of soft tissue radiography. Communication and health promotion. Medico-legal aspects. Management of breast disease, patient care, radiation safety and technique factors. Processing requirements. Positioning principles and special procedures. Systematic evaluation of the images. Pattern recognition.

**Hystero-salpingography:** Booking procedures, patient-radiographer relationship, procedural considerations and evaluation criteria. Pattern recognition.

**Bone densitometry:** Principles, bone biology and remodelling, osteoporosis, core competencies for radiographers, physical principles of dual X-ray absorptiometry and other bone densitometry techniques.

**Ultrasonography:** General principles in obstetrics and gynaecology, abdomen and pelvis, musculo-skeletal system.

**Computer Tomography:** Protocols for different examinations. Patient care. Image interpretation. Magnetic resonance imaging: Protocol for the different examinations. Patient care. Myelography.

## Diagnostic radiography 400 (DIR 400)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	35.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	RPH 300 ; RSC 300; DIR 300
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

Phlebotomy. Research, quality assurance, imaging procedures, unit management, clinical practice, digital image acquisition and display, ethics and law, patient care, pharmacology and drug administration and safe practice in one (1) of the following electives (to be offered based on feasibility):

- i. CT Scanning
- ii. MRI Scanning
- iii. Intervention radiography
- iv. Community engagement.

### Diagnostic laboratory medicine 807 (DLM 807)

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Chemical Pathology

**Period of presentation** Year

**Programmes**

<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Medicine
<b>Period of presentation</b>	Year

**Module content**

A dissertation in a relevant topic or equivalent publication produced under supervision in the appropriate department.

**Didactics of nursing education 110 (DNE 110)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.

**Contact time** 1 other contact session per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

Learning strategies and educational media.

Developing teaching strategies and designing audiovisual aids and evaluation tools. Theory of didactics.

Cognitive and intellectual functioning of adults. Educational relations.

## Didactics of nursing education 120 (DNE 120)

**Qualification** Undergraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Curriculum and programme development.

Application of the principles of curriculum building. Management of curricula, programmes and nursing schools.

Student guidance.

Learning problems and remedial practices. Student support systems. Learning theories.

## Didactics of nursing education 160 (DNE 160)

**Qualification** Undergraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Module content

\*Attendance modules only

Nursing education practical work.

Compulsory practical work, including the preparation and presentation of at least ten (10) lectures and five (5) clinical teaching sessions.

## Dynamics of nursing practice 151 (DNP 151)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	13.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Intra and interpersonal dimensions of the nurse.

Self-discovery, self-disclosure and self-awareness, professional socialisation and self-development. Self-evaluation and own journal assessment. Compilation of a personal portfolio. Interpersonal communication and contact: from the self to relationships. Therapeutic use of the self. The therapeutic milieu. Contemporary dilemmas of identity. The multiple self and multiple realities. Communication skills: a communication model for nursing. Management of conflict. Day planning and time management. Development of a personal philosophy. Problem-solving and critical thinking skills.

NB: Only for selected BCur students.

## Dynamics of nursing practice 152 (DNP 152)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	13.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Assessment skills (including the assessment interview, assessment of mental needs, basic examination skills and vital signs), compilation of a database and needs list and the prioritisation of needs. Application of the scientific approach to nursing.

NB: Only for selected BCur students.

## Dynamics of nursing practice 153 (DNP 153)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	13.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

### Module content

Nursing management of emergency situations and disasters in the community. The need for emergency care. Provision of emergency medical services. The impact of emergency situations and disasters on the community. Unique needs in situations of exceptional distress. First aid and basic pre-hospital emergency care. Psychiatric emergencies: suicide risk, aggression, self-destructive behaviour and emotional trauma.

NB: Only for selected BCur students.

## Dynamics of nursing practice 154 (DNP 154)

**Qualification** Undergraduate

**Module credits** 13.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

### Module content

Nursing facilitation of health promotion and illness prevention.

The Primary health care (PHC) approach and its underlying principles. Health promotion as part of the PHC approach. Models and approaches, planning and implementation of health promotion and illness prevention programmes. Health screening and its relevant assessment skills. Educational skills and the health service consumer in the teaching-learning situation. Disability and rehabilitation care as preventative and health promotive modality. The principles underlying rehabilitation care. Evaluation of health promotion and illness prevention programmes. Promotion of mental well-being: stress, conflict, substance abuse, violence and physical abuse.

NB: Only for selected BCur students.

## Dynamics of nursing practice 251 (DNP 251)

**Qualification** Undergraduate

**Module credits** 9.00

**Prerequisites** ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

## Module content

Nurse-therapeutic contexts.

Ethical-legal aspects and health policy regarding mental illness. Organisation and institutions in psychiatric health care. Theoretical foundations of psychiatric nursing practice. The DSM classification system of mental disorders.

NB: Only for selected BCur students.

## Dynamics of nursing practice 252 (DNP 252)

**Qualification** Undergraduate

**Module credits** 9.00

**Prerequisites** ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

### Module content

Acute and chronic mental disorders.

Nursing process applied in the psychiatric context. Psychopathology, abnormal and deviant behaviour. Common mental disorders: schizophrenia, affective, cognitive and anxiety disorders.

NB: Only for selected BCur students.

## Dynamics of nursing practice 253 (DNP 253)

**Qualification** Undergraduate

**Module credits** 9.00

**Prerequisites** ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

### Module content

Nurse-therapeutic conversations, group therapy and comprehensive care.

Individual therapy: Facilitative communication and the one-to-one relationship.

Group: the group process, group dynamics, leadership and leadership functions and relevant assessment skills.

Mental health education. Therapeutic milieu.

NB: Only for selected BCur students.

## Dynamics of nursing practice 254 (DNP 254)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	9.00
<b>Prerequisites</b>	ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122
<b>Contact time</b>	2 lectures per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 4

### Module content

Therapeutic skills, mentally challenged and cultural issues.

Crisis intervention. Loss and grieving process. Mentally challenged individuals. Cultural sensitivity in mental health nursing.

NB: Only for selected BCur students.

## Dynamics of nursing practice 351 (DNP 351)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Comprehensive family nursing.

Family life and family dynamics. Alternative families and lifestyles. Perspectives and approaches to comprehensive nursing care and support of families. Family violence and pathology. Marriage counselling and family therapy. Families in the perinatal period: unique needs and support (including basic antenatal and postnatal care).

NB: Only for selected BCur students.

## Dynamics of nursing practice 352 (DNP 352)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
<b>Language of tuition</b>	Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

### Module content

Comprehensive community nursing.

Perspectives and approaches to comprehensive nursing care and support of communities. Relevant statutory control over primary health care (PHC) practices in South Africa. Relevant assessment skills. Sexually transmitted infections and communicable diseases. Therapeutic support of the community. Rehabilitative support of communities in need. Emphasis is placed on the facilitation and support of self-care related to physical, mental and environmental health and well-being.

NB: Only for selected BCur students.

## Dynamics of nursing practice 353 (DNP 353)

**Qualification** Undergraduate

**Module credits** 15.00

**Prerequisites** NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

### Module content

NOTE: DNP 353 must be completed after DNP 354.

Principles of patient care management.

Planning, organising, leading and control in areas of direct patient care. Management in the rendering of patient care. Co-ordination of the multi- and transdisciplinary programme of treatment and rehabilitation. Aspects of professional practice. Introduction to labour law. Inspections of nursing and patient care units. The clinical practice setting as a teaching-learning situation and the principles of adult learning.

NB: Only for selected BCur students.

## Dynamics of nursing practice 354 (DNP 354)

**Qualification** Undergraduate

**Module credits** 15.00

**Prerequisites** NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

## Module content

Note: DNP 354 must be completed prior to DNP 353.

Primary curative nursing for common and uncomplicated disease conditions.

Common and uncomplicated health problems related to the cardiovascular, respiratory, digestive, neurological, musculo-skeletal and genito-urinary system and infectious diseases of infancy and childhood, adulthood and the elderly. Complaints of the eyes. Musculoskeletal pain/dysfunction and non-traumatic bone/joint pain. Relevant assessment skills. Applied human nutrition.

NB: Only for selected BCur students.

## Dynamics of nursing practice 451 (DNP 451)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362
<b>Contact time</b>	2 practicals per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

## Module content

Principles of nursing management and professional leadership in clinical nursing practice.

Applied principles of general management, human resources management, marketing and public relations and financial management. Leadership and leadership development: perspectives, trends and contemporary practice issues. Principles of management in selected emergency situations. Labour law and labour relations.

NB: Only for selected BCur students.

## Dynamics of nursing practice 452 (DNP 452)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362
<b>Contact time</b>	2 practicals per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

## Module content

Principles of professional practice, nursing staff development and teaching in clinical nursing practice. Nursing science, ethics and the law. Contemporary practice issues derived from the ethos and professional practice of nursing. Professional self-regulation and the organised nursing profession. Private nursing practice. Planning, implementation and evaluation of clinical teaching and in-service training programmes, continuing professional development and life-long learning.

NB: Only for selected BCur students.

## Advanced dynamics of nursing practice 800 (DNP 800)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MNurs Nursing Education \(Coursework\)](#)  
[MNurs Nursing Management \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 2 discussion classes per week, 6 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

## Dosage planning 700 (DSB 700)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [BRadHons Radiation Therapy](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Brachytherapy. ICRU level-3 Radiation dose planning. Stereotactic radio-surgery and stereotactic radiotherapy. Image based and image guided radiotherapy. Large field irradiation with photons. Current trends in Electron Therapy, proton therapy, heavy particle therapy and neutron therapy treatment planning and delivery.

## Sports nutrition 880 (DTE 880)

**Qualification** Postgraduate

**Module credits** 12.00

**Programmes** [MSc Sports Medicine \(Coursework\)](#)

**Prerequisites** No prerequisites.

<b>Contact time</b>	8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 1

### German: Cultural-professional (1) 113 (DTS 113)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00

<b>Programmes</b>	<a href="#">BA</a> <a href="#">BA Extended programme</a> <a href="#">BA Languages</a> <a href="#">BA Law</a> <a href="#">BIS Publishing</a> <a href="#">BPolSci International Studies</a>
-------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Service modules</b>	Faculty of Health Sciences
------------------------	----------------------------

<b>Prerequisites</b>	Grade 12 German
----------------------	-----------------

<b>Contact time</b>	1 discussion class per week, 2 lectures per week
---------------------	--------------------------------------------------

<b>Language of tuition</b>	Module is presented in English and German
----------------------------	-------------------------------------------

<b>Department</b>	Ancient and Modern Languages and Cultures
-------------------	-------------------------------------------

<b>Period of presentation</b>	Semester 1
-------------------------------	------------

#### Module content

Comprehensive review of German grammar; development of reading, writing, speaking and understanding skills; analysis and interpretation of texts.

### German: Cultural-professional (2) 123 (DTS 123)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	12.00
-----------------------	-------

<b>Programmes</b>	<a href="#">BA</a> <a href="#">BA Extended programme</a> <a href="#">BA Languages</a> <a href="#">BA Law</a> <a href="#">BIS Publishing</a> <a href="#">BPolSci International Studies</a>

<b>Contact time</b>	1 discussion class per week, 2 lectures per week
---------------------	--------------------------------------------------

<b>Language of tuition</b>	Module is presented in English and German
----------------------------	-------------------------------------------

<b>Department</b>	Ancient and Modern Languages and Cultures
-------------------	-------------------------------------------

**Period of presentation** Semester 2

### Module content

Continuation of comprehensive review of German; further development of reading, writing, speaking and understanding skills; analysis and interpretation of texts.

## Dietetic profession 110 (DTT 110)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BDietetics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

### Module content

Philosophy, development and challenges of the dietetic profession in a South African context.

## Dietetic profession 120 (DTT 120)

**Qualification** Undergraduate

**Module credits** 16.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

### Module content

Philosophy, development and challenges.

## Cultural eating patterns 122 (DTT 122)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BDietetics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

**Module content**

Cultural eating patterns of various ethnic and religious groups in South Africa.

**Dietetic application of communication principles 222 (DTT 222)**

**Qualification** Undergraduate

**Module credits** 12.00

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** 2nd-year status

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

**Module content**

A total diet approach to communicating food and nutrition messages using theoretical frameworks, including planning and evaluation of content as well as presentation skills.

**Nutrition education 223 (DTT 223)**

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BDietetics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

**Module content**

A total diet approach to communicating food and nutrition messages using theoretical frameworks, including planning and evaluation of content as well as presentation skills.

**Dietetic counselling 310 (DTT 310)**

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** [BDietetics](#)

**Prerequisites** 3rd-year status

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

### Module content

Theory of counselling. Interviewing: Interview; the consultation process; verbal, written and non-verbal communication to clients, patients, employees as individuals or groups in different stages of the life cycle in health and disease in homogenic and trans/multi-cultural situations by means of applicable theoretical frameworks.

## Clinic and discussion class 320 (DTT 320)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [BDietetics](#)

**Prerequisites** DTT 310

**Contact time** 1 discussion class per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

### Module content

Practice training: Management of a dietetics clinic. Practising the consultation process and practice management in a dietetics clinic.

## Dietetic profession 411 (DTT 411)

**Qualification** Undergraduate

**Module credits** 3.00

**Programmes** [BDietetics](#)

**Prerequisites** 4th-year status

**Contact time** 1 discussion class per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

### Module content

Dietetic profession

## Integration in dietetics 480 (DTT 480)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [BDietetics](#)

**Prerequisites** 4th-year status

**Contact time** 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

#### Module content

\*Attendance module only

### Epidemiology theory, biostatistics and demography 800 (EBD 800)

**Qualification** Postgraduate

**Module credits** 50.00

**Programmes** [MMed Occupational Medicine](#)  
[MMed Public Health Medicine](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

#### Module content

This module covers the principles of basic and applied Epidemiology, e.g. quantitative research methodologies, infectious diseases epidemiology, clinical epidemiology and epidemiology for occupational health. The principles of biostatistics and the use of STATA software for management and analysis of datasets. The principles of demography and interpretation and utilisation of demographic data. Health information systems.

### Critical theoretical analysis in ECI 801 (ECI 801)

**Qualification** Postgraduate

**Module credits** 90.00

**Programmes** [MECI](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Centre for Augmentative and Alternative Communicat

**Period of presentation** Year

### Child health 860 (ECI 860)

---

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MECI</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 10 seminars per week, 5 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Centre for Augmentative and Alternative Communicat
<b>Period of presentation</b>	Semester 1

### Communication pathology 861 (ECI 861)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">MECI</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 seminars per week, 5 web-based periods per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Centre for Augmentative and Alternative Communicat
<b>Period of presentation</b>	Semester 1

### Academic English for Health Sciences 111 (ELH 111)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BChD  
MBChB

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 1

#### Module content

Proficiency in academic English by interpreting and contextualising philosophical and sociological texts prescribed during the first semester; medical ethics; study skill improvement. *\*Presented to students in Health Sciences only.*

### Academic English for Health Sciences (MBChB and BChD) 112 (ELH 112)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BChD  
MBChB

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 2

**Module content**

Proficiency in Academic English used in the basic medical sciences; analysis, synthesis and presentation of select texts prescribed in the second semester. *\*Presented to students in Health Sciences only.*

**Academic English for Health Sciences (BCur, BDietetics, BOH, BOccTher, BRad and BPhysT) 121 (ELH 121)**

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BDietetics  
BNurs  
BOH  
BOccTher  
BPhysio  
BRad in Diagnostics  
BSportSci

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 1

**Module content**

Academic reading as well as academic writing and presentation skills, based on the approach followed in the healthcare sciences. *\*Presented to students in Health Sciences only.*

**Academic English for Health Sciences122 (ELH 122)**

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BDietetics  
BNurs  
BOH  
BOccTher  
BPhysio  
BRad in Diagnostics  
BSportSci

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 2

### Module content

Study of specific language skills required in the Health Care Sciences, including interviewing and report-writing skills. \*Presented to students in Health Sciences only. (BCur, BDietetics, BOH, BOT, Brad, BPhysT)\*

## Academic English for Health Sciences (BClinical Medical Practice) 131 (ELH 131)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BCMP](#)

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 1

### Module content

Study of English used in medicine, aimed at developing reading, writing and interviewing skills in clinical situations. \*Presented to students in Health Sciences only.

## Academic English for Health Sciences (BClinical Medical Practice) 132 (ELH 132)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BCMP](#)

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 2

### Module content

Further study of English in medicine, with emphasis on language skills required in clinical contexts. \*Presented to students in Health Sciences only.

\*Alternative evening classes: 2 discussion classes per week

Introduction to Literature in English (2)

This module introduces the study of post-nineteenth century literature by examining a number of texts representing different genres (poetry, drama, prose). Texts will be from both Africa and other parts of the world. By the end of this module students should have the background and analytical skills to perceptively read modern and contemporary poetry, novels and plays.

## Environmental assessments 785 (ENV 785)

**Qualification** Postgraduate

**Module credits** 15.00

### Programmes

[BScHons Environmental Health](#)  
[BScHons Geography and Environmental Science](#)  
[BScHons Geoinformatics](#)  
[BSocSciHons Geographical Sciences Geography and Environmental Science](#)

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Geography Geoinformatics and Meteorology

**Period of presentation** Semester 1

### Module content

The aim of this module is to understand the principles and processes behind environmental assessments. The module will give an overview of the history of assessments, compare assessment processes internationally, evaluate the strengths and weaknesses of different approaches, provide an overview of the South African regulatory context and the environmental authorisation process.

## Ethics and values in healthcare, organisational behaviour change and strategy in health 770 (EOC 770)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 50 hours per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

### Module content

The delivery of healthcare services require high ethical values and standards to promote quality of life which improve patient outcomes. The innovative and creative leader in the health sector will be provided with skills in dealing with organisational behaviour patterns which influence behaviour change and policy strategy. The module will focus on the difficulties in changing workplace behaviour and mechanisms of how to sustain change strategies which are workable and enabling.

## Ethics and values in healthcare, organisational behaviour change and strategy in health 771 (EOC 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Health Systems Management Executive Leadership](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Introduction to environmental and occupational health 770 (EOH 770)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

## Environmental and occupational hygiene measuring techniques 771 (EOH 771)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes** [BScHons Occupational Hygiene](#)

<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

The module involves the in depth study of environmental and occupational hygiene measuring techniques. The focus of this module is the theoretical principles and the practical application of measuring techniques used to conduct environmental and occupational hygiene surveys. Relevant standards and guidelines to determine legal compliance are also discussed. Students must also complete practical coursework in the air quality laboratory to obtain competency in occupational hygiene equipment, calculations and interpretation of occupational hygiene survey results. Students will have to take a competency test after completing all practical coursework.

### Occupational health and safety legislation in South Africa 772 (EOH 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BScHons Occupational Hygiene</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

The module involves the study of current relevant occupational health and safety legislation in South Africa. The focus is to enable learners to have a working knowledge of current Acts. Scenarios and case studies to illustrate the application of the Acts will be discussed.

### Occupational hygiene examination 773 (EOH 773)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00

<b>Period of presentation</b>	Year

## Introduction to toxicology 871 (EOH 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Provide understanding of toxicology related to the environment; furthermore provide an insight into the impacts of hazardous substances in the environment to the individual or the public. Promote the development of a comprehensive and systematic knowledge of this field with depth, specialisation and up-to-date knowledge. Develop effective information retrieval and processing skills and the ability to critically engage with current research and scholarship in toxicology.

## Introduction to toxicology 872 (EOH 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">MPH</a> <a href="#">MSc Public Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Introduction to environmental and occupational health 873 (EOH 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Environmental epidemiology 870 (EOM 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00

<b>Prerequisites</b>	HME 870, BOS 870
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

This module is an introduction of the various types of epidemiological study designs that are applied in the investigation of the association between environmental exposures and health outcomes. Apart from the classical epidemiological study designs (cross-sectional, case-control and cohort designs that are introduced in HME 870), other study designs such as the time-series, case-crossover, panel, spatial, genetic and molecular study designs are introduced and discussed. The statistical techniques that are applied in the time-series, case-crossover, panel, spatial, genetic and molecular study designs are discussed as well as the implication of random and systematic errors in exposure/health assessment on the measures of associations; hence a basic biostatistics vocabulary (introduced in BOS 870) is required.

## Environmental epidemiology 871 (EOM 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH MSc Epidemiology MSc Public Health
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Academic literacy (1) 110 (EOT 110)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Economic and Management Sciences  
Faculty of Health Sciences  
Faculty of Natural and Agricultural Sciences  
Faculty of Theology and Religion  
Faculty of Veterinary Science

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 1

### Module content

An introduction to academic literacy that considers various learning styles and strategies, and provides an initial exploration of the characteristics of academic language. The module focuses initially on academic listening and speaking. Practice in collecting information for academic tasks, as well as in the processing of academic information. In addition, the module has a focus on the enhancement of academic vocabulary, and some initial and elementary academic writing is attempted.

## Academic literacy (2) 120 (EOT 120)

**Qualification** Undergraduate

**Module credits** 6.00

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Economic and Management Sciences  
Faculty of Health Sciences  
Faculty of Natural and Agricultural Sciences  
Faculty of Theology and Religion  
Faculty of Veterinary Science

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Unit for Academic Literacy

**Period of presentation** Semester 2

### Module content

While retaining an emphasis on the collection and processing of academic information, this module also provides sustained practice in academic reading. Similarly, we concentrate on building up an academic vocabulary specific to certain fields of study. The final part of the module brings together academic listening, reading and writing. The production of academic information in the form of argumentative writing is the focus here, i.e. we concentrate on producing academic discourse that is rational, coherent, clear and precise.

## Epidemiology 800 (EPI 800)

---

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Module content

The following epidemiology modules are compulsory:

- Introduction to health measuring and informatics
- Basic epidemiology and biostatistics
- Analytical epidemiology
- Taking of surveys
- Introduction to health informatics
- Basic quality assurance
- Intermediary biostatistics
- Introduction to health system research
- Research ethics
- Obtaining research awards
- Scientific writing and reporting
- Introduction to quantitative research
- Community participation in research
- Experimental epidemiology: clinical experiments

### Mini-dissertation: Epidemiology 890 (EPI 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">MSc Epidemiology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Thesis: Epidemiology 990 (EPI 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Epidemiology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Conducting surveys 700 (EPM 700)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** BOS 751, HME 751

**Contact time** 2 weeks

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

#### Module content

The design of questionnaires and mode of delivery of questionnaires; Sampling with attention to complex sampling (stratification and or clustering); Examples and case studies based on South African examples of surveys with complex sampling. The design effect and sample size determination for complex samples. The analysis of data taking into account the sampling structure where this is not simple random sampling.

### Epidemiology 2 870 (EPM 870)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** MPH  
MSc Clinical Epidemiology  
MSc Epidemiology  
MSc Public Health

**Prerequisites** HME 870, BOS 870 and BOS 871

**Contact time** lectures and practicals

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

#### Module content

Advanced epidemiological concepts and topics building upon learning that has taken place in the introductory epidemiology modules; further study design (including randomised control trials and observational studies); proposal writing; advanced examination of bias, confounding and effect modification; Stratification and standardisation of rates; further selected special biostatistical methods.

### Conducting surveys 873 (EPM 873)

**Qualification** Postgraduate

<b>Module credits</b>	10.00
<b>Programmes</b>	MPH MSc Epidemiology MSc Public Health
<b>Prerequisites</b>	BOS 870
<b>Contact time</b>	1 practical per week, 12 lectures per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Disease surveillance 874 (EPM 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	MPH MSc Epidemiology MSc Public Health
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 3 discussion classes per week, 3 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Sports injuries I 110 (EXE 110)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	BSportSci
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed – requires departmental selection

This module serves as an introduction to the fundamental concepts related to sports injuries.

### Research I 111 (EXE 111)

<b>Qualification</b>	Undergraduate
----------------------	---------------

---

<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

### Module content

\*Closed - requires departmental selection

This module serves an introduction to research and information technology in Sport and Exercise which include computer skills; research techniques; library services and functions; literature searches; referencing techniques; plagiarism as well as ethics and theories in research. The content not only covers the steps of the research process but also explains the researcher's role in the research process.

## Motor learning and development I 120 (EXE 120)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

### Module content

\*Closed - requires departmental selection

The module focuses on a study, critique and analysis of the development of movement skills in humans from infancy to older adulthood, and on an examination of the way different motor, cognitive and social abilities affect how, when and why an individual learns motor skills. Students will gain a basic understanding of the fundamental concepts related to motor learning and motor development, and will be provided with a solid background regarding the fundamental motor skills developed during childhood and adolescence.

## Exercise science programme development 121 (EXE 121)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science

---

**Period of presentation** Semester 2

### Module content

\*Closed – requires departmental selection

This module focuses on the basic principles of exercise programme design. Students will gain a basic understanding of the fundamental concepts related to exercise and will be provided with a solid background regarding the development of an exercise program. Programme development aspects for cardiorespiratory exercise, weight management and body composition programs, stretching and flexibility training, strength and endurance training, speed development and plyometrics, balance and proprioception programs, exercise selection, and periodisation are included.

## Measurement and evaluation I 122 (EXE 122)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BSportSci](#)

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 2

### Module content

\*Closed – requires departmental selection

This module introduces students to physical fitness assessment, fitness test administration, exercise testing principles and procedures, assessment of fitness components, test quality in exercise science, evaluating and interpreting test data.

## Sports injuries 141 (EXE 141)

**Qualification** Undergraduate

**Module credits** 6.00

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Quarter 1

### Module content

\*Closed – requires departmental selection

Biomechanic factors, causes of injuries, soft-tissue injuries, first aid (RICE), massage, strapping and CPR.

## Exercise and training principles 142 (EXE 142)

**Qualification** Undergraduate

**Module credits** 6.00

---

<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Quarter 2

#### **Module content**

\*Closed - requires departmental selection

Introduction to physical fitness, multidimensional character of physical fitness, sport specific vs health-related fitness components, physiological effects of training, and application of training principles.

### **Fundamental nutrition 143 (EXE 143)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Quarter 3

#### **Module content**

\*Closed - requires departmental selection

\*Offered by the Department of Human nutrition for the students in Biokinetics, Sport and Leisure sciences  
Nutrition and health, digestion, absorption and metabolism, carbohydrates, fats, proteins, energy balance and weight management.

### **Motor learning and development 144 (EXE 144)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Quarter 4

#### **Module content**

\*Closed - departmental selection required

A study, critique and analysis of human motor growth and development in regular populations. Growth, maturation, physical activity and performance of children and adolescents as they progress from birth to young adulthood are included.

### **Programme development 160 (EXE 160)**

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	12.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

#### Module content

\*Closed - requires departmental selection

Development of programmes for stretching and flexibility training, strength training, speed development and plyometrics, endurance training, exercise selection, and periodisation. Sport specific. Periodisation: concepts and applications.

### Research methodology I 161 (EXE 161)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed - requires departmental selection

Introduction to Information technology in Sport and Exercise computer skills, research techniques, library services and functions, searches, referencing techniques, plagiarism, ethics in research and theories in research.

### Sports injuries II 210 (EXE 210)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Prerequisites</b>	EXE 110
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed – requires departmental selection  
injuries, knee injuries, and shoulder injuries. Sport-16  
specific injuries, sports massage, and advanced CPR.

Overuse injuries, lower limb

## Applied nutrition 220 (EXE 220)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

### Module content

\*Closed – requires departmental selection Nutrition and health, digestion, absorption and metabolism, carbohydrates, fats, proteins, energy balance and weight management. Food environment, nutrition during growth, nutrition and physical fitness, nutrition and stress management.

## Motor learning and development II 221 (EXE 221)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Prerequisites</b>	EXE 120
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

### Module content

\*Closed – requires departmental selection

An analysis and critique of how motor learning is affected by adulthood and aging and how to design appropriate programmes to maximise motor skill acquisition.

## Sports injuries II 222 (EXE 222)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Prerequisites</b>	EXE 110
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

### Module content

\*Closed – requires departmental selection

The module aims to further the knowledge and application of fundamentals concepts related to sports injuries.

## Nutrition for exercise and sport 223 (EXE 223)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes** [BSportSci](#)

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

### Module content

\*Closed – requires departmental selection

Understanding the basic principles of substrate location and utilization in an exercise and sport-related context, as well as the application of nutrition recommendations for exercise and sport.

## Research II 301 (EXE 301)

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** [BSportSci](#)

**Prerequisites** EXE 111

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Year

### Module content

\*Closed – requires departmental selection

In this module the focus will be on fundamental quantitative or experimental research methodology, and statistics. The student will have the opportunity to demonstrate an understanding of the module through the medium of a written theoretical examination and a research proposal.

## Sports injuries III 310 (EXE 310)

**Qualification** Undergraduate

**Module credits** 15.00

**Programmes** [BSportSci](#)

**Prerequisites** EXE 222

---

<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed – requires departmental selection

Theoretical knowledge will be gained in the understanding of region specific sport injuries. This includes the mechanism of injury, type of injury, assessment and management of the sport injury.

### Measurement and evaluation 320 (EXE 320)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	Third Year - Academic Level OR Fourth Year - Academic Level OR Fifth Year - Academic Level OR Final Year - Academic Level)
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

#### Module content

\*Closed – requires departmental selection Selecting appropriate tests, testing protocols and procedures, and evaluation of test data.

### Functional anatomy 362 (EXE 362)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	SMC 251
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Year

#### Module content

\*Closed - requires departmental selection

Practical application of anatomical knowledge in the evaluation and treatment of sport and orthopaedic injuries and conditions. The student will apply this knowledge in the writing of rehabilitation and exercise programmes.

## Pharmacology 171 (FAR 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 2

### Module content

The module will provide the oral hygiene student with appropriate pharmacological knowledge and understanding of drugs that necessitate treatment modification to the patient's treatment plan. The oral hygiene student will be equipped with a practical understanding of pharmaco-therapeutic concepts which are essential for prescribing medicaments used for oral hygiene, and to make an informed choice of a safe suitable local anaesthetic drug for the administering thereof to a patient. He/she must be able to apply knowledge of pharmacology in the clinical setting and in performing procedures pertaining to the scope of oral hygiene.

## Pharmacology 172 (FAR 172)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 2

### Module content

The module will provide the oral hygiene student with appropriate pharmacological knowledge and understanding of drugs that necessitate treatment modification to the patient's treatment plan. The oral hygiene student will be equipped with a practical understanding of pharmaco-therapeutic concepts which are essential for prescribing medicaments used for oral hygiene, and to make an informed choice of a safe suitable local anaesthetic drug for the administering thereof to a patient. He/she must be able to apply knowledge of pharmacology in the clinical setting and in performing procedures pertaining to the scope of oral hygiene.

## Pharmacology 180 (FAR 180)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	2.00
<b>Programmes</b>	BCMP

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 2

#### Module content

Introductory principles to clinical pharmacotherapy. Pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions.

### Clinical pharmacology 280 (FAR 280)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	2.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	FAR 180
<b>Contact time</b>	6 lectures per semester
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Year

#### Module content

Clinical pharmacotherapeutics including indications, contra-indications, side-effects and interactions of commonly prescribed medicines in South Africa. Rational prescribing and critique of prescriptions.

### Clinical pharmacotherapy 370 (FAR 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	1 discussion class per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Year

#### Module content

Introductory principles of clinical pharmacotherapy in view of applicable patient problems, receptors for medicines, principles of structure activity relationships, dynamic and kinetic principles to bring pharmacological principles and clinical therapy together in a problem-based curriculum.

## Clinical pharmacology 380 (FAR 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	BCMP
<b>Prerequisites</b>	FAR 280
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Year

### Module content

Clinical pharmacotherapeutics including indications, contra-indications, side-effects and interactions of commonly prescribed medicines in South Africa. Rational prescribing and critique of prescriptions.

## Pharmacology 381 (FAR 381)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Programmes</b>	BDietetics BNurs BPhysio BSc Human Genetics BSc Human Physiology BSc Medical Sciences BSchHons Pharmacology
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	FSG 161, 162, 251, 252.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 1

### Module content

Introduction, receptors, antagonism, kinetic principles, drugs that impact upon the autonomic and central nervous system, pharmacotherapy of hypertension, angina pectoris, myocardial infarction, heart failure, arrhythmias, and epilepsy. Diuretics, glucocorticosteroids, local anaesthetics, anaesthetic drugs, analgesics, iron and vitamins, oncostatics and immuno suppressants.

## Pharmacology 382 (FAR 382)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00

<b>Programmes</b>	<a href="#">BNurs</a> <a href="#">BPhysio</a> <a href="#">BSc Human Genetics</a> <a href="#">BSc Human Physiology</a> <a href="#">BSc Medical Sciences</a> <a href="#">BScHons Pharmacology</a>
-------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** FAR 381, FLG 211, FLG 212, FLG 221, FLG 222 GS

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Pharmacology

**Period of presentation** Semester 2

### Module content

Hormones, drugs that act on the histaminergic, serotonergic, and dopaminergic receptors. Pharmacotherapy of diabetes mellitus, schizophrenia, depression, obesity, anxiety, insomnia, gastro-intestinal diseases. Anticoagulants, antimicrobial drugs.

## Pharmacology 705 (FAR 705)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Pharmacology](#)

**Prerequisites** No prerequisites.

**Contact time** 2 seminars per week, 6 lectures per week, Sixteen times per week

**Language of tuition** Module is presented in English

**Department** Pharmacology

**Period of presentation** Year

### Module content

Covers the following topics: Immunology, pain and inflammation, pharmacokinetics, wound healing, proteomics, isotopes in medicine, pharmacogenetics, law, pharmaceuticals, traditional medicines, plant-based medicines, lifestyle disorders, drug/drug interactions, drug adverse effects, malaria, cancer and malignancies and psycho/neuropharmacology, Good Clinical Practice (GCP), Good Laboratory Practice (GLP), Therapeutic Drug Monitoring (TDM), Overview of dispensing medicine. Practicals are as per study guide.

This module includes 30 research credits.

## Pharmacology 802 (FAR 802)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Anaesthesiology](#)

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Year

### Family-oriented patient care 700 (FFM 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">PGDip Family Medicine</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

#### Module content

Study of the family as the object of care; family systems theory; tools for family-oriented care; family life-cycle; ethics of treating families; family conference; the family and chronic illness; family violence and alcohol abuse in the family.

### Family-oriented patient care 780 (FFM 780)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1

#### Module content

Study of the family as the object of care; family systems theory; tools for family-oriented care; family life-cycle; ethics of treating families; family conference; the family and chronic illness; family violence and alcohol abuse in the family.

### Financial administration 703 (FIA 703)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">PGDip Vocational Rehabilitation</a>
<b>Contact time</b>	1 seminar per week, 2 lectures per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy

**Period of presentation** Year

### Module content

Financial statements; budget; decision-making; behaviour of costs; cost-volume relation; allocation of costs; manufacturing costs, process of costs; activity costs; overhead costs; business planning.

## Science and world views 155 (FIL 155)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BChD  
BSc Extended programme - Biological and Agricultural Sciences  
BSc Medical Sciences  
MBChB

**Service modules** Faculty of Health Sciences  
Faculty of Natural and Agricultural Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Philosophy

**Period of presentation** Semester 1

### Module content

This is a broad introduction to the philosophy and history of science. Examples of themes and historical periods which are covered include: world views in ancient Greece; Socrates; Plato – the founder of Western thought; Aristotle – the foundation of a new tradition; Leonardo da Vinci; the foundation of modern science; the wonder years of the seventeenth century – the flourishing of the sciences and philosophy; the rising of mechanization; a drastic turn in man's vision – the rise of psychology; how the theory of relativity changed our view of the cosmos; quantum theory and its implications for the modern world view; the biological sciences and the secrets of life; the rise and role of psychology; the neuro-sciences; the place, role and benefit of philosophical thought in the sciences.

## Physiology and pathophysiology 702 (FIP 702)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** PGDip Hand Therapy

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

## Module content

Physiology of the integration of hand function; brain plasticity, pain. Regeneration of skin, bone, muscle and nerve tissue; infection; inflammation.

### Physiology 171 (FLG 171)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BOH](#)

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

## Module content

Physiology is the study of organisms at a cellular and system level. Physiology will provide the oral hygiene student with the necessary knowledge to understand functioning and abnormalities of the human body, the vital organs necessary for normal functioning and the systems that provide essential communication for the control of the body functions and homeostasis. The module content will serve as pre-knowledge for clinical subjects.

### Introductory and neurophysiology 211 (FLG 211)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BSc Biochemistry](#)  
[BSc Chemistry](#)  
[BSc Human Genetics](#)  
[BSc Human Physiology](#)  
[BSc Human Physiology, Genetics and Psychology](#)  
[BSc Medical Sciences](#)  
[BSc Microbiology](#)  
[BSc Nutrition](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** CMY 127 GS and MLB 111 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

## Module content

Orientation in physiology, homeostasis, cells and tissue, muscle and neurophysiology, cerebrospinal fluid and the special senses.

Practical work: Practical exercises to complement the theory.

## Circulatory physiology 212 (FLG 212)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BSc Biochemistry  
BSc Chemistry  
BSc Human Genetics  
BSc Human Physiology  
BSc Human Physiology, Genetics and Psychology  
BSc Medical Sciences  
BSc Microbiology  
BSc Nutrition

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** CMY 127 GS and MLB 111 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

## Module content

Body fluids; haematology; cardiovascular physiology and the lymphatic system. Practical work: Practical exercises to complement the theory.

## Lung and renal physiology, acid-base balance and temperature 221 (FLG 221)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BSc Biochemistry  
BSc Chemistry  
BSc Human Genetics  
BSc Human Physiology  
BSc Human Physiology, Genetics and Psychology  
BSc Medical Sciences  
BSc Microbiology  
BSc Nutrition

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** FLG 211 GS and FLG 212 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

### Module content

Structure, gas exchange and non-respiratory functions of the lungs; structure, excretory and non-urinary functions of the kidneys, acid-base balance, as well as the skin and body temperature control.

Practical work: Practical exercises to complement the theory.

## Digestion, endocrinology and reproductive systems 222 (FLG 222)

**Qualification** Undergraduate

**Module credits** 12.00

### Programmes

[BSc Biochemistry](#)  
[BSc Chemistry](#)  
[BSc Human Genetics](#)  
[BSc Human Physiology](#)  
[BSc Human Physiology, Genetics and Psychology](#)  
[BSc Medical Sciences](#)  
[BSc Microbiology](#)  
[BSc Nutrition](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** FLG 211 GS and FLG 212 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

### Module content

Nutrition, digestion and metabolism; hormonal control of the body functions and the reproductive systems.

Practical work: Practical exercises to complement the theory.

## Industrial physiology 322 (FLG 322)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BSc Human Physiology](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** BCM 251 GS, BCM 252 GS, BCM 261 GS, FLG 221 GS and FLG 222 GS

**Contact time** 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

### Module content

Problem-orientated module, with the emphasis on occupational health and safety in the industrial environment. Integration of different physiological systems is required. Practical work: Exposure to occupational hygiene measurement techniques. \*Students interested in pursuing postgraduate studies in OHS must take FLG 322.

