

## University of Pretoria Yearbook 2016

## Biometry 210 (BME 210)

| <b>Qualification</b>     | Undergraduate                                |
|--------------------------|--|
| Faculty F                | Faculty of Economic and Management Sciences  |
| Module credits 2         | 24.00  |
| Programmes E             | BSc Biotechnology                            |
| E                        | BSc Nutrition                                |
| E                        | BScAgric Animal Science                      |
| Service modules          | Faculty of Natural and Agricultural Sciences |
| Prerequisites E          | BME 120                                      |
| Contact time 4           | 4 lectures per week, 1 practical per week    |
| Language of tuition      | English                                      |
| Academic organisation S  | Statistics                                   |
| Period of presentation S | Semester 1                                   |

## Module content

Analysis of variance: Multi-way classification. Testing of model assumptions, graphics. Multiple comparisons. Fixed, stochastic and mixed effect models. Block experiments. Estimation of effects. Experimental design: Principles of experimental design. Factorial experiments: Confounding, single degree of freedom approach, hierarchical classification. Balanced and unbalanced designs. Split-plot designs. Analysis of covariance. Computer literacy: Writing and interpretation of computer programmes. Report writing.

The information published here is subject to change and may be amended after the publication of this information. The **General Regulations (G Regulations)** apply to all faculties of the University of Pretoria. It is expected of students to familiarise themselves well with these regulations as well as with the information contained in the **General Rules** section. Ignorance concerning these regulations and rules will not be accepted as an excuse for any transgression.