## Higher neurological functions 327 (FLG 327)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes**  
[BSc Biochemistry](#)  
[BSc Human Genetics](#)  
[BSc Human Physiology](#)  
[BSc Human Physiology, Genetics and Psychology](#)  
[BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** BCM 251 GS, BCM 252 GS, BCM 261 GS, FLG 221 GS and FLG 222 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

### Module content

Overview of higher cognitive functions and the relations between psyche, brain and the immune system. Practical work: Applied practical work with specific examples drawn from South African case studies taught within the framework of the UN Sustainable Development Goal 3 (Good Health and Well-being).

## Cellular and developmental physiology 330 (FLG 330)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes**  
[BSc Biochemistry](#)  
[BSc Human Genetics](#)  
[BSc Human Physiology](#)  
[BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** BCM 251 GS, BCM 252 GS, BCM 261 GS, FLG 221 GS and FLG 222 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

## Module content

During this module the biology of cellular processes such as the cell cycle, cell death, migration and their related cellular signalling pathways will be discussed as well as their role in early stage embryology and age-related pathologies. Practical work: Exposure to applied molecular biology techniques with specific examples drawn from South African case studies taught within the framework of the UN Sustainable Development Goal of Good Health and Well-being (Sustainable Development Goal 3).

## Exercise and nutrition science 331 (FLG 331)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BSc Biochemistry](#)  
[BSc Human Genetics](#)  
[BSc Human Physiology](#)  
[BSc Human Physiology, Genetics and Psychology](#)  
[BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** BCM 251 GS, BCM 252 GS, BCM 261 GS, FLG 221 GS and FLG 222 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

## Module content

Mechanisms of muscle contraction and energy sources. Cardio-respiratory changes, thermo-regulation and other adjustments during exercise. Use and misuse of substances to improve performance. Practical work: Applied practical work with exercise descriptions for the South African context taught within the framework of the UN Sustainable Development Goal 3 (Good Health and Well-being).

## Applied and pathophysiology 332 (FLG 332)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BSc Biochemistry](#)  
[BSc Human Genetics](#)  
[BSc Human Physiology](#)  
[BSc Human Physiology, Genetics and Psychology](#)  
[BSc Medical Sciences](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** BCM 251 GS, BCM 252 GS, BCM 261 GS, FLG 221 GS and FLG 222 GS

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

**Module content**

Integration of all the human physiological systems. Practical work: Applied practical work.

**Clinically applied anatomy 781 (FMA 781)**

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

**Module content**

Study of the upper limb, including the breast; head and neck; thorax; abdomen; pelvis; lower limb; embryology and histology.

**Clinically applied anatomy 782 (FMA 782)**

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

**Cardiovascular diseases 781 (FMC 781)**

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

**Chronic diseases 700 (FMD 700)**

**Qualification** Postgraduate

**Module credits** 15.00

---

<b>Programmes</b>	PGDip Family Medicine
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

#### Module content

Study of diabetes mellitus, asthma, epilepsy, hypertension, cardiac failure, obesity and chronic pain.

### Chronic diseases 781 (FMD 781)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1 and/or 2

#### Module content

Study of diabetes mellitus, asthma, epilepsy, hypertension, cardiac failure, obesity and chronic pain.

### Medical ethics 781 (FME 781)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1

### Psychiatry 700 (FMF 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	PGDip Family Medicine
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

#### Module content

Psychiatry in family practice

Study of depression, anxiety; suicide; the difficult adolescent; substance use and abuse; schizophrenia; dementia and delirium.

## Psychiatry 781 (FMF 781)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1

### Module content

Psychiatry in family practice

Study of depression, anxiety; suicide; the difficult adolescent; substance use and abuse; schizophrenia; dementia and delirium.

## Geriatrics 781 (FMG 781)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1

### Module content

Study of theories of ageing; physiology of ageing; demography; presentation of disease in the aged; cardiovascular system; conditions of the joints; respiratory system; central and peripheral nervous system; digestive tract; urinary tract; endocrine system; haematology; skin and sense organs; psycho-geriatrics; falls in the elderly; infections; cancer; terminal care; nutrition; rehabilitation; drugs and preventive geriatrics.

## Infectious diseases 700 (FMI 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">PGDip Family Medicine</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

## Module content

Introduction; study of contagious disease important to the traveller; contagious diseases in the tropical regions; viral illnesses in children; fever of unknown origin; sexually transmitted diseases; haemorrhagic fever; infective diarrhoea; meningitis; leprosy; HIV/Aids; tuberculosis; rabies; school attendance and infectious diseases; community-acquired pneumonia (CAP); acute virus hepatitis; rational use of antibiotics and other exogenous infections.

### Infectious diseases 781 (FMI 781)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

## Module content

Introduction; study of contagious disease important to the traveller; contagious diseases in the tropical regions; viral illnesses in children; fever of unknown origin; sexually transmitted diseases; haemorrhagic fever; infective diarrhoea; meningitis; leprosy; HIV/Aids; tuberculosis; rabies; school attendance and infectious diseases; community-acquired pneumonia (GVP); acute virus hepatitis; rational use of antibiotics and other exogenous infections.

### Physiology 781 (FMP 781)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

## Module content

Study of the nervous system; muscle physiology (skeletal, smooth and heart muscle); endocrine physiology; physiology of reproduction (age-related); cardiovascular physiology; thermoregulation; nutrition and digestion; acid-base balance; kidney, salt and water balance; blood and respiration.

### Sports medicine 781 (FMS 781)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

### Module content

An approach to sports injuries: concepts of training and fitness; energy systems and transfer of energy, nutrition, health and training; special investigations; injury; strapping and wrapping; stress fractures; examination and clinical conditions of different areas, upper limb, lower limb, pelvis; trunk and head: special considerations of age and gender – the child, the female athlete and the elderly exerciser; exercising under certain conditions – heat, cold, underwater altitude and time zones; sport and medical conditions – diabetes mellitus; HIV/Aids; drugs, alcohol; the tired athlete; concussion/boxing; exercise induced headache and medical coverage of sports events.

## Rheumatology 781 (FMU 781)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

### Module content

Study of rheumatoid arthritis; osteoarthritis; gout; ceronegative spondilo-arthropathy; collagen diseases; lower back pain; fibromyalgia and osteoporosis.

## Practice management 700 (FMX 700)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [PGDip Family Medicine](#)

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

### Module content

Study of human resource management; financial management; auditing of management and services management. The study of leadership and clinical governance for clinical primary care. The study of learning in primary care teams.

## Practice management 780 (FMX 780)

**Qualification** Postgraduate

**Module credits** 20.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 2

### Module content

Study of human resource management; financial management; auditing of management and services management.

## Forensic odontology 700 (FOT 700)

**Qualification** Postgraduate

**Module credits** 100.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

## Forensic odontology 701 (FOT 701)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [PGDip Dentistry Forensic Odontology](#)

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

## Child and adolescent psychiatry Part 1 801 (FPY 801)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Child and Adolescent Psychiatry \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Psychiatry

**Period of presentation** Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

## Forensic psychiatry for medical subspecialties Part 1 802 (FPY 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Programmes</b>	<a href="#">MPhil Forensic Psychiatry (Coursework)</a>
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA

### Physiology 110 (FSG 110)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BA Audiology](#)  
[BA Speech-Language Pathology](#)  
[BConSci Food Retail Management](#)  
[BConSci Hospitality Management](#)  
[BSc Culinary Science](#)  
[BSc Extended programme - Biological and Agricultural Sciences](#)  
[BSportSci](#)

**Service modules** Faculty of Humanities  
Faculty of Natural and Agricultural Sciences

**Prerequisites** No prerequisites.

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

### Module content

Introduction (terminology and anatomical orientation); chemical principles; cytology and histology; neuro-physiology and the senses; haematology and body fluids; cardiovascular system.

## Physiology 120 (FSG 120)

**Qualification** Undergraduate

**Module credits** 6.00

### Programmes

[BA Audiology](#)  
[BA Speech-Language Pathology](#)  
[BConSci Food Retail Management](#)  
[BConSci Hospitality Management](#)  
[BSc Culinary Science](#)  
[BSc Extended programme - Biological and Agricultural Sciences](#)  
[BSportSci](#)

**Service modules** Faculty of Humanities  
Faculty of Natural and Agricultural Sciences

**Prerequisites** FSG 110

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

### Module content

Respiratory system; nutrition; digestion and metabolism; kidneys and acid-base equilibrium; endocrinology; reproduction physiology and reproduction; skin and body temperatures.

## Physiology 161 (FSG 161)

**Qualification** Undergraduate

**Module credits** 6.00

<b>Programmes</b>	BDietetics BNurs BOccTher BPhysio BRad in Diagnostics
-------------------	-------------------------------------------------------------------

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Quarter 3

### Module content

Introduction to physiological principles; neurophysiology, and muscle physiology.

## Physiology 162 (FSG 162)

**Qualification** Undergraduate

**Module credits** 6.00

<b>Programmes</b>	BDietetics BNurs BOccTher BPhysio BRad in Diagnostics
-------------------	-------------------------------------------------------------------

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Quarter 4

### Module content

Body fluids; haematology; cardiovascular physiology, lymphatic system, and body defence mechanisms.

## Physiology 185 (FSG 185)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BCMP

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 6 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

### Module content

Introduction to Physiology, homeostasis and body fluids, cell physiology, haematology and immunology, cardiovascular system, respiration, neurophysiology and senses, gastrointestinal physiology and nutrition, kidneys, endocrinology, reproduction, skin and body temperature.

## Physiology 251 (FSG 251)

**Qualification** Undergraduate

**Module credits** 6.00

### Programmes

[BDietetics](#)  
[BOccTher](#)  
[BPhysio](#)  
[BRad in Diagnostics](#)

**Prerequisites** RAN 100, RFI 110, FSG 161, FSG 162, MTL 180, RAW 180, RAW 182

**Contact time** 1 practical per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Quarter 1

### Module content

Structure, gas exchange and secretory functions of the lungs; structure, excretory and non-urinary functions of the kidneys, acid-base balance, and skin and body temperature control. Practical work to complement the theory.

## Physiology 252 (FSG 252)

**Qualification** Undergraduate

**Module credits** 6.00

### Programmes

[BDietetics](#)  
[BOccTher](#)  
[BPhysio](#)  
[BRad in Diagnostics](#)

**Prerequisites** RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180,

**Contact time** 1 practical per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Quarter 2

### Module content

Nutrition, digestion and metabolism, hormonal control of body functions, and the reproductive systems. Practical work to complement the theory.

## Physiology 261 (FSG 261)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	<a href="#">BOccTher</a> <a href="#">BPhysio</a>
<b>Prerequisites</b>	PHY 131, CMY 151, ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, FTP 100
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Quarter 3

### Module content

Special neuro and muscle physiology.

## Physiology 262 (FSG 262)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	<a href="#">BOccTher</a> <a href="#">BPhysio</a> <a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	RAN 100, RFI 110, FSG 161, FSG 162, RAW 180, RAW 182, MTL 180
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Quarter 4

### Module content

Applied pathophysiology.

## Physiology 270 (FSG 270)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	72.00
<b>Prerequisites</b>	CMY 151, FIL 155, GNK 188, IDE 170, MGW 112, MLB 111, MTL 180, PHY 131, POH 170, SEP 110.
<b>Contact time</b>	1 practical per week, 6 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology

**Period of presentation** Year

### Module content

Building blocks and metabolism of molecules, muscle and neurophysiology, cerebrospinal fluid and the special senses. Body fluids; haematology; cardiovascular physiology and the lymphatic system. Structure, gas exchange and non-respiratory functions of the lungs; structure, excretory and non-urinary functions of the kidneys, acid-base balance, as well as the skin and body temperature control. Nutrition, digestion and metabolism; hormonal control of the body functions and the reproductive systems. Where appropriate, case studies will be discussed in order to demonstrate the practical application of the gained physiological knowledge to the clinical management of a dental patient. Practical work to complement the theory.

## Physiology 280 (FSG 280)

**Qualification** Undergraduate

**Module credits** 40.00

**Programmes** BChD

**Prerequisites** CMY 151, FIL 155, GNK 188, IDE 170, MGW 112, MLB 111, MTL 180, PHY 131, POH 170, SEP 110.

**Contact time** 1 practical per week, 6 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

Practical work to complement the theory.

## Applied physiology 370 (FSG 370)

**Qualification** Undergraduate

**Module credits** 12.00

**Prerequisites** BOK 280,(BOK 281 or BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

**Contact time** 1 discussion class per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

## Module content

Consult the Department of Physiology.

### Research methodology: Physiology 710 (FSG 710)

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

### Cellular physiology 712 (FSG 712)

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

### Physiology 714 (FSG 714)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes**

PGDip Dentistry Aesthetic Dentistry  
PGDip Dentistry Community Dentistry  
PGDip Dentistry Dental Materials  
PGDip Dentistry Endodontics  
PGDip Dentistry Forensic Odontology  
PGDip Dentistry Implantology  
PGDip Dentistry Oral Medicine  
PGDip Dentistry Oral Microbiology  
PGDip Dentistry Oral Pathology  
PGDip Dentistry Oral Surgery  
PGDip Dentistry Orthodontics  
PGDip Dentistry Pedodontics  
PGDip Dentistry Periodontology  
PGDip Dentistry Practice Management  
PGDip Dentistry Preventive Dentistry  
PGDip Dentistry Prosthetics  
PGDip Dentistry Prosthodontics  
PGDip Dentistry Radiography  
PGDip Dentistry Restorative Dentistry

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Applied physiology 720 (FSG 720)

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

### Basic physiology 771 (FSG 771)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Research: Physiology 773 (FSG 773)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology: Practical 774 (FSG 774)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology 801 (FSG 801)

**Qualification** Postgraduate

**Module credits** 36.00

MMed Anaesthesiology  
MMed Dermatology  
MMed Emergency Medicine  
MMed Forensic Pathology  
MMed Geriatrics  
MMed Haematology  
MMed Internal Medicine  
MMed Medical Oncology  
MMed Neurology  
MMed Neurosurgery  
MMed Nuclear Medicine  
MMed Obstetrics and Gynaecology  
MMed Ophthalmology  
MMed Orthopaedics  
MMed Otorhinolaryngology  
MMed Paediatric Surgery  
MMed Paediatrics  
MMed Plastic Surgery  
MMed Radiation Oncology  
MMed Radiological Diagnostics  
MMed Surgery  
MMed Thoracic Surgery  
MMed Urology  
MMilMed

**Programmes**

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

**Physiology 806 (FSG 806)**

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes**

MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)  
MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent)  
MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)  
MChD Orthodontics  
MChD Periodontics and Oral Medicine  
MChD Prosthodontics

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology 808 (FSG 808)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 809 (FSG 809)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 871 (FSG 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 873 (FSG 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 876 (FSG 876)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00

---

<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 878 (FSG 878)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 879 (FSG 879)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Sports physiology 880 (FSG 880)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">MSc Sports Medicine (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	Total of 15 lectures
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 882 (FSG 882)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00

**Programmes** MOccTher Activity Theory (Coursework)  
MOccTher Hand Therapy (Coursework)  
MOccTher Neurology (Coursework)  
MOccTher Paediatrics (Coursework)  
MOccTher Psychiatry (Coursework)

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology 883 (FSG 883)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** MPhysio Women's Health (Coursework)

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology 884 (FSG 884)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** MPhysio Neurology and Neurosurgery (Coursework)  
MPhysio Paediatrics (Coursework)

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology 885 (FSG 885)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** MPhysio Sports Medicine (Coursework)

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Year

### Physiology 886 (FSG 886)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">MPhysio Orthopaedics (Coursework)</a>
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 887 (FSG 887)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">MPhysio Internal Medicine (Coursework)</a> <a href="#">MPhysio Orthopaedic Manual Therapy (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Physiology 888 (FSG 888)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">MPhysio Surgery (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Mathematical methods 710 (FSK 710)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BScHons Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	6 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physics
<b>Period of presentation</b>	Semester 1

## Module content

Series; complex analysis; Bessel and other special functions; integral transforms; Green functions

### Classical dynamics 711 (FSK 711)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BScHons Medical Physics](#)

**Prerequisites** No prerequisites.

**Contact time** 6 lectures per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Semester 1

## Module content

Advanced problems in classical dynamics; Hamilton formalism; canonical transformations; continuum mechanics

### Quantum mechanics (I) 713 (FSK 713)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BScHons Medical Physics](#)

**Prerequisites** No prerequisites.

**Contact time** 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Semester 1

## Module content

Measurement process, General indefinite relations, Harmonic oscillator, symmetry, invariants and conservation laws, angular momentum, spin, perturbation theory, Schrödinger-Heisenberg and interaction pictures

### Electrodynamics (I) 714 (FSK 714)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BScHons Medical Physics](#)

**Prerequisites** No prerequisites.

**Contact time** 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Semester 1

**Module content**

Poisson equation, Green functions, Maxwell equations.

**Physics 808 (FSK 808)**

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Anaesthesiology](#)

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Year

**Internship training in food service system management 480 (FSS 480)**

**Qualification** Undergraduate

**Module credits** 14.00

**Programmes** [BDietetics](#)

**Prerequisites** No prerequisites.

**Contact time** 5 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

**Applied electro-biomechanics 801 (FTA 801)**

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 3 lectures per week, 4 seminars per week, 7 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

**Applied electro-biomechanics 802 (FTA 802)**

**Qualification** Postgraduate

---

<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week, 4 seminars per week, 7 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Applied electro-biomechanics 803 (FTA 803)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week, 4 seminars per week, 7 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Applied electro-biomechanics 804 (FTA 804)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week, 4 seminars per week, 7 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Applied electro-biomechanics 805 (FTA 805)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week, 4 seminars per week, 7 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Clinical physiotherapy: Paediatrics 813 (FTK 813)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	MPhysio Paediatrics (Coursework)
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 7 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Clinical physiotherapy: Neurology 814 (FTK 814)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	MPhysio Neurology and Neurosurgery (Coursework)
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week, 6 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Clinical physiotherapy: Women's health 815 (FTK 815)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	MPhysio Women's Health (Coursework)
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 7 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy

---

**Period of presentation** Year

### Clinical physiotherapy: Orthopaedics 816 (FTK 816)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MPhysio Orthopaedics \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 7 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Clinical physiotherapy: Orthopaedic manual therapy 817 (FTK 817)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MPhysio Orthopaedic Manual Therapy \(Coursework\)](#)

**Contact time** 1 lecture per week, 7 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Clinical physiotherapy: Sports medicine 818 (FTK 818)

**Qualification** Postgraduate

**Module credits** 40.00

**Programmes** [MPhysio Sports Medicine \(Coursework\)](#)

**Contact time** 1 lecture per week, 1 seminar per week, 7 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Physiotherapy 100 (FTP 100)

**Qualification** Undergraduate

**Module credits** 15.00

**Prerequisites** No prerequisites.

**Contact time** 1 web-based period per week, 3 lectures per week, 4 practicals per week, Community Engagement

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Module content

General introduction and orientation to physiotherapy, PBL skills and evidence-based approach to physiotherapy. Introduction to biomechanics, terminology, passive movements, measurement of the range of movement, clinical visits and patient-handling.

Kinetics: axis, planes, levers, effect of gravity on the human body.

Applied electro biomechanics: introduction to radiation, high-frequency, ultrasound, shortwave diathermy, laser, ultraviolet, infrared radiation.

Introduction to manual therapy: general introduction to massaging, evaluation of soft tissue, types applications and effects of massage techniques on various types of tissue, modalities application to the human body.

Human movement science: introduction to biomechanics, study of human movement, functional evaluation, muscle-testing, types of muscular activity, kinematics: analysis of movement, motor control and posture, characteristics of normal movement. Applied electrobiomechanics, introduction to medium frequency currents, Russian currents. Pulmonology.

Note: Physiotherapy is presented in a problem-based and integrated manner.

## Physiotherapy 101 (FTP 101)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [BPhysio](#)

**Contact time** 1 web-based period per week, 3 lectures per week, 4 practicals per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

## Physiotherapy 203 (FTP 203)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	45.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 web-based period per week, 4 practicals per week, 8 lectures per week, Community Engagement
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Module content

The problem-based learning approach to the principles of human movement science manual therapy for soft tissue and electro-biomechanics. This approach is applied by using selected clinical conditions of the thorax, pelvis and hip-joint over the total life spectrum.

The problem-based approach to the treatment of selected clinical conditions of the knee, ankle and foot complex, the pectoral girdle and gleno-humeral joint, the elbow, forearm and wrist and hand complex over the total life-cycle, through the application of the principles of human movement science manual therapy for soft tissue and electro-biomechanic.

## Physiotherapy 204 (FTP 204)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	35.00
<b>Programmes</b>	<a href="#">BPhysio</a>
<b>Contact time</b>	1 web-based period per week, 4 practicals per week, 8 lectures per week, Community Engagement

## Physiotherapy clinical practice 220 (FTP 220)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	13.00

---

<b>Prerequisites</b>	PHY 131,CMY 151,FSG 161,FSG 162,ANA 151,FTP 100,ANA 152,SLK 110,ANA 161,ANA 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 or ELH 121 and 122
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, Community Engagement
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Semester 2

### Module content

Study of the epidemiology, prevalence and incidence of selected clinical conditions. Students acquire clinical experience through the treatment of selected clinical conditions in various health care institutions, practices and clinics.

A theoretical and clinical examination will take place after conclusion of the module.

## Physiotherapy clinical practice 221 (FTP 221)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	<a href="#">BPhysio</a>
<b>Prerequisites</b>	PHY 131, CMY 151, FSG 161, FSG 162, ANA 151 ,FTP 101, ANA 152, SLK 110, ANA 161, ANA 162, CIL 121 or AIM 101 or AIM 111 and 121 or ELH 121 and 122
<b>Contact time</b>	1 lecture per week, 1 other contact session per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Semester 2

### Module content

Study of the epidemiology, prevalence and incidence of selected clinical conditions. Students acquire clinical experience through the treatment of selected clinical conditions in various health care institutions, practices and clinics.

A theoretical and clinical examination will take place after conclusion of the module.

## Physiotherapy 300 (FTP 300)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Prerequisites</b>	FSG 251,FSG 252,FSG 261,FSG 262,ANP 210,GMB 252,GMB 253,FTP 241,POL 251,FTP 231,
<b>Contact time</b>	1 discussion class per week, 2 lectures per week, 2 other contact sessions per week, 3 practicals per week, 3 web-based periods per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

## Module content

Theory of comprehensive physiotherapeutic management (prevention, promotion, restoration, and rehabilitation) of notifiable, non-notifiable and infectious conditions.

Diseases of lifestyle, chronic disease, the impact of HIV on disability and on patients with trauma, mental health.

Impact of physical/economic/political/

psychosocial environment on health and well-being, health promotion and development and sports science.

Comprehensive physiotherapy management is applied to infant health, during childhood, adolescent health, women's and men's health, health and disease in middle age and geriatrics.

## Physiotherapy clinical practice 301 (FTP 301)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	50.00
<b>Prerequisites</b>	FSG 251,FSG 252,FSG 261,FSG 262,ANP 210,GMB 252,GMB 253,FTP 231,FTP 241,POL 251
<b>Contact time</b>	1 discussion class per week, 2 practicals per week, 2 web-based periods per week, 3 lectures per week, Community Engagement
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

## Module content

Comprehensive clinical management of patients with communicable and non-communicable diseases and conditions, patients with an impairment or disability as a result of the impact of physical/economic/political and psychosocial environment on health and well-being, health promotion, and development and sports science.

Comprehensive clinical management is applied where relevant on infant health, during childhood, adolescence, in women's and men's health, and health and disease in middle age and geriatrics, diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and/or a mental health condition.

## Physiotherapy 303 (FTP 303)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	BPhysio
<b>Prerequisites</b>	FSG 251, FSG 252, FSG 261, FSG 262, ANP 210, GMB 252, GMB 253, FTP 241, POL 251, FTP 231
<b>Contact time</b>	1 discussion class per week, 2 lectures per week, 2 other contact sessions per week, 3 practicals per week, 3 web-based periods per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Physiotherapy clinical practice 304 (FTP 304)

**Qualification** Undergraduate

**Module credits** 45.00

**Programmes** BPhysio

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, ANP 210, GMB 252, GMB 253, FTP 231, FTP 241, POL 251

**Contact time** 1 discussion class per week, 2 practicals per week, 2 web-based periods per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Module content

Comprehensive clinical management of patients with communicable and non-communicable diseases and conditions, patients with an impairment or disability as a result of the impact of physical/economic/political and psychosocial environment on health and well-being, health promotion, and development and sports science.

Comprehensive clinical management is applied where relevant on infant health, during childhood, adolescence, in women's and men's health, and health and disease in middle age and geriatrics, diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and/or a mental health condition.

### Physiotherapy 400 (FTP 400)

**Qualification** Undergraduate

**Module credits** 20.00

**Prerequisites** RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300

**Contact time** 1 discussion class per week, 1 lecture per week, 1 web-based period per week, 2 practicals per week, Community Engagement

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

## Module content

Advanced comprehensive physiotherapeutic management of communicable and non-communicable diseases and conditions. This includes diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and mental health. Impact of physical/economic/political/psychosocial environment of health and well-being, health promotion and development, and sport science. The comprehensive physiotherapeutic management is applied to patients of all ages where relevant: in infant health, childhood, adolescent health, women's and men's health, health and disease in middle age and geriatrics and is based on the epidemiology of disease. The module includes 800 hours clinical experience in a variety of health care scenarios.

Examination period: October/November.

## Physiotherapy clinical practice 402 (FTP 402)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	88.00
<b>Prerequisites</b>	RHC 451, RHC 452, FAR 381, FAR 382, FTP 300, FTP 301, POL 300
<b>Contact time</b>	1 other contact session per week, 1 web-based period per week, 2 discussion classes per week, Community Engagement
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

## Module content

Comprehensive clinical management of patients with communicable, non-communicable diseases and conditions, patients who have an impairment or disability due to the impact of physical/economic/political/psychosocial environment on health and well-being. Health promotion, and development and sport science. Comprehensive clinical management is applied where relevant to infant health, during childhood, adolescence, in women's health and men's health, and health and disease in middle age and geriatrics, diseases of lifestyle, chronic disease, impact of HIV on disability, victims of trauma, and/or a mental health condition, addressing the determinants of health over the total life span. The module includes 800 hours clinical experience in a variety of health care scenarios. Examination period: October/November.

## Physiotherapy 403 (FTP 403)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	BPhysio
<b>Prerequisites</b>	RHC 451, RHC 452, FAR 381, FAR 382, FTP 303, FTP 304, POL 300

## Physiotherapy: Sports medicine 873 (FTP 873)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Contact time** 10 lectures per week, 2 seminars per week, 30 practicals per week

**Language of tuition** Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Dissertation: Physiotherapy 890 (FTP 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MPhysio</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Essay: Physiotherapy 891 (FTP 891)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Mini-dissertation 894 (FTP 894)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	60.00
<b>Programmes</b>	<a href="#">MPhysio Internal Medicine (Coursework)</a> <a href="#">MPhysio Neurology and Neurosurgery (Coursework)</a> <a href="#">MPhysio Orthopaedic Manual Therapy (Coursework)</a> <a href="#">MPhysio Orthopaedics (Coursework)</a> <a href="#">MPhysio Paediatrics (Coursework)</a> <a href="#">MPhysio Sports Medicine (Coursework)</a> <a href="#">MPhysio Surgery (Coursework)</a> <a href="#">MPhysio Women's Health (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Year

### Thesis: Physiotherapy 990 (FTP 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Physiotherapy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English

**Department** Physiotherapy

**Period of presentation** Year

### Community as patient 270 (GAP 270)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** FLG 170,GMB 170,MDB 170,TBW 170,ODO 170,PDL 170, DFA 170,VKM 170,GAP 170,RAD 170

**Contact time** 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

#### Module content

The module will enable the recently qualified oral hygienist to diagnose the oral health problems of any given community. Application of the knowledge gained from the module will enable him/her to participate in relevant primary and secondary preventive programmes to improve the oral health of that community in accordance with the Public Oral Health Policy of South Africa.

### Community as patient 271 (GAP 271)

**Qualification** Undergraduate

**Module credits** 14.00

**Programmes** BOH

**Prerequisites** ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

**Contact time** 1 lecture per week for 25 weeks, 1 other contact session per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

#### Module content

The module will enable the oral hygiene student to diagnose the oral health problems of any given community. Application of the knowledge gained from the module will enable him/her to participate in relevant primary and secondary preventive programmes to improve the oral health of that community in accordance with the public Oral Health Policy of the RSA. Oral hygiene students will visit special schools, nursery schools and hospitals where oral health programmes are implemented and maintained.

### Community as patient 371 (GAP 371)

**Qualification** Undergraduate

<b>Module credits</b>	13.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
<b>Contact time</b>	1 other contact session per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Year

### Module content

This module consists of practical work in the community only and is a continuation of Community as Patient 271.

### Community as patient 470 (GAP 470)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Prerequisites</b>	GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Year

### Module content

The modules in this subject consist of theoretical and practical training in oral epidemiology, community based primary and secondary prevention and the application of the principles of public oral health in his/her working environment.

### Community as patient 570 (GAP 570)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Prerequisites</b>	TBW 470, ODO 470, MFP 470, PDL 470, DFA 470, OFC 470, PTK 470, GAP 470, TMZ 470,
<b>Contact time</b>	1 lecture per week, 3 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Year

### Module content

The modules in this subject consist of theoretical and practical training in oral epidemiology, community based primary and secondary prevention and the application of the principles of public oral health in his/her working environment.

### Thesis: Mental health 990 (GEG 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Mental Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

### Geriatrics 800 (GER 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Geriatrics</a>
<b>Prerequisites</b>	PAG 806, ANA 893, FSG 801, FAR 804
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

### Thesis: Geriatrics 990 (GER 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Geriatrics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

### History 110 (GES 110)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00

<b>Programmes</b>	<a href="#">BA</a> <a href="#">BA Extended programme</a> <a href="#">BA Languages</a> <a href="#">BA Law</a> <a href="#">BA Visual Studies</a> <a href="#">BEd Intermediate Phase Teaching</a> <a href="#">BEd Senior Phase and Further Education and Training Teaching</a> <a href="#">BPolSci International Studies</a> <a href="#">BPolSci Political Studies</a> <a href="#">BSocSci Heritage and Cultural Tourism</a> <a href="#">BSocSci Industrial Sociology and Labour Studies</a> <a href="#">LLB</a>

### Public health medicine 800 (GGS 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	150.00
<b>Programmes</b>	<a href="#">MMed Public Health Medicine</a>

<b>Prerequisites</b>	Subject to passing EBD 800, ONO 800 and ASW 800 and to the fulfilment of the College of Public Health Medicine requirements for entry to the College examinations
<b>Contact time</b>	3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

#### Module content

The final exit examination GGS 800 will be conducted by the Colleges of Medicine of South Africa. The content of GGS 800 is therefore as determined by the current regulations and curriculum of the College of Public Health Medicine, a constituent member of the Colleges of Medicine of South Africa.

### Public health medicine 801 (GGS 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Occupational medicine 802 (GGS 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	150.00
<b>Programmes</b>	<a href="#">MMed Occupational Medicine</a>
<b>Prerequisites</b>	ASW 800, EBD 800, ONO 800, PHM 873
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

#### Module content

The syllabus for this module is laid out by the College of Public Health Medicine (CMSA) for the Fellowship in the College (Occupational Medicine) and may be obtained, updated, from their website. It is the final, exit specialist examination for the specialty.

### Mini-dissertation: Public health medicine 890 (GGS 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">MSc Public Health</a>

<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine

### Aspects of human geography 156 (GGY 156)

<b>Qualification</b>	Undergraduate
----------------------	---------------

**Module credits** 8.00

BA  
BA Extended programme  
BA Languages  
BEd Intermediate Phase Teaching  
BEd Senior Phase and Further Education and Training Teaching  
BIT Information Systems  
BPolSci International Studies  
BSc Chemistry  
BSc Computer Science  
BSc Environmental Sciences  
BSc Extended programme - Physical Sciences  
BSc Geography  
BSc Geoinformatics  
BSc Information and Knowledge Systems  
BSc Meteorology  
BSocSci Heritage and Cultural Tourism

**Programmes**

**Service modules**

Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Humanities  
Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Contact time** 1 tutorial per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Geography Geoinformatics and Meteorology

**Period of presentation** Quarter 2

**Module content**

This module begins by fostering an understanding of human geography. Then follows with the political ordering of space; cultural diversity as well as ethnic geography globally and locally; population geography of the world and South Africa: and four economic levels of development. The purpose is to place South Africa in a world setting and to understand the future of the country.

**Southern African geomorphology 166 (GGY 166)**

**Qualification** Undergraduate

**Module credits** 8.00

<b>Programmes</b>	<a href="#">BA</a> <a href="#">BA Extended programme</a> <a href="#">BA Languages</a> <a href="#">BEd Intermediate Phase Teaching</a> <a href="#">BEd Senior Phase and Further Education and Training Teaching</a> <a href="#">BPolSci International Studies</a> <a href="#">BSc Chemistry</a> <a href="#">BSc Computer Science</a> <a href="#">BSc Environmental Sciences</a> <a href="#">BSc Extended programme - Physical Sciences</a> <a href="#">BSc Geography</a> <a href="#">BSc Geoinformatics</a> <a href="#">BSc Information and Knowledge Systems</a> <a href="#">BSc Meteorology</a> <a href="#">BSocSci Heritage and Cultural Tourism</a>

## Medical nuclear science 700 (GKW 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Medical Nuclear Science</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nuclear Medicine
<b>Period of presentation</b>	Year

### Module content

This module includes 30 research credits.

## Dissertation: Medical nuclear science 890 (GKW 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Medical Nuclear Science</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nuclear Medicine
<b>Period of presentation</b>	Year

## Thesis: Medical nuclear science 990 (GKW 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Medical Nuclear Science</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nuclear Medicine
<b>Period of presentation</b>	Year

## Microbiology and immunology 171 (GMB 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	<a href="#">BOH</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Semester 1

### Module content

This module will provide the oral hygiene student with a thorough basic knowledge of:

- Basic microbiology
- Applied oral microbiology
- Basic immunological principles
- Applied immunology
- Principles of hypersensitivity, auto-immune disease and immunisation

The module content will serve as preknowledge for clinical subjects.

## Medical microbiology 252 (GMB 252)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BDietetics](#)  
[BPhysio](#)

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Quarter 2

### Module content

Infection, immunity and basic bacteriology.

Introduction and basic principles of infection, sterilisation and the immune system. Bacterial cells and the classification of disease-causing bacteria.

## Medical microbiology 253 (GMB 253)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BDietetics](#)  
[BPhysio](#)

**Prerequisites** FLG 211 GS, FLG 212 GS

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Quarter 3

## Module content

Systemic bacteriology.

Commonly occurring bacterial infections and the bacteria that cause them.

## Medical microbiology 254 (GMB 254)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BDietetics](#)  
[BPhysio](#)

**Prerequisites** FLG 211 GS, FLG 212 GS

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Quarter 4

## Module content

Fungi, parasitology and virology.

Commonly occurring fungal, viral and parasite infections and infestations, and the organisms that cause them.

## Medical microbiology 700 (GMB 700)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Medical Microbiology](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 seminar per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Year

## Module content

This module includes 30 research credits.

## Medical microbiology 800 (GMB 800)

**Qualification** Postgraduate

**Module credits** 300.00

**Programmes** [MMed Medical Microbiology](#)

**Prerequisites** GMB 801, or Capita selecta from APY 871, CHP 871, HEM 871, GVR 871

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Year

### Medical microbiology 801 (GMB 801)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Medical Microbiology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Year

### Medical microbiology (Capita selecta) 871 (GMB 871)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Haematology](#)  
[MMed Medical Virology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Semester 1

### Dissertation: Medical microbiology 890 (GMB 890)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MSc Medical Microbiology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Year

### Thesis: Medical microbiology 990 (GMB 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Medical Microbiology](#)  
[PhD Medical Microbiology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Medical Microbiology

**Period of presentation** Year

### Geometrical optics 800 (GMO 800)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Ophthalmology](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Year

#### Module content

Mathematical description of waves; Light as an electromagnetic wave; Nature of sources of light; Wave fronts (Huygens principle); Snell's Law; Index of refraction; Exploration of the laws of reflection and refraction at planar and curved surfaces; Ray tracing methodology to find position, Nature of images and magnification; Thin lens formula; Conjugate foci formula; Lensmaker's formula; Ophthalmic prisms: characteristics, classification and refractive power; Thin lenses: types, image formation; Cylindrical lenses: Introduction; Optical Systems: Lens combinations (notation, toric lenses); Thick lenses (cardinal points, system power); The Eye: structure and function, reduced eye; Aberrations in general; Eye defects: myopia, hyperopia, presbyopia, astigmatism; Optical apparatus for ophthalmology: invasive / non-invasive, ophthalmic laser, ophthalmoscope, fundus camera, light coagulator.

### Health human resource planning 800 (GMP 800)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

### Medical physics: Practical work 700 (GNF 700)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BScHons Medical Physics](#)

**Prerequisites** No prerequisites.

---

<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Medical physics: Nuclear medicine 701 (GNF 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BScHons Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Medical physics: Diagnostic radiology 702 (GNF 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BScHons Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Medical physics: Radiation physics 703 (GNF 703)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BScHons Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

---

### Medical physics: Radiotherapy 704 (GNF 704)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BScHons Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Medical physics: Radiation protection 705 (GNF 705)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BScHons Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Dissertation: Medical physics 890 (GNF 890)

<b>Qualification</b>	Postgraduate

<b>Programmes</b>	<a href="#">MSc Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Thesis: Medical physics 990 (GNF 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Medical Physics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English

**Department** Radiation Oncology

**Period of presentation** Year

### Orientation 120 (GNK 120)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Contact time** 17 lectures per week, 4 discussion classes per week, 4 seminars per week, 5 practicals per week

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Semester 2

#### Module content

Introduction to the Study of Medicine/Dentistry.

Introduction to the Faculty of Health Sciences and students' interaction with the faculty description of the curriculum and the demands made on students at different stages. Introduction to the principles contained within the "golden threads". Introduction to the cultural differences and taboos important to the health care worker. First stages of learning a new language - Setswana and Afrikaans.

### Computer orientation 122 (GNK 122)

**Qualification** Undergraduate

**Module credits** 4.00

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Semester 2

### People and their environment 127 (GNK 127)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Contact time** 15 practicals per week, 2 discussion classes per week, 5 seminars per week, 6 lectures per week

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Semester 2

### Module content

The bio-psychosocial approach to health care; patients in their family and community environment; the role of psychology in the work of a generalist; how patients adapt to sickness and cope with stress; the health care system in rural South Africa; health promotion and health education; the use of electronic databases.

## Introduction to clinical pharmacotherapy 128 (GNK 128)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** MBChB

**Prerequisites** No prerequisites.

**Contact time** 5 discussion classes per week, 5 lectures per week

**Language of tuition** Module is presented in English

**Department** Pharmacology

**Period of presentation** Semester 2

### Module content

Introductory principles to clinical pharmacotherapy on the grounds of applicable patient problems/disease processes; receptors for medicines; principles of structure activity relationships; dynamic and kinetic principles to bring pharmacological principles and clinical therapy together in a problem-based curriculum.

## Anatomy 188 (GNK 188)

**Qualification** Undergraduate

**Module credits** 56.00

**Programmes** BChD

**Prerequisites** No prerequisites.

**Contact time** 18 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

## Module content

Systemic anatomy and embryology:

An introduction to anatomical terminology, the musculoskeletal system, nervous system, surface anatomy, cardiovascular system, respiratory system, urogenital system, gastro-intestinal system, the endocrine system and human embryology.

Human osteology:

Introduction to osteology, bone function and classification, humerus, radius, ulna, femur, tibia, fibula, clavicle, scapula, ribs, sternum, vertebrae, pelvis, hand and foot bones, sesamoid bones, skull, mandible, joints.

Human histology:

General introduction to cells and tissue, terminology, the cell and cytoplasm, organelles and inclusions, surface and glandular epithelium, general connective tissue, specialised connective tissue, namely cartilage, bone, blood and haemopoietic tissue, muscle and nervous tissue.

## Medical preparatory module 200 (GNK 200)

**Qualification** Undergraduate

**Module credits** 0.00

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Semester 2

## Introduction to clinical medicine 283 (GNK 283)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** MBChB

**Prerequisites** CMY 151, FIL 155, MGW 112, MLB 111, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128, CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Semester 2

## Module content

The bio-psycho-social model of illness; the SIAMS framework for the consultation; surface anatomy: the integrated management of childhood illness (IMCI); general physical examination skills and introduction to clinical departments.

## Blood 285 (GNK 285)

**Qualification** Undergraduate

**Module credits** 4.00

<b>Prerequisites</b>	CMY 151,GNK 121,GNK 122,MLB 111,PHY 131,GNK 126,BOK 120,MTL 180,MGW 111,FIL 182,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

### Basic emergency care 286 (GNK 286)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">BOccTher</a> <a href="#">BPhysio</a> <a href="#">B Rad in Diagnostics</a> <a href="#">BSportSci</a> <a href="#">MBChB</a>
<b>Prerequisites</b>	CMY 151,FIL 155,MGW 112,MLB 111,PHY 131,MTL 180,GNK 120,BOK 121,GNK 127,GNK 128,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112
<b>Contact time</b>	1 other contact session per week, 8 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 1 and/or 2

#### Module content

Theory and practical training in basic emergency care.

### Anatomy (Dissection) 288 (GNK 288)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	37.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	CMY 151,GNK 120,GNK 127,MLB 111,PHY 131,GNK 128,BOK 121,MGW 112,FIL 155,MTL 180,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 111 and 112
<b>Contact time</b>	14 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

## Module content

Clinically applied regional dissection of the upper limb, neck and back, head, brain, thorax, abdomen, pelvis and lower limb.

### Anatomy 289 (GNK 289)

**Qualification** Undergraduate

**Module credits** 40.00

**Programmes** BChD

**Prerequisites** GNK 286, GPS 280, FSG 270, MDB 270, POH 270, ODO 270, PRD 270, ZUL 110, AFR 111, IDE 270

**Contact time** 15 lectures per week

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 1

## Module content

Clinically applied regional approach to human anatomy. Detailed cadaveric dissection of the head and neck, brain and spinal cord, axilla, upper limb, thorax, back and abdomen. Particular emphasis will be given to the head and neck region. The perineum, pelvis and lower limb will not be dissected, but taught with the aid of prosected specimens.

### Heart and blood vessels 381 (GNK 381)

**Qualification** Undergraduate

**Module credits** 25.00

**Programmes** MBChB

**Prerequisites** BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281 or (BOK 285,BOK 287)),GNK 283,GNK 286, LCP 280, SMO 281,SMO 211

**Contact time** 16 lectures per week

**Language of tuition** Module is presented in English

**Department** Internal Medicine

**Period of presentation** Semester 1

## Module content

Discussion of the important diseases in order to obtain a complete overview of the disease, which will include anatomy, physiology, pathology, pharmacology and clinical medicine.

### Lungs and chest 383 (GNK 383)

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** MBChB

<b>Prerequisites</b>	BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281 or (BOK 285,BOK 287)),GNK 283,GNK 286, LCP 280, SMO 281, SMO 211
<b>Contact time</b>	12 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Semester 1

### Module content

Lungs and chest.

Discussion of the significant diseases in order to obtain a complete overview of the disease, which will include anatomy, physiology, pathology, pharmacology and clinical medicine.

## Preceptorship 385 (GNK 385)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281or (BOK 285,BOK 287)),GNK 283,GNK 286, LCP 280, SMO 281, SMO 211
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 2

### Module content

A learning opportunity for the undergraduate student to:

- (i) experience in practice, the general practitioner or family physician,
- (ii) meet the unselected patient and
- (iii) observe first-hand, the problems which have to be contended within primary care. The problems comprise biomedical, psycho-social and managerial challenges.

## Haematological malignancies 386 (GNK 386)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	BOK 280,GNK 288,BOK 284,GPS 280,(BOK 281 or (BOK 285,287)),GNK 283,GNK 286, LCP 280, SMO 281, SMO 211
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Paediatrics
<b>Period of presentation</b>	Semester 1

## Module content

Haematological malignant neoplasia: Basic and clinical information with regard to this group of diseases, including healing ability with regard to lymphoma, leukaemia, myeloproliferative diseases; and immunoproliferative diseases.

## Head and neck anatomy 388 (GNK 388)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	GNK 288,BOK 283,(BOK 281or (BOK 285,287)),GNK 286,GPS 280,IKT 200,BOK 280,SMO 211,SMO 281, LCP 280
<b>Contact time</b>	12 practicals, 16 discussion classes per week, 4 lectures per week, 8 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

## Module content

A relevant head-and-neck anatomy module for dental students, detailing essential information applicable to the practice of clinical dentistry.

## Medical preparatory module 400 (GNK 400)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	0.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 2

## Disorders of childhood 481 (GNK 481)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	31.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,GNK 488,SMO 311,SMO 380,SMO 382
<b>Contact time</b>	6 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Paediatrics
<b>Period of presentation</b>	Semester 1

## Module content

The module is designed to help students gain knowledge, skills and attitudes in order to understand and respond to the special needs and vulnerability of children in relation to development, nutrition, environment and adaptation; recognise by means of history and examination, common and important abnormalities of development, nutrition, environment and adaptation and be able to deal with them effectively; recognise by means of history and examination, common and important health problems of infancy and childhood and be able to deal with them effectively.

The mornings are devoted to direct contact with paediatric patients and their problems by means of small-group activities at a variety of experimental learning sites.

The afternoon periods are used for representative case studies with regard to a series of general or important themes, illustrated by multidisciplinary symposia, lectures, problem-solving exercises and self-tuition.

## Forensic medicine 482 (GNK 482)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** MBChB

**Prerequisites** GPS 380, LCP 380, GNK 381, GNK 383, BOK 380, GNK 386, SMO 311, SMO 380, LCP 380, BOK 382, GNK 488, SMO 382.

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Semester 2

## Module content

- Forensic pathology, thanatology taumatology
- Medicine and law, medical law

## Musculoskeletal conditions 483 (GNK 483)

**Qualification** Undergraduate

**Module credits** 28.00

**Programmes** MBChB

**Prerequisites** GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 380,SMO 311,SMO 382

**Contact time** 7 lectures per week

**Language of tuition** Module is presented in English

**Department** Orthopaedics

**Period of presentation** Semester 2

## Module content

A study of the build and functions as well as the diseases of the musculo-skeletal movement apparatus in adults and children. Emphasis is placed on the diagnosis and treatment of the most prominent conditions as well as the acquiring of practical and clinical skills.

## Endocrinology 484 (GNK 484)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 380,SMO 311,SMO 382
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 2

### Module content

An opportunity for the student to become familiarised with the most common endocrinology problems in practice, including diabetes and obesity. The focus is on the recognition of these conditions and their practical handling.

## Head and neck 485 (GNK 485)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	33.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 311,SMO 380,SMO 382
<b>Contact time</b>	5 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Otorhinolaryngology
<b>Period of presentation</b>	Semester 2

### Module content

An opportunity for the undergraduate student to acquire knowledge and skills in respect of the prevention, diagnosis and treatment of diseases of the head and neck region by means of lectures, seminars, self-tuition and practical sessions in the clinic, ward, theatre as well as the skills laboratory. A problem-based and interdisciplinary approach is emphasised.

## Ageing 486 (GNK 486)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 311,SMO 380,SMO 382

<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Semester 2

#### Module content

Discussion of the physiology and psychology of ageing and an overview of diseases commonly found in the elderly, with a biomedical psycho-social approach.

### Skin 487 (GNK 487)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 381,GNK 383,BOK 380,GNK 386,GPS 380,BOK 382,SMO 311,SMO 380,SMO 382
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Semester 2

#### Module content

Clinical manifestations and management.

### Elective 488 (GNK 488)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	23.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	BOK 280,BOK 284,GNK 286,GPS 280,SMO 281,(BOK 281 or (BOK 285,287)),GNK 283,GNK 288,SMO 211, LCP 280
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 2

#### Module content

An opportunity for the undergraduate student to acquire knowledge, skills and experience in the medical practice environment.

### Psychiatry and social dysfunction 581 (GNK 581)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	34.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 481,BOK 480,BOK 482,GNK 485,GNK 483,GNK 487,GNK 486,GNK 484,GNK 385,SMO 411
<b>Contact time</b>	18 lectures per week, 5 ppw
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Semester 1

### Module content

The module will help students to acquire knowledge, skills and attitudes that will enable them to diagnose and manage certain psychiatric conditions. Preventive and promotive aspects of management are also emphasised. These psychiatric conditions include the following: mood disorders, anxiety disorders, alcohol and substance-related disorders, sexual disorders, schizophrenia and other psychotic disorders, mental disorders due to general medical conditions, personality disorders, eating disorders and sleep disorders.

These topics will be handled as applicable to children, adolescents and adults. Additional topics include: legal aspects, aggression, child abuse, child development, mental retardation and interpersonal skills.

During morning lectures, students are directly exposed to psychiatric patients and their problems by means of small-group activities.

The afternoon lectures are used for the solution of problem-orientated case studies and accompanied exploration of the themes mentioned above. The module is student-oriented, with the emphasis on self-tuition.

### Health and healthcare 582 (GNK 582)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	27.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
<b>Contact time</b>	15 lectures per week, 2 discussion classes per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1

### Module content

This module aims to integrate the concepts of Family Medicine and Community Medicine for the delivery of health care in South Africa. The module content covers medico-legal aspects of practice, ethical issues, as well as approaches to common problems in practice, with emphasis on the application of the bio-psychosocial model of care in the South African district health system.

## Traumatology 583 (GNK 583)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
<b>Contact time</b>	1 other contact session per week, 1 practical per week, 1.5 seminars per week, 10 lectures per week, 3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Semester 1

### Module content

The block consists of two modules, one practical and the other theoretical. The objective of the trauma practicals is to introduce students to clinical recognition of trauma emergencies, institution of emergency resuscitation, application of life saving and life support manoeuvres and emergency treatment of the trauma victim. Using actors/models, students are taught the application of the Advanced trauma life support (ATLS) (ABCDE) type approach to trauma.

The trauma theory comprises the introduction to the full spectrum of trauma as a disease. Epidemiology of trauma, mechanisms of wounding, including ballistics, the biological response to trauma, wound healing and complications of trauma will be taught. Emergency treatment, resuscitation and intensive care treatment of the trauma victim will be covered.

A systematic course on a thematic basis will be given to cover the major organ systems prioritised according to the ATLS type approach of life threatening, limb threatening or disfiguring injuries.

Thus, thoracic, cardiovascular, abdominal, head and neck trauma will be dealt with as potential life threatening injuries, orthopaedic as limb threatening trauma and skin injuries are mainly disfiguring. Thermal, electrical and chemical burns and hypothermia will be covered. Introduction to physical and psychological rehabilitation and nutrition of the trauma victim will be taught.

## Pharmacotherapy 585 (GNK 585)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	7.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 1

## Module content

Core pharmacotherapy and applicable clinical aspects of the most general and prominent diseases and conditions, principles of toxicology and medical-forensic aspects of substance abuse, court proceedings and iatrogenic deaths.

### Anaesthesiology 586 (GNK 586)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	13.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	BOK 480,BOK 482,GNK 481,GNK 483,GNK 484,GNK 485,GNK 486,GNK 487,GNK 385,SMO 411
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anesthesiology
<b>Period of presentation</b>	Semester 1

## Module content

A basic introduction to the underlying principles of the theory and practice of anaesthesiology applicable to the generalist. Learning experiences comprise practical residency (prior to Block 18), formal interactive lectures, workshops and case studies (during Block 18).

### Forensic medicine morning rotation 587 (GNK 587)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	LCP 480, BOK 480, BOK 482, GNK 385, GNK 481, GNK 483, GNK 484, GNK 485, GNK 486, GNK 487, SMO 411
<b>Contact time</b>	1 a weeks for period of 2 weeks, 4 lectures over period of 2 weeks, 5 practicals per week (2 week period)
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Forensic Medicine
<b>Period of presentation</b>	Semester 1

## Module content

Forensic medicine morning rotation.

### Surgery 680 (GNK 680)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	52.00
<b>Programmes</b>	MBChB

---

<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Surgery (7 weeks) in the Student Intern Complex: General surgery, vascular surgery, plastic surgery, paediatric surgery, cardiothoracic surgery.

### Orthopaedics 681 (GNK 681)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	17.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Orthopaedics (three weeks) in the Student Intern Complex.

### Anaesthesiology 682 (GNK 682)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anesthesiology
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Anaesthesiology (3½ weeks) in the Student Intern Complex.

### Internal medicine 683 (GNK 683)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	45.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Semester 1 and Semester 2

### Module content

Internal medicine (7 weeks) in the Student Intern Complex.

### Internal medicine related sub-disciplines 684 (GNK 684)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Semester 1 and Semester 2

### Psychiatry 685 (GNK 685)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Semester 1 and Semester 2

### Module content

Psychiatry (7 weeks) in the Student Intern Complex.

### Obstetrics and gynaecology 686 (GNK 686)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	40.00

---

<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512,
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Obstetrics and gynaecology (7 weeks) in the Student Intern Complex.

### Paediatrics 687 (GNK 687)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Paediatrics
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Paediatrics (7 weeks) in the Student Intern Complex.

### Community-based education 688 (GNK 688)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586,SMO 511,SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Community-based education (3½ weeks) in the Student Intern Complex.

### Diagnostic laboratory medicine 689 (GNK 689)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	11.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Diagnostic laboratory medicine (2 weeks); image-forming medicine; evidence-based medicine and bio-ethics (two days) in the Student Intern Complex.

### Urology 690 (GNK 690)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	11.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Urology
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Urology (2 weeks) in the Student Intern Complex.

### Family medicine 691 (GNK 691)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Semester 1 and Semester 2

#### Module content

Family medicine (3½ weeks) in the Student intern complex.

## Community obstetrics 692 (GNK 692)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 581,GNK 582,GNK 583,GNK 585,GNK 586
<b>Contact time</b>	40 practicals per week, Community Engagement
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Semester 1 and Semester 2

### Module content

Community obstetrics (3½ weeks) in the Student Intern Complex.

## Neurology 693 (GNK 693)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	MBChB
<b>Prerequisites</b>	GNK 581, GNK 582, GNK 583, GNK 585, GNK 586, SMO 511, SMO 512
<b>Contact time</b>	40 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Neurology
<b>Period of presentation</b>	Semester 1 or Semester 2

### Module content

Neurology in the Student Intern Complex.

## General microbiology 270 (GOM 270)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	23.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Microbiology
<b>Period of presentation</b>	Year

## Module content

The course “Microbiology” will prepare the dental student with the necessary knowledge and the discussion capability regarding basic microbiology, virology and immunology of both the healthy and diseased patient so that the student will understand the normal functioning of the relevant systems of the human body and will have compassion for the needs of patients with deflections from the normal. The student will be able to integrate the knowledge gained with the holistic approach to patients in order to be able to approach the treatment of patients preventatively and comprehensively. The course will provide the dental student with a thorough basic knowledge of principles of infection in general microbiology and virology.

### General microbiology 370 (GOM 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	23.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Microbiology
<b>Period of presentation</b>	Year

<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 1 and Semester 2

### Generic procedural skills 370 (GPS 370)

---

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Dentistry
<b>Period of presentation</b>	Semester 1

#### Module content

Procedures: skin, scrubbing and dressing for theatre.

Physical examinations: cardiovascular examination, respiratory examination.

### Generic procedural skills 380 (GPS 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">MBChB</a>
<b>Prerequisites</b>	BOK 280,GNK 283,GNK 288,GPS 280,(BOK 281 or (BOK 285,BOK 287)),SMO 211,GNK 286,BOK 284,SMO 281
<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Semester 1

### Groups in occupational therapy 702 (GRA 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">PGDip Vocational Rehabilitation</a>
<b>Contact time</b>	1 discussion class per week, 1 seminar per week, 2 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### Module content

Emphasis will be placed on role-playing and groups in learning employment acquisition behaviour.

### Groups in occupational therapy 800 (GRA 800)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	28.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	10 lectures per week, 15 practicals per week, 5 discussion classes per week, 5 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Group techniques in occupational therapy 700 (GRT 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	60.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	5 practicals per week, 6 discussion classes per week, 8 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### Module content

The group process. Group leadership. Problem clients and intervention strategies. Group activities with clients on different levels of motivation and action.

### Group techniques in occupational therapy 701 (GRT 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	60.00
<b>Contact time</b>	5 practicals per week, 8 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

#### Module content

The group process. Group leadership. Problem clients and intervention strategies. Group activities with clients on different levels of motivation and action.

## Community nursing science 110 (GVP 110)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

The community nursing context.

Community health, community-based nursing care and primary health care (PHC).

Processes in community nursing.

Assessment, diagnosis, intervention and evaluation. Health education and home healthcare nursing.

## Community nursing science 120 (GVP 120)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	25.00
<b>Prerequisites</b>	GVP 110
<b>Contact time</b>	1 other contact session per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Module content

Care of individuals, families and communities in the community nursing context. Comprehensive approach to the care of infants, children, women, men and those within unique settings or circumstances (e. g. the elderly, the homeless, marginalised communities, emergency situations and reproductive health). Common community health problems.

Communicable diseases and immunisation, HIV/Aids. Chronic physical and mental health problems. Social pathology in the community.

## Community nursing science 160 (GVP 160)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	50.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science

**Period of presentation** Year

### Module content

\*Attendance module only

Community nursing science practical work.

Compulsory practical work, which includes mother and child health, school health, occupational health and safety, geriatric care, the prevention and control of communicable diseases, rehabilitation services and community resources, environmental safety, physical and nursing assessment of patients, diagnosis and care and health education.

Family study and community profile.

## Community nursing science 250 (GVP 250)

**Qualification** Undergraduate

**Module credits** 18.00

**Prerequisites** GVP 110,GVP 120

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

The community nursing process.

Assessment, planning, implementation and evaluation within the community health nursing context.

Epidemiology and demography in community health nursing.

## Community nursing science 260 (GVP 260)

**Qualification** Undergraduate

**Module credits** 18.00

**Prerequisites** GVP 250

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Community involvement.

Community empowerment, development and participation. Quality assurance and change in the community context.

## Community nursing science 300 (GVP 300)

**Qualification** Undergraduate

<b>Module credits</b>	44.00
<b>Prerequisites</b>	GVP 250,GVP 260
<b>Contact time</b>	2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Module content

Application of relevant nursing theories.

Quality assurance. Nursing care planning and applicable nursing interventions in individual group, family and community contexts. Family care.

## Medical virology 700 (GVR 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Medical Virology</a>
<b>Prerequisites</b>	No prerequisites.

<b>Contact time</b>	1 practical per week, 16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### **Module content**

To provide students with knowledge on all the relevant legislation pertaining to occupational health in the general and mining industries.

### **Principles of health policy and management 710 (HCM 710)**

<b>Qualification</b>	UPOnline
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip in Public Health (UPOnline)</a>
<b>Prerequisites</b>	PHM 710
<b>Contact time</b>	Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

### Module content

The module provides introductory learning in Health Policy and Management, in a manner suitable for new managers or those who have not had formal management training, sufficient for you to undertake basic management tasks. Whatever field of public health a graduate enters they are likely to have to undertake some management responsibilities. This module aims to provide all graduates with the foundation of knowledge, skills, attitudes and values in health policy and management that they will need.

### Comparative health care systems 771 (HCM 771)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Year

### Health policy and systems 772 (HCM 772)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 4 other contact sessions per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

### Managing occupational health services 773 (HCM 773)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Occupational Medicine and Health](#)

**Prerequisites** EOH 770

**Contact time** 1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Global health governance and diplomacy 877 (HCM 877)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 40 lectures per year
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

The module uses an interdisciplinary approach and focuses on global health governance and global health diplomacy. The module will bring together various disciplines such as public health, governance, economics, foreign policy and international affairs. The module moves from local to global giving emphasis to issues that manage and shape the global environment for public health.

### Project management in health 770 (HCS 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	HME 770 or HME 772
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Project management in health 771 (HCS 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	HME 771 or HME 773
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Project management in health 870 (HCS 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Service modules</b>	Faculty of Veterinary Science
<b>Prerequisites</b>	HME 870
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Laboratory skills in public health 875 (HCS 875)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00

---

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	40 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Project management in health 876 (HCS 876)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### **Haematology 700 (HEM 700)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Haematology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Haematology
<b>Period of presentation</b>	Year

#### **Module content**

This module includes 30 research credits.

### **Haematology 800 (HEM 800)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Haematology</a>
<b>Prerequisites</b>	FSG 801, HEM 801, or Capita selecta from APY 871, CHP 871, GMB 871, GVR 871
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Haematology
<b>Period of presentation</b>	Year

### **Haematology 801 (HEM 801)**

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Clinical Pathology</a> <a href="#">MMed Haematology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Haematology
<b>Period of presentation</b>	Year

### Haematology (Capita selecta) 871 (HEM 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Medical Microbiology</a> <a href="#">MMed Medical Virology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Haematology
<b>Period of presentation</b>	Year

### Dissertation: Haematology 890 (HEM 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Haematology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Haematology
<b>Period of presentation</b>	Year

### Thesis: Haematology 990 (HEM 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Haematology</a> <a href="#">PhD Haematology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Haematology
<b>Period of presentation</b>	Year

## Public health, ethics and human rights 870 (HET 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 3 discussion classes per week, 3 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Semester 1

### Module content

This module enables students to understand ethical and human rights reasoning in health interventions and research, and provides competence in ethical review of public health research and interventions. The module covers ethical and human rights approaches and applies them to public health. Students deal with threats to ethics or human rights in public health action, and with some specific areas: resource allocation, gender and research, environmental justice, international collaborative research.

## Introduction to monitoring and evaluation for health managers 770 (HIN 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

This is an introductory module on Monitoring and Evaluation (M&E) designed to provide students with knowledge, attitudes and skills regarding M&E frameworks, health information and data systems and indicators, evaluation designs, development of M&E plans, data collection, processing and use and feedback of M&E results, within the context of health systems strengthening. At the end of the module the student should be able to define M&E concepts in the context of health systems strengthening; describe M&E frameworks; design an M&E plan; understand health information systems and data collection, processing and understand how M&E results can be used for health systems strengthening.

## Introduction to monitoring and evaluation for health managers 773 (HIN 773)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health

**Period of presentation** Year

## Introduction to research methodology 710 (HME 710)

**Qualification** UPOne

**Module credits** 10.00

**Programmes** [PGDip in Public Health \(UPOne\)](#)

**Prerequisites** PHM 710

**Contact time** Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

## Module content

To learn to “think epidemiologically”. The principles of epidemiology including applied epidemiology. The use of EpiData software for questionnaire design and data collection. Rates ratios and proportions; Basic study designs used in epidemiology (include cross-sectional, cohort, case-control, ecological, RCTs. Also sub-groups such as MCC, Historical cohort, Nested C-C). Validity, repeatability, confounding, effect modification; Sources and types of bias; sampling methods, probabilistic and non-probabilistic; stratified and cluster sampling; designing questionnaires and questionnaire items; calculating odds ratios, relative proportions relative risks and incidence rate ratios and the correct interpretation of these. ID epi (host/agent/environment model, R0, attack rates, outbreak investigations). Clinical epidemiology (sensitivity specificity predictive values). Operational research basic principles only.

## Epidemiology and Biostatistics I 711 (HME 711)

**Qualification** UPOne

**Module credits** 15.00

**Programmes** [PGDip in Public Health \(UPOne\)](#)

**Prerequisites** PHM 710

**Contact time** Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

## Module content

This module introduces learners to thinking “epidemiologically” and the principles of epidemiology including applied epidemiology. The module introduces software for questionnaire design and data collection. Basic principles such as rates ratios and proportions are explained. Key study designs used in epidemiology (include cross-sectional, cohort, case-control, ecological, randomised control trials and sub-groups are introduced. This module introduces learners to the development and application of statistical reasoning and methods addressing, analysing, and solving problems in public health-, health care-, and biomedical, clinical-, and population-based research.

## Epidemiology and Biostatistics II 712 (HME 712)

**Qualification** UPOne

**Module credits** 15.00

**Programmes** [PGDip in Public Health \(UPOnline\)](#)

**Prerequisites** HME 711 AND PHM 710

**Contact time** Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

## Module content

This module introduces learners to the application of epidemiology and the statistical procedures and analysis of the most commonly used statistical tests in the field of biostatistics.

## Epidemiology 1 751 (HME 751)

**Qualification** Postgraduate

**Module credits** 15.00

**Prerequisites** PHM 773

**Contact time** 2 weeks

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

To learn to “think epidemiologically”. The principles of epidemiology including applied epidemiology. The use of EpiData software for questionnaire design, data capturing and data cleaning. Rates ratios and proportions; Basic study designs used in epidemiology (include cross-sectional, cohort, case-control, ecological, randomised controlled trials. Also sub-groups such as Matched case control, Historical cohort, Nested Case Control). Concepts such as validity, repeatability, confounding, effect modification; Sources and types of bias; sampling methods, probabilistic and non-probabilistic; stratified and cluster sampling; designing questionnaires and questionnaire items; calculating odds ratios, relative proportions relative risks and incidence rate ratios and the correct interpretation of these. infectious disease epidemiology (host/agent/environment model, R0, attack rates, outbreak investigations). Clinical epidemiology (sensitivity specificity predictive values). Operational research principles.

## Epidemiology 2 752 (HME 752)

**Qualification** Postgraduate

**Module credits** 15.00

**Prerequisites** PHM 773, HME 751, BOS 752

**Contact time** 2 weeks

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

Intermediate epidemiological concepts and topics building upon learning that has taken place in the introductory epidemiology module; further study design (including different types of trials); Consort guidelines; Stratification and standardisation of rates; Good clinical practice principles; DAGs; Structural equation modelling; systematic reviews including meta-analysis techniques and methods; Principle components analysis; Propensity score matching; case-cross-over designs; polytomous regression; exact logistic regression; predictive models; repeated measurements (GEE and also fixed/random effects models).

## Part I Integrative assignment 753 (HME 753)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** PHM 773, HME 751, BOS 751

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

This assignment will task the students to integrate both epidemiology and biostatistics in their responses. It will take the nature of an interactive case-based seminar that demonstrates the interrelatedness of epidemiological methods and biostatistical methods. It builds on learning in the modules: Epidemiology 1 and Biostatistics 1.

## Part II integrative assignment 754 (HME 754)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	BOS 752, HME 752
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Like the Part 1 integrative assignment, this assignment will task the students to integrate further epidemiology and biostatistics in their responses. It will take the nature of a case-based seminar that demonstrates the interrelatedness of epidemiological methods and biostatistical methods. It will build on learning that has taken place in the modules: Biostatistics 2 and Epidemiology 2

## Epidemiology 1 770 (HME 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

The principles of epidemiology including applied epidemiology (eg infectious disease epidemiology, clinical epidemiology and operational research). The use of EpiData software for questionnaire design and data collection.

## Epidemiology 1 771 (HME 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

The principles of epidemiology including applied epidemiology (eg infectious disease epidemiology, clinical epidemiology and operational research). The use of EpiData software for questionnaire design and data collection.

## Primary epidemiology 772 (HME 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 1 seminar per week, 2 practicals per week, 8 lectures per week, 9 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Primary epidemiology 773 (HME 773)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BScHons Aerospace Medicine</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Primary epidemiology 774 (HME 774)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip Dentistry Community Dentistry</a> <a href="#">PGDip Occupational Medicine and Health</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Monitoring and evaluation of health programmes 860 (HME 860)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	4 practicals per week, Block 3: 8 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Health Sciences Deans Office
<b>Period of presentation</b>	Year

## Module content

Monitoring and evaluation principles; qualitative research; health data management; ethics; quality assurance; surveillance.

### Public health epidemiology 861 (HME 861)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Contact time** 4 practicals per week, Block 3: 8 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

Chronic disease epidemiology; infectious disease epidemiology; surveillance; environmental epidemiology.

### Epidemiology 1 870 (HME 870)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [MChD Community Dentistry](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

The principles of epidemiology including applied epidemiology (e.g. infectious disease epidemiology, clinical epidemiology and operational research). The use of EpiData software for questionnaire design and data collection.

### Monitoring and evaluation 873 (HME 873)

**Qualification** Postgraduate

**Module credits** 15.00

**Service modules** Faculty of Veterinary Science

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 2 lectures per week, 4 discussion classes per week, 4 seminars per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Epidemiology 1 874 (HME 874)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** MPH  
MSc Clinical Epidemiology  
MSc Epidemiology  
MSc Public Health

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

#### Module content

The principles of epidemiology including applied epidemiology (e.g. infectious disease epidemiology, clinical epidemiology and operational research). The use of EpiData software for questionnaire design and data collection.

### Monitoring and evaluation 875 (HME 875)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** MPH  
MSc Epidemiology  
MSc Public Health

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Scientific writing 771 (HMS 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 14 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

#### Module content

Scientific writing

### Scientific writing 772 (HMS 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Scientific writing 871 (HMS 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Contact time</b>	16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Health data management 872 (HMS 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	EPM 874 and BOS 870
<b>Contact time</b>	40 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Scientific writing 873 (HMS 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00
<b>Programmes</b>	MMed Occupational Medicine MPH MSc Aerospace Medicine MSc Clinical Epidemiology MSc Environmental Health MSc Epidemiology MSc Public Health
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Health data management 874 (HMS 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	MPH
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Human nutrition 210 (HNT 210)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	BDietetics BSc Nutrition
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	2nd-year status
<b>Contact time</b>	1 discussion class per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 1

### Module content

Application of scientific principles in human nutrition.  
Standards, guidelines and food composition tables.

## Human nutrition 220 (HNT 220)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	BDietetics BSc Nutrition
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	FLG 211 GS FLG 212 GS BCM 253 BCM 254 BCM 255 BCM 256 VDG 250 HNT 210
<b>Contact time</b>	1 discussion class per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 2

## Module content

Human nutrition in the life cycle: Nutritional screening, nutritional needs, nutrition problems and prevention thereof, growth monitoring and meal/menu planning.

### Advanced human nutrition 411 (HNT 411)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [BDietetics](#)  
[BSc Nutrition](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** 4th-year status

**Contact time** 1 discussion class per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

## Module content

Seminars and case studies (theory and practical application): Eating behaviour, eating disorders, nutrient/nutrition supplementation, sports nutrition, vegetarianism, food safety, nutrition of the disabled, prevention of non-communicable disease of lifestyle; nutrition and immunity; nutrition and genetics.

### Applied nutrition in exercise and sport 702 (HNT 702)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BScHons Sports Science](#)

**Contact time** 1 hour per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

## Module content

Nutrition plays an important role to achieve optimal health and performance of athletes. In this module theoretical principals of sport nutrition are illustrated through practical application in sport specific scenarios. Sport nutrition-related phenomena are discussed, e.g.iron deficiency anaemia, female athlete triad, nutritional matters of gastro-intestinal distress in athletes, and nutritional approaches to changing anthropometric indicators.

### Health system and transformation policy (political analysis, strategy and finance options) 770 (HPF 770)

**Qualification** Postgraduate

<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	50 hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Module content

Reform in SA – What is the problem? To include variations among provinces and districts, measurement issues, etc. Financing NHI: Revenue sources (general taxes, payroll taxes, etc.) the role of private insurance, fiscal space and the public finance situation in SA, covering the informal sector, etc. Pay for performance as a policy tool: practical difficulties and the critical role for management in implementation. Overview of payment: Options for paying doctors and hospitals, the role of contracting, likely consequences and implementation issues. Politics and the reform process: Stakeholder analysis and mobilising support for reform. Financing NHI: Revenue sources (general taxes, payroll taxes, etc.) the role of private insurance, fiscal space and the public finance situation in S.A., covering the informal sector, etc. Organising NHI: national vs. provincial, public vs. quasi-public, roles for private administrators, choices about fiscal autonomy, relationship to various ministries. Government and market failures and the role of the public and private sectors – including corruption issues in both areas. Benefit package and targeting: Introduction to the ‘step pyramid’. What should be covered and for whom? What role for co-payments as incentive and revenue source. The developmental transformation of the healthcare system is informed by the political context and the constitutional imperatives for access to care which are the main function of the health system. This module will provide the participant with analytical tools to interpret the political economy of health and to develop strategies which can respond to the health needs on the ground in a practical manner so that the impact of the health policy is understood and how it informs the type of executive leader required to deliver the results of effective and efficient healthcare delivery. Participants will be trained in costing the pooling, provisioning and procurement of health services as District or Hospital Managers to allow for the effective and efficient running of the services over which they have authority. Training will focus on their Units becoming a Cost Centre for the management of the finances allocated by the Provincial Health Authority as well as capacity building in the event that delegations for autonomy is devolved of their level of employment. The importance of performance management will be the focus in relation to optimal budget performance, allocation within the institution as well as meeting performance targets and outcome measures.

### Health systems re-engineering including public sector centralisation and decentralisation 770 (HSR 770)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 50 hours per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

#### Module content

(District) Health systems (and hospital) re-engineering including public sector centralisation and decentralisation.

The re-engineering of the health system is one of the key pillars of the SAELPH programme with focus on improvement of services in the DHS. The new thrust of the national DOH with PHC as a key focus requires a new type of health leader who can understand the central role of PHC in a future equitable and efficient healthcare system. This module will assist to reshape the thinking of public health leaders towards building sound foundation strategies for the delivery of essential healthcare services primarily at the DHS level and its impact on the overall healthcare system. Development of a decentralisation case – a South African example focused on a district as the ‘man in the middle’ of the decentralisation process including the need for information, problems of supervision. Understand the international experience in re-engineering public sector providers, with special emphasis on PHC and how they will function in a future NHI.

### Health systems re-engineering including public sector centralisation and decentralisation 771 (HSR 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** PGDip Health Systems Management Executive Leadership

**Period of presentation** Year

### **Integrated dentistry 170 (IDE 170)**

**Qualification** Undergraduate

**Module credits** 28.00

**Prerequisites** No prerequisites.

<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Semester 2

### Module content

Introduction to clinical dentistry:

- Infection control training
- Occupational health and safety training
- Code of conduct, professionalism and ethical behaviour
- Academic skills training (library, goal-orientation, time management, etc)
- Basic dental assisting
- Basic tooth anatomy and terminology
- Dental terminology
- Psychomotor skills training (model casting, carving of teeth out of plaster, wax work)
- Introduction to the disciplines and specialities
- Third language training
- Clinic visits throughout the year
- Visits to a dental practice

### Integrated dentistry 180 (IDE 180)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Semester 2

## Integrated healthcare leadership 112 (IHL 112)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

Introduction to integrated healthcare leadership with the focus on the introduction to the nursing profession, history of nursing, introduction to ethical legal practice and an introduction to concepts of quality nursing.

## Integrated healthcare leadership 120 (IHL 120)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	<a href="#">BA Audiology</a> <a href="#">BA Speech-Language Pathology</a> <a href="#">BDietetics</a> <a href="#">BNurs</a> <a href="#">BOccTher</a> <a href="#">BPhysio</a> <a href="#">BRad in Diagnostics</a>
<b>Service modules</b>	Faculty of Humanities
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science

**Period of presentation** Semester 2

### Module content

Leadership and multidisciplinary team work. Healthcare systems and legislation. Determinants of health. Introduction to healthcare models (e.g. community-based care, family-centred care, etc.). Professionalism, Ethical principles. Management of diversity. NB: Only for School of Healthcare Sciences and Department of Speech-Language Pathology and Audiology students.

## Integrated healthcare leadership 210 (IHL 210)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BA Audiology](#)  
[BA Speech-Language Pathology](#)  
[BDietetics](#)  
[BNurs](#)  
[BOccTher](#)  
[BPhysio](#)  
[BRad in Diagnostics](#)

**Service modules** Faculty of Humanities

**Prerequisites** IHL 112/2/3, IHL 120 (For Audiology and Speech-Language Pathology students only IHL 120 is applicable)

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

Principles of project management. Communication principles. Leadership. Health promotion and education, advocacy and literacy. Counselling for health behaviour change. NB: Only for School of Healthcare Sciences and Speech- Language Pathology and Audiology students.

## Integrated healthcare leadership 222 (IHL 222)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BNurs](#)

**Prerequisites** IHL 112, IHL 120

**Contact time** 1 lecture per week, 11 practical hours per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

## Module content

Aspects of the nursing profession, including an introduction to integrative healthcare principles, an introduction to nursing management, the principles of quality improvement, and guided engagement in professional activities (national/international).

## Integrated healthcare leadership 310 (IHL 310)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** BA Audiology  
BA Speech-Language Pathology  
BDietetics  
BNurs  
BOccTher  
BPhysio  
BRad in Diagnostics

**Service modules** Faculty of Humanities

**Prerequisites** IHL 111/2/3, IHL 120, IHL 210, IHL 221/2/3/4 (For Audiology and Speech-Language Pathology students only IHL 210 is applicable)

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Module content

Community needs assessment. Leadership in community development. Planning and implementation of collaborative community-based interventions. Application of principles of monitoring and evaluation. NB: Only for School of Healthcare Sciences and Department of Speech - Language Pathology and Audiology students.

## Integrated healthcare leadership 322 (IHL 322)

**Qualification** Undergraduate

**Module credits** 4.00

**Programmes** BNurs

**Prerequisites** IHL 210, IHL 222

**Contact time** 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

## Module content

Introduction to nursing management with reference to mentoring and coaching of junior students in professional activities, ethical-legal framework governing and disciplinary hearings at SANC, application of knowledge of integrative healthcare, monitoring and evaluation of the quality improvement process, and principles of personnel management.

### Integrated healthcare leadership 324 (IHL 324)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BPhysio](#)

**Prerequisites** IHL 110, IHL 210, IHL 310

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

## Module content

End-of-life care; preventing and managing sexual harassment; giving and receiving feedback; self and time-management; reflexive caring; practice; the International Classification of Functioning, Disability and Health (ICF); working with mid-level workers; leadership management and evidence-based practice; ethics in physiotherapy practice; medico-legal documentation.

### Integrated healthcare leadership 412 (IHL 412)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [BNurs](#)

**Prerequisites** IHL 310, IHL 322

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Module content

Aspects of nursing management related to development of ambassador skills in professional interactive activities (local/national/international), ethical-legal practice for special groups and addressing ethical challenges in healthcare, risk and asset management, incorporation of integrative healthcare in practice and strategic and systematic management of a healthcare unit.

### Interprofessional health management 413 (IHL 413)

**Qualification** Undergraduate

<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	ANP 210, RPD 380, SEP110/ZUL110, AKU 303, AKU 381, AKU 382, ART 381, ART 382, ELH 121, ELH 122, AIM 101
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

Principles for the management of an occupational therapy department in the public sector. Principles to set up and management of a private practice. Management of support staff in occupational therapy. Marketing strategies in occupational therapy. Professional ethics, values and accountability. Code of ethics for occupational therapists

## Integrated healthcare leadership 414 (IHL 414)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	<a href="#">BPhysio</a>
<b>Prerequisites</b>	IHL 110, IHL 210, IHL 310, IHL 324
<b>Contact time</b>	2 lectures per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

Ethical management of community physiotherapy programmes, including physiotherapy aspects of community-orientated primary health care. Continuing professional development, private practice management and labour law.

## Integrated healthcare leadership 422 (IHL 422)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	IHL 310, IHL 322
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science

**Period of presentation** Semester 2

### Module content

Professional development with the focus on engagement in professional activities; professional leadership, management and evaluation of best practice; national/international guidelines/strategies; policy development and principles of clinical governance; and evaluation of health facilities for compliance with SANC requirements.

## Integrated healthcare leadership 424 (IHL 424)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BPhysio](#)

**Prerequisites** IHL 110, IHL 210, IHL 310, IHL 324

**Contact time** 2 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Ethical management of community physiotherapy programmes, including physiotherapy aspects of community-based primary care. Sustained professional development, private practice management and labour law.

## Interpersonal communication 700 (IKX 700)

**Qualification** Postgraduate

**Module credits** 60.00

**Prerequisites** No prerequisites.

**Contact time** 4 discussion classes per week, 4 practicals per week, 6 seminars per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

The interpersonal process. Factors influencing communication. Intervention strategies. Pathology factors which influence the communication process.

## Interpersonal communication 701 (IKX 701)

**Qualification** Postgraduate

**Module credits** 60.00

**Contact time** 4 discussion classes per week, 4 practicals per week, 6 seminars per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

**Module content**

The interpersonal process. Factors influencing communication. Intervention strategies. Pathology factors which influence the communication process.

**Instrumentation 700 (INX 700)**

**Qualification** Postgraduate

**Module credits** 25.00

**Programmes** [BRadHons Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

**Module content**

PET/CT. PET/MRI. Hybrid image reconstruction technology.

**Life orientation 111 (JLO 111)**

**Qualification** Undergraduate

**Module credits** 12.00

**Service modules** Faculty of Health Sciences

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Early Childhood Education

**Period of presentation** Semester 1

**Module content**

To empower the student teacher to achieve and extend his/her personal potential by addressing changes in youth behaviour. The module focuses on characteristics that have been identified in research to bring about positive behaviour change. Students are guided to develop knowledge and skills with regard to physical development and movement as one of the topics of the subject Life Orientation. The module also focuses on certain aspects of sport psychology as well as physiological dimensions needed to assess the movement skills of learners. The practical component focuses on learning and teaching of sport and human movement development skills for the school sport teaching and training environment. This practical component forms the foundation for the following study years.

**Life orientation 121 (JLO 121)**

---

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Service modules</b>	Faculty of Health Sciences
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Early Childhood Education
<b>Period of presentation</b>	Semester 2

### Module content

To empower student teachers to achieve and extend their personal potential and to guide them to develop knowledge and skills with regard to physical and psychological development as two of the topics of the subject Life Orientation. The topic of this module is also Personal Development but focuses on the interpersonal and intrapersonal skills of the student. Topics covered include: developmental stages, self-actualisation, self-concept, conflict management and personal management. The module also focuses on human anatomy and basic physiology as background to developing human movement. The practical component focuses on learning and teaching of sport and human movement development skills for the school sport teaching and training environment. It forms the foundation for the following study years where different disciplines are learnt. On attainment of the learning outcomes the student should be able to demonstrate his/her knowledge and understanding of the theory to be applied in the practical classes.

## Nuclear medicine 700 (KDE 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	30.00
<b>Programmes</b>	<a href="#">BRadHons Nuclear Medicine</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

Advanced imaging and processing techniques. Procedures involving the use of emerging technologies and radiopharmaceuticals. Paediatric nuclear medicine diagnostic imaging. Management and administration of therapeutic radiopharmaceuticals. Radiation safety aspects.

Comprehensive quality assurance and unit management. Establishing nuclear medicine services. Advanced concepts, current quality management theory, accreditation, and audit documentation. Basic principles and practices necessary for effective supervision and leadership in a healthcare environment. Principles and practices in human resource management in healthcare settings.

## Nuclear medicine 701 (KDE 701)

<b>Qualification</b>	Postgraduate
----------------------	--------------

---

<b>Module credits</b>	25.00
<b>Programmes</b>	<a href="#">BRadHons Nuclear Medicine</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 2 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

Module consists of two sections to integrate with theoretical knowledge gained in TKG 710 (Theory of nuclear medicine). Clinical practice to operationalise and integrate the fundamental theoretical components. Choice of examination, patient positioning, field of view, orientation, routine views, static and dynamic imaging, SPECT imaging, modified views, acquisition and processing of data, correct labelling of data, patient care. Quality control. Pattern recognition and interpretation of procedures. Problems and pitfalls. Hot laboratory rules, regulations, skills, calculations. Cold laboratory equipment and procedures. Application of radiation safety. Advanced imaging and processing techniques. Procedures involving the use of emerging technologies and radiopharmaceuticals. Paediatric nuclear medicine diagnostic imaging. Management and administration of therapeutic radiopharmaceuticals. Radiation safety aspects. Comprehensive quality assurance and unit management. Establishing nuclear medicine services. Advanced concepts, current quality management theory, accreditation, and audit documentation. Basic principles and practices necessary for effective supervision and leadership in a healthcare environment. Principles and practices in human resource management in healthcare settings.

### Nuclear medicine 801 (KDE 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Nuclear Medicine</a>
<b>Prerequisites</b>	ANA 809, FSG 801, KDE 802, PAG 801, RCF 800
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nuclear Medicine
<b>Period of presentation</b>	Year

### Nuclear physics 802 (KDE 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Nuclear Medicine</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nuclear Medicine

**Period of presentation** Year

### Dissertation: Nuclear medicine 890 (KDE 890)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MRad Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Clinical epidemiology 800 (KEM 800)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

#### Module content

Students will be required to satisfactorily complete an individualised series of modules, compiled in conjunction with consultants in the department. The list of available modules will differ from year to year, depending upon the demand for the modules in question. The list of available modules will also be reviewed from time to time, in accordance with the changes in the field of public health. A list of the modules offered at present is obtainable from the departmental secretary. (Tel 012 339 8608 or 339 8618)

### Mini-dissertation: Clinical epidemiology 890 (KEM 890)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [MSc Clinical Epidemiology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Paediatrics 800 (KGE 800)

**Qualification** Postgraduate

**Module credits** 300.00

<b>Programmes</b>	<a href="#">MMed Paediatrics</a>
<b>Prerequisites</b>	ANA 805, FSG 801, PAG 802
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Paediatrics
<b>Period of presentation</b>	Year

### Paediatrics 802 (KGE 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Paediatrics
<b>Period of presentation</b>	Year

### Thesis: Paediatrics 990 (KGE 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Paediatrics</a> <a href="#">PhD Paediatrics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Paediatrics
<b>Period of presentation</b>	Year

### Maxillo-facial and oral surgery 701 (KGM 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Maxillo-facial and oral surgery 800 (KGM 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Programmes</b>	<a href="#">MChD Orthodontics</a>

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Maxillo-facial and oral surgery 802 (KGM 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	700.00
<b>Programmes</b>	<a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Maxillo-facial and oral surgery 803 (KGM 803)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Programmes</b>	<a href="#">MChD Prosthodontics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Dissertation: Maxillo-facial and oral surgery 890 (KGM 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	240.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Clinical training 891 (KGM 891)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">MSc Dentistry Oral Surgery (Coursework)</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Mini-dissertation: Oral Surgery 892 (KGM 892)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	60.00
<b>Programmes</b>	<a href="#">MSc Dentistry Oral Surgery (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Dissertation: Maxillofacial and Oral surgery 893 (KGM 893)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Dent)</a> <a href="#">MChD Maxillofacial and Oral Surgery (endorsement ChirMaxFac-Med)</a>

<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Essay: Maxillo-facial and oral surgery 895 (KGM 895)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Thesis: Maxillo-facial and oral surgery 990 (KGM 990)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Dentistry</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Maxillo-facial rontgenology 801 (KGR 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Quantitative health sciences 800 (KGW 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	1.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Mini-dissertation: Quantitative health legislation 890 (KGW 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Medical criminalistics 700 (KRT 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Medical Criminalistics</a>
<b>Prerequisites</b>	No prerequisites.

**Language of tuition** Module is presented in English

**Department** Forensic Medicine

**Period of presentation** Year

### Module content

This module includes 30 research credits.

## Dissertation: Medical criminalistics 890 (KRT 890)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MSc Medical Criminalistics](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Forensic Medicine

**Period of presentation** Year

## Thesis: Medical criminalistics 990 (KRT 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [PhD Medical criminalistics](#)

**Language of tuition** Module is presented in English

**Department** Forensic Medicine

**Period of presentation** Year

## Clinical nursing science 110 (KVG 110)

**Qualification** Undergraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Module content

Statutory framework and scientific basis for clinical nursing practice.

Clinical nursing practice: legal aspects, statutory and professional control. Homeostasis, basic sciences and critical thinking exercises in clinical nursing. Problem-driven clinical nursing practice.

Problem-solving: characteristics, advantages and the problem-solving process. Problem-solving and the nursing process. Aspects of systems-oriented nursing care: assessment, diagnosis, planning, implementing and evaluation.

## Clinical nursing science 120 (KVG 120)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	KVG 110
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

Clinical reasoning in nursing practice.

Clinical judgement and clinical decision-making. Contextual and task features of clinical decision-making.

Strategies to improve clinical reasoning. Clinical reasoning in the assessment of disease processes and in the evaluation of treatment modalities for disease processes in nursing practice.

Reflective clinical nursing practice.

Reflective nursing practice: principles and application. Delivery of problem-driven, problem-based and holistic nursing care within acute care settings.

## Clinical nursing science 250 (KVG 250)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	33.00
<b>Prerequisites</b>	KVG 110,KVG 120
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

## Module content

Theory of specialised nursing practice.

In one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing science, child nursing science or operating theatre nursing science. Contemporary problems and practice issues.

## Clinical nursing science 260 (KVG 260)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	34.00
<b>Prerequisites</b>	KVG 250
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Module content

Theory of specialised nursing practice.

In one of the following clinical nursing speciality areas: critical care, emergency nursing, advanced midwifery, neonatal nursing science, child nursing science or operating theatre nursing science. Contemporary problems and practice issues.

## Clinical nursing science 300 (KVG 300)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	KVG 250,KVG 260
<b>Contact time</b>	2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Year

### Module content

Role and functions of clinical nursing specialists in their area of specialisation. Contemporary trends, issues and dilemmas in clinical nursing practice.

## Clinical skills in hand therapy 702 (KVH 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">PGDip Hand Therapy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	12 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

## Module content

Study and application of:

- evaluation methods and instruments for hand and upper limb injuries
- current techniques in hand therapy.

## Longitudinal clinic attachment programme 180 (LCP 180)

**Qualification** Undergraduate

**Module credits** 0.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Year

## Module content

The longitudinal clinic attachment programme will link students to one of about 40 clinics in Pretoria and its surrounds. Each student is allocated to a specific clinic in Tshwane, Hammanskraal or Metsweding for a four-year period - medical students from the middle of the first year to the middle of the fifth year, and dentistry students from the middle of the first year to the end of the second year. Students will visit these clinics during the course of each block and special activity as negotiated with each block and rotation chair. The activities they do at the clinic will be the practical application of the theory they acquired in class with the added benefit of the experience of the context of the patient and the healthcare system.

## Longitudinal clinic attachment programme 280 (LCP 280)

**Qualification** Undergraduate

**Module credits** 0.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Year

## Allergology for medical subspecialities Part 1 801 (LER 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Programmes</b>	<a href="#">MPhil Allergology (Coursework)</a>
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

## Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za)

## Executive leadership in health (including responsible leadership) 770 (LHE 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	50 hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Module content

The application of the principles of Executive Leadership in the health sector will be examined with focus on several modalities of leadership including meta-leadership with a focus on examining why its application by health leaders are met with so much difficulty. The challenges which prevail in the pilot districts for the National Health Insurance will be analysed. Participants will be expected to do precourse reading in preparation for the module as well as a postmodule assignment which may include the writing up and development of a strategic plan with a focus on executive leadership principles. Application of responsible leadership strategies in to the public health sector. The focus on contemporary views of responsible leadership in South Africa and measures to redress the shortcomings in taking responsibility and being accountable for your actions. What is the vision for responsible leadership on the horizon in the next 5 to 15 years and how can a health manager reposition his/her thinking to meet the demands and the role they are to play in the new NHI funded system in the position they presently occupy. What does it mean to lead in a responsible manner be it at district, provincial or national level. This will include the call for courageous scholarship and strategies to lead collectively in a responsible manner.

## Laboratory management 700 (LMX 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	15 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Chemical Pathology
<b>Period of presentation</b>	Semester 2

## Aerospace medicine 700 (LRG 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	75.00
<b>Programmes</b>	<a href="#">BScHons Aerospace Medicine</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	8 hours for 5 days
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

The purpose of this module is to teach the fundamentals of aerospace medicine. Topics addressed in this module include:

Aviation Physiology (The Aviation working environment, cognition, decision making, communication, sleep and fatigue, physics of the atmosphere, hypobarism, hypoxia, vision, spatial disorientation, acceleration, radiation, noise, vibration hyper/hypothermia.)

Clinical Aviation Medicine (Incapacitation during flight, aging, cardiology, neurology, ophthalmology, ENT, pulmonology, psychiatry, metabolic/endocrine, malignancy, digestive system, haematology, urinary, renal, gynaecological/obstetric, musculoskeletal, infective, medication.)

Aviation medical regulations (Regulations of the International Civil Aviation Organisation and the South African Civil Aviation Authority.)

## Research report: Aerospace medicine 701 (LRG 701)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [BScHons Aerospace Medicine](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Aerospace medicine 800 (LRG 800)

**Qualification** Postgraduate

**Module credits** 1.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Division of Aerospace Medicine

**Period of presentation** Year

## Aerospace medicine 801 (LRG 801)

**Qualification** Postgraduate

**Module credits** 25.00

**Language of tuition** Module is presented in English

**Department** Division of Aerospace Medicine

**Period of presentation** Year

## Module content

The purpose of this module is to teach the fundamental aspects of aerospace medicine

Topics addressed in this module include:

The atmosphere of the earth and other planets in the solar system; cardiovascular and respiratory physiology; hypoxia and hyperventilation; oxygen equipment, pressure clothing and spacesuits; spacecraft and aircraft cabin pressure, pressure change and its biological effects; subatmospheric decompression sickness; effects of acceleration; head injury and protection; thermal stress; noise and vibration; physiology of sleep and wakefulness; optics and vision; spatial orientation in flight; cosmic radiation; physiological effects of microgravity.

## Aerospace medicine 802 (LRG 802)

**Qualification** Postgraduate

**Module credits** 20.00

**Language of tuition** Module is presented in English

**Department** Division of Aerospace Medicine

**Period of presentation** Year

## Module content

The purpose of this module is to teach operational aspects of the aerospace medicine.

Topics addressed in this module include:

Astronaut and aircrew selection, training and management; air traffic control – aeromedical aspects and human factors; errors and accidents; the flight deck and cockpit; the International Space Station; restraint systems and escape from aircraft and spacecraft; in-flight communication; passenger safety in transport aircraft; patient, human remains and medical sample transport by air – logistic considerations; aeromedical evacuation and transfer of the critical patient; aircraft accident investigations; identification of aircraft accident victims; aviation pathology and toxicology; disinfection, disinsection, decontamination and aircraft hygiene; hygiene in space; air support to naval operations; visits to airports and aerospace industry; aviation medical regulations (of both the International Civil Aviation Organisation and the South African Civil Aviation Authority.)

## Aerospace medicine 803 (LRG 803)

**Qualification** Postgraduate

**Module credits** 25.00

**Language of tuition** Module is presented in English

**Department** Division of Aerospace Medicine

**Period of presentation** Year

## Module content

The purpose of this module is to teach an understanding of the clinical aspects of aerospace medicine.

Topics addressed in this module include:

Motion sickness; medical aspects of long term low- and microgravity; cardiovascular disease; hypertension; respiratory disease; gastrointestinal disease; metabolic and endocrine disorders; renal disease; haematology; malignant disease; neurological disease; ophthalmology; otorhinolaryngology; aviation psychiatry; orthopaedics; clinical management of decompression illness; medication and aircrew; aviator fatigue and relevant fatigue countermeasures; the ageing pilot; commercial passenger fitness to fly; international travel and diseases that can be spread via aircraft passengers.

## Dissertation: Aerospace medicine 890 (LRG 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Aerospace Medicine</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Aerospace medicine 990 (LRG 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Division of Aerospace Medicine
<b>Period of presentation</b>	Year

## Laboratory management 771 (LRM 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	12 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Chemical Pathology
<b>Period of presentation</b>	Year

## Microbiology 705 (MBG 705)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Microbiology 800 (MBG 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Clinical Pathology</a>
<b>Prerequisites</b>	APA 800
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Microbiology
<b>Period of presentation</b>	Year

### Microbiology 802 (MBG 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Microbiology
<b>Period of presentation</b>	Year

### Sports psychology 210 (MBK 210)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Quarter 1 and Quarter 2

## Module content

\*Closed – requires departmental selection Sports psychology on second-year level is a general introductory module that orientates the student in sports psychology as a science. The module focuses on psychological principles and human behaviour in an exercise and sports context. This includes the study of sports and exercise behaviour, the psychology of coaching and exercise psychology. Sports psychology in this module focuses on the application of psychology in practical sports settings. The student is orientated in psychological sports questionnaires that determine motivation, activation levels as well as sports psychological techniques. The psychology of injuries and burnout form part of this module.

## Sports psychology 212 (MBK 212)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Sport and Leisure Studies
<b>Period of presentation</b>	Semester 1

## Module content

\*Closed – requires departmental selection

In this module students will form an understanding of the multi-dimensional nature of sport psychology, with specific reference to Performance Termination (PT), Performance Dysfunction (PDy), Performance Impairment (PI) and Performance Development (PD) as portrayed in the Multi-Level Classification System for Sport Psychology (MCS-SP). Through studying the MCS-SP students will understand the role of sport psychologists in the sport context, how sport psychology focuses on the psychological well-being of athletes within sport organizations, as well as the psychological aspects that contribute to excellence in sport performance.

## Biokinetics clinical practice II 718 (MBK 718)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">BScHons Biokinetics</a>
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Year

## Module content

This module serves as the practical platform for students to acquire exposure to an experience in health promotion, the maintenance of physical abilities and final phase rehabilitation. This will be achieved by means of the practical application of scientifically based assessment and physical activity programme prescription for healthy and special populations. This module requires the student to meet the expected requirements stipulated by the Health Professions Council of South Africa and have accumulated 65 hours of Sport First aid.

### Clinical exercise physiology 719 (MBK 719)

**Qualification** Postgraduate

**Module credits** 25.00

**Programmes** [BScHons Biokinetics](#)

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Year

#### Module content

The module examines exercise physiology from a biokinetics perspective and includes the normal and pathophysiology of bio-energetics, adaptation of the body systems, environmental influences, ergogenic aids and special considerations such as aging, gender, genetics and fatigue.

(1 hour contact time per week with work assignments for the following week).

### Biokinetics 721 (MBK 721)

**Qualification** Postgraduate

**Module credits** 25.00

**Programmes** [BScHons Biokinetics](#)

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Year

#### Module content

This module serves as the theoretical platform for students to acquire the knowledge and understanding of the role of the biokineticist in health promotion, the maintenance of physical abilities and final phase rehabilitation. This will be achieved by means of acquiring the knowledge and understanding of scientifically based assessment and physical activity programme prescription in healthy and special populations.

### Sports physiology 722 (MBK 722)

**Qualification** Postgraduate

**Module credits** 25.00

**Programmes** [BScHons Sports Science](#)

---

<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Year

#### Module content

The module examines exercise physiology as applied in a sport science context and includes the normal and performance enhancement physiology of bio-energetics, adaptation of the body systems, environmental influences, ergogenic aids and special considerations such as aging, gender, genetics and fatigue.

(1 hour contact time per week with work assignments for the following week).

### Sports science 723 (MBK 723)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	25.00
<b>Programmes</b>	<a href="#">BScHons Sports Science</a>
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Year

#### Module content

This subject promotes the detailed investigation of the theoretical basis of exercise testing for sport-related physical fitness and exercise prescription for improved sport performance, and includes a practical review of measurement and evaluation, exercise testing, exercise programme design and strength and conditioning skills and knowledge. The student will be expected to complete 20 hours of Sport First aid.

### Biomechanics III 724 (MBK 724)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	25.00
<b>Programmes</b>	<a href="#">BScHons Sports Science</a>
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

## Module content

Advanced biomechanical methods are introduced, including three-dimensional kinematics, estimation of joint loading, and electromyography. These techniques will be applied in the analysis of sports techniques as they relate to performance enhancement and injury prevention.

## Human biology 120 (MBL 120)

**Qualification** Undergraduate

**Module credits** 9.00

**Prerequisites** MLB 111

**Contact time** 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 2

## Medical biostatistics 700 (MBS 700)

**Qualification** Postgraduate

**Module credits** 20.00

### Programmes

BScHons Anatomy  
BScHons Cell Biology  
BScHons Chemical Pathology  
BScHons Comparative Anatomy  
BScHons Developmental Biology  
BScHons Haematology  
BScHons Human Cell Biology  
BScHons Human Genetics  
BScHons Human Histology  
BScHons Human Physiology  
BScHons Macro-anatomy  
BScHons Medical Criminalistics  
BScHons Medical Immunology  
BScHons Medical Microbiology  
BScHons Medical Nuclear Science  
BScHons Medical Oncology  
BScHons Medical Physics  
BScHons Medical Virology  
BScHons Neuro-anatomy  
BScHons Pharmacology  
BScHons Physical Anthropology  
BScHons Radiation Oncology  
BScHons Reproductive Biology  
BScHons Reproductive Biology Andrology

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Statistics

**Period of presentation** Semester 1

### Medical biostatistics 800 (MBS 800)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes** [MPharmMed](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Statistics

**Period of presentation** Semester 1

### Oral surgery 700 (MCH 700)

**Qualification** Postgraduate

**Module credits** 100.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 5 practical per week

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### Oral surgery 702 (MCH 702)

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [PGDip Dentistry Oral Surgery](#)

**Contact time** 1 discussion class per week, 5 practical per week

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### Oral surgery 800 (MCH 800)

**Qualification** Postgraduate

**Module credits** 60.00

**Programmes** [MSc Dentistry Oral Surgery \(Coursework\)](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### Dissertation: Oral surgery 890 (MCH 890)

**Qualification** Postgraduate

**Module credits** 240.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### Essay: Oral surgery 895 (MCH 895)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### Oral biology 171 (MDB 171)

**Qualification** Undergraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

#### Module content

This module will provide the oral hygiene student with a broad basic knowledge on the development, normal macroscopic and microscopic structure and functions of the oral cavity, teeth and related structures. The module content will serve as pre-knowledge for clinical subjects and oral pathology in the oral hygiene programme.

### Oral biology 172 (MDB 172)

**Qualification** Undergraduate

**Module credits** 19.00

---

<b>Programmes</b>	BOH
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

#### Module content

This module will provide the oral hygiene student with a broad basic knowledge on the development, normal macroscopic and microscopic structure and functions of the oral cavity, teeth and related structures. The module content will serve as pre-knowledge for clinical subjects and oral pathology in the oral hygiene programme.

### Oral biology 270 (MDB 270)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	11.00
<b>Prerequisites</b>	PHY 131, MGW 112, MLB 111, MTL 180, CMY 151, FIL 155, GNK 188, IDE 170, POH 170, SEP 110/ELH 111,112, AIM 101
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

#### Module content

This module is the study of the development, macroscopic and microscopic structure and function of tissue of the mouth and related structures with emphasis on the application in clinical dentistry. This module also includes the study of relevant molecular biology.

### Oral biology 280 (MDB 280)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	24.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	PHY 131, MGW 112, MLB 111, MTL 180, CMY 151, FIL 155, GNK 188, IDE 170, POH 170, SEP 110/ELH 111,112, AIM 101
<b>Contact time</b>	2 lectures per week

<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

---

## Module content

This module is the study of the development, macroscopic and microscopic structure and function of tissue of the mouth and related structures with emphasis on the application in clinical dentistry. This module also includes the study of relevant molecular biology.

## Applied oral biology 700 (MDB 700)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes**

- PGDip Dentistry Aesthetic Dentistry
- PGDip Dentistry Community Dentistry
- PGDip Dentistry Dental Materials
- PGDip Dentistry Endodontics
- PGDip Dentistry Forensic Odontology
- PGDip Dentistry Implantology
- PGDip Dentistry Oral Medicine
- PGDip Dentistry Oral Microbiology
- PGDip Dentistry Oral Pathology
- PGDip Dentistry Oral Surgery
- PGDip Dentistry Orthodontics
- PGDip Dentistry Pedodontics
- PGDip Dentistry Periodontology
- PGDip Dentistry Practice Management
- PGDip Dentistry Preventive Dentistry
- PGDip Dentistry Prosthetics
- PGDip Dentistry Prosthodontics
- PGDip Dentistry Radiography
- PGDip Dentistry Restorative Dentistry

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Semester 1

## Oral biology 800 (MDB 800)

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes**

- MChD Periodontics and Oral Medicine
- MChD Prosthodontics

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

## Oral biology 801 (MDB 801)

**Qualification** Postgraduate

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Medical oncology 700 (MDN 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Medical Oncology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Oncology
<b>Period of presentation</b>	Year

#### Module content

This module includes 30 research credits.

### Medical oncology 801 (MDN 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Medical Oncology</a>
<b>Prerequisites</b>	ANA 800, FSG 801, FAR 806, PAG 808
<b>Contact time</b>	1 lecture per week, 1 seminar per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Oncology
<b>Period of presentation</b>	Year

### Dissertation: Medical oncology 890 (MDN 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Medical Oncology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Oncology

**Period of presentation** Year

### Thesis: Medical oncology 990 (MDN 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Medical Oncology](#)  
[PhD Medical Oncology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Medical Oncology

**Period of presentation** Year

### Midwifery: Theory 310 (MDW 310)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BNurs](#)

**Prerequisites** NUR 210, NUR 220, NPE 210, NPE 220

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

#### Module content

Theory of midwifery on pre-conception care, health education and genetic counselling, normal pregnancy, foetal development and common conditions in pregnancy.

### Midwifery: Practical 311 (MDW 311)

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** [BNurs](#)

**Prerequisites** NUR 210, NUR 220, NPE 210, NPE 220

**Contact time** 1 lecture per week, 11 practical hours per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Module content

Midwifery skills in practise in pre-conception care, health education and genetic counselling, normal pregnancy, with common conditions in pregnancy, and related to foetal development.

### Midwifery: Theory 320 (MDW 320)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	NUR 210, NUR 220, NPE 210, NPE 220
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

Theory of midwifery of normal and high risk intrapartum, postpartum and neonatal care.

### Midwifery: Practical 321 (MDW 321)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	NUR 210, NUR 220, NPE 210, NPE 220
<b>Contact time</b>	1 lecture per week, 11 practical hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

Midwifery skills related to normal and high risk intrapartum, postpartum and neonatal care.

### Midwifery: theory 410 (MDW 410)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	MDW 310, MDW 311, MDW 320, MDW 321
<b>Contact time</b>	2 lectures per week, 2 practical hours per week
<b>Language of tuition</b>	Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

Theory related to comprehensive maternal and neonatal healthcare with a focus on gender-based violence during pregnancy, immunisation principles, application of IMCI principles in management of minor ailments for sick young infant, complications during abnormal pregnancy, antenatal care, labour, and the postpartum period.

### Midwifery: practical 411 (MDW 411)

**Qualification** Undergraduate

**Module credits** 22.00

**Programmes** [BNurs](#)

**Prerequisites** MDW 310, MDW 311, MDW 320, MDW 321

**Contact time** 18 practical hours per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

Practical related to comprehensive maternal and neonatal healthcare with a focus on gender-based violence during pregnancy, immunisation principles, application of IMCI principles in management of minor ailments for sick young infant, complications during abnormal pregnancy, antenatal care, labour, and the postpartum period.

### Midwifery: theory 420 (MDW 420)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BNurs](#)

**Prerequisites** MDW 310, MDW 311, MDW 320, MDW 321

**Contact time** 2 lectures per week, 2 practical hours per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Theory of community maternal and child healthcare and complications during the neonatal period.

### Midwifery: practical 421 (MDW 421)

**Qualification** Undergraduate

**Module credits** 22.00

---

<b>Programmes</b>	BNurs
<b>Prerequisites</b>	MDW 310, MDW 311, MDW 320, MDW 321
<b>Contact time</b>	18 practical hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

#### Module content

Practical of community maternal and child healthcare and complications during the neonatal period.

### Health informatics, monitoring and evaluation 771 (MEH 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	50 hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

#### Module content

Participants will be taught the importance of evidence-based public health and how to use health data, interpret the data, use the data for planning and for evaluation. The critical importance of how to strategically monitor and evaluate all programmes and systems, as well as how practical leadership requires in-depth knowledge of how to use review systems for forward planning. The use of knowledge management modalities will be used in health planning and participants will be required to design a Monitoring and Evaluation system that can be used at their workplace for better results in healthcare delivery.

### Health informatics, monitoring and evaluation 772 (MEH 772)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	PGDip Health Systems Management Executive Leadership
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

**Module credits** 30.00

**Programmes** [MPharmMed](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Pharmacology

**Period of presentation** Year

### Maxillo-facial pathology 371 (MFP 371)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BOH](#)

**Prerequisites** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271

**Contact time** 2 discussion classes per week for 10 weeks, 2 lectures per week for 20 weeks, 2 other contact sessions per week for 2 weeks

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

#### Module content

This module introduces the oral hygiene student to the maxillo-facial pathology commonly encountered in general practice. It will enable the student to differentiate between variants of normal and pathological lesions. A basic knowledge of the etiology, pathogenesis, and clinical appearance of the lesions will be acquired. Selected treatment modalities relevant to the oral hygienist will also be discussed in this module.

### Maxillo-facial pathology 470 (MFP 470)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370

**Contact time** 2 discussion classes per week for 6 weeks, 2 lectures per week, 2 other contact sessions per week for 3 weeks

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Module content

The modules in this subject will empower the student with knowledge of the embryology, anatomy, physiology and pathology of the oral mucosa, the salivary glands, intra- and extraoral soft tissue and bone in order to diagnose and manage lesions, diseases and conditions of the oral mucosa, salivary glands, intra and extraoral soft tissue and bone.

## Maxillo-facial pathology 480 (MFP 480)

**Qualification** Undergraduate

**Module credits** 31.00

**Programmes** BChD

**Prerequisites** GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370

**Contact time** 1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Module content

The modules in this subject will empower the student with knowledge of the embryology, anatomy, physiology and pathology of the oral mucosa, the salivary glands, intra- and extraoral soft tissue and bone in order to diagnose and manage lesions, diseases and conditions of the oral mucosa, salivary glands, intra and extraoral soft tissue and bone.

## Maxillo-facial pathology 570 (MFP 570)

**Qualification** Undergraduate

**Module credits** 10.00

**Prerequisites** TBW 470, ODO 470, MFP 470, PDL 470, DFA 470, OFC 470, PTK 470, GAP 470, TMZ 470

**Contact time** 1 lecture per week, 2 discussion classes per week for 6 weeks, 2 other contact sessions per week for 2 weeks

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

## Module content

The modules in this subject will empower the student with knowledge of the embryology, anatomy, physiology and pathology of the oral mucosa, the salivary glands, intra- and extraoral soft tissue and bone in order to diagnose and manage lesions, diseases and conditions of the oral mucosa, salivary glands, intra and extraoral soft tissue and bone.

### Maxillo-facial pathology 580 (MFP 580)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	33.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	TBW 470,ODO 470,MFP 470,PDL 470,DFA 470,OFC 470,PTK 470,GAP 470,TMZ 470
<b>Contact time</b>	1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

## Module content

The modules in this subject will empower the student with knowledge of the embryology, anatomy, physiology and pathology of the oral mucosa, the salivary glands, intra- and extraoral soft tissue and bone in order to diagnose and manage lesions, diseases and conditions of the oral mucosa, salivary glands, intra and extraoral soft tissue and bone.

### Oral medicine 700 (MGK 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	4 discussion classes per week, 4 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Year

### Oral medicine 701 (MGK 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	PGDip Dentistry Oral Medicine
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Year

### Oral medicine 702 (MGK 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Contact time</b>	4 discussion classes per week, 4 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Year

### Human genetics 700 (MGN 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	50.00
<b>Programmes</b>	<a href="#">BScHons Human Genetics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Genetics and Developmental Biology
<b>Period of presentation</b>	Semester 2

### Research report: Human genetics 790 (MGN 790)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	50.00
<b>Programmes</b>	<a href="#">BScHons Human Genetics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Genetics and Developmental Biology
<b>Period of presentation</b>	Year

### Human genetics 802 (MGN 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Programmes</b>	<a href="#">MChD Orthodontics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	14 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Genetics and Developmental Biology
<b>Period of presentation</b>	Semester 1

### Dissertation: Human genetics 890 (MGN 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Human Genetics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Genetics and Developmental Biology
<b>Period of presentation</b>	Year

### Thesis: Human genetics 990 (MGN 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Human Genetics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Genetics and Developmental Biology
<b>Period of presentation</b>	Year

### People and their environment 112 (MGW 112)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	<a href="#">BChD</a> <a href="#">MBChB</a>
<b>Service modules</b>	Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Sociology
<b>Period of presentation</b>	Semester 1

#### Module content

This module comprises basic psychology and sociology concepts relevant to Medicine, and to Dentistry, in the case of BChD students.

Basic psychiatric concepts are also taught.

### Human resources planning 780 (MHP 780)

<b>Qualification</b>	Postgraduate
----------------------	--------------

---

<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Semester 1

### **Military medicine: Internal medicine 800 (MIG 800)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMilMed</a>
<b>Prerequisites</b>	FSG 801, VGN 800, IGK 804, CHR 801, RAT 800
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

### **Molecular and cell biology 111 (MLB 111)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00

## Programmes

## Service modules

Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Health Sciences  
Faculty of Veterinary Science

## Prerequisites

A candidate who has passed Mathematics with at least 60% in the Grade 12 examination

## Contact time

1 practical/tutorial per week, 4 lectures per week

## Language of tuition

Module is presented in English

## Department

Biochemistry, Genetics and Microbiology

## Period of presentation

Semester 1

## Module content

Introduction to the molecular structure and function of the cell. Basic chemistry of the cell. Structure and composition of prokaryotic and eukaryotic cells. Ultrastructure and function of cellular organelles, membranes and the cytoskeleton. General principles of energy, enzymes and cell metabolism. Selected processes, e.g. glycolysis, respiration and/or photosynthesis. Introduction to molecular genetics: DNA structure and replication, transcription, translation. Cell growth and cell division.

## Molecular and cell biology 133 (MLB 133)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BSc Extended programme - Biological and Agricultural Sciences](#)  
[BSc Extended programme - Physical Sciences](#)

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Health Sciences  
Faculty of Veterinary Science

**Prerequisites** Admission to the relevant programme.

**Contact time** 2 lectures per week, Fortnightly discussions, Fortnightly practicals, Foundation Course

**Language of tuition** Module is presented in English

**Department** Department of Plant and Soil Sciences

**Period of presentation** Semester 1

### Module content

Introduction to life science and life on earth, including the importance and relevance of the Sustainable Development Goals; the scientific method, principles of microscopy, introduction to the molecular structure and function of the cell. Basic chemistry of the cell. Structure and composition of prokaryotic and eukaryotic cells.

## Molecular and cell biology 143 (MLB 143)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BSc Extended programme - Biological and Agricultural Sciences](#)  
[BSc Extended programme - Physical Sciences](#)

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Health Sciences  
Faculty of Veterinary Science

**Prerequisites** Admission to the relevant programme.

**Contact time** 2 lectures per week, Fortnightly discussions, Fortnightly practicals, Foundation Course

**Language of tuition** Module is presented in English

**Department** Department of Plant and Soil Sciences

**Period of presentation** Semester 2

### Module content

Ultrastructure and function of cellular organelles, membranes and the cytoskeleton. General principles of energy, enzymes and cell metabolism including selected cellular.

### Oral microbiology 700 (MMB 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Oral microbiology 702 (MMB 702)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">PGDip Dentistry Oral Microbiology</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Multimodality imaging 400 (MMI 400)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BRad in Diagnostics</a>
<b>Prerequisites</b>	RPH 300
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

#### Module content

Application of multimodality imaging in Oncological diseases- staging, therapy monitoring and individual risk assessment, and image guided intervention. Neurological diseases. Patient management models in multimodality imaging. Radiographic pathology; Image interpretation of multimodality imaging i.e. CT Scan; MRI; PET/CT; PET/MRI; PET/Mammography; Ultrasonography; Radiation Therapy delivery accuracy verification with Image Guided systems. Technical aspects of management of multimodality imaging systems. Quality assurance in multimodality imaging.

### MMed: Essay 800 (MMS 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Semester 1

### Dissertation 890 (MMS 890)

**Qualification** Postgraduate

**Module credits** 180.00

#### Programmes

MMed Anaesthesiology  
MMed Anatomical Pathology  
MMed Chemical Pathology  
MMed Clinical Pathology  
MMed Dermatology  
MMed Emergency Medicine  
MMed Family Medicine  
MMed Forensic Pathology  
MMed Geriatrics  
MMed Haematology  
MMed Internal Medicine  
MMed Medical Microbiology  
MMed Medical Oncology  
MMed Medical Virology  
MMed Neurology  
MMed Neurosurgery  
MMed Nuclear Medicine  
MMed Obstetrics and Gynaecology  
MMed Ophthalmology  
MMed Orthopaedics  
MMed Otorhinolaryngology  
MMed Paediatric Surgery  
MMed Paediatrics  
MMed Plastic Surgery  
MMed Psychiatry  
MMed Radiation Oncology  
MMed Radiological Diagnostics  
MMed Surgery  
MMed Thoracic Surgery  
MMed Urology

**Language of tuition** Module is presented in English

**Department** School of Medicine

**Period of presentation** Year

### Medical nutrition therapy 310 (MNX 310)

**Qualification** Undergraduate

**Module credits** 9.00

**Programmes** BDietetics

<b>Prerequisites</b>	3rd-year status
<b>Contact time</b>	1 discussion class per week, 2 lectures per week for 7 weeks
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 1

### Module content

Introduction to the origin of diseases as a consequence of programmed changes that occur during impaired intrauterine growth and development. Aetiology and clinical manifestations of under-nutrition/PEM; principles and practices of medical nutrition therapy in under-nutrition/PEM; impact and influence of worm infestation. Congenital heart disease and special problems related to children with congenital heart disease. Relationship between malnutrition and Aids; role of nutrition in immunity within the context of HIV/Aids; clinical signs, symptoms and problems associated with Aids and guidelines for the alleviation of these symptoms; nutritional related problems of medication used by Aids patients. Appropriate practical assignments and case studies.

## Medical nutrition therapy 322 (MNX 322)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	50.00
<b>Prerequisites</b>	FLG 221,FLG 222,BCM 261,BCM 262,VDS 221,HNT 220,AGV 413,BCM 251,BCM 252,DTT 222
<b>Contact time</b>	3 discussion classes per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 2

### Module content

Nutrition care process. Role of diet and nutrition in the etiology and treatment of undernourishment, obesity, diabetes mellitus, hypoglycaemia, hypertension, hyperlipoproteinaemia and coronary heart disease. Disorders of the renal system. Nutrient-drug interactions. Basic principles of special nutritional care, special feeding methods and products. Appropriate practical assignments and case studies in order to practise the nutrition care process.

## Medical nutrition therapy 323 (MNX 323)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	28.00
<b>Programmes</b>	<a href="#">BDietetics</a>
<b>Prerequisites</b>	3rd-year status
<b>Contact time</b>	2 discussion classes per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition

**Period of presentation** Semester 2

### Module content

Relationships between obesity, hypertension, cardiovascular disease, insulin resistance and concomitant health risks. Aetiology, pathophysiology and manifestation(s) of type 1 and type 2 Diabetes Mellitus, gestational diabetes and impaired glucose tolerance; principles and practices of medical nutrition therapy of diabetes mellitus integrated with medical/pharmacological treatment; dietary treatment/prevention of complications; dietary adaptations when exercising and life style/behaviour modification. Aetiology and clinical manifestations of cardiovascular; principles and practices of medical nutrition therapy in CVD. Aetiology and clinical manifestation(s) of renal disease conditions; principles and practices of medical nutrition therapy in renal conditions (nephritic syndrome, nephrotic syndrome, acute and chronic renal failure, nephrolithiasis). Nutrient-drug interactions. Metabolic response to acute and chronic stress. Principles of special nutritional care, special feeding methods and products required for injured/critically ill patients. Appropriate practical assignments and case studies

## Medical nutrition therapy 411 (MNX 411)

**Qualification** Undergraduate

**Module credits** 25.00

**Programmes** [BDietetics](#)

**Prerequisites** 4th-year status

**Contact time** 3 discussion classes per week, 6 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

### Module content

The role of diet and nutrition in the aetiology and treatment of diseases of the gastrointestinal tract and related organs, metabolic disorders and gout, diseases of neurological origin, prematurity and paediatric disease conditions. Nutritional care of physiological trauma and cancer. Nutrient-drug interactions. Appropriate practical assignments and case studies (practising the nutrition care process).

## Internship training in medical nutrition therapy 480 (MNX 480)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BDietetics](#)

**Prerequisites** MNX 411

**Contact time** 5 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

## Medical oncology for medical subspecialties Part 1 801 (MOC 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Medical Oncology
<b>Period of presentation</b>	Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

## Dissertation: Oral pathology and oral biology 890 (MPB 890)

<b>Qualification</b>	Postgraduate

Faculty of Veterinary Science

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Ancient and Modern Languages and Cultures

**Period of presentation** Semester 1 and Semester 2

#### Module content

The acquisition of a basic medical orientated vocabulary compiled from Latin and Greek stem forms combined with prefixes and suffixes derived from those languages. The manner in which the meanings of medical terms can be determined by analysing the terms into their recognisable meaningful constituent parts, is taught and exercised. The functional use of medical terms in context as practical outcome of terminological application is continually attended to.

### Medical applied psychology 801 (MTS 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Psychiatry</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Year

### Transcultural practice 802 (MTS 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	13.00
<b>Programmes</b>	<a href="#">MSc Medical Applied Psychology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	13.00
<b>Programmes</b>	<a href="#">MSc Medical Applied Psychology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Year

### Practical work: Medical applied psychology 808 (MTS 808)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">MSc Medical Applied Psychology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Year

### Mini-dissertation: Medical applied psychology 890 (MTS 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	90.00
<b>Programmes</b>	<a href="#">MSc Medical Applied Psychology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Psychiatry
<b>Period of presentation</b>	Year

### Multivariate analysis 720 (MVA 720)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BComHons Mathematical Statistics</a> <a href="#">BScHons Financial Engineering</a> <a href="#">BScHons Mathematical Statistics</a> <a href="#">BScHons Mathematics of Finance</a>
<b>Service modules</b>	Faculty of Health Sciences Faculty of Natural and Agricultural Sciences
<b>Prerequisites</b>	MVA 710
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Statistics
<b>Period of presentation</b>	Semester 2

#### Module content

Discriminant analysis and classification. Principal component analysis. The biplot. Multidimensional scaling. Factor analysis. Probabilistic clustering.

### Neuro-anatomy for communication pathology 211 (NAN 211)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	7.00
<b>Programmes</b>	<a href="#">BA Audiology</a> <a href="#">BA Speech-Language Pathology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

## Module content

This module focuses on the theory and practical experience of the structure of the central nervous system, course and distribution of the cranial nerves and embryology of the central nervous system. Division; embryology of the central nervous system; histology of the nervous system; gross anatomy: spinal cord, brain stem, cerebral hemispheres, ventricles, meninges and circulation of cerebro-spinal fluid, blood circulation, cranial nerves, autonomic nervous system and tracts of the CNS.

### Research report: Preparation 882 (NAV 882)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MPharmMed</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 1

### Research report 883 (NAV 883)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MPharmMed</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 other contact session per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Pharmacology
<b>Period of presentation</b>	Semester 1

### Neurosurgery 800 (NCR 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Neurosurgery</a>
<b>Prerequisites</b>	ANA 894, FSG 801, ANP 875, BVC 801
<b>Contact time</b>	1 practical per week, 2 seminars per week, 3 discussion classes per week, 4 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Neurosurgery
<b>Period of presentation</b>	Year

## Thesis: Neurosurgery 990 (NCR 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Neurosurgery</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Neurosurgery
<b>Period of presentation</b>	Year

## Nursing dynamics 720 (NDY 720)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	8.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Module content

Introduction to leadership and ethical-legal aspects in specialised professional nursing practice.

## Neuro-physiology 221 (NFG 221)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	7.00
<b>Programmes</b>	<a href="#">BA Audiology</a> <a href="#">BA Speech-Language Pathology</a>
<b>Prerequisites</b>	FSG 110 and FSG 120
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Semester 2

### Module content

Neuronal physiology, central nervous system, peripheral nervous system, including the afferent and efferent divisions.

## Neuro-physiology 700 (NFG 700)

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Neurophysiology 801 (NFG 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Psychiatry</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

#### Module content

Study of neurophysiology from molecular to system level, as applicable to all aspects of general psychiatry, neuropsychiatry and psychopharmacology.

### Emergency medicine 801 (NGK 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Emergency Medicine</a>
<b>Prerequisites</b>	ANA 802, FSG 801, FAR 880, PAG 880
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Family Medicine
<b>Period of presentation</b>	Year

### First aid 171 (NHS 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">BOH</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2.5 days of lectures
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry

**Period of presentation** Semester 1

### Module content

The practical-orientated first-aid training will empower the oral hygiene student with a working knowledge of day-to-day emergencies, both in the workplace and at home. At this entry-level training the student will partake in the practical aspects of bleeding and wound management, cardio pulmonary resuscitation, care for unconscious patients and choking to name a few. The module content will assist the oral hygiene student in managing medical emergencies in the dental surgery.

## Research III 702 (NMR 702)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [BScHons Biokinetics](#)  
[BScHons Sports Science](#)

**Prerequisites** None

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Year

### Module content

In this module the focus will be on the execution of a research proposal and writing a research manuscript on the study executed, and the presentation of the research project which includes an introduction, literature survey, methodology, results and discussion, and conclusion and recommendations.

## Neurology/Neuro-surgery 801 (NNC 801)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Contact time** 5 discussion classes per week, 5 practicals per week, 5 seminars per week

**Language of tuition** Module is presented in English

**Department** Neurosurgery

**Period of presentation** Year

## Nursing practice education 110 (NPE 110)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BNurs](#)

**Prerequisites** No prerequisites.

---

<b>Contact time</b>	8 practical hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

#### Module content

Introduction to nursing practice as it is related to foundations of clinical nursing, health promotion and disease prevention practice, basic human needs in practice and family assessment.

### Nursing practice education 120 (NPE 120)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	11 practical hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

#### Module content

Application of promotion of wellness in the hospital setting: record keeping, comprehensive assessment and basic care in the hospital setting.

### Nursing practice education 161 (NPE 161)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

#### Module content

Clinical learning experiences and laboratory work: these modules comprise 240 hours of compulsory clinical practical and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

### Nursing practice education 162 (NPE 162)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Module content

Clinical learning experiences and laboratory work: these modules comprise 240 hours of compulsory clinical practical and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Nursing practice education 210 (NPE 210)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	NUR 110, NUR 120, NPE 110, NPE 120
<b>Contact time</b>	11 practical hours per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

Nursing skills in medical and surgical nursing care, including basic resuscitation, suctioning and medication administration, skills related to medical and palliative nursing care, and skills related to pre- and post-operative nursing care.

## Nursing practice education 220 (NPE 220)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	NUR 110, NUR 120, NPE 110, NPE 120
<b>Contact time</b>	11 practical hours per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Module content

Nursing skills related to care of patients with conditions of the respiratory-, cardiovascular-, neurological-, musculoskeletal- and gastrointestinal systems.

## Nursing practice education 261 (NPE 261)

**Qualification** Undergraduate

**Module credits** 24.00

**Prerequisites** ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 1 other contact session per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

Clinical learning experiences and laboratory work: these modules comprise 240 hours of compulsory clinical practical and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Nursing practice education 262 (NPE 262)

**Qualification** Undergraduate

**Module credits** 24.00

**Prerequisites** ANA 151,ANA 152,ANA 161,ANA 162,FSG 161,FSG 162,NUR 151,NUR 152,NUR 153,NUR 154,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 1 other contact session per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Clinical learning experiences and laboratory work: these modules comprise 240 hours of compulsory clinical practical and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Nursing practice education 310 (NPE 310)

**Qualification** Undergraduate

**Module credits** 3.00

---

<b>Programmes</b>	BNurs
<b>Prerequisites</b>	NUR 210, NUR 220, NPE 210, NPE 220
<b>Contact time</b>	2 practical hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

#### Module content

Nursing skills related care of patients with conditions of the renal-, endocrine-, reproductive-, and integumentary systems and special senses (eyes and ears).

### Nursing practice education 320 (NPE 320)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	3.00
<b>Programmes</b>	BNurs
<b>Prerequisites</b>	NUR 210, NUR 220, NPE 210, NPE 220
<b>Contact time</b>	2 practical hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

#### Module content

Nursing skills in mental health, including mental health assessment, screening for violence, trauma counselling skills and management of the violent patient.

### Nursing practice education 361 (NPE 361)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

## Module content

Note: NPE 361 assessment for semester mark:

General nursing science 60%, midwifery 20% and psychiatry 20%.

Final assessment: General nursing science 30% midwifery 20% psychiatry 20%, community 30%.

Clinical learning experiences and laboratory work: these modules comprise 300 hours of compulsory clinical practical work and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Nursing practice education 362 (NPE 362)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	30.00
<b>Prerequisites</b>	NUR 251, NUR 252, NUR 253, NUR 254, DNP 251, DNP 252, DNP 253, DNP 254, NPE 261, NPE 262
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

NB: NPE 362 semester mark:

General nursing science 20%, midwifery 40%, community/PHC 20%, management 20%.

Final assessment: General nursing science comprehensive assessment 80%. (Pharmacology, management, general nursing science and PHC) and midwifery OSCE 20%.

Clinical learning experiences and laboratory work: these modules comprise 300 hours of compulsory clinical practical work and laboratory work each (per semester). Students will complete these modules in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Nursing practice education 410 (NPE 410)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	BNurs
<b>Prerequisites</b>	NUR 310, NUR 320, NPE 310, NPE 320
<b>Contact time</b>	11 practical hours per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

Nursing skills related to comprehensive general nursing with inclusion of resuscitation and management of haemodynamic status, management of medical emergencies, management of surgical emergencies, and management of dying and death and care of significant others.

## Nursing practice education 420 (NPE 420)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	BNurs
<b>Prerequisites</b>	NUR 310, NUR 320, NPE 310, NPE 320
<b>Contact time</b>	11 practical hours per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

Comprehensive self-care for vulnerable populations in the community and practica of Integrated Management of Childhood Illness (IMCI).

## Nursing practice education 461 (NPE 461)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	50.00
<b>Prerequisites</b>	NUR 351, NUR 352, NUR 353, NUR 354, DNP 351, DNP 352, DNP 353, DNP 354, NPE 361, NPE 362
<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

## Module content

Clinical learning experiences and laboratory work: this module comprises 500 hours of compulsory clinical practical and laboratory work each (per semester). Students will complete this module in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Nursing practice education 462 (NPE 462)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	50.00
<b>Prerequisites</b>	NUR 351, NUR 352, NUR 353, NUR 354, DNP 351, DNP 352, DNP 353, DNP 354, NPE 361, NPE 362

<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

### Module content

Clinical learning experiences and laboratory work: this module comprises 500 hours of compulsory clinical practical work and laboratory work each (per semester). Students will complete this module in specified healthcare units.

NB: Only selected BCur students may register for this module.

## Neurology 800 (NRE 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Neurology</a>
<b>Prerequisites</b>	PAG 805, ANA 891, FSG 801
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Neurology
<b>Period of presentation</b>	Year

## Neurology 801 (NRE 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Psychiatry</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Neurology
<b>Period of presentation</b>	Year

## Thesis: Neurology 990 (NRE 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Neurology</a> <a href="#">PhD Neurology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Neurology

**Period of presentation** Year

### Nutritional assessment 313 (NTA 313)

**Qualification** Undergraduate

**Module credits** 30.00

**Programmes** [BDietetics](#)

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** 3rd-year status

**Contact time** 1 discussion class per week, 1 practical per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

#### Module content

Evaluation of nutritional status.

Nutrition care process, overview of evaluation of nutrition status. Scientific principles of evaluation of nutrition status; nutrition screening; clinical, anthropometric, biochemical and dietary evaluation of nutrition status.

Practice training: practising of theoretical principles of nutrition status evaluation in hospital/clinic and/or skills laboratory.

### Nursing studies 110 (NUR 110)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [BNurs](#)

**Prerequisites** No prerequisites.

**Contact time** 1 practical hour per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

#### Module content

Introduction to nursing theory, including theoretical foundations of nursing practice, health promotion and disease prevention, as well as basic human needs.

### Nursing studies 120 (NUR 120)

**Qualification** Undergraduate

**Module credits** 3.00

**Programmes** [BNurs](#)

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical hour per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

#### Module content

Fundamental principles of health promotion in the hospital setting with inclusion of the nursing process, therapeutic environment and daily living activities and principles of medication management.

### Nursing studies 151 (NUR 151)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

#### Module content

Fundamentals of nursing science

Introduction and concept clarification: nursing, nursing science, health and illness. Approaches to nursing and perspectives on human beings and their world. The art and science of nursing. Philosophical foundations of nursing. Overview of the history of nursing. Aspects of professional practice. The scientific approach to nursing. Human needs as the basis for nursing practice. The wellness-illness continuum.

NB: Only selected BCur students may register for this module.

### Nursing studies 152 (NUR 152)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

## Module content

Human needs and development in health and illness.

Humans as biological, psychological and spiritual beings within socio-economic and cultural contexts. Basic needs: nutrition, comfort and activity, rest and sleep, elimination, hygiene, oxygen, learning, sensory and interpersonal, pain management, safety, homeostasis, growth and development, medication needs, spiritual needs and the need for a dignified death. Self-image, own identity and self-actualisation. Relevant aspects of human nutrition. Human developmental stages and the unique needs associated with each stage.

NB: Only selected BCur students may register for this module.

## Nursing studies 153 (NUR 153)

**Qualification** Undergraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

## Module content

Environment, society and communities and its influence on nursing science.

The environment as determinant of health and wellness. Environmental hygiene. Societal and community phenomena, sectors, stratification and institutions. Marginalised communities in South Africa. The impact of disease on families, communities and society. Community-based health services and the role of the hospital as community institution.

NB: Only selected BCur students may register for this module.

## Nursing studies 154 (NUR 154)

**Qualification** Undergraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

## Module content

Provision of health care to communities and the nursing management of minor ailments. Comprehensive health care and the multidisciplinary team approach. Community involvement and participation in the provision of health services. Community empowerment. Introduction to public health and systems of health care. Care of the elderly. Selected minor ailments of the upper respiratory tract, oral cavity and skin: earache, sore throat, colds and flu, sinusitis, tonsillitis, halitosis and oral and integumentary health. NB: Only selected BCur students may register for this module.

## Nursing studies 210 (NUR 210)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** [BNurs](#)

**Prerequisites** NUR 110, NUR 120, NPE 110, NPE 120

**Contact time** 1 lecture per week, 1 practical hour per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Module content

Theory related to homeostasis, immunology, haematology and principles of medical, palliative and surgical nursing care.

## Nursing studies 220 (NUR 220)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BNurs](#)

**Prerequisites** NUR 110, NUR 120, NPE 110, NPE 120

**Contact time** 1 lecture per week, 1 practical hour per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

## Module content

Theory related to communicable and non-communicable conditions of the respiratory-, cardiovascular-, neurological-, musculoskeletal- and gastrointestinal systems, across the lifespan.

## Nursing studies 251 (NUR 251)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** FSG 161,FSG 162,NPE 161,NPE 162,NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

### Module content

Introduction to medical-surgical and trauma nursing science.

The medical and surgical approach to health care. Acute versus chronic illness. The influence of disease and hospitalisation on the adult health service consumer. Aspects of professional practice. Relevant assessment skills. Aspects of trauma nursing. Applied human nutrition. Intrinsic and extrinsic causes of disease. Cellular stressors, adaptive processes, abnormal cellular growth, cell damage, repair and cell death. Neoplasia and tumor pathology. General disturbances of homeostasis. Introduction to genetics and inheritance of disease. Aspects of medical emergency nursing.

NB: Only selected BCur students may register for this module.

## Nursing studies 252 (NUR 252)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,DNP 153,DNP 154,NPE 161,NPE 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 practicals per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

### Module content

Surgical nursing science.

Comprehensive perioperative nursing of patients with common surgical health problems of injuries related to the musculo-skeletal, neurological, gastro-intestinal and respiratory system, the eye and reproductive health.

Relevant assessment skills. Soft tissue injuries, surgical wounds and wound care techniques: wounds and wound healing, relevant assessment skills, aseptic wound care procedures (principles and techniques), modern wound care products and evidence-based practice, traumatic wounds (including burn trauma) and chronic wounds.

Applied human nutrition. Inflammation, infection and necrosis.

NB: Only selected BCur students may register for this module.

## Nursing studies 253 (NUR 253)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,DNP 153,DNP 154,NPE 161,NPE 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 3

### Module content

Medical nursing science.

Comprehensive medical nursing of patients with common medical health problems related to the respiratory, neurological, digestive, renal, endocrine and cardiovascular system, acute poisoning, cancer and haematological problems (anaemia and leukaemia) and metabolic disturbances. Disturbances of circulation and oedema formation. Overview of hypersensitivity reactions and auto-immune disorders. Examples from the clinical practice of nursing. Relevant assessment skills. Applied human nutrition.

NB: Only selected BCur students may register for this module.

## Nursing studies 254 (NUR 254)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** NUR 151,NUR 152,NUR 153,NUR 154,DNP 151,DNP 152,DNP 153,DNP 154,NPE 161,NPE 162,CIL 111 and 121 or AIM 101 or AIM 111 and 121 EOT 110 and 120 or ELH 121 and 122

**Contact time** 2 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

### Module content

Principles of child health nursing science.

Unique needs during the childhood years. Common childhood health problems: respiratory, cardiovascular and pain management, diarrhoea, nausea and vomiting, malnutrition and failure to thrive. Applied human nutrition. The effects of hospitalisation on children and their families. Therapeutic play and support of the child and nurse-therapeutic interventions with children. The unique world of the sick child and alternative approaches to illness through play therapy. Aspects of paediatric emergency nursing.

NB: Only selected BCur students may register for this module.

## Integrative health care 255 (NUR 255)

**Qualification** Undergraduate

**Module credits** 11.00

**Prerequisites** No prerequisites.

<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

#### Module content

Principles, perspectives, ethical-legal consideration and legislation relating to integrative health care, traditional healing in Africa, healing modalities related to natural and manual complementary therapies, nutritional and medicinal importance of indigenous plants.

NB: Only selected BCur students may register for this module.

### Nursing studies 310 (NUR 310)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	NUR 210, NUR 220, NPE 210, NPE 220
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

#### Module content

Theory related to communicable and non-communicable conditions of the renal-, endocrine-, reproductive-, and integumentary systems and special senses (eyes and ears) across the lifespan.

### Nursing studies 320 (NUR 320)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	4.00
<b>Programmes</b>	<a href="#">BNurs</a>
<b>Prerequisites</b>	NUR 210, NUR 220, NPE 210, NPE 220
<b>Contact time</b>	1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

#### Module content

Theory of mental health nursing regarding childhood physical and mental disabilities, emergency psychiatric conditions, personal and social dynamics in violence, and personal and social dynamics in substance abuse.

## Nursing studies 351 (NUR 351)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Prerequisites</b>	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 1

### Module content

Gender health nursing sciences.

Male gender health nursing. Female gender health nursing. Family planning (contraception, infertility and preconception care). Sexual development and sexual needs, gender relationships and gender issues, role identity and role conflict. Sexual deviance and sexual abuse. Violence against women and children.

NB: Only selected BCur students may register for this module.

## Nursing studies 352 (NUR 352)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Prerequisites</b>	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 2

### Module content

Midwifery science: accompaniment during pregnancy.

Overview of the perinatal period. Embryology and foetal growth and development. The normal pregnancy, unique needs of the pregnant woman and low-risk antenatal care. Relevant assessment skills. Applied human nutrition.

NB: Only selected BCur students may register for this module.

## Nursing studies 353 (NUR 353)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Prerequisites</b>	NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Quarter 3

## Module content

Midwifery science: accompaniment during normal childbirth and puerperium.

The course of the intrapartum period, related needs and low-risk postnatal care. Relevant assessment skills.

Applied human nutrition.

NB: Only selected BCur students may register for this module.

## Nursing studies 354 (NUR 354)

**Qualification** Undergraduate

**Module credits** 18.00

**Prerequisites** NUR 251,NUR 252,NUR 253,NUR 254,DNP 251,DNP 252,DNP 253,DNP 254,NPE 261,NPE 262

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

## Module content

Midwifery science: high-risk pregnancy.

Maternal and perinatal morbidity and mortality and notification. Risk assessment of mother and foetus. Relevant assessment skills. Nursing care related to specific health needs and problems during the antenatal period.

NB: Only selected BCur students may register for this module.

## Nursing studies 410 (NUR 410)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BNurs](#)

**Prerequisites** NUR 310, NUR 320, NPE 310, NPE 320

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

## Module content

Theory related to comprehensive general nursing with a focus on haemodynamic monitoring, assessment and interpretation, medical emergencies, surgical emergencies and shock.

## Nursing studies 420 (NUR 420)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** [BNurs](#)

**Prerequisites** NUR 310, NUR 320, NPE 310, NPE 320

**Contact time** 1 practical hour per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Comprehensive nursing care to protect vulnerable populations, and Integrated Management of Childhood Illness (IMCI).

## Nursing studies 451 (NUR 451)

**Qualification** Undergraduate

**Module credits** 18.00

**Prerequisites** NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362

**Contact time** 2 practicals per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 1

### Module content

Midwifery science: High-risk childbirth.

Abnormal course of the intrapartum period, related needs and management. Foetal monitoring. Rupture of membranes, pre-term and post-term labour. Obstetric injuries and emergencies. Nurse-therapeutic support during the lived experience of high-risk pregnancy and pregnancy-related complications. Relevant assessment skills.

NB: Only selected BCur students may register for this module.

## Nursing studies 452 (NUR 452)

**Qualification** Undergraduate

**Module credits** 18.00

**Prerequisites** NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362

**Contact time** 2 practicals per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 2

## Module content

Midwifery science: High-risk puerperium and the high-risk neonate.

High-risk post-natal care. Characteristics and needs of the neonates. Principles of nursing care in respect of healthy and sick or high-risk neonates. Comprehensive nursing of neonates with specific problems. Relevant assessment skills. Applied human nutrition.

NB: Only selected BCur students may register for this module.

## Nursing studies 456 (NUR 456)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	40.00
<b>Prerequisites</b>	NUR 351,NUR 352,NUR 353,NUR 354,DNP 351,DNP 352,DNP 353,DNP 354,NPE 361,NPE 362
<b>Contact time</b>	2 practicals per week, 4 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 2

## Module content

Nursing elective.

An approved elective, chosen in consultation with the head of the department.

- Themes from community nursing science and primary health care
- Themes from psychiatric nursing science and therapeutic conversations
- Themes from general medical nursing science
- Themes from general surgical nursing science
- Themes from hospital-based midwifery science

The availability of electives will depend on student interest and the availability of staff and training facilities. Students need to enquire about prospective electives before registering for this module.

Ten (10) credits of the above elective should include content on research-based practice (or a research project), contemporary practice issues, international nursing studies and ethical and legal aspects of health care practice within the chosen elective.

NB: Only selected BCur students may register for this module.

## Research principles 700 (NVB 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">BRadHons Diagnostics</a> <a href="#">BRadHons Nuclear Medicine</a> <a href="#">BRadHons Radiation Therapy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English

**Department** Radiography

**Period of presentation** Semester 1

**Module content**

Development and submission of a research protocol.

**Principles of occupational medicine 770 (OCM 770)**

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

**Clinical skills in occupational medicine 771 (OCM 771)**

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** No prerequisites.

**Contact time** 16 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

**Module content**

\*Attendance module only

**Principles of occupational medicine 772 (OCM 772)**

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Occupational Medicine and Health](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

**Clinical skills in occupational medicine 773 (OCM 773)**

**Qualification** Postgraduate

<b>Module credits</b>	5.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

**Module content**

\*Attendance module

### Clinical skills in occupational medicine 774 (OCM 774)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">PGDip Occupational Medicine and Health</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

**Module content**

\*Attendance module only

### Principles: Occupational medicine 870 (OCM 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Clinical skills in occupational health 871 (OCM 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Occupational science 100 (OCX 100)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	14.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Contact time</b>	2 lectures per week, 8 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

Theory of occupational science. Application of creative ability principles during activity participation. Application of a variety of elective activities which promotes the engagement of clients in meaningful occupation.

## Occupational science 200 (OCX 200)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, OCX 100, OTX 100, MTL 180, GNK 286, CIL 121 or AIM 101 or AIM 111 and 121, ELH 121 and 122
<b>Contact time</b>	1 lecture per week, 4 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

The theory on the science of occupation. Application of activities in the areas of ADL (Activities of Daily Living) and leisure, as well as elective activities that promote the engagement of clients in meaningful occupation.

## Occupational science 303 (OCX 303)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	19.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	FSG 251, FSG 252, FSG 261, FSG 262, OCX 200, OTX 212, OTX 211, RPD 200, OTX 221, OTX 222
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy

**Period of presentation** Year

### Module content

The study of normal development and the effect on ill health and disability in the areas of play and school. The science and application of occupational therapy principles to promote engagement in meaningful occupation taking into consideration personal and environmental context. Includes pathology, causes, clinical picture and prognosis of selected conditions.

## Occupational science 311 (OCX 311)

**Qualification** Undergraduate

**Module credits** 13.00

**Programmes** [BOccTher](#)

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, OCX 200, OTX 212,, OTX 211, RPD 200, OTX 221, OTX 211

**Contact time** 2 practicals per week, 2 seminars per week, 5 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Semester 1

### Module content

The study of the effect of ill health and disability in the area of Activities of Daily Living (ADL). The science and application of occupational therapy principles to promote engagement in meaningful occupation, taking into consideration personal and environmental contexts. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

## Occupational science 312 (OCX 312)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes** [BOccTher](#)

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, OCX 200, OTX 212, OTX 211, RPD 200, OTX 221, OTX 222

**Contact time** 2 practicals per week, 4 lectures per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Semester 2

### Module content

The study of the effect of ill health and disability in the area of work. The science and application of occupational therapy principles to promote engagement in meaningful occupation within the context of South African Disability Equity Legislation. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

## Occupational science 400 (OCX 400)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	35.00
<b>Programmes</b>	BOccTher
<b>Prerequisites</b>	ANP 210, RPD 380, OCX 311, OCX 312, OTX 311, OTX 322, AIM 101, ELH 121, ELH 122 and [SEP 110 of ZUL 110]
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

Continued study in occupational science with emphasis on the areas of occupation. Integration and application of knowledge and skills in a community fieldwork setting, an elective vocational rehabilitation fieldwork setting and in an elective paediatric fieldwork setting.

## Odontology 171 (ODO 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Odontology
<b>Period of presentation</b>	Semester 2

### Module content

This module will enable the oral hygiene student to be competent in the evaluation of the oral health status of the child, adolescent, adult and geriatric patient in terms of diseases related to the hard tissues of the oral cavity plus the pulpa and peri-apical tissues, and be able to:

- correctly diagnose the diseases;
- correctly diagnose the patient's risk profile;
- instruct a patient to be capable of exercising self-protective measures;
- change the behavioural pattern of the patient through motivation;
- create resistant and optimally maintainable dental hard tissues for oral health;
- reverse early lesions where possible;
- refer patients for restorative and rehabilitative treatment.

## Ondontology 270 (ODO 270)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00

<b>Programmes</b>	BChD
<b>Prerequisites</b>	GNK 286, GNK 289, GPS 280, FSG 270, MDB 270, IDE 270, POH 270, PRD 270, ZUL 110, AFR 111
<b>Contact time</b>	1 clinical session per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Odontology
<b>Period of presentation</b>	Year

#### Module content

Chair-side assisting:

This clinical training entails the chair-side assisting of senior dental students during the treatment of patients.

### Odontology 271 (ODO 271)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	7.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
<b>Contact time</b>	1 discussion class per week, 1 other contact session per week, 1 practical per week, 1 seminar per week, 2 lectures per week for 16 weeks
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Odontology
<b>Period of presentation</b>	Year

#### Module content

This module is a continuation of Odontology 171. It will enable the oral hygiene student to be competent in the evaluation of the oral health status of the child, adolescent, adult and geriatric patient in terms of diseases related to the hard tissues of the oral cavity plus the pulpa and peril-apical tissues, and be able to:

- Correctly diagnose the diseases
- Correctly diagnose the patient's risk profile
- Instruct a patient to be capable of exercising self-protective measures
- Change the behavioural pattern of the patient through motivation
- Create resistant and optimally maintainable dental hard tissues for oral health
- Reverse early lesions where possible
- Refer patients for restorative and rehabilitative treatment

### Odontology 370 (ODO 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	43.00
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

**Contact time** 2 lectures per week, 3 practicals per week

**Language of tuition** Module is presented in English

**Department** Odontology

**Period of presentation** Year

### Module content

The modules in the subject odontology form an integrated curriculum that is structured and presented by various lecturers from different departments of the school. The modules consist of theoretical, practical and clinical training. The theoretical training includes anatomy, embryology, histology, microbiology and pathology of the teeth and teeth structure, while the clinical training is focused on the preventive, curative, and minor rehabilitative treatment of teeth development and eruption malformations, dental caries, pulpal and peri-radicular pathology, unerupted and impacted teeth, and tooth wear as part of the ageing process.

## Odontology 380 (ODO 380)

**Qualification** Undergraduate

**Module credits** 39.00

**Programmes** BChD

**Prerequisites** BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

**Contact time** 1 discussion class per week, 2 lectures per week, 2.6 practicals per week

**Language of tuition** Module is presented in English

**Department** Odontology

**Period of presentation** Year

**Prerequisites** ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

**Contact time** 1 lecture per week for 20 weeks, 1 practical per week (28 week period)

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

#### Module content

This module is designed to provide the oral hygiene student with knowledge and skills regarding:

- Local anaesthetics
- Oral surgery procedures
- Traumatology and
- Basic knowledge regarding advanced maxillo-facial surgery.

### Oro-facial surgery 370 (OFC 370)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BChD

<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Module content

- (a) Surgical anatomy: Applied surgical anatomy.
- (b) Examination, anaesthesia, distress: Examination of a surgical patient, stress control and sedation, local anaesthetics, local anaesthetic techniques, applied pharmacology and prescription (synoptic), emergency procedures.
- (c) Basic oral surgery: Sterilisation and disinfection, oral surgical armamentarium, exodontia and related complications, bleeding problems, antrum.
- (d) Advanced oral surgery: Apaiectomy, impactions, electro and cryosurgery, soft tissue infections and osteomyelitis, pre-prosthetic surgery (review).
- (e) Basic maxillo-facial surgery: Traumatology, surgical pathology, neuralgias, temporo-mandibular joint derangements.
- (f) Advanced maxillo-facial surgery: Micro surgery (review), orthognathic surgery, facial cleft deformities, cranio-facial surgery (review).

## Orofacial surgery 371 (OFC 371)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Programmes</b>	<a href="#">BOH</a>
<b>Prerequisites</b>	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Maxillo Facial and Oral Surgery
<b>Period of presentation</b>	Year

### Module content

This module is a continuation of Orofacial surgery 271 and will consist of clinical work only.

## Oro-facial surgery 470 (OFC 470)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	41.00
<b>Programmes</b>	<a href="#">BChD</a>
<b>Prerequisites</b>	GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, PDL 370, ODO 370, DFA 370

**Contact time** 1 discussion class per week, 1 lecture per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

### Module content

(a) Surgical anatomy: Applied surgical anatomy.

(b) Examination, anaesthesia, distress: Examination of a surgical patient, stress control and sedation, local anaesthetics, local anaesthetic techniques, applied pharmacology and prescription (synoptic), emergency procedures.

(c) Basic oral surgery: Sterilisation and disinfection, oral surgical armamentarium, exodontia and related complications, bleeding problems, antrum.

(d) Advanced oral surgery: Apaiectomy, impactions, electro and cryosurgery, soft tissue infections and osteomyelitis, pre-prosthetic surgery (review).

(e) Basic maxillo-facial surgery: Traumatology, surgical pathology, neuralgias, temporo-mandibular joint derangements.

(f) Advanced maxillo-facial surgery: Micro surgery (review), orthognathic surgery, facial cleft deformities, cranio-facial surgery (review).

### Oro-facial surgery 570 (OFC 570)

**Qualification** Undergraduate

**Module credits** 42.00

**Programmes** BChD

**Prerequisites** TBW 470,ODO 470,MFP 470,PDL 470,DFA 470,OFC 470,PTK 470,GAP 470,TMZ 470

**Contact time** 1 discussion class per week, 1 lecture per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Year

## Module content

- (a) Surgical anatomy: Applied surgical anatomy.
- (b) Examination, anaesthesia, distress: Examination of a surgical patient, stress control and sedation, local anaesthetics, local anaesthetic techniques, applied pharmacology and prescription (synoptic), emergency procedures.
- (c) Basic oral surgery: Sterilisation and disinfection, oral surgical armamentarium, exodontia and related complications, bleeding problems, antrum.
- (d) Advanced oral surgery: Apicectomy, impactions, electro and cryosurgery, soft tissue infections and osteomyelitis, pre-prosthetic surgery (review).
- (e) Basic maxillo-facial surgery: Traumatology, surgical pathology, neuralgias, temporo-mandibular joint derangements.
- (f) Advanced maxillo-facial surgery: Micro surgery (review), orthognathic surgery, facial cleft deformities, cranio-facial surgery (review).

## Thesis: Public health 990 (OGD 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Public Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Thesis: Environmental health 990 (OGH 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">PhD Environmental Health</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Gynaecological oncology for medical subspecialties Part 1 801 (OGY 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Programmes</b>	<a href="#">MPhil Gynaecological Oncology (Coursework)</a>
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

## Maternal and fetal medicine for medical subspecialities Part 1 802 (OGY 802)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Maternal and Fetal Medicine \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

## Reproductive medicine for medical subspecialities Part 1 803 (OGY 803)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Reproductive Medicine \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za)

## Urogynaecology for medical subspecialities Part 1 804 (OGY 804)

**Qualification** Postgraduate

**Module credits** 120.00

**Prerequisites** Relevant base specialty registration with HPCSA.

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Year

**Module content**

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

### Ophthalmology 800 (OHK 800)

**Qualification** Postgraduate

**Module credits** 300.00

**Programmes** [MMed Ophthalmology](#)

**Prerequisites** ANP 871, ANA 876, FSG 801, GMO 800

**Language of tuition** Module is presented in English

**Department** Ophthalmology

**Period of presentation** Year

### Thesis: Ophthalmology 990 (OHK 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Ophthalmology](#)  
[PhD Ophthalmology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Ophthalmology

**Period of presentation** Year

### Occupational and environmental health epidemiology 860 (OHM 860)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Contact time** 4 practicals per week, Block 3: 8 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

**Module content**

Exposure assessment; health risk assessment; environmental epidemiology; surveillance; toxicology; environmental chemical pollution.

## Postgraduate studies in occupational hygiene 1 873 (OHS 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	MPH
<b>Prerequisites</b>	FLG 322 or equivalent occupational hygiene coursework with 2 year practical experience in the field of occupational hygiene
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

The purpose of this module is to introduce students to the basic concepts of occupational hygiene. Topics addressed in this module include occupational hygiene principles, legislation, risk management (including risk assessment), measuring environmental factors, ergonomics, biological environmental factors, psychological environmental factors, control of environmental factors, communication and report writing and toxicology. Problem-based assignments and practical work needs to be completed and submitted after completion of each unit standard.

## Postgraduate studies in occupational hygiene 2 874 (OHS 874)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	MPH
<b>Prerequisites</b>	Satisfactory progress with submissions of OHS 873 assignments (unit standards 1 – 9)
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

Introduction to laboratory practice, occupational health education, research and statistical methods, integrated management systems, quality systems, audits and occupational hygiene management. Problem-based assignments need to be completed and submitted within a month after each unit standard.

## Individual studies in occupational hygiene 875 (OHS 875)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	MPH
<b>Prerequisites</b>	FLG 322 or equivalent Occupational hygiene coursework with 2 yrs practical experience, satisfactory progress in OHS 873.
<b>Language of tuition</b>	Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Module content

In-depth knowledge in occupational hygiene concerning legislative requirements related to different occupational hygiene strategies and stressors, i.e. risk assessment, occupational stress, illumination, extreme thermal conditions, noise, airborne contaminants, ventilation and ergonomics. Students need to compile template reports and submit it for grading.

## Principles of occupational hygiene and toxicology 770 (OHT 770)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Principles of occupational hygiene and toxicology 771 (OHT 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Occupational Medicine and Health](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Principles of occupational hygiene and toxicology 772 (OHT 772)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [BScHons Environmental Health](#)  
[BScHons Occupational Hygiene](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Principles of occupational hygiene and toxicology 870 (OHT 870)

**Qualification** Postgraduate

<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Principles of occupational hygiene and toxicology 872 (OHT 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Oncological behavioural sciences 700 (OKG 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	25.00
<b>Programmes</b>	<a href="#">BRadHons Radiation Therapy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

#### Module content

Behavioural dimensions of cancer and sickness, Psychology of cancer, Existential dimensions of cancer, Social dimensions of cancer, language and cross-cultural dimensions of cancer, Communication between patient and oncology team, Complementary psychology therapies

### Otorhinolaryngology 700 (ONK 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Otorhinolaryngology

**Period of presentation** Year

### Otorhinology 800 (ONK 800)

**Qualification** Postgraduate

**Module credits** 300.00

**Programmes** [MMed Otorhinology](#)

**Prerequisites** ANP 870, ANA 875, FSG 801, BVC 807

**Language of tuition** Module is presented in English

**Department** Otorhinology

**Period of presentation** Year

### Dissertation: Otorhinology 890 (ONK 890)

**Qualification** Postgraduate

**Module credits** 240.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Otorhinology

**Period of presentation** Year

### Thesis: Otorhinology 990 (ONK 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Otorhinology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Otorhinology

**Period of presentation** Year

### Communicable and non-communicable health-related conditions 800 (ONO 800)

**Qualification** Postgraduate

**Module credits** 50.00

**Programmes** [MMed Occupational Medicine](#)  
[MMed Public Health Medicine](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

### Module content

This module covers the principles of disease prevention and control and addresses a broad scope of communicable and non-communicable diseases. Surveillance systems and their applications.

## Orthodontics 171 (ORD 171)

**Qualification** Undergraduate

**Module credits** 9.00

**Programmes** BOH

**Prerequisites** No prerequisites.

**Contact time** 1 Seminar, 1 other contact session per week, 1 practical per week, 2 lectures per week, 2 web-based periods per week for 7 weeks

**Language of tuition** Module is presented in English

**Department** Orthodontics

**Period of presentation** Semester 2

### Module content

This module will empower the oral hygiene student to recognise and refer limited developmental and structural abnormalities of the growing and mature dento-craniofacial structures. It will furthermore provide the student with the knowledge and skills to perform orthodontic procedures pertaining to the scope of oral hygiene. This module will comprise lectures only.

## Orthodontics 271 (ORD 271)

**Qualification** Undergraduate

**Module credits** 6.00

**Programmes** BOH

**Prerequisites** ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

**Contact time** 1 discussion class per week, 1 other contact session per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Orthodontics

**Period of presentation** Year

### Module content

This module will empower the oral hygiene student to recognise and refer limited developmental and structural abnormalities of the growing and mature dento-cranofacial structures. It will furthermore provide the student with the knowledge and skills to perform orthodontic procedures pertaining to the scope of oral hygiene. The module consists of lectures and clinical work.

## Orthodontics 370 (ORD 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Prerequisites</b>	BOK 280, (BoK 281 or (BOK 285, 287)), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Orthodontics
<b>Period of presentation</b>	Year

### Module content

The modules in this subject extend over the third, fourth and fifth years of study. Lectures, practical and clinical work, seminars and discussions on the following: (a) Basic principles and therapeutic measures.

- (b) Occlusion: development and morphology.
- (c) Development and growth: cranium.
- (d) Stainless steel: properties and uses.
- (e) Orthodontic devices: requirements and types.
- (f) Changes in tissue.
- (g) Malocclusion: classification and aetiology.
- (h) Examination, aids, diagnosis and planning.
- (i) Bad habits.
- (j) Preventive and interceptive orthodontics.
- (k) Treatment: principles, problems with space, methods.
- (l) The role of extraction.
- (m) Retention.

## Orthodontics 372 (ORD 372)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	7.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
<b>Contact time</b>	1 discussion class per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Orthodontics
<b>Period of presentation</b>	Year

## Module content

This module is chosen as an elective and planned around orthodontics as a main field of study. This module will include:

- Cephalometric analysis
- Different fixed orthodontic techniques
- Orthodontic procedures pertaining to the scope of oral hygiene
- Presentation of seminars

## Orthodontics 380 (ORD 380)

**Qualification** Undergraduate

**Module credits** 14.00

**Programmes** BChD

**Prerequisites** BOK 280, (BoK 281 or (BOK 285, 287)), BOK 283, GNK 286, GNK 288, GPS 280, IKT 200, SMO 211, SMO 281

**Contact time** 1 discussion class per week, 1 lecture per week, 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Orthodontics

**Period of presentation** Year

## Module content

The modules in this subject extend over the third, fourth and fifth years of study. Lectures, practical and clinical work, seminars and discussions on the following:

- a. Basic principles and therapeutic measures.
- b. Occlusion: development and morphology.
- c. Development and growth: cranium.
- d. Stainless steel: properties and uses.
- e. Orthodontic devices: requirements and types.
- f. Changes in tissue.
- g. Malocclusion: classification and aetiology.
- h. Examination, aids, diagnosis and planning.
- i. Bad habits.
- j. Preventive and interceptive orthodontics.
- k. Treatment: principles, problems with space, methods.
- l. The role of extraction.
- m. Retention.

## Orthodontics 470 (ORD 470)

**Qualification** Undergraduate

**Module credits** 21.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Orthodontics

**Period of presentation** Year

### Module content

The modules in this subject extend over the third, fourth and fifth years of study. Lectures, practical and clinical work, seminars and discussions on the following: (a) Basic principles and therapeutic measures.

<b>Period of presentation</b>	Year

### Thesis: Orthopaedics 990 (ORT 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Orthopaedics</a> <a href="#">PhD Orthopaedics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Orthopaedics
<b>Period of presentation</b>	Year

### Occupational therapy 100 (OTX 100)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 2 discussion classes per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

## Module content

The study of occupational therapy roles, scope, domain, core knowledge and professional ethics. Includes the application of the process of occupational therapy intervention, tools of practice and theoretical frameworks.

### Occupational therapy 211 (OTX 211)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [BOccTher](#)

**Prerequisites** ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 163, OCX 100, OTX 100, MTL 180, GNK 286, CIL 121 or AIM 101 or AIM 111 and 121, ELH 121 and 122

**Contact time** 2 other contact sessions per week, 2 practicals per week, 2 seminars per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 2

## Module content

Sensory-motor disorders: The study of occupational therapy evaluation and intervention of sensory-motor disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

### Occupational therapy 212 (OTX 212)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes** [BOccTher](#)

**Prerequisites** ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, OCX 100, OTX 100, MTL 180, GNK 286, CIL 121 or AIM 101 of AIM 111 and 121, ELH 121 and 122

**Contact time** 2 other contact sessions per week, 2 practicals per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 3

## Module content

Mental health and cognition: The study of occupational therapy evaluation and intervention of psycho-social and cognitive disorders in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected disorders.

### Occupational therapy 221 (OTX 221)

**Qualification** Undergraduate

**Module credits** 12.00

<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, OCX 100, OTX 100, MTL 180, GNK 286, 121 or AIM 101 or AIM 111 and 121, ELH 121 and 122
<b>Contact time</b>	2 other contact sessions per week, 2 practicals per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 4

#### Module content

Neurology: The study of occupational therapy evaluation and intervention of neurological conditions in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

### Occupational therapy 222 (OTX 222)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	ANA 151, ANA 152, ANA 161, ANA 162, FSG 161, FSG 162, OCX 100, OTX 100, MTL 180, GNK 286, CIL 121 or AIM 101 or AIM 111 and 121, ELH 121 and 122
<b>Contact time</b>	2 practicals per week, 2 seminars per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Quarter 1

#### Module content

Biomechanics: The study of occupational therapy evaluation and intervention of the conditions of the musculoskeletal system in all age groups. Includes the pathology, causes, clinical picture and prognosis of selected conditions.

### Occupational therapy 311 (OTX 311)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	FSG 251, FSG 252, FSG 261, FSG 262, OCX 200, OTX 212, OTX 211, RPD 200, OTX 221, OTX 222
<b>Contact time</b>	2 practicals per week, 2 seminars per week, 20 other contact sessions per week, 5 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy

**Period of presentation** Semester 1

### Module content

Continued study of occupational therapy for patients/clients with physical and neurological conditions. Facilitation of occupational performance through the application of assistive technologies and adaptations. Includes therapeutic apparatus, control interfaces, prosthesis and the selection, design and manufacture of splints.

## Occupational therapy 322 (OTX 322)

**Qualification** Undergraduate

**Module credits** 15.00

**Programmes** [BOccTher](#)

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, OTX 212, OTC 211, RPD 200, OTX 221, OTX 222

**Contact time** 2 practicals per week, 2 seminars per week, 4 other contact sessions per week, 5 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Semester 2

### Module content

The application of therapeutic group techniques, stress management and interpersonal techniques in counselling. Includes the study of occupational therapy evaluation and intervention of psychiatric disorders in childhood.

## Occupational therapy 401 (OTX 401)

**Qualification** Undergraduate

**Module credits** 35.00

**Programmes** [BOccTher](#)

**Prerequisites** ANP 210, RPD 380, SEP 110/ZUL 110, OCX 303, OCX 311, OCX 312, OTX 311, OTX 322, ELH 121, ELH 122

**Contact time** 1 discussion class per week, 2 seminars per week, 4 other contact sessions per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

Continued study of occupational therapy for patients/clients with physical and neurological conditions. Integration and application of knowledge and skills in a physical/neurological fieldwork setting.

## Occupational therapy 402 (OTX 402)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	35.00
<b>Programmes</b>	<a href="#">BOccTher</a>
<b>Prerequisites</b>	ANP 210, RPD 380, SEP 110/ZUL 110, OCX 303, OCX 311, OCX 312, OTX 311, OTX 322, ELH 121, ELH 122
<b>Contact time</b>	1 discussion class per week, 2 seminars per week, 4 other contact sessions per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

Continued study of occupational therapy for mental healthcare users. Integration and application of knowledge and skills in a mental health fieldwork setting.

## Occupational therapy 800 (OTX 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00
<b>Programmes</b>	<a href="#">MOccTher</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

\*Attendance module only  
Participation in discussion classes, ward rounds and clinics.

## Occupational therapy 801 (OTX 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MOccTher Hand Therapy (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

An in-depth study of upper limb biomechanics and ergonomics, evaluation and treatment techniques for hand and upper limb injuries and conditions; advanced clinical management.

## Occupational therapy 802 (OTX 802)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MOccTher Neurology (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

An in-depth study of occupational therapy as applicable to neurological conditions in adults.

## Occupational therapy 803 (OTX 803)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MOccTher Paediatrics (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

An in-depth study of determining and treatment of children with different diagnoses.

## Occupational therapy 804 (OTX 804)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	40.00
<b>Programmes</b>	<a href="#">MOccTher Psychiatry (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Occupational Therapy
<b>Period of presentation</b>	Year

### Module content

An in-depth study of occupational therapy as applicable to psychiatric disturbances in adults and/or children.

## Occupational therapy 805 (OTX 805)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	68.00
<b>Programmes</b>	<a href="#">MOccTher Activity Theory (Coursework)</a>
<b>Language of tuition</b>	Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

### Module content

An in-depth study of (i) classification, development of activity participation and its influence on health; (ii) bio-psychosocial perspectives on activity participation.

## Dissertation: Occupational therapy 890 (OTX 890)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MOccTher](#)

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Year

## Mini-dissertation: Occupational therapy 891 (OTX 891)

**Qualification** Postgraduate

**Module credits** 60.00

**Programmes** [MOccTher Activity Theory \(Coursework\)](#)  
[MOccTher Hand Therapy \(Coursework\)](#)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [PGDip Family Medicine](#)

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

## Module content

Study of primary care over the whole quadruple burden of disease (HIV/AIDS, TB, maternal and child care, non-communicable diseases, trauma and violence) and in terms of the morbidity profile of primary care in South Africa. This include acute (emergency) care, chronic care and in some cases care provided in the midwife obstetric unit. Up-skilling to ensure that primary care doctors are familiar with the latest national guidelines across the whole burden of disease, and refreshed of all the clinical skills required.

### Community-orientated primary care 700 (PCP 700)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [PGDip Family Medicine](#)

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Year

## Module content

Study of the concept of community-orientated primary care. Study of the five principles of community-orientated primary care; Local health and institutional analysis, comprehensive care, equity, practice with science and service integration around users. A practical guide to doing community-orientated primary care.

### Plastic surgery 800 (PCR 800)

**Qualification** Postgraduate

<b>Qualification</b>	Postgraduate
----------------------	--------------

<b>Module credits</b>	100.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Prosthodontics
<b>Period of presentation</b>	Year

### Implantology 701 (PDI 701)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">PGDip Dentistry Implantology</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Prosthodontics
<b>Period of presentation</b>	Year

### Periodontology 171 (PDL 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BOH</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Semester 2

#### Module content

This module will provide the oral hygiene student with knowledge of the:

- Macro- and microscopic features of the periodontium
- Function of the periodontium
- Assessment and diagnosis of periodontal diseases
- Determine risk factors of periodontal diseases

### Periodontology 271 (PDL 271)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	11.00
<b>Programmes</b>	<a href="#">BOH</a>
<b>Prerequisites</b>	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

**Contact time** 1 discussion class per week for 4 weeks, 1 practical per week for 30 weeks, 2 lectures per week for 16 weeks

**Language of tuition** Module is presented in English

**Department** Periodontics and Oral Medicine

**Period of presentation** Year

### Module content

This module is a continuation of Periodontology 171 and will provide the oral hygiene student with knowledge of:

- Periodontal diseases
- Pathogenesis of periodontal diseases
- Implantology
- Surgical procedures

The module will also enable the oral hygiene student to:

- Compile, exercise and evaluate a comprehensive and effective preventive, therapeutic and maintenance plan for the periodontal patient
- Actively participate in the prevention, treatment and maintenance of periodontal conditions

## Periodontology 370 (PDL 370)

**Qualification** Undergraduate

**Module credits** 7.00

**Prerequisites** BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281

**Contact time** 1 practical per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Periodontics and Oral Medicine

**Period of presentation** Year

## Module content

- i. The modules in the subject are offered in the third, fourth and fifth years of study.
- ii. The depth and weighting of the knowledge base and the clinical application and interpretation of the modules will be dependent on the year of study.
- iii. The goal is to educate and train general dental practitioners who will be able to apply their expertise and knowledge in the prevention and treatment of periodontal diseases in both the public and private sectors within the scope of the dental practitioner. In order to achieve this, the student must know the embryology, normal anatomy, histology and functions of the periodontium. The student must understand the aetiology, pathogenesis, the risk and other factors associated with the various forms of periodontal diseases, and their classification. The student must be able to perform a comprehensive clinical examination and use the information so gained to arrive at a diagnosis and treatment plan. The student must become proficient in applying preventive control methods, to supply oral hygiene methods and applicable instructions to the patient; motivating the patient; scaling and root planning; be able to correctly evaluate the tissue response to these procedures; be able to differentiate clinically between the various forms of periodontal disease and be able to perform clinical procedures associated with the treatment of early and moderate stages of periodontal diseases. The student must understand the treatment possibilities associated with established and advanced periodontal diseases, including regenerative procedures and implant treatment, and when and to whom, such patients should be referred for specialist diagnosis and treatment, should this be necessary.

## Periodontology 372 (PDL 372)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	7.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Year

### Module content

The module will provide the oral hygiene student with an in depth overview of the current status of Periodontics with the emphasis on the clinical application, understanding and role of the oral hygienist as part of the team. The purpose is to train the oral hygiene student to be competent in applying his/her expertise and knowledge in the prevention and treatment of periodontal diseases.

## Periodontology 380 (PDL 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	9.00

<b>Programmes</b>	BChD
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Year

### Module content

- i. The modules in the subject are offered in the third, fourth and fifth years of study.
- ii. The depth and weighting of the knowledge base and the clinical application and interpretation of the modules will be dependent on the year of study.
- iii. The goal is to educate and train general dental practitioners who will be able to apply their expertise and knowledge in the prevention and treatment of periodontal diseases in both the public and private sectors within the scope of the dental practitioner. In order to achieve this, the student must know the embryology, normal anatomy, histology and functions of the periodontium. The student must understand the aetiology, pathogenesis, the risk and other factors associated with the various forms of periodontal diseases, and their classification. The student must be able to perform a comprehensive clinical examination and use the information so gained to arrive at a diagnosis and treatment plan. The student must become proficient in applying preventive control methods, to supply oral hygiene methods and applicable instructions to the patient; motivating the patient; scaling and root planning; be able to correctly evaluate the tissue response to these procedures; be able to differentiate clinically between the various forms of periodontal disease and be able to perform clinical procedures associated with the treatment of early and moderate stages of periodontal diseases. The student must understand the treatment possibilities associated with established and advanced periodontal diseases, including regenerative procedures and implant treatment, and when and to whom, such patients should be referred for specialist diagnosis and treatment, should this be necessary.

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Contact time</b>	20 practicals per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Periodontics and Oral Medicine

**Period of presentation** Year

### Dissertation: Periodontics and oral medicine 891 (PDL 891)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MChD Periodontics and Oral Medicine](#)

**Language of tuition** Module is presented in English

**Department** Periodontics and Oral Medicine

**Period of presentation** Year

### Thesis: Periodontology and oral medicine 990 (PDL 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [PhD Dentistry](#)

**Language of tuition** Module is presented in English

**Department** Periodontics and Oral Medicine

**Period of presentation** Year

### Psychopathology 801 (PGP 801)

**Qualification** Postgraduate

**Module credits** 28.00

**Programmes** [MOccTher Psychiatry \(Coursework\)](#)

**Language of tuition** Module is presented in English

**Department** Psychiatry

**Period of presentation** Year

#### Module content

An indepth study of the psychopathology diseases applicable to psychiatry.

### Assignment in public health 770 (PHA 770)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Assignment in public health 771 (PHA 771)

**Qualification** Postgraduate

**Module credits** 30.00

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Learning in public health 710 (PHM 710)

**Qualification** UPOne

**Module credits** 10.00

**Programmes** [PGDip in Public Health \(UPOne\)](#)

**Prerequisites** No prerequisites.

**Contact time** Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

#### Module content

The history and scope of public health. The importance of self-motivated deep learning as opposed to passive learning. Learning the value of group work. The use of the internet and the library to research areas of study. The writing of literature reviews and assignments. The avoidance of plagiarism. Improving English writing skills. Elements of human rights and public health ethics. Students will be given assignments involving a short literature search and applied writing practice. They will also learn how to use the internet and its information with discretion, and also how to use the UP on-line learning platforms.

### Epidemiology and biostatistics research project 750 (PHM 750)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

A protocol for a quantitative epidemiological study, or a mixed methods study, that is suitable for presentation to the ethics committee at the start of the MSc programme should the student proceed to the MSc Epidemiology and biostatistics. A protocol for secondary analysis of data or a systematic review that incorporates an appropriate meta-analysis would also be acceptable.

## Part II Epidemiology and biostatistics examination 752 (PHM 752)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	0.00
<b>Prerequisites</b>	Must have passed the Part II coursework modules with the exception of the Part II integrative assignment.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

Examination of Part II learning.

## Learning in public health 770 (PHM 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	50 hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

Special introduction to fundamentals in Executive Leadership in health  
The emerging student will be taught the fundamentals in executive leadership in healthcare systems which will form the basic platform or foundation for understanding the challenges for application of leadership modalities at the different levels of healthcare service delivery in the public health service and how to begin to think and analyse how the principles of executive leadership at their level of appointment can improve health service delivery.

## Diploma examination: Occupational health (Part 1) 771 (PHM 771)

## Learning in public health 870 (PHM 870)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Module content

This is the first (one-week) module at the beginning of the year focusing on learning. At the end of this week, you will have a much better understanding of what you actually want to achieve in public health and what you need to learn to get there. You will probably also have changed your views on learning: from individual surface learning and memorization, to valuing deep learning often in a group context. Finally, you will have achieved the ability to use the ever-increasing knowledge in health, philosophy, and ethics that are generated on the internet to your own best advantage.

## Public health examination Part 1 871 (PHM 871)

<b>Period of presentation</b>	Year

### Dissertation: Periodontology and oral medicine 890 (PMG 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	240.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Periodontics and Oral Medicine
<b>Period of presentation</b>	Year

### Public oral health 170 (POH 170)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Semester 2

#### Module content

- Principles of public oral health
- Determinants of health
- Definitions of health, disease and illness
- Public health approaches to prevention

### Public oral health 270 (POH 270)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	GNK 286, GNK 289, GPS 280, FSG 270, MDB 270, IDE 270, ODO 270, PRD 270, ZUL 110, AFR 111
<b>Contact time</b>	1.5 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry

**Period of presentation** Year

### Module content

- Orientation to health sciences research
- Ethical consideration in the conduct of health sciences research
- An overview of the research process
- Selecting or identifying research problems
- The literature review
- Refining and defining the research question, formulating a hypothesis and preparing a research proposal
- Quantitative research
- Non-traditional and qualitative research designs
- Sampling
- Data collection and Data quality
- Data analysis
- Research reports and report evaluation

### Public oral health 280 (POH 280)

**Qualification** Undergraduate

**Module credits** 15.00

**Programmes** BChD

**Prerequisites** GNK 286, GNK 289, GPS 280, FSG 270, MDB 270, IDE 270, ODO 270, PRD 270, ZUL 110, AFR 111

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

### Module content

- Orientation to health sciences research
- Ethical consideration in the conduct of health sciences research
- An overview of the research process
- Selecting or identifying research problems
- The literature review
- Refining and defining the research question, formulating a hypothesis and preparing a research proposal
- Quantitative research
- Non-traditional and qualitative research designs
- Sampling
- Data collection and Data quality
- Data analysis
- Research reports and report evaluation

### Public oral health 370 (POH 370)

**Qualification** Undergraduate

**Module credits** 4.00

**Programmes** BChD

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

#### Module content

- Oral epidemiology
- Prevention and oral health promotion
- Health services (systems)

### Public oral health 371 (POH 371)

**Qualification** Undergraduate

**Module credits** 8.00

**Programmes** BOH

**Prerequisites** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271

**Contact time** 1 lecture per week, 2 practicals per week over 10 weeks

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

#### Module content

This module is chosen as an elective to further studies in the field of community dentistry. This module will provide the oral hygiene student with a deeper understanding and skills in the fields of Preventive Dentistry, Oral Epidemiology, and Administration and Management. This will enable him/her to be able to develop and manage a needs-related preventive programme for the individual high risk patient and also for a specific community or population. It will be expected of the student to submit a minor research report demonstrating his/her understanding and skills in the field of public oral health. The main subject consists of four syllabus themes, namely:

- Preventive dentistry
- Oral epidemiology
- Project management
- Minor research report

### Public oral health 470 (POH 470)

**Qualification** Undergraduate

**Module credits** 6.00

### Policy practice seminar 770 (PPS 770)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** No prerequisites.

**Contact time** 50 hours per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

#### Module content

The fundamentals of health policy practice implementation will be discussed and methods of analysis will be linked to how the best effective health policy processes can be structured to respond to the health needs. The policy chain from inception to implementation will be analysed to establish why SA health policies, which are rated as very good, never gets implemented and where they are implemented, the results are less than optimal. How can policy practice assist executive leaders in health to work smarter, with fewer resources and achieve greater results for effective service delivery. The role of the community in the policy development and practice process will analysed to see what lessons can be learned to cut down on bureaucracy and red tape.

### Policy practice seminar 771 (PPS 771)

**Qualification** Postgraduate

**Module credits** 5.00

**Programmes** [PGDip Health Systems Management Executive Leadership](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Sports practical 100 (PRC 100)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BSportSci](#)

<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Year

#### Module content

\*Closed – requires departmental selection.

This module will serve as the foundation for swimming, netball, athletics and gymnasium movement skill acquisition. The module serves as exposure to and experience in the movement skills practiced in swimming, netball, athletics and gymnasium. This will aid the Sport Scientist and Biokineticist to better understand and condition clients and patients practicing these sports. Sports-specific skills, team situation; rules and regulations, refereeing; game analysis; coaching.

### Sports practical (Basic) 150 (PRC 150)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Contact time</b>	5 practicals per week
<b>Language of tuition</b>	Module is presented in English

<b>Period of presentation</b>	Year

## Module content

\*Closed - requires departmental selection

This module will serve as the foundation for rugby, hockey, cricket and tennis movement skill acquisition. This module serves as exposure to and experience in the movement skills practiced in rugby, hockey, cricket and tennis. This will aid the Sport Scientist and Biokineticist to better understand and condition clients and patients practicing these sports.

## Exercise science practice 301 (PRC 301)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Year

## Module content

\*Closed – requires departmental selection

This module serves as the platform for supervised practical training and application in exercise testing and interpretation for sport-related physical fitness components, exercise programme design and implementation for sport-related physical fitness, and sport science work experience. This module requires the student to have accumulated 45 hours of Sport First aid.

## Prosthodontics 270 (PRD 270)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	3.00
<b>Programmes</b>	<a href="#">BChD</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Prosthodontics
<b>Period of presentation</b>	Year

## Module content

- Basic tooth morphology
- Introduction to dental laboratory procedures in Removable Prosthodontics

## Prosthodontics 370 (PRD 370)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	41.00
<b>Prerequisites</b>	BOK 280,BOK 281,BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Prosthodontics
<b>Period of presentation</b>	Year

### Module content

Examination and evaluation of the denture patient, principles and taking of impressions, determination of vertical and horizontal jaw relations and facial bow recording. Aesthetics. Fitting and placing of the finished denture. Post treatment. Clinical aspects of manufacturing of complete and partial dentures, obturators and special apparatus.

## Prosthodontics 380 (PRD 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	43.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	BOK 280,BOK 281,BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	2 discussion classes per week, 3 lectures per week, 3 practicals per week

<b>Contact time</b>	1 lecture per week, 2 discussion classes per week
<b>Language of tuition</b>	Module is presented in English

---

**Department** Community Dentistry

**Period of presentation** Year

### Module content

Patients with special needs pose unique challenges, especially in relation to the need for an inventive and carefully planned approach suited to each individual's needs. This module will therefore equip the oral hygiene student to manage patients in this regard. The focus is on adapting and modifying the approach and management of the patient according to the specific need for instance pregnancy, physical and mental disabilities, medical conditions and age.

## Psychiatry 800 (PSI 800)

<b>Period of presentation</b>	Year

## Implementation of quality improvement modalities (strategies) in the health system 771 (QIM 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	50 hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine

**Period of presentation** Year

### Module content

Participants will be required to identify the current quality challenges at their place of work and develop an advanced quality improvement strategic plan which they can implement. The plan must respond to the recent audit of facilities conducted by the Department of Health. Participants will be required upon returning to their place of work to implement the plan and after 6 months report on the results and what improvements had occurred as a result of their plans. The key factors to be addressed include waiting times, availability of medication, cleanliness of facilities, the long queues and patient satisfaction. Participants will be taught quality improvement strategies related to executive leadership, learning and organisational change.

## Implementation of quality improvement modalities (strategies) in the health system 772 (QIM 772)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Health Systems Management Executive Leadership](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Radiography 271 (RAD 271)

**Qualification** Undergraduate

**Module credits** 20.00

**Prerequisites** ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

**Contact time** 1 lecture per week for 30 weeks, 2 practicals per week (30 week period)

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

## Module content

The oral hygiene student must be competent to produce a variety of intra- and extra-oral radiographs of good diagnostic quality. He/she must also recognise relevant anatomical landmarks on a radiograph and distinguish between normal and abnormal appearances. He/she must at all times be conscious of possible deleterious effects of radiation on biological systems.

### Radiography 272 (RAD 272)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	11.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

### Diagnostic imaging 370 (RAD 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Radiography 371 (RAD 371)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
<b>Contact time</b>	1 lecture per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Module content

This module is aimed at providing the oral hygiene student with the necessary skills, attitude and relevant knowledge by studying the following aspects in radiation physics relevant to dentistry:

- Electromagnetic waves – their properties and behaviour
- X-rays – their specific properties, sources of X-rays and production of X-rays
- Construction of the X-ray tube
- Accurate image formation
- Interaction of photons with living tissues
- Radiation biology
- Radiation protection
- ALARA principle
- Quality control measures

This module furthermore entails practical work in the Radiology section.

## Radiography 372 (RAD 372)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes** BOH

**Prerequisites** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271.

**Contact time** 1 lecture per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Module content

This module is aimed at providing the oral hygiene student with the necessary skills, attitude and relevant knowledge by studying the following aspects in radiation physics relevant to dentistry:

- Electromagnetic waves – their properties and behaviour
- X-rays – their specific properties, sources of X-rays and production of X-rays
- Construction of the X-ray tube
- Accurate image formation
- Interaction of photons with living tissues
- Radiation biology
- Radiation protection
- ALARA principle
- Quality control measures

This module furthermore entails practical work in the Radiology section.

### Diagnostic imaging 380 (RAD 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	14.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

### Diagnostic imaging 470 (RAD 470)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	13.00
<b>Prerequisites</b>	GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, GPS 370, TBW 370, ODO 370, PDL 370, ORD 370, OFC 370, TK 370, RAD 370
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Year

#### Module content

Diagnostic imaging 370/470 is a two year course delivered during the 3rd and 4th years of the BChD programme. It deals with all aspects of radiographic imaging of the maxillofacial region appropriate to the Dentist. Diagnostic imaging 370 is delivered during BChD III as a promotion course. Diagnostic imaging 470 is an examination course delivered during BChD IV. The purpose of Diagnostic imaging 470 is:

- To formalise teaching and examination of Diagnostic Imaging 370/470.
- To certify students' ability to apply knowledge obtained in Diagnostic Imaging 370 to clinical and practical situations of Diagnostic Imaging.
- To certify that students act professionally during clinical situations of Diagnostic Imaging.

### Diagnostic imaging 480 (RAD 480)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	21.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, GPS 370, TBW 370, ODO 370, PDL 370, ORD 370, OFC 370, TK 370, RAD 370
<b>Contact time</b>	1 discussion class per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English

### Diagnostic imaging 570 (RAD 570)

**Qualification** Undergraduate

**Module credits** 8.00

**Prerequisites** TBW 470,ODO 470,MFP 470,PDL 470,ORD 470,OFC 470,PTK 470,GAP 470,TMZ 470,RAD 470

**Contact time** 1 discussion class per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Semester 1

### Module content

Diagnostic imaging 570 is an attendance course presented during the first semester of BChD V. The purpose of the course is:

- To formalise teaching and formative assessment of final year students' clinical and diagnostic skills in Diagnostic imaging.
- To develop students' confidence in clinical aspects of Diagnostic imaging.
- To ensure radiographic service rendering in Diagnostic imaging by senior (5th year) students while 4th year students are in training.

### Diagnostic imaging 580 (RAD 580)

**Qualification** Undergraduate

**Module credits** 7.00

**Programmes** BChD

**Prerequisites** TBW 470,ODO 470,MFP 470,PDL 470,ORD 470,OFC 470,PTK 470,GAP 470,TMZ 470,RAD 470

**Contact time** 1 discussion class per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Semester 1

### Module content

Diagnostic imaging 580 is an attendance course presented during the first semester of BChD V. The purpose of the course is:

- To formalise teaching and formative assessment of final year students' clinical and diagnostic skills in Diagnostic imaging.
- To develop students' confidence in clinical aspects of Diagnostic imaging.
- To ensure radiographic service rendering in Diagnostic imaging by senior (5th year) students while 4th year students are in training.

### Radiography 700 (RAD 700)

**Qualification** Postgraduate

**Module credits** 90.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Module content

Advanced dental radiography.

### Introductory radiography 701 (RAD 701)

**Qualification** Postgraduate

**Module credits** 90.00

**Programmes** [PGDip Dentistry Radiography](#)

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Introductory radiography 702 (RAD 702)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes**

- PGDip Dentistry Aesthetic Dentistry
- PGDip Dentistry Community Dentistry
- PGDip Dentistry Dental Materials
- PGDip Dentistry Endodontics
- PGDip Dentistry Forensic Odontology
- PGDip Dentistry Implantology
- PGDip Dentistry Oral Medicine
- PGDip Dentistry Oral Microbiology
- PGDip Dentistry Oral Pathology
- PGDip Dentistry Oral Surgery
- PGDip Dentistry Orthodontics
- PGDip Dentistry Pedodontics
- PGDip Dentistry Periodontology
- PGDip Dentistry Practice Management
- PGDip Dentistry Preventive Dentistry
- PGDip Dentistry Prosthetics
- PGDip Dentistry Prosthodontics
- PGDip Dentistry Radiography
- PGDip Dentistry Restorative Dentistry

<b>Language of tuition</b>	Separate classes for Afrikaans and English
<b>Department</b>	Oral Pathology and Oral Biology
<b>Period of presentation</b>	Semester 1

**Introductory radiography 710 (RAD 710)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.

### **Radiographic anatomy 100 (RAN 100)**

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

## Module content

General introduction to anatomy: Anatomical terminology, surface and regional anatomy, histology of basic tissues; ossification, healing and repair.

Introduction to osteology.

Regional anatomy I: Thoracic skeleton and thoracic soft tissues; osteology; joints and soft tissues of the extremities; osteology and joints of the vertebral column; abdominal surface anatomy; osteology and soft tissue of the pelvis. Skull I: Cranium and facial bones.

Radiographic anatomy I: Regional radiographic anatomy, with emphasis on the skeletal components.

## Radiographic anatomy 280 (RAN 280)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	RFI 110,MTL 180,RAN 100,FSG 161,FSG 162,RAW 182,RAW 180
<b>Contact time</b>	1 discussion class per week, 1 other contact session per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

## Module content

Systemic anatomy I: Digestive and urogenital systems.

Sensory organs: Skin; eye; ear; nose; tongue.

Skull II: Advanced osteology; base of cranium; openings and sinuses.

Radiographic anatomy II: Systemic anatomy with emphasis on soft tissue components.

## Radiographic anatomy 380 (RAN 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	RFI 210,RFI 211,RAN 280,FSG 251,FSG 252,FSG 262
<b>Contact time</b>	1 discussion class per week, 1 practical per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Year

## Module content

Systemic anatomy II: Female reproductive system and breast; Cardiovascular system; Cerebrospinal fluid system. Introduction to neuroanatomy.

Regional cross-sectional anatomy: Cranium, brain; thorax; abdomen; pelvis and limbs.

Radiographic anatomy III: Systemic and cross-sectional anatomy with emphasis on three-dimensional reconstruction.

## Radiographic anatomy 700 (RAN 700)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes** [BRadHons Diagnostics](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 1

## Module content

Integration of anatomical concepts related to the general as well specialised imaging procedures specific to radiographic technique and image interpretation regarding the thorax, abdomen, pelvis, head and neck, vertebral column, the nervous system: brain and upper and lower limbs.

## Radiography 180 (RAW 180)

**Qualification** Undergraduate

**Module credits** 50.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 1 seminar per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

(a) Introduction to radiography. Concepts of ethics, profession and professionalism. Professional standards in radiography. Communication skills: interpersonal and scientific. Radiation protection concepts and equipment. Principles of infection control. Radiographic procedures and positioning principles. Care of the patient. Pathological condition. Related imaging modalities.

(b) Patients with special problems. Handling of paediatric patients and geriatric patients.

(c) Radiographic examinations: thorax, abdomen, extremities, hip, pelvis, spine and skull. Theoretical and practical instruction is used to integrate basic sciences and clinical radiography. Procedural considerations and positioning techniques. Selection of technique factors. Radiation protection. Pathological conditions and film evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma.

## Radiographic imaging 182 (RAW 182)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 seminar per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

Introduction: Discovery of X-rays, processing principles, handling of X-ray equipment. X-beam: production of X-rays, attenuation.

Properties of the radiographic image: visibility and geometric properties.

Image formation: interaction between X-rays and the human body and subject contrast.

Primary exposure factors: mAs, kVp and SID. AEC. Principles of technique charts. Image recording: darkrooms, cassettes, intensifying screens, efficiency of rare earth intensifying screens and X-ray film construction.

Control of scatter radiation: production of scatter, effect of scattered radiation on the image, beam restriction devices, grids and grid efficiency.

Geometry: focal spot size, SID, OID, X-ray beam/body part/film alignment, influence of distances and other variables on the geometric properties of the image. Introduction to digital radiography.

## Radiography 185 (RAW 185)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	48.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

(a) Introduction to radiography. Concepts of ethics, profession and professionalism. Professional standards in radiography. Communication skills: interpersonal and scientific. Radiation protection concepts and equipment. Principles of infection control. Radiographic procedures and positioning principles. Care of the patient. Pathological condition. Related imaging modalities.

(b) Patients with special problems. Handling of paediatric patients and geriatric patients.

(c) Radiographic examinations: thorax, abdomen, extremities, hip, pelvis, spine and skull. Theoretical and practical instruction is used to integrate basic sciences and clinical radiography. Procedural considerations and positioning techniques. Selection of technique factors. Radiation protection. Pathological conditions and film evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma.

## Radiographic imaging 186 (RAW 186)

<b>Qualification</b>	Undergraduate
----------------------	---------------

<b>Module credits</b>	19.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

#### Module content

Introduction: Discovery of X-rays, processing principles, handling of X-ray equipment. X-beam: production of X-rays, attenuation.

Properties of the radiographic image: visibility and geometric properties.

Image formation: interaction between X-rays and the human body and subject contrast.

Primary exposure factors: mAs, kVp and SID. AEC. Principles of technique charts. Image recording: darkrooms, cassettes, intensifying screens, efficiency of rare earth intensifying screens and X-ray film construction.

Control of scatter radiation: production of scatter, effect of scattered radiation on the image, beam restriction devices, grids and grid efficiency.

Geometry: focal spot size, SID, OID, X-ray beam/body part/film alignment, influence of distances and other variables on the geometric properties of the image. Introduction to digital radiography.

### Radiography 280 (RAW 280)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	54.00
<b>Prerequisites</b>	RAN 100,RFI 110,FSG 161,FSG 162,RAW 180,RAW 182,MTL 180
<b>Contact time</b>	1 lecture per week, 3 discussion classes per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

#### Module content

Skeletal system: Procedures and techniques for: positioning, patient care, selection of technique factors, radiation protection, pathological conditions and film evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma. Alternative imaging and film principles and procedures. Apparatus. Radiation protection.

Radiographic procedures: Execution of radiographic examinations and procedures, selection of technique factors, radiation protection, problem-solving, pathological conditions and film evaluation for neonatal and mobile unit procedures. Orthopaedic theatre procedures. Soft tissue contrast media examinations. Applied nursing sciences. Research principles

Practical implementation: Compilation of a portfolio. Theoretical and practical tuition are used to integrate science and clinical radiography.

### Radiographic imaging 282 (RAW 282)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Prerequisites</b>	RAN 100,RFI 110,FSG 161,FSG 162,RAW 180,RAW 182,MTL 180

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Film evaluation. Application of technique factors, compiling of technique charts.

Films, film technology, image formation and sensitometric properties.

Processing, monitoring the processor and processing area.

Darkroom and design, chemicals.

Quality assurance tests.

Digital radiography: image formation and processing.

## Radiation therapy and nuclear medicine 284 (RAW 284)

**Qualification** Undergraduate

**Module credits** 10.00

**Prerequisites** RAN 100,RFI 110,FSG 161,FSG 162,RAW 180,RAW 182,MTL 180

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Quarter 4

### Module content

(a) Radiobiology: Cell survival curves and target theories, radiation effects on tissue, tissue and organ radio sensitivity. Radiation pathology, acute and chronic effects, late effects of radiation. Clinical radiobiology:

Radiation therapy, tumour radiobiology, fractionation, iso-effect formulae.

(b) Introduction to radiation therapy: Origin and incidence of cancer, diagnoses and staging, treatment and modalities. Treatment methods in radiation therapy. Preparation for external beam irradiation. Dosage. Biological principles of radiation. Effects of radiation on normal tissue.

(c) Introduction to nuclear medicine: Principles of nuclear physics and nuclear medicine, nuclear instrumentation, radio chemical pharmacology. Basic approach to clinical nuclear medicine and relevant techniques.

## Radiography 285 (RAW 285)

**Qualification** Undergraduate

**Module credits** 52.00

**Prerequisites** RAN 100, RFI 110, FSG 161, FSG 162, RAW 185, RAW 186, MTL 180

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Skeletal system: Procedures and techniques for: positioning, patient care, selection of technique factors, radiation protection, pathological conditions and film evaluation. Problem-solving. Execution of radiographic examinations and procedures. Trauma. Alternative imaging and film principles and procedures. Apparatus. Radiation protection.

Radiographic procedures: Execution of radiographic examinations and procedures, selection of technique factors, radiation protection, problem-solving, pathological conditions and film evaluation for neonatal and mobile unit procedures. Orthopaedic theatre procedures. Soft tissue contrast media examinations. Applied nursing sciences. Research principles

Practical implementation: Compilation of a portfolio. Theoretical and practical tuition are used to integrate science and clinical radiography.

## Radiographic imaging 286 (RAW 286)

**Qualification** Undergraduate

**Module credits** 19.00

**Prerequisites** RAN 100, RFI 110, FSG 161, FSG 162, RAW 185, RAW 186, MTL 180

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Film evaluation. Application of technique factors, compiling of technique charts.

Films, film technology, image formation and sensitometric properties.

Processing, monitoring the processor and processing area.

Darkroom and design, chemicals.

Quality assurance tests.

Digital radiography: image formation and processing.

## Radiation therapy and nuclear medicine 287 (RAW 287)

**Qualification** Undergraduate

**Module credits** 9.00

**Prerequisites** RAN 100, RFI 110, FSG 161, FSG 162, RAW 185, RAW 186, MTL 180

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Quarter 4

## Module content

(a) Radiobiology: Cell survival curves and target theories, radiation effects on tissue, tissue and organ radio sensitivity. Radiation pathology, acute and chronic effects, late effects of radiation. Clinical radiobiology: Radiation therapy, tumour radiobiology, fractionation, iso-effect formulae.

(b) Introduction to radiation therapy: Origin and incidence of cancer, diagnoses and staging, treatment and modalities. Treatment methods in radiation therapy. Preparation for external beam irradiation. Dosage. Biological principles of radiation. Effects of radiation on normal tissue.

(c) Introduction to nuclear medicine: Principles of nuclear physics and nuclear medicine, nuclear instrumentation, radio chemical pharmacology. Basic approach to clinical nuclear medicine and relevant techniques.

## Radiography 380 (RAW 380)

**Qualification** Undergraduate

**Module credits** 52.00

**Prerequisites** FSG 251,FSG 252,FSG 262,GNK 286,RAN 280,RAW 281,RAW 282,RAW 283,RBG 281,RFI 210

**Contact time** 1 lecture per week, 1 seminar per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Cardiovascular system: Imaging equipment: laser imager and dry film imager, construction, operation and films. Digital subtraction and image manipulation, viewing, recording and storing of images. Principles and equipment considerations for cardioangiography and angiography. Selective angiography. Intervention techniques (vascular and non-vascular). Venography. Seldinger technique, contrast media, medication, catheters, guide wires and accessories. Quality assurance and quality control. Patient care. Medico-legal aspects. Research. Case presentations. Pattern recognition. Clinical experience and evaluation.

Clinical evaluation of an excretory urogram that was done theoretically in the 2nd year.

Mammography: Introduction. Principles of soft tissue radiography. Communication and health promotion. Medico-legal aspects. Management of breast disease, patient care and treatment options. Mammography equipment, radiation safety and technique factors. Image receptors. Processing requirements. Positioning principles and special procedures. Systematic evaluation of the images. Different modalities or equipment to demonstrate the breast. Quality assurance and quality control. Case presentation. Research. Pattern recognition. Clinical experience and evaluation.

Hysterosalpingography: Booking procedures, patient-radiographer relationship, procedural considerations and evaluation criteria. Pattern recognition.

Bone densitometry: Principles, bone biology and remodelling, osteoporosis, core competencies for radiographers, physical principles of dual X-ray absorptiometry and other bone densitometry techniques. Clinical experience.

Ultrasound: General principles. Clinical experience.

Computer Tomography: Imaging principles – conventional and spiral. Factors affecting image quality. Contrast media. Protocol for different examinations. Patient care. Case presentation. Research. Pattern recognition. Clinical experience and evaluation.

Magnetic resonance imaging: Imaging principles and image characteristics. Contrast media. Protocol for the different examinations. Patient care. Clinical experience. Myelography.

Research project.

Clinical evaluation and film evaluation of examinations that were done theoretically in the first and second year.

## Radiography practice 382 (RAW 382)

**Qualification** Undergraduate

**Module credits** 30.00

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 1 seminar per week, 2 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Ethics. Law as applied to radiography. Health care. Healthcare delivery. Systems. Health policy (national and international).

Planning of health facilities and services.

General management principles as applied to a radiography department. Purchase specifications processors and basic x-ray equipment. Comparison for clinical use. Accepting criteria.

Radiation safety: Simplifying and standardizing technique. Radiation protection and control (personnel and patients).

Quality assurance: Introduction. Quality patient care and assessment. Reject film analysis and research report.

Quality control tests and corrective action.

Film evaluation.

## Radiography 383 (RAW 383)

**Qualification** Undergraduate

**Module credits** 50.00

**Prerequisites** FSG 251, FSG 252, FSG 262, GNK 286, RAN 280, RAW 281, RAW 286, RAW 283, RBG 281, RFI 210

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

Quality control tests and corrective action.

Film evaluation.

## Quality assurance 780 (RAW 780)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes** [BRadHons Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Semester 2

## Module content

Integration of administrative and management principles. Legal and ethical requirements in management of a radiography department. Drafting a quality assurance programme and manual for a radiography department. Management of reject image analysis compilation of a programme and implantation thereof. Compiling radiation safety protection protocols. Conducting and management of quality control tests on all types of radiation emitting equipment and accessories. Staff evaluations and quality of service programmes.

## Image interpretation 781 (RAW 781)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes** [BRadHons Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Semester 2

### Module content

Advance application of image interpretation principles in image evaluation of the head and neck, chest and abdomen, axial and appendicular skeleton in biplane, three dimensional and cross sectional images. Radiographic report writing skills.

### Computer tomography 782 (RAW 782)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BRadHons Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Semester 2

### Module content

Introduction to principles of CT scan. Image acquisition, processing and image evaluation and interpretation normal as well pathological images of head, neck, thorax, abdomen and musculo-skeletal system. Application of Quality assurance including quality control and radiation safety principles for all investigations and procedures. Knowledge on Contrast media administration for all the different types of procedures and investigations. Patient care. Medico-legal aspects. Clinical application and evaluation by means of case studies.

### Magnetic resonance imaging 783 (RAW 783)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BRadHons Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Semester 2

### Module content

Review of basic MRI principles, image weighting and contrast, spatial encoding, k-space, image formation, instrumentation, MRI safety, trade-offs between parameters, pulse sequences, flow phenomena and basic principles of MRA. Artifacts in MRI/ Contrast agents. Functional imaging techniques and applications for various types of investigations.

## Intervention 784 (RAW 784)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BRadHons Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Semester 2

### Module content

Interventional procedures for both adult and paediatric which includes all specialised radiographic modalities such as CT, MRI and Ultrasound.. Imaging principles and post processing. Intervention equipment considerations for all imaging modalities and accessory equipment for different procedures, investigations and interventions. Contrast media application and drug administration for all the different types of procedures and investigations. Patient care. Medico-legal aspects. Radiation protection. Quality assurance including quality control. Clinical application and evaluation by means of case studies.

## Reproductive biology: Andrology 700 (RBA 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Reproductive Biology Andrology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Urology
<b>Period of presentation</b>	Year

### Module content

This module includes 30 research credits.

## Dissertation: Reproductive biology: Andrology 890 (RBA 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Reproductive Biology Andrology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Urology
<b>Period of presentation</b>	Year

## Thesis: Reproductive biology: Andrology 990 (RBA 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Reproductive Biology Andrology</a> <a href="#">PhD Reproductive Biology</a> <a href="#">PhD Reproductive Biology Andrology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Urology
<b>Period of presentation</b>	Year

## Radiobiology 770 (RBG 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

## Radiobiology 800 (RBG 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

## Radiobiology 801 (RBG 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	36.00
<b>Programmes</b>	<a href="#">MMed Radiation Oncology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Dissertation: Radiobiology 890 (RBG 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	240.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiation Oncology
<b>Period of presentation</b>	Year

### Reproductive biology 700 (RBI 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Reproductive Biology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Year

#### Module content

This module includes 30 research credits.

### Dissertation: Reproductive biology 890 (RBI 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Reproductive Biology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology
<b>Period of presentation</b>	Year

### Thesis: Reproductive Biology 990 (RBI 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00
<b>Programmes</b>	<a href="#">DMed Reproductive Biology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Obstetrics and Gynaecology

**Period of presentation** Year

## Radiochemistry and pharmacology 700 (RCF 700)

**Qualification** Postgraduate

**Module credits** 20.00

**Programmes** [BRadHons Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Definitions, principles, concepts, terminology, notation. Production and purification of radionuclides. Generators: working knowledge, evaluation techniques, quality control. Technegas production. Radiolabelling methods. Characteristics and quality control of radiopharmaceuticals. Biodistribution, pharmacokinetics, metabolism of radiopharmaceuticals. Kit preparation. Diagnostic and therapeutic radiopharmaceuticals, requirements, radiobiological aspects and applications. Hot laboratory: Rules and regulations. Type A, B, C laboratories. Radiopharmacy construction and design. Radiation safety and protection. Relevant instrumentation and equipment hot and cold lab. Handling, storage and waste disposal of radioactive materials. Contamination and decontamination procedures. Radiopharmaceuticals: preparation, dose calculation and measurement. Molecular imaging. Adverse reactions and altered biodistribution.

## Radiobiology, chemistry and pharmacology 800 (RCF 800)

**Qualification** Postgraduate

**Module credits** 36.00

**Programmes** [MMed Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nuclear Medicine

**Period of presentation** Year

## Research project 310 (RCH 310)

**Qualification** Undergraduate

**Module credits** 20.00

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** 3rd-year status

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 1

### Module content

Research methods and process.

## Research project 320 (RCH 320)

**Qualification** Undergraduate

**Module credits** 10.00

**Service modules** Faculty of Natural and Agricultural Sciences

**Prerequisites** RCH 310

**Contact time** 1 discussion class per week, 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Human Nutrition

**Period of presentation** Semester 2

### Module content

Literature study, protocol and statistics (1 l + 1 x 2h discussion).

Preparation of protocol and submission for approval (1 x 2h discussion).

## Research 371 (RCH 371)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [BOH](#)

**Prerequisites** ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Year

### Module content

This module will assist the oral hygienist student to become competent in the area of research by becoming active consumers of research to improve their practice and also taking part in research in the area of oral health. The student must demonstrate the ability to take part in an oral health research project under the guidance of an experienced researcher and report on aspects of the research project such as the type of research, the elements of a scientific research methodology, the data collection and the statistical method(s) used in the project and the results.

## Research project 480 (RCH 480)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	6.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Human Nutrition
<b>Period of presentation</b>	Semester 1

## Radiotherapeutic dosage planning 700 (RDB 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	35.00
<b>Programmes</b>	<a href="#">BRadHons Radiation Therapy</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

#### Part 1

Target volumes determination, treatment field localisation and treatment prescription. Treatment localisation equipment and principles of image geometry. Patient positioning, marking fields, and immobilisation in radiotherapy. Use of mechanical and mathematical radiation beam modification in treatment planning and delivery. Principles of 2-Dimensional and 3-Dimensional external beam photon radiation dose planning and dose calculation. Application of standard 2-Dimensional and 3-Dimensional external radiotherapy treatment planning. Principles of electron beam planning. Treatment planning quality assurance.

#### Part 2

Brachytherapy. ICRU level-3 Radiation dose planning. Stereotactic radio-surgery and stereotactic radiotherapy. Image-based and image-guided radiotherapy. Large field irradiation with photons. Current trends in Electron Therapy, proton therapy, heavy particle therapy and neutron therapy treatment planning and delivery.

## Radiological diagnostics 800 (RDD 800)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	300.00
<b>Programmes</b>	<a href="#">MMed Radiological Diagnostics</a>
<b>Prerequisites</b>	ANP 807, ANA 808, FSG 801, MFK 800
<b>Contact time</b>	5 discussion classes per week, 5 lectures per week
<b>Language of tuition</b>	Module is presented in English

**Department** Radiology

**Period of presentation** Year

### Thesis: Radiological diagnostics 990 (RDD 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Radiological Diagnostics](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Radiopharmacology 700 (RDF 700)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [BRadHons Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

#### Module content

Radiopharmaceutical development trial processes and novel applications.

### Radiological therapy 900 (RDT 900)

**Qualification** Postgraduate

**Module credits** 1.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiation Oncology

**Period of presentation** Year

### Thesis: Radiological therapy 990 (RDT 990)

**Qualification** Postgraduate

**Module credits** 480.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiation Oncology

**Period of presentation** Year

### Radiation physics 110 (RFI 110)

**Qualification** Undergraduate

**Module credits** 10.00

**Service modules** Faculty of Health Sciences

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Year

#### Module content

Units: converting, dimensional analysis. Mechanics: momentum, force, energy, circular motion, moment of inertia, angular momentum, simple harmonic motion.

Electrostatics: Coulomb's law, electric field, potential. Direct currents: resistors, Ohm's law. Capacitors: capacitance, series, parallel energy. Magnetism: force on a moving charge, electric motor. Electromagnetic induction: Faraday's law, Lenz's Law, generators. Alternating currents: average and rms value, three phase, rectification, transformers. Electrical safety. Atomic structure: ionization, excitation.

X-rays: production, absorption.

### Radiation physics 210 (RFI 210)

**Qualification** Undergraduate

**Module credits** 10.00

**Service modules** Faculty of Health Sciences

**Prerequisites** RFI 110, MTL 180, RAN 100, FSG 161, FSG 162, RAW 182 and RAW 180

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Semester 1

#### Module content

X-ray generator: transformer, energy losses, rectifiers, capacitor-discharge systems, kVp and mA control, high voltage cables. Image intensifiers: design, brightness gain, coupling systems. TV camera and monitor: design, video signal, scanning. Image quality. Optics: reflection, refraction, total internal reflection, mirrors, lenses, thin lens formula, lens aberrations, fibre optics, lasers, laser camera. Computers: basic hardware, digital principles and terminology, data storage.

### Radiation physics 211 (RFI 211)

**Qualification** Undergraduate

<b>Module credits</b>	10.00
<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	RFI 110, RAW 180, RAN 100, FSG 161, FSG 162, RAW 182 and MTL 180
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physics
<b>Period of presentation</b>	Semester 2

### Module content

Radio-active decay: half-life, alfa decay, beta decay, gamma decay. Production of isotopes cyclotron, nuclear reactor, Van de Graaff accelerator. Absorption: nucleons, alfa particles, beta particles. Dosimetry: exposure, absorbed dose, equivalent dose, effective dose, dose limits. Radiation detectors: Geiger counter, scintillation counter, thermoluminescent detector, semi-conductor detectors. Radiopharmaceuticals. Biological effects: genetic and somatic effects.

## Radiation physics 310 (RFI 310)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	10.00
<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	FSG 251, RFI 210, RAW 281, RBG 281, RAN 280, RAW 282, FSG 252, FSG 262, RAW 284 and RFI 211
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physics
<b>Period of presentation</b>	Semester 1

### Module content

Computed tomography: CT generations. Equipment: x-ray tube, collimators, detectors. Image reconstruction: fundamental equations, algorithms.

Image properties: field size, image matrix, voxel, pixel, CT number, window width and height. Image quality: spatial resolution, contrast resolution, quantum mottle, spatial uniformity and frequency. Image processing: edge enhancement, pixel shifting and subtraction. Digital radiography: X-ray, equipment, analogue to digital conversion, linear and logarithmic subtraction, image noise. Ultrasound: theory, transducers, piezo-electric crystals, resonant frequency, interaction with matter, acoustic impedance, Doppler techniques. Magnetic resonance: medical applications.

## Radiation therapy 801 (RGT 801)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography

**Period of presentation** Year

## Research methodology for healthcare sciences 300 (RHC 300)

**Qualification** Undergraduate

**Module credits** 30.00

**Programmes**  
BA Audiology  
BA Speech-Language Pathology  
BDietetics  
BNurs  
BOccTher  
BPhysio  
BRad in Diagnostics

**Service modules** Faculty of Humanities

**Prerequisites** IHL 110, IHL 121/2/3/4; (ELH 121 and 122); AIM 111 or 101 (These prerequisites are not applicable to Audiology and Speech-Language Pathology students)

**Contact time** 2 lectures per week, 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Module content

Concepts of research; research process; research studies appraisal; planning and developing literature review; developing research idea and research question; research principles in designing research proposal; research proposal writing.

## Research in healthcare sciences 400 (RHC 400)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes**  
BDietetics  
BNurs  
BOccTher  
BPhysio  
BRad in Diagnostics

**Prerequisites** RHC 300

**Contact time** 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Module content

Conducting process of obtaining ethics clearance, data collection, data analysis, research report writing.

## Research in healthcare sciences 480 (RHC 480)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiotherapy
<b>Period of presentation</b>	Semester 1

### Module content

Research in healthcare sciences:

- Understanding the importance of evidence-based clinical practice.
- Understanding the research process and general approaches to research.
- Knowledge of the methodologies commonly used in healthcare sciences.
- Reading and critiquing published research.
- Writing a literature review.
- Understanding and respecting research ethics and the criteria for good quality research.

## Research methodology 710 (RHC 710)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	12.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

Introduction to evidence-informed practice, quantitative research, qualitative research and mixed methods research.

## Research application in specialisation 711 (RHC 711)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	8.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Nursing Science
<b>Period of presentation</b>	Semester 1

### Module content

Application of research in clinical nursing science.

### Research application in specialisation 721 (RHC 721)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 2 practicals per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Application of research to enhance evidence-informed nursing practice.

### Clinical haematology for medical subspecialties Part 1 801 (RHE 801)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Clinical Haematology \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 18 Months

**Language of tuition** Module is presented in English

**Department** Internal Medicine

**Period of presentation** Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

### Endocrinology for medical subspecialties Part 1 802 (RHE 802)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Endocrinology and Metabolism \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Internal Medicine

**Period of presentation** Year

## Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

### Infectious diseases for medical subspecialities Part 1 803 (RHE 803)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Programmes</b>	<a href="#">MPhil Infectious Diseases (Coursework)</a>
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

## Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za)

### Medical gastroenterology for medical subspecialities Part 1 804 (RHE 804)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Programmes</b>	<a href="#">MPhil Medical Gastroenterology (Coursework)</a>
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

## Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

### Nephrology for medical subspecialities Part 1 805 (RHE 805)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	120.00
<b>Programmes</b>	<a href="#">MPhil Nephrology (Coursework)</a>
<b>Prerequisites</b>	Relevant base speciality registration with HPCSA
<b>Contact time</b>	24 months
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine

**Period of presentation** Year

**Module content**

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za)

**Pulmonology for medical subspecialities Part 1 806 (RHE 806)**

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Pulmonology \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Internal Medicine

**Period of presentation** Year

**Module content**

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

**Rheumatology for medical subspecialities Part 1 807 (RHE 807)**

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Rheumatology \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Internal Medicine

**Period of presentation** Year

**Module content**

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

**Ethics and jurisprudence 700 (RLE 700)**

**Qualification** Postgraduate

**Module credits** 30.00

## Programmes

PGDip Dentistry Aesthetic Dentistry  
PGDip Dentistry Community Dentistry  
PGDip Dentistry Dental Materials  
PGDip Dentistry Endodontics  
PGDip Dentistry Forensic Odontology  
PGDip Dentistry Implantology  
PGDip Dentistry Oral Medicine  
PGDip Dentistry Oral Microbiology  
PGDip Dentistry Oral Pathology  
PGDip Dentistry Oral Surgery  
PGDip Dentistry Orthodontics  
PGDip Dentistry Pedodontics  
PGDip Dentistry Periodontology  
PGDip Dentistry Practice Management  
PGDip Dentistry Preventive Dentistry  
PGDip Dentistry Prosthetics  
PGDip Dentistry Prosthodontics  
PGDip Dentistry Radiography  
PGDip Dentistry Restorative Dentistry

**Prerequisites** A minimum of one year practice experience

**Language of tuition** Module is presented in English

**Department** Dental Management Sciences

**Period of presentation** Semester 1

## Module content

To be a good healthcare practitioner requires a life-long commitment to sound professional and ethical practices and an overriding dedication to the interests of fellow human beings and society. The term "profession" means "a dedication, promise or commitment publicly made". Practice as a healthcare professional is based on a relationship of mutual trust between patients and healthcare practitioners. In the course of their professional work healthcare practitioners are required to subscribe to certain rules of conduct. To this end the Health Professionals Council of South Africa (HPCSA) has formulated a set of rules regarding professional conduct against which complaints of professional misconduct will be evaluated. These rules are presented in the basic subject, Ethics and jurisprudence.

## Ethics and jurisprudence 710 (RLE 710)

**Qualification** Postgraduate

**Module credits** 30.00

**Prerequisites** A minimum of one year practice experience

**Contact time** determined by Head of Department

**Language of tuition** Module is presented in English

**Department** Dental Management Sciences

**Period of presentation** Semester 1

## Module content

To be a good healthcare practitioner requires a life-long commitment to sound professional and ethical practices and an overriding dedication to the interests of fellow human beings and society. The term "profession" means "a dedication, promise or commitment publicly made". Practice as a healthcare professional is based on a relationship of mutual trust between patients and healthcare practitioners. In the course of their professional work healthcare practitioners are required to subscribe to certain rules of conduct. To this end the Health Professionals Council of South Africa (HPCSA) has formulated a set of rules regarding professional conduct against which complaints of professional misconduct will be evaluated. These rules are presented in the basic subject, Ethics and jurisprudence.

## Management and leadership 400 (RML 400)

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** [B Rad in Diagnostics](#)

**Prerequisites** IHL 310

**Contact time** 1 discussion class per week, 1 lecture per week, 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Comprehensive quality management for the radiation Science including diagnostic radiography and relevant modalities e.g., mammography, digital imaging, CT, and MRI. Advanced concepts, current quality management theory, accreditation, and audit documentation are covered. Basic principles and practices necessary for effective supervision and leadership in a health care environment. Inter-disciplinary teamwork principles and practice pertinent to radiography. Principles and practices in human resource management in health care settings. Risk management. Management of change and transformation. Ethical and legal issues influence on practice and the environment. Defining advanced practitioner role; participation within professional bodies; Methods to assess professional outcomes; Customer satisfaction survey components; Process and procedures for continuous professional development. Novel working practices Reflective practitioner in radiography; Professional role within the community and responsibilities to the community. Establishing own private practice in diagnostic radiography.

## Introduction to radiation therapy, nuclear medicine and radiobiology 200 (RNR 200)

**Qualification** Undergraduate

**Module credits** 9.00

**Programmes** [B Rad in Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

- a. Introduction to radiation therapy: Radiation therapy services organisation. The radiation therapist – Scope of practice; Practice Standards. Cancer management – Cancer incidence; epidemiology and etiological studies; Detection and diagnosis; Prevention. Treatment – Radiation oncology; Surgical oncology; Medical oncology; Immunotherapy; Complementary and alternative medicine. Radiation treatment modalities; Identification and application of radiation therapy equipment and accessories. Key terms related to external beam radiation equipment. Key terms related to radiation dose to be delivered. Radiation beam positioning terms; Patient positioning. Common radiation effects on normal tissue.
- b. Introduction to nuclear medicine: Role of Nuclear Medicine in medical diagnosis and treatment. Principles of nuclear physics and nuclear medicine, nuclear instrumentation, radio chemical pharmacology. Basic approach to clinical nuclear medicine and relevant techniques.
- c. Introduction to radiobiology: • basic background to the field of radiobiology the interaction of different radiation types with the molecules and organelles of the mammalian cell; biological interaction of different radiation types with the cellular dynamics; biological effect of radiation on organs of the body and the whole body; clinical radiobiology in diagnostic radiography.

## Research and professional development 380 (RPD 380)

**Qualification** Undergraduate

**Module credits** 20.00

**Prerequisites** FSG 251, FSG 252, FSG 261, FSG 262, AKU 200, ART 282, ART 284, RPD 200, ART 281, ART 283

**Contact time** 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** Occupational Therapy

**Period of presentation** Quarter 3

### Module content

Development, submission and approval of an occupational therapy related research protocol. Continued study of occupational therapy professional ethics and management. Elective fieldwork to promote professional development.

## Radiation physics 100 (RPH 100)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [B Rad in Diagnostics](#)

**Prerequisites** No prerequisites.

**Contact time** 1 tutorial per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Year

### Module content

**Units:** standards, conversion, dimensional analysis.

**Mechanics:** simple harmonic motion, rotation, sound wave propagation.

**Electricity:** electrostatics, electrodynamics.

**Electromagnetism:** induction, alternating currents, safety.

**Atomic physics:** atomic models and quantum phenomena, X-rays, particle-wave duality.

## Radiation physics 200 (RPH 200)

**Qualification** Undergraduate

**Module credits** 20.00

**Programmes** [BRad in Diagnostics](#)

**Prerequisites** RPH 100

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Physics

**Period of presentation** Year

### Module content

**X-ray generation:** atomic physics, thermodynamics, X-ray tubes, linear accelerators.

**Image formation and recording:** optics, image intensifiers, solid state physics, digital imaging display and storage systems, image quality and patient dose.

**Radioactivity:** nuclear nomenclature, half-life, activity, decay modes and nuclear processes, nuclide chart and decay.

**Production of radioisotopes:** Nuclear reactions, production facilities (cyclotrons, reactors, and accelerators).

**Interactions of ionising radiation with matter:** charged particles, neutrons, photons, attenuation coefficients, photo-electric Compton contribution.

**Radiation Detection:** detectors (Geiger, scintillation, TLD, semiconductor, ionisation chamber), counting (spectroscopy, efficiency, statistics), protection.

**Dosimetry:** units, exposure, dose, absorbed dose, equivalent dose, effective dose, dose limits.

## Radiation physics 300 (RPH 300)

**Qualification** Undergraduate

**Module credits** 10.00

**Programmes** [BRad in Diagnostics](#)

**Prerequisites** RPH 200

---

<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physics
<b>Period of presentation</b>	Semester 1

#### Module content

**Digital radiography:** data acquisition (equipment, detectors, analogue to digital conversion), image properties, image matrix, bit depth, file formats, data compression. Image processing (filters, frequency, spatial, Fourier transform), contrast adjustment (histogram equalisation, gamma-, linear and logarithmic adjustment), edge enhancement (pixel shifting, subtraction). Image quality (noise, resolution).

**Computed tomography:** technological developments in construction and design. Data acquisition (parameters, field size). Image reconstruction (fundamental equations and algorithms). Image processing (CT number, window width, window height). Image quality (resolution, quantum mottle, spatial uniformity, frequency modulation transfer function).

**Magnetic resonance imaging:** principles (spin angular momentum, torque, precession, magnetic moment, spin orientation, Larmor frequency), acquisition (RF pulses, magnetic field gradient, superconductivity, spin echo sequence, weighted images).

### Diagnostic radiographic science 100 (RSC 100)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">BRad in Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 tutorial per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

## Module content

Introduction: Discovery of x-rays, processing principles, handling of x-ray equipment. x-ray beam: production of x-rays, attenuation.

Properties of X Rays: importance and influence of Bremsstrahlung and Characteristic radiation on Imaging and Dose, Electron Energy, Target Material, Influence of Filtration. X-Ray Projection Imaging Concepts: Geometry, Radiographic Contrast, Scatter and Scatter Reduction (Control of scatter radiation: production of scatter, effect of scattered radiation on the image, beam restriction devices, grids and grid efficiency), Artefacts and Image Degradation.

Radiographic Detectors: Intensifying Screen and Film (, cassettes, intensifying screens, efficiency of rare earth intensifying screens and x-ray film construction), Computed Radiography (CR), Direct Digital Radiography (DDR), Indirect Digital Radiography (IDR).

Principles of conventional and digital radiography image optimisation – Primary exposure factors: mAs, kVp and SID. AEC.(factor which influence the production and recording of images); Principles of technique charts  
Conventional Image processing: darkrooms Image Representations: Contrast, Spatial Resolution, Noise, Temporal Resolution, Sampling and Quantization

Introduction to quality assurance in radiographic imaging. Introduction to radiation protection for patient, personnel and public- radiation units, detection and measurement, radiation dose equipment and area survey. Regulations and operation of radiation equipment. Introduction to digital imaging system.

## Diagnostic radiographic science 200 (RSC 200)

**Qualification** Undergraduate

**Module credits** 15.00

**Programmes** [BRad in Diagnostics](#)

**Prerequisites** RPH 100, RSC 100

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Film evaluation. Application of technique factors, compiling of technique charts. Films, film technology, image formation and sensitometric properties. Processing, monitoring the processor and processing area. Darkroom, design and chemicals.

Digital image manipulation: Pre-Processing, Segmentation, Grayscale Processing, Frequency Processing, Reconstruction, Three-Dimensional Representations, Image Fusion/Registration, Computer-Aided Detection (CAD) and Diagnosis

Display technologies: Hard-Copy Printers, Film, Cathode Ray Tube (CRT), Liquid Crystal Display (LCD), Other Displays (e.g., Plasma, Projection)

Viewing Conditions: Viewing Distance, Image and Pixel Size, Workstation Ergonomics, Adaptation and Masking, Ambient Lighting and Illumination. Quality assurance of conventional, computed and digital radiography systems. Hospital integrated computer patient and imaging system and principles of system management in terms of information capture, display, storage and distribution.

## Diagnostic radiographic science 300 (RSC 300)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	<a href="#">B Rad in Diagnostics</a>
<b>Prerequisites</b>	RSC 200; RPH 200
<b>Contact time</b>	1 discussion class per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

### Module content

**Informatics:** Basic Computer Terminology, Integrating Healthcare Enterprise (IHE), PACS, Radiology Information System (RIS), Hospital Information System (HIS), Electronic Medical Record (EMR), Health Level 7 (HL7) Networks. Film digitisers.

**Storage:** Hardware, Storage Requirements, Disaster Recovery. DICOM: Modality Worklist, Image and Non-Image Objects, Components and Terminology, DICOM Conformance.

**Data Compression:** Clinical Impact, Lossy, Lossless, Image and Video Formats.

**Security and Privacy:** Encryption, Firewalls. Contrast media used in 2-D and 3-D imaging procedures (including MRI), overview of chemical make-up and physical properties of contrast agents, patient risk factors, pre-medication strategies, indicators/symptoms of patient reactions, care and treatment of reactions to contrast agents. Image quality optimisation in CT, Artefacts, factors affecting patient dose. Intervention Radiography (including digital subtraction angiography),

Mammography, Bone densitometry. Application of MRI imaging of musculo-skeletal and central nervous system in terms of image contrast and factors affecting image formation and pulse sequence.

Introduction to Quality assurance and quality control in CT, Intervention Radiography (including Digital subtraction angiography), Mammography, Bone densitometry and MRI. The preparation of patients for contrast media radiographic investigations, technical imaging procedures, and needle placements.

## Dissertation: Diagnostics 890 (RSD 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MRad Diagnostics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiography
<b>Period of presentation</b>	Year

## Research report: Radiography 700 (RSK 700)

<b>Qualification</b>	Postgraduate
----------------------	--------------

**Module credits** 30.00

**Programmes** [BRadHons Diagnostics](#)  
[BRadHons Nuclear Medicine](#)  
[BRadHons Radiation Therapy](#)

**Prerequisites** No prerequisites.

**Contact time** as scheduled with study leader

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Continuation of the research process which includes the implementation of the approved research protocol and writing up a research essay of the completed research project.

## Radiation therapy 700 (RSZ 700)

**Qualification** Postgraduate

**Module credits** 30.00

**Programmes** [BRadHons Radiation Therapy](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Basic management principles. Management of radiation oncology service, department and unit. Total quality management in radiation therapy. Brachytherapy. Treatment field conformation and treatment dose conformation in radiotherapy treatment delivery. Large field irradiation with photons and superficial photon therapy. Intra-operative radiation therapy.

## Radiation therapy 701 (RSZ 701)

**Qualification** Postgraduate

**Module credits** 35.00

**Programmes** [BRadHons Radiation Therapy](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

### Part 1:

Clinical ethics and patient care and support in radiotherapy. Medico-legal aspects in radiation therapy. Radiotherapy assessment, patient care and support for patients receiving radiation therapy for tumours of the oral cavity, digestive tract, respiratory system, urinary system, nervous system, reproductive system, skin and blood. Management of patients receiving radiotherapy with co-existing medical conditions of anaemia, infection, ascites, pleural effusion, pain and neutropenia. Care of patients with tracheostomy, mastectomy, amputations and dental care. Radiobiological principles and concepts that underpin the interaction of radiation with cells, tissues, whole body. Tumour kinetics and tumour response to radiation. Carcinogenesis. Tumour micro-environment. Fractionation. Normal tissue responses of skin, oral mucosa, salivary glands, bone marrow, bone, cartilage, lung, kidney, testis, central nervous system and peripheral nervous tissue. Radiation effects on developing embryo. Hyperthermia. Basic principles of application of superficial x-ray, megavoltage x-ray, electron, neutron therapy, proton therapy, brachytherapy, intensity modulated radiotherapy and intra-operative radiotherapy. Basic radiotherapy treatment techniques in the treatment of malignant tumours of gynaecological, head and neck, skin, breast, genitourinary, gastrointestinal, lymphomas, leukemias, lung, mediastinum, bone, soft tissue, central nervous system and paediatric tumours. Radiotherapy treatment techniques for non-malignant tumours. Cancer biology and pathology. Epidemiology, prevention, early diagnosis and education. General principles in oncological management of the patient. Oncological principles related to the treatment of malignant tumours of different anatomical regions. Radiation oncology principles related to management of benign tumours, non-malignant medical conditions and oncological emergencies.

### Part 2:

Basic management principles. Quality management. Brachytherapy. Treatment field conformation and treatment dose conformation in radiotherapy treatment delivery. Large field irradiation with photons and superficial photon therapy.

## Dissertation: Radiation therapy 890 (RSZ 890)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MRad Radiation Therapy](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Sports anatomy 880 (SAN 880)

**Qualification** Postgraduate

**Module credits** 12.00

**Programmes** [MSc Sports Medicine \(Coursework\)](#)

<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Anatomy
<b>Period of presentation</b>	Semester 1

### Cell biology 700 (SBI 700)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	100.00
<b>Programmes</b>	<a href="#">BScHons Cell Biology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

#### Module content

This module includes 30 research credits.

### Dissertation: Cell biology 890 (SBI 890)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	180.00
<b>Programmes</b>	<a href="#">MSc Cell Biology</a>
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Physiology
<b>Period of presentation</b>	Year

### Communication in health 770 (SCC 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

Development and implementation of a health communication programme, eg a radio discussion on a current health topic.

### Communication in health 771 (SCC 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Contact time</b>	1 practical per week, 16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

Development and implementation of a health communication programme, eg a radio discussion on a current health topic.

### Communication in health 871 (SCC 871)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Service modules</b>	Faculty of Veterinary Science
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 practical per week, 16 lectures per week, 4 discussion classes per week, 4 seminars per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Communication in health 873 (SCC 873)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a>
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

### Social determinants of health 710 (SCM 710)

<b>Qualification</b>	UPOnline
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">PGDip in Public Health (UPOnline)</a>
<b>Prerequisites</b>	PHM 710
<b>Contact time</b>	Fully online

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** UPOne Short Intake

### Module content

A range of factors that influence health from a social, environmental and economic basis; analysis of the determinants of health problems and related behaviours, their effect on the individual, community and the broader society. Health promotion approaches, strategies and actions to address social determinants. Planning, implementation and evaluation of public health interventions to address social determinants of health.

## Social determinants of health and primary healthcare 770 (SCM 770)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** No prerequisites.

**Contact time** 1 practical per week, 16 lectures per week, 4 discussion classes per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Module content

Primary Healthcare (PHC) approach: Philosophical basis and policy concept.

Health problem analysis.

Social and economic determinants of health.

Millennium Development Goals (MDG's) and health.

Elements of comprehensive primary health care.

Principles of the district health system.

Intersectoral collaboration in health development.

Community-oriented PHC.

## Human resource management and industrial sociology 771 (SCM 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Social determinants of health and primary healthcare 772 (SCM 772)

---

<b>Qualification</b>	Postgraduate

### Social determinants of health and primary health care 880 (SCM 880)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Programmes</b>	<a href="#">MPH</a>
<b>Prerequisites</b>	No prerequisite.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

The social determinants of health and primary health care including the declaration of Alma Ata. The principles of health promotion including the Ottawa Charter. Applied demographic principles including migration and health, and social aspects of human sexual and reproductive health. Nutrition and school health programmes.

### Health promotion 770 (SCP 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Contact time</b>	16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

#### Module content

Overview of key milestones and development in health promotion theory and practice, principles and strategies of health promotion; main social and behavioural theories relevant to health promotion; health promotion main models and health promotion programme planning.

### Health promotion 771 (SCP 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Module content

Overview of key milestones and development in health promotion theory and practice, principles and strategies of health promotion; main social and behavioural theories relevant to health promotion; health promotion main models and health promotion programme planning.

### Health promotion in practice 772 (SCP 772)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** SCP 770

**Contact time** 16 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

#### Module content

Practice training in health promotion settings including schools, health facilities, early childhood centres, etc.

### Health promotion in practice 773 (SCP 773)

**Qualification** Postgraduate

**Module credits** 5.00

**Prerequisites** SCP 771

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

#### Module content

Practice training in health promotion settings including schools, health facilities, early childhood centres, etc.

### Health promotion 870 (SCP 870)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** MPH

**Prerequisites** No prerequisites.

**Contact time** 16 lectures per week

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Health promotion in practice 872 (SCP 872)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	10.00
<b>Prerequisites</b>	SCP 870
<b>Contact time</b>	16 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	School of Health System and Public Health
<b>Period of presentation</b>	Year

## Sepedi for beginners 110 (SEP 110)

<b>Qualification</b>	Undergraduate

<b>Language of tuition</b>	Module is presented in English
----------------------------	--------------------------------

<b>Department</b>	African Languages
-------------------	-------------------

<b>Period of presentation</b>	Semester 1 and Semester 2
-------------------------------	---------------------------

## Module content

\*For absolute beginners only.

\*Only students from the School of Healthcare Sciences and Speech-Language Pathology and Audiology may take this module during semester 2. All other students must take this module during semester 1. Also note that students from the School of Healthcare Sciences, who already possess the language skills taught in this module, may write an exemption examination.

The acquisition of basic Sepedi communicative skills with emphasis on everyday expressions and suitable high frequency vocabulary, within specific social situations.

## Radiation physics and instrumentation for nuclear medicine 700 (SFI 700)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BRadHons Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Basic concepts of radiation physics, radioactive decay, radionuclide production, interaction with matter, radiation detectors and counting systems. Problems in radiation detection. The gamma camera: performance, image quality, quality control. Digital computers in nuclear medicine. SPECT principles, cameras, quality. PET principles, cameras, quality. Radiation dosimetry and biology. Radiation protection and safety.

## Strategic financial management in health 770 (SFM 770)

**Qualification** Postgraduate

**Module credits** 10.00

**Prerequisites** No prerequisites.

**Contact time** 50 hours per week

**Language of tuition** Module is presented in English

**Department** Public Health Medicine

**Period of presentation** Year

## Module content

The module will enable the participant to implement strategies which are practical and implementable in the workplace taking into consideration the complexities and challenges prudent and well thought through financial management strategies which not only addresses the current financial problems but provides for visionary thinking in its application towards a more equitable healthcare delivery system. The importance of adequate skills required for an efficient National Health Insurance will be the focus and participants will be required to develop strategic financial plans based on their workplace objectives so that practical solutions can be developed that is within budget and which are affordable.

## Strategic financial management in health 771 (SFM 771)

**Qualification** Postgraduate

**Module credits** 10.00

**Programmes** [PGDip Health Systems Management Executive Leadership](#)

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

## Module content

## Radiation physics and radiation protection 700 (SFR 700)

**Qualification** Postgraduate

**Module credits** 15.00

**Programmes** [BRadHons Radiation Therapy](#)

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

## Module content

Basic radiation physics. Interactions of X-radiation and gamma rays with matter. Radiation beam attenuation. Treatment machines for external beam radiotherapy. External photon beam and dose quantities. Photon beam measurements and calibrations and treatment dose calculations. Photon beam modification for treatment dose optimisation. Electron interaction with matter and electron therapy. Radiotherapy quality assurance of external beam units and treatment planning systems. Radiation protection and shielding and personnel monitoring. Imaging in radiation oncology. Radiation physics principles of three dimensional conformal radiation therapy and intensity modulated radiation therapy. Procedures and processes involved in Stereotactic radiotherapy and stereotactic radiosurgery. Radiation physics principles of Brachytherapy. Principles of total body irradiation. Radiation interactions in proton and neutron therapy,

## Surgical gastroenterology for medical subspecialities Part 1 801 (SGE 801)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Surgical Gastroenterology \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

**Contact time** 24 months

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Year

### Module content

Curriculum as designated by the relevant College of Medicine at [www.collegemedsa.ac.za](http://www.collegemedsa.ac.za).

## Trauma surgery for medical subspecialities Part 1 802 (SGE 802)

**Qualification** Postgraduate

**Module credits** 120.00

**Programmes** [MPhil Trauma Surgery \(Coursework\)](#)

**Prerequisites** Relevant base speciality registration with HPCSA

[BSc Human Physiology, Genetics and Psychology](#)

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Health Sciences  
Faculty of Natural and Agricultural Sciences

**Prerequisites** No prerequisites.

**Contact time** 2 discussion classes per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Psychology

**Period of presentation** Semester 1

## Module content

This module is a general orientation to Psychology. An introduction is given to various theoretical approaches in Psychology, and the development of Psychology as a science is discussed. Selected themes from everyday life are explored and integrated with psychological principles. This module focuses on major personality theories. An introduction is given to various paradigmatic approaches in Psychology.

## Psychology 120 (SLK 120)

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** BA  
BA Audiology  
BA Extended programme  
BA Fine Arts  
BA Languages  
BA Law  
BA Speech-Language Pathology  
BEd Senior Phase and Further Education and Training Teaching  
BIS Information Science

BSc Extended programme - Biological and Agricultural Sciences  
BSc Human Physiology, Genetics and Psychology

**Service modules** Faculty of Engineering, Built Environment and Information Technology  
Faculty of Education  
Faculty of Health Sciences  
Faculty of Natural and Agricultural Sciences

**Prerequisites** No prerequisites.

**Contact time** 2 discussion classes per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Psychology

**Period of presentation** Semester 2

## Module content

This module introduces the student to a basic knowledge and understanding of the biological basis of human behaviour. The module addresses the key concepts and terminology related to the biological subsystem, the rules and principles guiding biological psychology, and identification of the interrelatedness of different biological systems and subsystems. In this module various cognitive processes are studied, including perception, memory, thinking, intelligence and creativity. Illustrations are given of various thinking processes, such as problem solving, critical, analytic and integrative thinking.

## Psychology 210 (SLK 210)

**Qualification** Undergraduate

**Module credits** 20.00

<b>Programmes</b>	BA BA Audiology BA Languages BA Law BA Speech-Language Pathology BOccTher BPhysio BSW BSc Human Physiology, Genetics and Psychology

### Module content

In this module human development from conception through adolescence to adulthood is discussed with reference to various psychological theories. Incorporated are the developmental changes related to cognitive, physical, emotional and social functioning of the individual and the context of work in adulthood. Traditional and contemporary theories of human development explaining and describing these stages are studied in order to address the key issues related to both childhood and adulthood.

<b>Department</b>	Psychology
-------------------	------------

**Period of presentation** Semester 2

**Module content**

This module is a social-psychological perspective on interpersonal and group processes. Themes that are covered include communication, pro-social behaviour, social influence and persuasion, political transformation, violence, and group behaviour.

**Fundamental physiology 110 (SMC 110)**

**Qualification** Undergraduate

**Module credits** 12.00

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 1

**Module content**

\*Closed – requires departmental selection The cell, bioenergy, muscle contraction, and respiration.

**Fundamental anatomy 155 (SMC 155)**

**Qualification** Undergraduate

**Module credits** 6.00

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Quarter 2

**Module content**

\*Closed – requires departmental selection

Orientation and terminology, osseous tissue and skeletal structure, axial skeleton, appendicular skeleton, articulations, and cardiorespiratory system.

**Fundamental physiology 156 (SMC 156)**

**Qualification** Undergraduate

**Module credits** 6.00

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Quarter 3

### Module content

\*Closed – requires departmental selection

The cell, bio-energy, muscle contraction, and respiration.

### Fundamental biomechanics 157 (SMC 157)

**Qualification** Undergraduate

**Module credits** 6.00

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Quarter 4

### Module content

\*Closed – requires departmental selection

This module focuses on the biomechanical principles involved in human movement and sport activities. It comprises the study and analysis of the forms of human movement, linear and angular kinematics and fluid mechanics.

### Applied kinesiology (anatomy) 210 (SMC 210)

**Qualification** Undergraduate

**Module credits** 16.00

**Prerequisites** ANA 121, ANA 122

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 1

### Module content

\*Closed – requires departmental selection. Biomechanics and muscle anatomy, classes of levers, structural kinesiology, central nervous system, and peripheral nervous system.

### Applied biomechanics 211 (SMC 211)

**Qualification** Undergraduate

**Module credits** 16.00

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 1

### Module content

\*Closed – requires departmental selection. This module focuses on the biomechanical principles involved in human movement and sports activities. It comprises the study and analysis of linear and angular kinetics and the understanding of the biomechanical principles underlying the skeletal system and joints.

### Exercise physiology I 212 (SMC 212)

**Qualification** Undergraduate

**Module credits** 14.00

**Programmes** [BSportSci](#)

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 1

### Module content

\*Closed – requires departmental selection

Homeostasis, thermoregulation, bone and connective tissue adaptations, muscle adaptations, and muscle force development.

### Biomechanics I 213 (SMC 213)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes** [BSportSci](#)

**Contact time** 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 1

### Module content

\*Closed – requires departmental selection

This module focuses on the biomechanical principles involved in human movement and sports activities. It comprises primarily of the study of linear and angular kinematics and kinetics of human motion and introduces the student to various applications and measurement techniques used in biomechanics.

### Human anatomy II 214 (SMC 214)

**Qualification** Undergraduate

**Module credits** 16.00

**Programmes** [BSportSci](#)

**Prerequisites** ANA 123

---

<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

#### Module content

\*Closed – requires departmental selection

This module builds on the knowledge attained in ANA 123 and involves comprehensive study of the muscular system (origin, insertion, action and nerve supply of the muscles of the human body) and the nervous system.

### Applied physiology (exercise) 220 (SMC 220)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Prerequisites</b>	SMC 110
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

#### Module content

\*Closed – requires departmental selection. Acid-base balance, thermoregulation, hypo and hyperbaria, exercise metabolism, factors affecting performance.

### Exercise physiology II 221 (SMC 221)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	14.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Prerequisites</b>	SMC 212
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

#### Module content

\*Closed – requires departmental selection

Exercise metabolism, cardiovascular adaptations, respiratory adaptations, and water, electrolyte and acid-base balance responses to exercise.

## Exercise physiology III 320 (SMC 320)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	20.00
<b>Programmes</b>	<a href="#">BSportSci</a>
<b>Prerequisites</b>	SMC 221
<b>Contact time</b>	1 tutorial per week, 2 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 2

### Module content

\*Closed – requires departmental selection.

Allostasis, energy dynamics, fatigue, immune system considerations, muscle hypertrophy, DOMS, NSAIDs, environmental physiology.

## Strategic marketing (and communication) in health 770 (SMH 770)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	50 hours per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Public Health Medicine
<b>Period of presentation</b>	Year

### Module content

The module will enable the participant to create a messaging strategy that can be used in all marketing materials. To develop a marketing programme appropriate for the target audience using the most effective possibilities such as public relations, advertising, website (and other internet platforms), promotional seminars, conferences and trade booth opportunities, downloadable materials, direct marketing (offline and online), packaging, event sponsorships and merchandising promotions. The participant will be taught the skills to develop a communications programme that complements the marketing programme and provides timely and comprehensive internal, external and strategic communications initiatives in an integrated approach. One of the key issues will be the level of the health message and whether it makes an impact on the improvement of uptake of healthcare services.

## Strategic marketing (and communication) in health 771 (SMH 771)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	5.00
<b>Programmes</b>	<a href="#">PGDip Health Systems Management Executive Leadership</a>

**Language of tuition** Module is presented in English

**Department** School of Health System and Public Health

**Period of presentation** Year

### Module content

The module will enable the participant to create a messaging strategy that can be used in all marketing materials. ### Special study module 120 (SMO 120)

**Qualification** Undergraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

### Special study module 121 (SMO 121)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Anatomy

**Period of presentation** Semester 2

### Special study module 211 (SMO 211)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** CMY 151, FIL 155, MGW 112, MLB 111, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128

**Language of tuition** Module is presented in English

**Department** Physiology

**Period of presentation** Semester 1

### Special study module 281 (SMO 281)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** CMY 151, FIL 155, MGW 112, PHY 131, MTL 180, GNK 120, BOK 121, GNK 127, GNK 128, SMO 121

**Language of tuition** Module is presented in English

**Department** Anatomical Pathology

**Period of presentation** Semester 2

### Special study module 311 (SMO 311)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Internal Medicine

**Period of presentation** Semester 1

### Special study module 380 (SMO 380)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Surgery

**Period of presentation** Semester 1

### Special study module 382 (SMO 382)

**Qualification** Undergraduate

**Module credits** 5.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Semester 1

### Special study module 411 (SMO 411)

**Qualification** Undergraduate

**Module credits** 2.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Obstetrics and Gynaecology

**Period of presentation** Semester 2

### Special study module 511 (SMO 511)

**Qualification** Undergraduate

**Module credits** 2.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Psychiatry

**Period of presentation** Semester 1

### Special study module 512 (SMO 512)

**Qualification** Undergraduate

**Module credits** 2.00

**Programmes** [MBChB](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Family Medicine

**Period of presentation** Semester 1

### Event management and entrepreneurship 210 (SMS 210)

**Qualification** Undergraduate

**Module credits** 16.00

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Biokinetics and Sports Science

**Period of presentation** Semester 2

**Module content**

\*Closed – requires departmental selection. Planning, organising, logistics and management of events, and also the effect of events.

**Event and facility management 211 (SMS 211)**

**Qualification** Undergraduate

**Module credits** 12.00

**Programmes** [BSportSci](#)

**Contact time** 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Sport and Leisure Studies

**Period of presentation** Semester 2

**Module content**

\*Closed – requires departmental selection

This module will provide the basic knowledge of management (planning, leading, organising and controlling) of sporting and health promotion events and exercise facilities.

**Systems of healthcare 254 (SOH 254)**

**Qualification** Undergraduate

**Module credits** 10.00

**Prerequisites** PHY 131, CMY 151, FSG 161, FSG 162, FTP 100, ANA 152, ANA 162

**Contact time** 1 discussion class per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Quarter 4

**Module content**

Healthcare sciences and the dimensions of healthcare.

Multidisciplinary and comprehensive healthcare delivery. Systems of healthcare delivery: local, national and international institutions and organisations in the healthcare sector. Local, national and international health policies. Demographical, biostatistical and epidemiological concepts, methods and tendencies in the planning of healthcare facilities and services. Contemporary issues in healthcare delivery and policy.

**Radiation oncology 700 (SOZ 700)**

**Qualification** Postgraduate

**Module credits** 100.00

**Programmes** [BScHons Radiation Oncology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

This module includes 30 research credits.

## Radiation oncology 800 (SOZ 800)

**Qualification** Postgraduate

**Module credits** 300.00

**Programmes** [MMed Radiation Oncology](#)

**Prerequisites** ANP 809, ANA 809, FSG 801, MFK 801, RBG 801

**Language of tuition** Module is presented in English

**Department** Radiation Oncology

**Period of presentation** Year

## Dissertation: Radiation oncology 890 (SOZ 890)

**Qualification** Postgraduate

**Module credits** 180.00

**Programmes** [MSc Radiation Oncology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiation Oncology

**Period of presentation** Year

## Thesis: Radiation oncology 990 (SOZ 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Radiation Oncology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Radiation Oncology

**Period of presentation** Year

## Foundations of recreation and sports management 110 (SRM 110)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Service modules</b>	Faculty of Economic and Management Sciences Faculty of Health Sciences
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Sport and Leisure Studies
<b>Period of presentation</b>	Semester 1

### Module content

This module is a broad introduction to sport and recreation as products in the market. Students discover the nature of sport and recreation, the difference between the concepts and policies, plans, strategies and structures of sport and recreation in South Africa and Zone VI in Africa. The dynamic scope and nature of recreation and sports management are introduced and discussed. Emphasis is placed on basic management tasks and functions in sport and recreation contexts, interpersonal skills, leadership and control systems and techniques in sport and recreation. The module establishes a foundation of management knowledge and skills on which subsequent sport and recreation management modules are built.

## Foundations of recreation and sports management 111 (SRM 111)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Contact time</b>	3 lectures per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Biokinetics and Sports Science
<b>Period of presentation</b>	Semester 1

## Comprehensive patient management 171 (TBW 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	2.00
<b>Programmes</b>	BOH

<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 other contact session per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Semester 2

### Module content

The purpose of this module is to:

- embed communication skills required during patient management; and
- facilitate an understanding of the patient's psycho-social dimensions that may influence health-related behaviour and customer demand.

## Comprehensive patient management 271 (TBW 271)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	3.00
<b>Prerequisites</b>	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Year

### Module content

The purpose of this module is to:

- Embed aspects related to occupational health and safety
- Embed communication skills required during patient management
- Develop presentation skills to address large audiences
- Facilitate an understanding of professionalism and ethical behaviour
- Embed knowledge about legal aspects that are related to dentistry
- Embed knowledge/skills in terms of administrative management and scheduling in a dental practice
- Embed psychological aspects pertaining to patient management
- Facilitate the management of a primary preventive treatment plan
- Provide primary preventive treatment in cooperation with senior BChD students

## Comprehensive patient management 272 (TBW 272)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	ELH 121, ELH 122, AIM 101, ACO 171, ANA 171, FAR 171, FLG 171, GMB 171, MDB 171, ODO 171, ORD 171, PDL 171, TBW 171, VKM 171, NHS 171

<b>Contact time</b>	1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Year

### Module content

The purpose of this module is to:

- Embed aspects related to occupational health and safety

- Facilitate the management of a primary preventive treatment plan
- Provide primary preventive treatment in cooperation with senior BChD students

## Comprehensive patient management 370 (TBW 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	18.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Year

## Module content

Holistic evaluation of a patient, the clinical hypothetic-deductive reasoning processes, diagnosis, prognosis and treatment planning. Under the guidance of a tutor, and by utilising a special “practice patient” file, the students start treating a “practice patient” comprehensively. The student compiles a portfolio, on a continuous basis, on the clinical and administrative procedures concerning the “practice patient”. The portfolio contains the student’s year mark, which is determined on a 50:50 basis, with the examination mark as the final pass mark. The examination mark is determined when the student presents the practice patient case to an audience and a panel of adjudicators.

Application of business management principles during patient management. Preparing the student for a meaningful and successful career in an increasingly complex business and health care environment. Application of certain principles and skills in terms of:

- Psychology in the dentistry practice.
- Political parameters in dentistry.
- Sociology and dentistry.
- Ethics for the dentist.
- Career possibilities.
- Management of a practice.

Additional to this, students should understand the economic, cultural, legal and regulatory environment to establish and optimise patient management.

## Comprehensive patient management 371 (TBW 371)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	3.00
<b>Prerequisites</b>	ODO 271, OFC 271, RAD 271, PDL 271, ORD 271, GAP 271, VKM 271, TBW 271
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 1 seminar, 2 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Dental Management Sciences
<b>Period of presentation</b>	Year

## Module content

The purpose of this module is to:

- Facilitate an understanding of technology management and maintenance
- Embed knowledge/skills in terms of administrative management and scheduling in a dental practice
- Facilitate an understanding of customer needs and demands
- Embed knowledge/skills regarding internal marketing in a dental practice
- Facilitate career management abilities
- Facilitate and understanding of an employee’s rights in terms of the labour law
- Facilitate an understanding of an oral hygienist’s role in the management of a dental practice
- Facilitate the management of a primary preventive treatment plan
- Provide primary preventive treatment in cooperation with senior BChD students

## Comprehensive patient management 372 (TBW 372)

---

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	BOH

<b>Period of presentation</b>	Year

## Module content

Holistic evaluation of a patient, the clinical hypothetic-deductive reasoning processes, diagnosis, prognosis and treatment planning. Under the guidance of a tutor, and by utilising a special “practice patient” file, the students start treating a “practice patient” comprehensively. The student compiles a portfolio, on a continuous basis, on the clinical and administrative procedures concerning the “practice patient”. The portfolio contains the student’s year mark, which is determined on a 50:50 basis with the examination mark as the final pass mark. The examination mark is determined when the student presents the practice patient case to an audience and a panel of adjudicators.

Application of business management principles during patient management. Preparing the student for a meaningful and successful career in an increasingly complex business and health care environment. Application of certain principles and skills in terms of:

- Psychology in the dentistry practice.
- Political parameters in dentistry.
- Sociology and dentistry.
- Ethics for the dentist.
- Career possibilities.
- Management of a practice.

Additional to this, students should understand the economic, cultural, legal and regulatory environment to establish and optimise patient management.

## Comprehensive patient management 570 (TBW 570)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Prerequisites</b>	DFA 470,GAP 470,MFP 470,ODO 470,OFC 470,PDL 470,TBW 470,PTK 470,TMZ 470
<b>Contact time</b>	1 lecture per week, 1 other contact session per week, 1 practical per week, 1 seminar

## Thesis: Dental management sciences 990 (TBW 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [PhD Dentistry](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Dentistry General

**Period of presentation** Year

## Applied surgical anatomy 710 (TCA 710)

**Qualification** Postgraduate

**Module credits** 12.00

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Maxillo Facial and Oral Surgery

**Period of presentation** Semester 1

## Thoracic surgery 800 (TCR 800)

**Qualification** Postgraduate

**Module credits** 300.00

<b>Programmes</b>	MMed Thoracic Surgery
<b>Prerequisites</b>	ANA 898, FSG 801, ANP 878, BVC 805
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

### Thesis: Thoracic surgery 990 (TCR 990)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	360.00

<b>Programmes</b>	DMed Thoracic Surgery
<b>Prerequisites</b>	No prerequisites.
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Surgery
<b>Period of presentation</b>	Year

### Applied medicine 370 (TGG 370)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	11.00
<b>Prerequisites</b>	BOK 280,(BOK 281 or (BOK 285,287)),BOK 283,GNK 286,GNK 288,GPS 280,IKT 200,SMO 211,SMO 281
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Internal Medicine
<b>Period of presentation</b>	Year

#### Module content

The purpose of this module is to enable the dentist to identify medical problems, which may have an effect on the dental treatment or may affect the patient's general health. The dentist must be able to interpret the patient's medical history, in order to modify the treatment plan accordingly to ensure a safe dental treatment and/or to refer the patient for medical or specialist care.

### Applied medicine 380 (TGG 380)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	8.00

### Theory of nuclear medicine 710 (TKG 710)

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	25.00

**Programmes** [BRadHons Nuclear Medicine](#)

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week

**Language of tuition** Module is presented in English

**Department** Radiography

**Period of presentation** Year

### Module content

Revision of relevant anatomy, physiology and pathology. Procedures of musculoskeletal, endocrine, respiratory, genito-urinary, gastro-intestinal, hepatobiliary, cardiovascular, central nervous systems. Infection and SPECT imaging. Procedures including lymphatics, venograms, ciliary clearance, dacryoscintigraphy. Non-imaging procedures. Radio-immunoassays: History, basic principles, antibody production. Monoclonal antibodies. Radioimmunoscintigraphy. Radiation safety. Tumour imaging and therapeutic procedures. Paediatric techniques. PET and PET/CT. Indications and contra-indications. Effects of medication on procedures. Drug intervention. Radiopharmaceuticals: methods of administration, choice, physiological pathways, patient dose, quality control. Instrumentation, collimation, settings, quality control. Patient treatment: patient preparation, instructions, route and technique of radiopharmaceutical administration. Procedures: choice of examination, patient positioning, field of view, orientation, routine views, static and dynamic imaging, SPECT imaging, modified views. Radiation effects: physical, biological and effective  $T_{1/2}$ , target organs, excretory pathways, protection. Quality control. Pattern recognition and interpretation of procedures. Problems and pitfalls. Emerging and hybrid technology and applications.

### Applied oral pathology 801 (TMP 801)

**Qualification** Postgraduate

**Module credits** 24.00

**Programmes** [MChD Community Dentistry](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

### Applied oral pathology 871 (TMP 871)

**Qualification** Postgraduate

**Module credits** 24.00

**Prerequisites** No prerequisites.

**Contact time** 1 discussion class per week, 1 seminar per week

**Language of tuition** Module is presented in English

**Department** Oral Pathology and Oral Biology

**Period of presentation** Year

## Anaesthesiology 470 (TMZ 470)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	16.00
<b>Programmes</b>	BChD
<b>Prerequisites</b>	GNK 388, MDB 370, TGG 370, FSG 370, FAR 370, RAD 370, TBW 370, ODO 370, PDL 370, DFA 370

<b>Period of presentation</b>	Semester 2

### **Final written examination 750 (ULT 750)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	1.00
<b>Prerequisites</b>	One of ULT 722, ULT 723, ULT 724, ULT 725 as well as one of ULT732, ULT733, ULT734, ULT735, and one of ULT742, ULT743, ULT744, ULT745 as well as ULT730, ULT731, ULT740
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Radiology
<b>Period of presentation</b>	Semester 2

#### **Module content**

A portfolio of the continuous written assessments completed during each module for the PGDipGUS

### **Practical examination 751 (ULT 751)**

<b>Qualification</b>	Postgraduate
<b>Module credits</b>	1.00

**Prerequisites** One of ULT 722, ULT 723, ULT 724, ULT 725 as well as one of ULT732, ULT733, ULT734, ULT735, and one of ULT742, ULT743, ULT744, ULT745 as well as ULT730, ULT731, ULT740

**Language of tuition** Module is presented in English

**Department** Radiology

**Period of presentation** Semester 2

### Module content

Clinical cases representative of all modules and elective.

## Elective module: General ultrasound 752 (ULT 752)

**Qualification** Postgraduate

**Module credits** 12.00

**Programmes** [PGDip General Ultrasound](#)

**Language of tuition** Module is presented in English

**Department** Radiology

**Period of presentation** Semester 2

## Elective module: Vascular ultrasound 753 (ULT 753)

**Qualification** Postgraduate

**Module credits** 12.00

**Programmes** [PGDip General Ultrasound](#)

**Language of tuition** Module is presented in English

**Department** Radiology

**Period of presentation** Semester 2

## Final written examination 754 (ULT 754)

**Qualification** Postgraduate

**Module credits** 0.00

**Programmes** [PGDip General Ultrasound](#)

**Prerequisites** One of ULT 726, ULT 727, ULT 728, ULT 729 as well as one of ULT 738, ULT 739, ULT 741, ULT 746, and one of ULT 748, ULT 749, ULT 752, ULT 753 as well as ULT 736, ULT 737, ULT 747

**Language of tuition** Module is presented in English

**Department** Radiology

**Period of presentation** Semester 2

## Module content

A portfolio of the continuous written assessments must be completed during each module for the PGDip (General Ultrasound).

### Practical examination 755 (ULT 755)

**Qualification** Postgraduate

**Module credits** 0.00

**Programmes** [PGDip General Ultrasound](#)

**Prerequisites** One of ULT 726, ULT 727, ULT 728, ULT 729 as well as one of ULT 738, ULT 739, ULT 741, ULT 746, and one of ULT 748, ULT 749, ULT 752, ULT 753 as well as ULT 736, ULT 737, ULT 747

**Language of tuition** Module is presented in English

**Department** Radiology

**Period of presentation** Semester 2

## Module content

Clinical cases representative of all modules and electives.

### Academic orientation 110 (UPO 110)

**Qualification** Undergraduate

**Module credits** 0.00

**Programmes** [BCMP](#)  
[BChD](#)  
[BDietetics](#)  
[BNurs](#)  
[BOH](#)  
[BOccTher](#)  
[BPhysio](#)

**Language of tuition** Module is presented in English

**Department** Health Sciences Deans Office

**Period of presentation** Year

### Urology 800 (URO 800)

**Qualification** Postgraduate

**Module credits** 300.00

**Programmes** [MMed Urology](#)

**Prerequisites** ANA 897, FSG 801, ANP 877, BVC 804

**Language of tuition** Module is presented in English

**Department** Urology

**Period of presentation** Year

### Thesis: Urology 990 (URO 990)

**Qualification** Postgraduate

**Module credits** 360.00

**Programmes** [DMed Urology](#)  
[PhD Urology](#)

**Prerequisites** No prerequisites.

**Language of tuition** Module is presented in English

**Department** Urology

**Period of presentation** Year

### Food service management 321 (VDB 321)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BConSci Hospitality Management](#)  
[BDietetics](#)  
[BSc Culinary Science](#)

**Service modules** Faculty of Health Sciences

**Prerequisites** Natural and Agricultural Sciences students: VDS 322 #

**Contact time** 1 practical per week, 3 lectures per week

**Language of tuition** Afrikaans and English are used in one class

**Department** Consumer and Food Sciences

**Period of presentation** Semester 2

#### Module content

Planning and layout of food service units for different food service systems. Equipment for food services. Factors influencing the choice and purchasing of equipment for different food service units. Hygiene and safety in food services. management in food service systems. Financial management in food services.

### Nursing dynamics 110 (VDN 110)

**Qualification** Undergraduate

**Module credits** 14.00

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 1

### Module content

Healthcare environment: structure, dynamics and impact on the clinical standards of nursing practice. National population and health profiles. Epidemiological viewpoints on health. The healthcare environment and the dynamics of healthcare services. Factors influencing contemporary health service delivery. Policies and the rendering of healthcare in South Africa. Selected healthcare practice models (including the characteristics of nursing practice). The basic principles and methodology of nursing research. Applying research to nursing practice.

Leadership principles in nursing practice.

Leadership styles and skills. Directing in the nursing unit. Principles of human resource management and development. The principles of adult teaching and learning in clinical practice. The adult learner and evaluation.

## Nursing dynamics 120 (VDN 120)

**Qualification** Undergraduate

**Module credits** 14.00

**Prerequisites** VDN 110

**Contact time** 1 other contact session per week, 2 lectures per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Semester 2

### Module content

Communication and management principles for nursing practice.

Assertiveness and interpersonal communication, team building, and managing cultural diversity and change. Written communications. Management of conflict, crisis intervention and stress management. Facilitation of health, wellness and community development.

Basic first-level management principles in nursing practice. Quality assurance and standards for nursing practice. Principles of financial planning and management. Private nursing practice.

Ethical-legal framework for nursing practice.

Professional tasks and responsibilities of registered nurses and midwives/accoucheurs. Development of the nursing profession, nursing ethos and fundamental viewpoints. Principles of professional practice. Conduct, statutory control and professional self-regulation. Human rights, the rights of patients and international perspectives on patient care. Ethics, ethical dilemmas and ethical decision-making in nursing practice.

## Basic food preparation 111 (VDS 111)

**Qualification** Undergraduate

**Module credits** 6.00

### Programmes

[BConSci Food Retail Management](#)

[BConSci Hospitality Management](#)

[BSc Culinary Science](#)

<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	0.5 practical per week, 1 discussion class per week, 1 lecture per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Consumer and Food Sciences
<b>Period of presentation</b>	Semester 1

### Module content

Module 1: Basic food preparation and food preparation techniques. Mise en place, weighing and measurement techniques, equipment and terminology as applied in food preparation. History of the foodservice industry and contemporary chefs. Basic food quality control.

Module 2: Food preparation basics of the following: stocks, soups and sauces

## Basic food preparation 121 (VDS 121)

**Qualification** Undergraduate

**Module credits** 6.00

### Programmes

[BConSci Food Retail Management](#)  
[BConSci Hospitality Management](#)  
[BSc Culinary Science](#)  
[BSc Extended programme - Biological and Agricultural Sciences](#)

<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	VDS 111
<b>Contact time</b>	1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Consumer and Food Sciences
<b>Period of presentation</b>	Semester 2

### Module content

Module 1: Principles and practices of food preparation and cooking techniques. Mise en place, weighing and measurement techniques, equipment and terminology as applied in food preparation. Basic food quality control.

Module 2: Food preparation basics of the following: starches and cereals

## Food commodities and preparation 210 (VDS 210)

**Qualification** Undergraduate

**Module credits** 18.00

### Programmes

[BConSci Food Retail Management](#)  
[BConSci Hospitality Management](#)  
[BSc Culinary Science](#)

<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	VDS 121

**Contact time** 1 practical per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Consumer and Food Sciences

**Period of presentation** Semester 1

### Module content

Module 1: The study of different food systems with regard to food preparation. Physical and chemical properties and the influence of the composition in food preparation.

Module 2: Food preparation basics of the following: soups and sauces, fruit and vegetables; salads; frozen desserts; gelatine.

Module 3: Origin and development of food habits; Factors influencing habits and choice; Dynamics of food habits.

Influence of religion on food habits. Food habits of different ethnic groups.

All modules encompass sustainable food preparation practices through the principles of waste management, including the utilising and minimization of food waste and portion control. Sustainability is addressed by the food practices of local ethnic cultures, the ingredients used by these cultures and how to utilise these ingredients and substituting ingredients with local alternatives.

## Food commodities and preparation 221 (VDS 221)

**Qualification** Undergraduate

**Module credits** 18.00

**Programmes** [BConSci Food Retail Management](#)  
[BConSci Hospitality Management](#)  
[BSc Culinary Science](#)

**Service modules** Faculty of Health Sciences

**Prerequisites** VDS 210

**Contact time** 1 practical per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Consumer and Food Sciences

**Period of presentation** Semester 2

### Module content

Module 1: The study of different food systems with regard to food preparation. Physical and chemical properties and the influence of the composition in food preparation.

Module 2: Food preparation basics of the following: meat; poultry; fish, legumes, eggs and milk, baked products (whole spectrum); leavening agents.

Module 3: The influence of culture on cuisines. Study of the cuisines of selected African, European and Eastern countries.

All modules encompass sustainable food preparation practices through the principles of waste management, including the utilising and minimization of food waste and portion control. Sustainability is addressed by the food practices of local ethnic cultures, the ingredients used by these cultures and how to utilise these ingredients and substituting ingredients with local alternatives.

## Basic food preparation and food preparation techniques 231 (VDS 231)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BDietetics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Consumer and Food Sciences
<b>Period of presentation</b>	Semester 1

### Module content

Basic food preparation and food preparation techniques.

## Food commodities and preparation 232 (VDS 232)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	12.00
<b>Programmes</b>	<a href="#">BDietetics</a>
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 discussion class per week, 1 lecture per week, 1 practical per week
<b>Language of tuition</b>	Module is presented in English

<b>Period of presentation</b>	Semester 2

### Module content

Food commodities and preparation.

## Large-scale food production and restaurant management 322 (VDS 322)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	31.00
<b>Programmes</b>	<a href="#">BConSci Hospitality Management</a> <a href="#">BSc Culinary Science</a>
<b>Service modules</b>	Faculty of Health Sciences
<b>Prerequisites</b>	VDS 210 and VDS 221
<b>Contact time</b>	3 lectures per week, 3 practicals per week
<b>Language of tuition</b>	Afrikaans and English are used in one class
<b>Department</b>	Consumer and Food Sciences
<b>Period of presentation</b>	Semester 2

## Module content

Module 1: Restaurant management. Table setting, table serving, wine service, food and wine pairing, beverage management.

Module 2: Menu planning for different food service systems and styles of food service.

Module 3: Large scale food procurement, consumption and storage.

Practical work: Principles of large-scale food preparation and the practical application thereof in a practical restaurant situation. Recipe formats and adjustment applicable to large-scale food preparation. Work scheduling and the practical exposure to the use of large scale catering equipment in a real life situation.

The UN sustainable development goals #3; 8; 9; 11 and 12 are addressed during the theory components and practical sessions. Projects are focused on identifying not only critical areas of concern but also possible mitigating strategies thus encouraging initiatives to achieve good health and well-being, responsible industry consumption, production community engagement and economic growth.

## Large-scale food production 323 (VDS 323)

**Qualification** Undergraduate

**Module credits** 19.00

**Programmes** [BDietetics](#)

**Prerequisites** VDS 231

**Contact time** 1 practical per week, 3 lectures per week

**Language of tuition** Module is presented in English

**Department** Consumer and Food Sciences

**Period of presentation** Semester 2

### Module content

Large-scale production.

## Nursing science practical work 201 (VGK 201)

**Qualification** Undergraduate

**Module credits** 50.00

**Prerequisites** No prerequisites.

**Contact time** 1 other contact session per week, 1 practical per week

**Language of tuition** Module is presented in English

**Department** Nursing Science

**Period of presentation** Year

### Module content

Practical work according to the area of specialisation.

## Advanced women's health 808 (VGK 808)

**Qualification** Postgraduate

<b>Module credits</b>	24.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	2 lectures per week, 4 discussion classes per week
<b>Language of tuition</b>	Module is presented in English

## Preventive oral health 171 (VKM 171)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	15.00
<b>Programmes</b>	BOH
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week for 15 weeks, 2 other contact sessions per week for 10 weeks, 3 discussion classes per week, 6 practicals per week for 17 weeks
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Year

### Module content

This module entails lectures and clinical work, pertaining to the scope of oral hygiene, in the pre-clinical ward. It is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of developing, implementing and evaluating a needs-driven primary and basic-secondary preventive programme for a patient.

## Preventive oral health 271 (VKM 271)

<b>Qualification</b>	Undergraduate
<b>Module credits</b>	58.00
<b>Prerequisites</b>	No prerequisites.
<b>Contact time</b>	1 lecture per week for 15 weeks, 5 practicals per week
<b>Language of tuition</b>	Module is presented in English
<b>Department</b>	Community Dentistry
<b>Period of presentation</b>	Semester 2

## Module content

This module is a continuation of Preventive Oral Health 171 and is aimed at enabling an oral hygiene student to develop his/her skills, knowledge and attitude by means of devising, implementing and evaluating a needs-driven primary and basic-secondary preventive programme for a patient. This module entails lectures and clinical work, pertaining to the scope of oral hygiene, on real patients.

### Preventive oral health 272 (VKM 272)

**Qualification** Undergraduate

**Module credits** 43.00

**Programmes** BOH

**Prerequisites** No prerequisites.

**Contact time** 1 lecture per week for 30 weeks, 6 practicals (30 week period)

**Language of tuition** Module is presented in English

**Department** Community Dentistry

**Period of presentation** Semester 2

## Module content
